Names and Portraits of Birds

Which Interest Gunners; with descriptions in language understood of the people.

BY G. TRUMBULL.

Contains the local names in popular use, and eighty-nine illustrations, which, with the clear descriptions in the text, will enable any man who can read to identify the contents of his game bag.

OPINIONS OF THE PRESS:

It is the first, so far as we know, of a class of books of which the need is felt in every department of natural history.—Troy Press.

To all dwellers by the water and in the country and especially all who shoot, the book will supply a great need, and every one who is interested in birds will be interested in it.—Boston Evening Traveller.

The book should find its way to a choice place in every sportsman's library.—Chicago Inter-Ocean.

There is a delightful dearth of dead languages in this book. The sportsman who looks between the covers for a description of some game bird—a description which will enable him to identify the creature should he meet it in the woods or on the water—is not compelled to shut the book, drop a bad word or two upon it and go in search of some Greek and Latin dictionaries to find out what the description means.—New York Herald.

Log Cabins

AND

HOW TO BUILD THEM.

By WILLIAM S. WICKS.

This is a complete exposition of the art and method of building log cabins from the simplest dog kennel to highly artistic dwellings. Everyone going into the woods and designing to construct his shelter with the materials at hand, should procure "Log Cabins," for in its pages he will find a variety of designs, simple and ornate, adapted to temporary shelter or to permanent homes, with full and clear instruction and illustration in every matter of detail. Sent, post free, for \$1.50.

Routes for Sportsmen.

When planning your annual tour remember that this company controls over 4,100 miles of railway equipped in the most approved modern style, passing through a magnificent country noted for its unsurpassed facilities for sport.

A FEW OF THE PRINCIPAL RESORTS.

ANDROSOGGIN LAKE (via Bryant's Pond or Bethel).—Excellent trout fishing and game, large and small, of every description.

THE WHITE MOUNTAINS (via Gorham, N. H.).—For trout and varieties of game.

THE SALMON RESORTS (via Quebec, New Brunswick and Nova Scotia reached via Quebec).—

LAKE ST. JOHN REGION (via Quebec).—For ouananiche, trout, caribou, bear, moose, beaver, otter, etc.

THE RIVER ST. LAWRENCE (in the neighborhood of the line for 400 miles).—For muscalonge, pike, bass, whitefish, pickerel, perch.

THE THOUSAND ISLANDS (via Gananoque or Kingston).—For pickerel, black bass, muscalonge, pike.

MUSKOKA LAKE.—The best place on the continent for fishing, shooting and camping. All varieties of fish and game.

PARRY SOUND AND GEORGIAN BAY (reached via Penetang, Midland, Collingwood, etc.) for black bass, pickerel, deer, partridge, bear, otter, etc.

LAKE ONTARIO, ERIE, HURON AND MICHIGAN (via stations at all principal ports).

LAKE SUPERIOR (via Collingwood, Warton, Sarnia in connection with steamship lines).

The charges for hotels, guides and camping at many of the fishing waters named above are extremely low. Full particulars of same are published in a pamphlet descriptive of the "Fishing and Hunting Resorts of the Grand Trunk Railway," which will be forwarded free on application to the company's principal agents, or to the General Passenger Agent at Montreal.

N. J. POWER, General Passenger Agent,

L. J. SEARGEANT, General Manager.

A BLANK DAY.

BUT IT WAS NOT ON THE

RAILROAD.

The sportsman of the North often has a blank day. Indeed, no Northern shooter knows much about shooting until he has shot in the South, where the superb natural conditions have left the game in undiminished plenty in the covers.

Don't Go After Bear

to the Rockies. Go to the wide river bottoms of Mississippi or Louisiana and you will get one.

Don't Go After Turkeys

to the Great West, but to the Great South, in Mississippi and Louisiana, where the unbounded woodlands hold abundance of these noble birds.

Don't Go After Ducks

in the North, and work hard for days for a dozen ducks. Go South, to Louisiana and Texas, and learn what wildfowl shooting is.

The Quail, Woodcock and Snipe shooting of the South is such as the Northern hunter never dreamed of. A genial climate, a pleasant people, a six months open season, and birds until you want no more.

The Illinois Central Road runs direct to all this country, and is the only road that does.

A. H. HANSON,

Gen. Pass. Agent, Illinois Central R. R., Chicago.

Rome, Watertown & Ogdensburg Railroad.

N. Y. C. & H. R. R. CO., Lessee.

The Rome, Watertown & Ogdensburg Railroad is the route to the best fishing grounds in New York State and Canada. Through cars are run from New York City, Chicago, Detroit, Buffalo, Niagara Falls, Suspension Bridge, Utica, Syracuse and Rochester, to Cape Vincent, Clayton, St. Lawrence River, Massena Springs, Ogdensburg, and all principal places on Lake Ontario, and to Norwood for all points in the White Mountains and Maritime Provinces.

This line reaches the best and most famous fishing grounds in America for salmon, ouananiche, muscalonge, black bass, brook trout, lake trout, white fish, pickerel, perch and other fish. Information in regard to the fishing grounds and how to reach them will be cheerfully furnished upon application to

MEMBERSHIP SHARES

IN THE

Triton Fish and Game Club,

CANADA.

There has just been incorporated under the above title the finest fishing and gunning association in Canada. This preserve consists of 102,000 acres, lying within its borders over fifty lakes and a score of rivers and mountain streams, all of which swarm with trout ranging from 6lbs. (*Salmo fontinalis* only.) The virgin wilderness teems with small game. Of the larger kinds the caribou abounds. Moose and black bear are fairly plentiful, as also beaver, otter and other fur-bearing animals.

The Triton Club is situated 100 miles north of Quebec, on the line of the Quebec & Lake St. John Railway, and is reached in twenty-four hours easy journey (by rail) from New York City. (See prospectus.)

A limited number of shares is offered to gentlemen of unexceptionable references.

As a summer resort for both gentlemen and ladies the Triton Club offers great attractions, in addition to the best fishing and shooting to be had on this continent, at a very low cost.

The shares are \$250 each, and are an absolutely safe investment. Intending purchasers should carefully examine Sec. 4 of constitution, also pages 12 and 13 of by-laws about membership certificates, agents, membership cards, route and mode of payments.

TROUT LAKES FOR SALE.

I offer for sale a portion of my Adirondack preserve, from 1,000 to 2,000 acres of land, with four lakes. Three of the lakes contain the property, good road to two of the lakes, easy trail to the other two. This property is suitable for a club or for private resorts. One lake is stocked with salmon trout, the others with speckled trout, 30,000 planted last May, and shall plant as many more this year. Will sell any one lake with a portion of the land. Address DR. J. DE V. MOORE, 157 Park Avenue, Utica, N. Y.

Property For Sale.

SALMONIER, Newfoundland.

For sale or to let for the season, "WOODLANDS," the property of the late Sir Robert Pimmet (within five hours run from St. Johns and with telegraphic communication) situated on the banks of a lovely salmon river, and in the neighborhood of good duck, grouse and caribou shooting. Good anchorage for a large yacht within a mile of the dwelling house, which contains furnished dining and drawing rooms, kitchen and offices, schoolroom, seven bedrooms and three dressing rooms. Also good stabling. Apply for further particulars to CHARLES A. M. FINSENT, St. Johns, Newfoundland, or P. O. Box 1177, New York.

PUBLIC NOTICE.

The Commissioner of Crown Lands will lease, for a period of ten years, to the highest bidder, on the 15th of June next, in one of the rooms of the department, the fishing rights belonging to the province of Quebec, in the river "Grand Caspédia," (Baie des Chaleurs), subject to the lease now existing in favor of His Excellency the Governor General of Canada, until the expiration of his term of office. The rental price will be four thousand dollars (4,000) per annum, and the rental must be paid in advance. For further information, apply to the undersigned.

E. J. FLYNN, Commissioner of Crown Lands, Department of Crown Lands, Quebec, 10th May, 1893.

ALBEMARLE AND PAMPLICO CRUISING AND

Hunting Association—Bear, Deer, Wild Turkey, Quail, Swan, Geese, Brant, Duck, Curlew, Snipe. Finest fishing; Bluefish, Striped Bass, Weakfish, Drum, etc. Membership limited to 20. One more subscriber wanted. H. A. Weeks, 74 Murray St., N. Y.

THE RECORD IS ALSO A CLEAN ONE.

In our issue of May 25, commenting on the amount of advertising contained in that number, we wrote:

With this issue the FOREST AND STREAM breaks the advertising record of twenty years. It carries more advertising announcements than have been contained in any previous issue since the establishment of the paper in 1873. This breaks the record not only of the FOREST AND STREAM, but of all journalism in this particular field. No other sportsman's journal has to-day, or has ever had, an equal amount of bona fide paid advertising.

This was a calm, temperate and not at all exuberant statement of facts, which appeared to us to be well worthy of note. We are pained to observe that an esteemed contemporary criticises the concluding assertion of the quoted paragraph as containing an error. There is no error there. The amount of advertising, it is true, may have been exceeded, but the amount of "bona fide paid advertising" has never been.

Moreover, since the critic appears to invite a comparison, we may point out, as we thought it unnecessary to do on the occasion referred to, that the FOREST AND STREAM'S advertising pages are clean. They are devoted to the announcements of respectable people, advertising the business of respectable people, for the patronage of respectable people. There is not a single indecent "medical" advertisement in them. There has never been. There never will be. The line is drawn rigidly; the rule of exclusion is as immutable as the laws of the Medes and Persians. This is so well understood by those whose support we enjoy, that there would be no occasion ever to allude to it, except as in this instance for purposes of comparison.

A journal which mingles with the advertisements of sportsmen's goods those so-called "medical" advertisements which are on their face quack and fraudulent, and in wording and purpose are indecent and filthy, puts an insult not only upon respectable advertisers but upon every man as well who is confronted by the objectionable announcements or into whose home they are unwittingly admitted.

No man need ever scrutinize with apprehension the advertising pages of the journal which goes out from No. 318 Broadway, New York.

Our advertising space record has been broken this year. The record of clean advertising will never be broken.

THE ALLIGATOR SATCHEL.

If the feather-bedecked hat implies the destruction of birds of plumage, the alligator skin hand-bag means the passing of the 'gator; and with all his ugliness the Florida alligator bids fair to follow the Florida plume birds with all their beauty into the limbo of wild species destroyed for commercial purposes. One unfortunate feature of the case is that the alligator has no friends. He is universally regarded as an ugly customer. His ways are the reverse of winning. No Audubon Society espouses his cause. The sentiment evoked in behalf of the feathered singers in the trees has no regard for the alligator bellowing in the swamp. The alligator must go. The statistics show that he is going; indeed, that from large areas of Florida he has gone. In the early days of pleasure travel in that State, a quarter of a century ago, on all the great highways the alligator was as ubiquitous as he was novel and interesting. To-day one must seek him, if to be found at all, in the remote

byways. In those times he was sought as a curiosity, or fell a victim to the sportsman thirsting for renown as an alligator slayer; but since then, the commercial importance of his pursuit having been demonstrated, he has been hunted systematically for market.

In the recently issued "Report of the Fisheries on the South Atlantic States," by Dr. H. M. Smith, of the United States Fish Commission, are given some interesting and suggestive statistics of the Florida alligator industry. The business has already reached and passed the point of highest development, and is now on a decline, not because of a lessened demand for the products, but because the warfare has been waged so extensively and so relentlessly that the supply has been diminished to a point where the pursuit is no longer profitable. It is estimated that in the decade from 1880 to 1890 not less than 2,500,000 alligators were killed in the State; and the supply could not stand this tremendous drain. The alligator has been "killed out" and the alligator hunter has gone into other occupations.

Alligators are killed chiefly for their skins; the teeth also have a commercial value. A large trade is still carried on in alligator curiosities; in 1890 about 8,400 alligators were disposed of to tourists in Jacksonville. Most of these are very small ones, for which the hunters receive only from \$10 to \$30 per hundred. In no branch of the industry are those who gather the raw material well paid. Marketable skins from three to twelve feet in length bring only sixty cents on an average, and most of this is taken out in trade—provisions and ammunition—so that the hunter appears to earn all that he receives. The hunter combines with his pursuit of the alligator that of deer, bear, wildcat, opossum and raccoon for the skins; and in 1890 in the Kissimmee and Lake Okeechobee region about a thousand otters were killed. Formerly, too, the plume birds contributed an important share to the profits, but the supply has failed and that branch of the business has been discontinued. In like manner, unless there shall be a change in present methods, the alligator industry must fail.

SNAP SHOTS.

IF ALL other records of the introduction of the Mongolian pheasants were destroyed it would be practicable to gather reasonably complete data from the game laws. The Oregon statute, for instance, would tell not only when the birds were first brought into the country, but also that America owes to Judge Denny this splendid addition to its feathered game resources. And as one State after another—Washington, California, Idaho, Colorado, Wisconsin, New York (in a Livingston county law), Vermont and Alabama—have prescribed periods of protection, one may note from this legislative record the distribution of the birds over the Union. A similar history might be made out for the European partridges, pheasants and hares which have been brought to us; and now at the request of Dr. W. O. Blaisdell of Macomb, Ill., the Legislature of that State has provided for the protection of the Chukor partridges imported by him from far away India.

No one can foretell, at this "stage of the game," what will be the outcome of this introduction of foreign birds and their protection. There is another story embodied in the bird legislation of this country, that of the English sparrow. It records first the stringent protection of the defenseless stranger; next the repeal of protective statutes, when it was discovered that the newcomer was abundantly able to care for himself; and then the offer of a bounty on his head, when he had become an intolerable pest. There are not wanting those who pose as alarmists to tell us that similar chapters will be added to the legislative history of these newly imported species of game birds. To which the reply may be that the pheasants and partridges are good to eat. Had the sparrow been fit for the table, the markets would have taken good care of the surplus.

One of the problems to be solved is that of the ability of these newcomers to withstand the unaccustomed enemies they will encounter here. That they are abundantly able to make shift for themselves in the cold of winter has already been demonstrated; but it has been quite as clearly shown that in some latitudes they cannot stand up against the vermin, great and small. The Jekyll Island's experience with English pheasants showed that in Georgia it was a simple matter to breed the birds by

the thousand, but the enterprise failed ingloriously and the pheasants succumbed when the snakes and fleas and ticks came down upon them.

The sheep ranchers of the Southwest, who have suffered great losses by the depredations of panthers, wolves and coyotes, have been conducting exhaustive experiments to test various remedies, and as a result of their investigations have developed the plan of propagating the disease known as mange, which has been shown to be destructive of the pests. In the annual convention of the Texas Wool Growers' Association in San Antonio last Tuesday, it was recommended that "mange pens" should be established in every county of the State. This is fighting the devil with fire.

Note, as another illustration of the changing shooting conditions in this country, the scheme of the Shocco Game Association of Baltimore, which has just bought a thousand acres farm in Warren county, North Carolina, and is converting it into a game preserve after European models. The preserve will be stocked with thousands of American quail and with European pheasants and partridges. A gamekeeper has been imported from one of the game preserves of the Rothschilds. By a contract with the proprietors of adjoining farms the property under control will compose fifteen thousand acres; this arrangement will hold for ten years; by the terms of the contract the club undertakes to stock the leased farms, and to pay a fair price for the game killed by its members; the owner of a leased farm may himself shoot over it and may invite his friends; but outsiders are to be warned off. The Warrenton Record, speaking for the Warren county people, says: "We would be glad to welcome a dozen other clubs to the county, for whom we have plenty of room, and to whom we can offer equal advantages."

Tennessee has established a unique system of Fish Commissioners. By a recent enactment, the county courts are empowered to elect in each county a Commissioner, whose duty it shall be to investigate and report upon the fishing interests of his district, and to report upon them to the Governor of the State and to the United States Fish Commission. For this service he is allowed an annual salary not in excess of \$25, with a like sum for expenses. It stands to reason that whatever shall be done by the Commissioners must be a labor of love; but if the agitation for fish and game protection, which we have commented on from time to time, proves anything, there is abundant ground for confidence that in some counties at least decided steps will be taken toward wiser methods of preserving and using the fish supply.

By the resignation of Mr. E. M. Dawson, who until a few days ago was chief clerk of the Interior Department, that branch of the Government service loses an efficient and faithful official. Mr. Dawson has been long in the Department, and years ago when the affairs of the Yellowstone Park first came under his administration he showed a keen appreciation of their importance, and proved himself an alert and faithful guardian of the reservation. It must be a matter of sincere regret to all friends of the National Park that Mr. Dawson has seen fit to tender his resignation to the Secretary of the Interior, for his long familiarity with Park matters and his deep interest in them made him one of the most efficient of its protectors.

Writers of anonymous letters often mean well but are mistaken in their method of trying to do good. We are frequently in receipt of anonymous communications reporting violations of the game or fish laws and usually asking "Where is the protector?" Usually we forward such letters to the protector, but that experienced official has learned by experience that the anonymous guide is likely to lead him into a ditch. The manly, sensible and practical course for one who has knowledge of violations is to give information in a straightforward way to the protector, sign his name to it and stand ready to back it.

President Cleveland has been fishing at Hog Island. As usual, when a President of the United States goes fishing, the papers have made a great to-do over it. Mr. Cleveland had good luck, enjoyed the outing, and has gone back to his work. Many another fisherman, whose going and coming the papers will not trouble themselves to chronicle, may have just as good a time, enjoy the fun just as much and go back to work just as rested.

The Sportsman Tourist.

CALIFORNIA SPRING TIME.

GEYSERVILLE, Cal., May 10.—We are taking our outings on our own domains these days. Trout streams have lost their charms, since we were not strong enough to clamber over rocks and fallen trees as of yore. My husband has been confined to the house by illness for many months, and an occasional drive, target practice from the back porch, and FOREST AND STREAM are the only recreations he has strength to enjoy. He is particularly pleased to see "Uncle Lisha" and "Aunt Jerusha" back in their old home, and is eagerly waiting and hoping for the re-establishment of the old shop, where he hopes to spend many pleasant hours with Uncle Lisha.

I have been sitting under the oak trees in our front yard this morning trying to write, but my attention has been so frequently called away by the music of the wild birds in the overhanging branches, that I have made but little progress. We have such a variety of birds in California, and at this season of the year they are so tame that they often come within reach of our hands. The linnets have grown so familiar within the past two or three days that they are carrying off every conceivable thing that will answer for building material. I put scraps of cotton and knitting silk just outside the window among the vines, and the busy little workers carry them off in a jiffy. Sometimes they take a peep inside, as if to say, "I wonder if she sees us." Golden orioles, robins, sparrows and the little woodpecker, in his jaunty red cap, and myriads of feathered midgets, to me nameless, all are busy at work to-day; and what cheerful workers they are, judging from the music they are making at the same time. A dainty red-throated hummingbird was just now hanging over a bunch of roses so close to me that I might have touched him.

Truly this is a birds' paradise. It could not be otherwise, the whole country is in its glory. Wild flowers in profusion are scattered everywhere. The golden eschscholtzia flower of California blooms in masses, and in such variety and delicacy of tint as to keep one in continual wonder and admiration. So common is it that the natives scarcely give it a passing glance. It seems to me, that in order to appreciate the beauties of nature on the Pacific coast one must have been reared elsewhere. It is so very seldom that I hear a person brought up here mention the grandeur of the surroundings, while at this season of the year I find it difficult to think or speak of anything else.

As I sit here looking down the valley I see great fields of waving grain, just beginning to head, well-kept orchards and vineyards, and neat homes. In the opposite direction, great oak trees scattered here and there, with their masses of green foliage make a soft foreground to the picture of gradually rising foothills, and further in the distance a background of rugged mountains.

But, alas, in vain I sigh for a paradise with the serpent left out. While sitting out there on my camp stool, with my dog Hector at my feet and our pet Maltese in my lap, I was suddenly startled by the old blue rascal making a spring into some shrubbery close at hand, and upon looking to see what had taken him away so abruptly, when I had been trying all the morning to get rid of him, out he came proudly bearing a long dangling object in his mouth, and made straight for me. I am not there now. I prefer looking out at the window. Blue has deposited his prize on the ground and is giving me reproachful glances for running away. He expected approval, and my conduct seems to have mystified him somewhat. Hector strikes at the post mortem with his great ungainly paw, then runs back a bit and gives a quick bark, then Blue spits at him. Well, I'll leave them to settle the matter between themselves, for I don't think I care to have anything to do with it.

But, to go back to our beautiful springtime, we have already had some very suggestive days, and I begin to dread what the coming months are sure to bring forth. A few more weeks and the lovely green grass will be withered and parched, and until the cooling rains of November come we shall want to go away to where the soft sea breezes blow.

Even lovely California has her drawbacks, and an old-fashioned thunder shower would do my soul good this very minute, and ere the heat of summer has passed I shall be sighing for a Dakota blizzard, a Minnesota cyclone, or anything under the sun that will relieve the monotony of burning heat.

Methinks I hear a voice from further down the coast saying, "Good enough for you; you ought to live in San Francisco." But we can't all live in San Francisco; there are too many there already.

Trout are very scarce this year. A party of four went out to Sulphur Creek last week with the intention of staying several days; but they returned on the evening of the second day, and were thoroughly disgusted with the trip. Like reports reach us from all the other streams in our locality. On the first day of the open season a couple of our little friends brought my husband a string of seventeen lovely trout, and the same little fishermen informed us yesterday that there is not a fish to be found anywhere, and they are perfectly reliable.

We see quail every day, as they come about the yard this time of year. They seem to understand that they are perfectly safe in doing so. While out for a drive the other day we counted twenty-six. That reminds me; I promised myself some months since that I never would say "quail" to FOREST AND STREAM again. I had seen a flock of seventy-seven, and as it is so unusual to see so many in one band, I was very proud to report the same, but imagine my disappointment when they docked me fifty birds, making me say "twenty-seven." But as this is my only grievance against our favorite paper, I'll forgive the injustice this time; but should it happen again I cannot say as to consequences. My husband suggests that I should be a little more moderate in my count, and perhaps my statements would be treated with greater respect. I take this in good part, as observation and experience have taught me what to expect in all cases with a woman in it.

I notice there is a demand for "chance shots" just now, and as I made one the other day that I very much regretted, I'll send it along.

My birthday came last week and with it a nickel-plated 22 Winchester that is the pride of my heart. It has

globe sights, and I found it somewhat difficult to get the combination at first, but I used the cartridges in a very reckless manner, and had just got so that I could hit the barn about every third shot, when my husband told me I had better try my sights on a robin that was hopping about on the lawn. "I wouldn't kill a robin for the world," I replied. "But you'll miss it, you know, and it's a fine target." I am ashamed of it, but I did take a shot at the little redbreast and he tumbled over just as dead as could be. I shut my eyes for a moment, and when I opened them again Hector was bringing the little bird to me. I am aware that my shot counts eleven less than "twelve pigeons," but I imagine my surprise was no less than was that of the other shooter. I've been offered two bits several times since to try my marksmanship on a robin, but I have not been tempted to try it.

We have a few doves, but rabbits and squirrels are the only legitimate game to be found at this time of year.

MARTON.

MY CHANCE ACQUAINTANCE.—IV.

WE—not the editorial "we," but my venerable friend and myself—had been wandering through the woods aimlessly one pleasant Sunday afternoon, admiring nature and looking for some good natural crooks for boat knees. The old man stopped quite suddenly and for several minutes contemplated in silence a spring which was bubbling up from the ground and discharging the cool sparkling beverage at the rate of about two gallons per minute. "Nice one, ain't it?" I never come here but I think of what happened to me on this here spot nigh on to thirty years ago. It were a dreadful cold day; snow was deep, I had lugged a deer much as three miles and was just about tuckered out. I thought I'd build a fire, warm up and rest a bit, eat the balance of my lunch and take a fresh start, as I were some distance from home.

"It was getting late, so I hurriedly scraped away the snow and built a fire just about on that spot. The fire burned up good, and I were just getting my hands warmed before tacking my lunch, when I thought I saw something move right in the bottom of that fire. I wiped my eyes and took a good solid square look.

"There certainly was a movement there, as though a snake or something of that kind were a trying to roll over. What could it be? Had I built a fire over a frozen snake, or over the hole of some other varmint, or the tail of some bogie, and the fire was a warming him up and putting life into him? The durned thing surely did move, and the movement was certainly gittin' stronger.

"Now I can't abide snakes; they beat me every time. There was a kind of a spasm went down my back, something like a touch of the ager; then a creepy, crawly sort of a feeling shot all over me; my knees wobbled and my hair, if it didn't stand on end; my eyes stuck out as you might have hung your hat on 'em. As the motion got more powerful like, something about the size of a big snake certainly did roll over. I were that rattled I hollered. Yelling seemed to let a little sense into me. I reached for my knife. It was gone! I jumped for my gun, which I had stood up in the crotch of a tree about ten or twelve steps away. As soon as my hands touched that are gun my nerves quit shivering. I was all right again. That gun came to my shoulder quick; then with my finger on the trigger I marched back, solid as old cheese, ready to blow a hole big as yer arm through any livin' critter. I aimed and looked, squinted and peeped, but could not see anything like a snake nor any moving thing; but there about a foot or so from the fire was my hunting knife. I reached for it, but dropped it mighty sudden, for it were nearly red hot. Yee see I'd used it to whittle some stuff to start the fire with, and in my hurry had raked it up with the kindlin', but the knife had more sense than I had, and when the fire begun to git too hot for it it actually rolled over and over until it had cleared itself more'n a foot from the fire. Yes, I've got that are knife yet, and if I don't show it at the World's Fair it will be because I can't get space."

A. W.

BACK TO THE OLD HOME.

FOR more than forty years I have been a very busy man—indeed, a veritable slave to business. Though of late years I have managed to take short mid-summer vacations, which were spent at the sea shore, while the change was delightful and agreeable, it did not satisfy the longings of a man who was born in Vermont and had spent his childhood and youth amid her green hills and her smiling valleys. I remembered these hills and valleys as they appeared to me in the merry month of June, and often wondered if they would prove as entrancing now as they did then. During my leisure hours I dreamed of and longed for the time when I could revisit my native hills during the summer, "when the bloom was on the ry."

At last, after many years of patient waiting, the golden moment came. The cares of business were laid aside, and with the ardor and impetuosity of youth I began preparations for spending a summer in dear old Vermont. Visions of apple blossoms, purring brooks and wary trout flitted before my eyes, and I was impatient for the day of departure. It came at last, and like a school boy when just "let out," I was off, full of bright anticipations which were to be fully realized as the sequel will show.

I reached H., my native town, on June 1, and was heartily welcomed by a few warm friends, who had shown their good sense and love of home by refusing to emigrate.

On the day following my arrival I took down the old shotgun, with which I had learned to shoot chipmunks, woodchuck and gray squirrels when a boy, and which now would bring down a coon or a hawk, and with Edmo, a typical barefoot boy of eight years, son of my host and long-time friend, genial, large-hearted, sport-loving Capt. B., started across the fields for the old sugar mill, where in my youth I had learned the mystic art of transmuting maple sap into maple syrup, sweeter than honey of the Hymettus.

The day was perfect, the air exhilarating, the fields were sprinkled with daisies and buttercups, just as they were fifty years ago, the birds sang as sweetly, the apple blossoms were just as fragrant, just as modest and lovely as ever. The grand old maples—primeval trees—still stood in all their glory, jealously guarding their ancient domain and inviting me as of yore to rest under their generous shade.

Edmo and I plunged into this forest primeval, explored it from circumference to center, visited the old boiling place, the rock where I shot my first partridge, the ledge

where the wild honeysuckles grew, the bluff overlooking the pond that forms the western boundary of the hill, the outlet and falls that bound it on the south, in short, every thing that had impressed me as a child was eagerly sought out and lovingly remembered.

The southern slope of the hill is pasture, with huge maples towering skyward scattered about, affording luxurious shade for sheep or cattle or men or boys, and under one of these trees with wide-spreading branches we ate our lunch. Near by was a spring of pure cold water, which went with our lunch. At this spring I had quenched my thirst many a time when a boy. Just as we emerged from the deep woods and entered this open, we ran on to a brood of young partridges only a few days old, and the lightning-like rapidity with which they disappeared under dead leaves and bits of bark made young Edmo's eyes dilate, and a look of bewilderment and wonder overspread his bright boy face.

The lengthening shadows reminded us that the day was waning and that as we had a long walk before us, it was time to turn our faces homeward. The unalloyed pleasure derived on this first day's outing in Vermont was only a forerunner of the days that were to follow and to prove a perfect realization of the dream I had indulged in so long.

WILD GOOSE SHOOTING IN KANSAS.

I WAS located at Kinsley, Kan., a dining station on the Atchison, Topeka & Santa Fe R. R., near which the Arkansas River winds its way between and through the sand hills. Four miles below there were at that time large sand bars, where thousands of wild geese and sand hill cranes were to be found roosting. They were in the habit of feeding two miles back from the river upon the high ground. Leaving the river at daylight and returning at about 11 o'clock A. M.; then at 3 P. M. they went out again, returning at night, thus affording the gunner a choice of stands.

I preferred to shoot over decoys in the wheatfields, and as a rule in the afternoon. Sometimes, when delayed after 3 P. M., I would go to the river, shooting them as they came in after sundown, using seven sheet-iron profile decoys and a live wild goose that I had wing-tipped the season before. I would select a wheatfield where they were in the habit of feeding, place the iron decoys across their line of flight with the old live gander in the lead; and preparing a blind of tumble weeds I was soon ready for business.

Looking off toward the river I could see a dark line in the distance and I knew that the first flock was on its way to the feeding grounds. Nearer came this dark line and closer I hugged the ground in my blind. Soon they sight my decoys and then begin to call. The old gander becomes wild with excitement; stretching his neck to its fullest extent he flaps his wings and returns the calls of his flying companions, which have by this time set their wings and are rapidly coming to the decoys. Waiting until the flock were within 35 yds. and their wings beating the air, their long black legs stretched out ready to alight, I open fire upon them and down comes a pair, or sometimes three, and sometimes only a single one. Shooting a heavily choked gun, I usually selected my bird and seldom failed to score at that distance.

The report of the gun had scarcely died away before another flock could be seen coming in the distance, and the old gander again began to talk to them, and setting their wings the flock start for the decoys and death. Thus flock after flock follow each other, many passing around us and others being frightened by the report of the gun used upon those ahead of them, and goose after goose fell among the decoys. Between flocks I would set up the dead geese among the decoys, thus adding materially to the attractiveness of the display until the flight was over, lasting from an hour to an hour and a half. The sheet iron decoys were very lifelike, but with the addition of the live decoy the aggregation was very deceiving, and his repeated calls proved very assuring to his free companions.

I have in this way bagged in an afternoon from 12 to 20, and in one single instance with a friend (who did not shoot) from Pittsburgh, Pa., watching me from the shelter of a neighboring straw stack, I bagged 39 in about an hour's time over this string of decoys. Many geese were killed on the sand bars at the same time by digging pits and using decoys, when they came in from the feeding grounds, and much larger bags made than in the wheatfields.

The sandhill cranes were hunted differently. Taking a spring wagon and driver, with a pair of fast-running Texas ponies, we start out for cranes. Sighting them feeding in a field, or upon burnt ground, the shooters drop out and secrete themselves in high grass or behind small cottonwood trees and cornshocks. The driver goes away round them. The cranes watching him soon forget, if they knew, that the other occupants of the wagon are hiding in the other end of the field. When the driver gets them between us and the wagon he lays whip to the ponies and they run like the wind for the cranes, which take wing and come directly to us, not over 30 yds. high, looking back, as it were, at the flying team. We jump up and fire into their ranks, which so demoralizes them that I have repeatedly fired a third shot into them before they went out of range, and bagging three birds. The prowess of that old 10-gauge gun was the talk of my farmer friends long after I left that country, for it protected their wheatfields from the inroads made upon them by these large numbers of geese and cranes.

A most laughable incident happened one morning when I was shooting with a couple of Chicago friends, who had joined me to go goose shooting. Getting a late start we were hurrying along as fast as the team could travel, but daylight overtook us before we reached the point we expected to shoot from and the flight was on. One friend and myself jumping out ran into a cornfield and lay down, telling the other, a very large corpulent man, to drive the team along out of the way. We soon had a chance to try our skill, and seven geese were bagged as

they went over us. Another one, a wingshot, fell out in the stubble near the wagon. Our corpulent companion jumped out and started to retrieve it. While he was chasing it around a large flock was seen coming directly over where we were hidden. We yelled to our retrieving friend, "Get down! get down!" Dropping on his knees and ducking his head to the ground he imagined he was hidden, but his efforts were useless, as he looked then bigger than the side of a house, and, of course, the geese shied off, my friend calling to him, "Why don't you get down?"

The fat man replied, "Ain't I down now? They can't see me." This was more than we could stand and we laughed until we were sore, but our friend could not see the joke. Nevertheless, we made a goose shooter out of him after all, and many a good laugh he has enjoyed with us over his efforts to hide from the geese in the open stubble.

In this way I have spent many happy days goose shooting in Kansas.

JOS. W. IRVIN.

CHICAGO AND THE WEST.

[From a Staff Correspondent.]

IN regard to the quail crop for next year, Mr. J. E. Fisher, of the Riverside Kennels, Riverside, Ind., has the following to say in a letter to Mr. Waters, of this office. Mr. Fisher's kindness to the birds is something very well worth emulation. He remarks:

"The quail have done far better than was expected. A great many fed through with cattle and hogs. I found a large bevy last week that had not paired off yet. They are later this year in hatching than they were last year. I believe they will do better. I have done the best I could and have planted hemp and several packages of Canary bird seed for the quail. There are several kinds of seed in each package. I sowed it in different places on the farm out of the way of other crops and hope it may prove a success."

May 15.—Mr. Ezra E. Howard, of Edgar, Neb., writes me under date of May 13: "The doe birds did not come to amount to anything, and so I cannot give you the article on doe birds as you requested, and as I intended to do. A very few were killed, but nothing near the usual number. I am of the opinion that market-hunting in the spring has considerable to do with them not appearing in their usual numbers."

I have the following from a Western gentleman whom I believe to be reliable. It relates a miserable state of facts. I beg the attention of Wyoming sportsmen and trust that when that market-shooting man lands with his outfit to go into the grouse business he will meet with a committee who will give him a good old-fashioned Western invitation to leave the country, and to hit the trail only in the high places. There is no use in the Wyoming men submitting to something not only disreputable, but illegal and dead wrong. The following is my information:

"A man will soon go to Wyoming, in the country between Rawlins and Medicine Bow, with ten teams and about twelve to fifteen men besides, to kill and ship sage grouse for Eastern markets. He calculates to pay out for wages in the two months that he will hunt about \$1,000, besides the birds that he will buy. This outfit will clean out about all the grouse in a large section of country."

E. HOUGH.

909 SECURITY BUILDING, Chicago.

Nebraska Quail for California.

FORT BIDWELL, Modoc Co., Cal., May 18.—*Editor Forest and Stream:* It may be of interest to some of your readers to learn that I have successfully imported for stocking purposes some Bob White quail from far away Nebraska. Two dozen started from Valentine, Neb., by express, March 28, and eighteen of the number were delivered here April 6, ten days en route, which seems the more remarkable from the fact that the last 135 miles of their journey was on a stage coach or rather buckboard, which gave them a terrible shaking up. They were cold, tired, hungry and thirsty upon arrival, but brightened up wonderfully when their crops were filled, and after a night's rest. They came during a severe snowstorm and were immediately transferred to two fresh coops, and kept in the house a week until the weather moderated, when they were turned out, since which time they have several times been seen.

An old-time sporting friend, Col. D. S. Gordon, of the Sixth Cavalry, with whom I have spent many pleasant hours afield, furnished the birds and had built for their transportation a light strong coop, the bottom of which was made of boards, and the sides and top of wire netting, while over all, except the ends, was a layer of burlap. Birds and all weighed but 35 lbs., and express charges were only \$3.40. It would have been better had the burlap been underneath the wire screen, as some of their heads were bare of feathers and apparently raw to the skull from contact with the wire; but taken all in all it was a very satisfactory experience.

Three years ago I attempted to introduce the Mongolian pheasant and procured eggs in Portland, Ore., which came by express around by Reno, Nev., and in here by stage; but not one chick hatched from the dozen eggs, although the eggs were well packed. I always supposed that the jolting they got ruined them.

Will Dr. Beebe, or Judge Greene, or some of your correspondents, kindly tell me through your columns whether or not the pheasant will stand our severe winters. I am told that snow is quite disastrous to them, as it balls up on their long tails, weighting them down so they are unable to fly. Is this the fact?

A. C. LOWELL.

Southern California.

SALT LAKE CITY, Utah.—*Editor Forest and Stream:* I have been through southern California, not on a shooting trip, for it is too late, but to spy out the good places for shooting another time, and at the same time have a rest. As our good friend, T. S. Van Dyke, says, good shooting in California is almost a thing of the past. To be sure you find a good many quail in the southern parts, but they keep chiefly in the cultivated sections, where shooting is not allowed. The Hotel del Coronado, at San Diego, has a small preserve which is well stocked with quail and rabbits. With the latter I am informed they have good sport coursing during the winter season. Waterfowl do not migrate through California, in vast

numbers as of old. Civilization has driven them to some other route, although the celebrated Suisun marshes afford good shooting to those who control its shooting privileges, and their friends. Deer may still be found among the hills of Santa Barbara and Monterey counties, but it takes good hunting and perseverance to bring success.

Good sport can be had fishing for sea fish at Santa Catalina Island, and the mountain brooks in the central and north parts of the State afford good trout fishing. There are many fine streams in the southerly portion which would afford good sport if they were well stocked and the supply maintained.

Sea and River Fishing.

The Fish Laws of the United States and Canada, in the Game Laws in Brief, 25 cents. In the "Book of the Game Laws" (full text), 50 cents.

NIAGARA COUNTY ANGLERS' DAY.

LOCKPORT, N. Y., June 1.—*Editor Forest and Stream:* In accordance with their honored custom, the Niagara County Anglers' Club, of this city, yesterday celebrated their annual outing with an excursion to Fort Niagara for a fishing match. The fishermen went by train to Lewiston and then by steamer to Youngstown.

Lewiston was reached at 7:45, and after a brief wait the Anna F. Owen and barge conveyed the contestants to Youngstown. The ride down the river was indescribably fine. Few streams abound in more picturesque and grander scenes than does the Niagara. The morning was beautiful, an invigorating nor'easter stirred the hearts of all, and the resolves to mighty effort could be heard resolving high above the throb of the steamer's engines. Many of the excursionists were unmindful of the beauty and grandeur of the scene, so intent were they upon the task of arranging rod and line, reel and hook.

Onward the little vessel sped. At historic Youngstown, after a journey through scenes of storied or unsung loveliness, a spectacle was presented near the old fort which might recall the old days of military strife. It was, however, the serried ranks rather of peaceful oarsmen than of men of war. With oars "present arms" they stood in line and saluted the club with three rousing cheers as the steamer drew to shore. The task of finding the boat and boatmen assigned to each party was quickly accomplished.

The black bass grounds near the old fort were soon covered with a fleet of boats, each containing a red man and a blue man. The white caps came dancing inland in salutation, and the crest of their snowy waves combined with the fluttering red and blue badges, worn by the men of Captain Millar and Captain Hatch respectively, made at once a pretty and patriotic picture.

There were 47 men under the lead of each captain, the roster reading:

CAPT. MILLAR (RED).

J. L. Adkins, Edward Hopkins, D. E. Brong, G. L. Holmes, H. W. Brown, D. E. Jeffery, J. H. Buddenhagen, W. E. Jenney, W. Cocker, W. J. Jackson, James Cocker, L. H. Lureman, D. C. Carroll, A. L. Lerch, F. B. Lewis, Joseph Dumville, Jr., John A. Merritt, George E. Emerson, Joseph Fisher, Peter Miller, T. Graves, Frank McCollum, W. E. Hickup, C. L. Nicholls, O. D. Prudden, A. H. Haskell, A. H. Pickard, W. H. Templar, E. N. S. Ringueberg, Perry, Stowell, W. J. Ransom, F. K. Sweet, C. S. Rice, W. Steele, William Staler, T. H. Van Horn, H. Wendover, F. G. Stone, A. H. Stevens, E. J. Taylor, W. A. Williams, A. E. Wayman, F. E. Lewis, Thomas Gross.

CAPT. HATCH (BLUE).

D. R. Bruce, A. R. Beck, Emmett Belknap, Dr. Bement, William Bryan, W. H. Case, J. E. Emerson, N. D. Ensign, H. H. Flagler, B. J. Ferguson, William J. Gould, W. E. Huston, H. C. Hulshoff, G. W. Harmony, M. N. Haskell, John Klupf, J. F. Little, A. B. Lewis, S. Wright McCollum, H. S. Meade, George W. Mann, C. A. Murphy, M. O'Connor, Tunis Outwater, W. E. Shaeffer, A. L. Smith, W. W. Trevor, H. Timanus, H. C. Templar, George W. Weaver, E. C. Williamson, LeRoy Fisher, Allan Merritt, Herbert Ransom, Dr. W. J. Leake, Ernest Crosby, Mr. Rider, Mr. Haynes, M. H. Hoover, G. W. Lansing, George Barker, Charles E. Savery, Ed. Smith, De Lisle Brookins, Roger Millar, Willard M. Hart.

The club has a set of rules for prize fishing, which are stringently enforced; here are some of the chief:

No. 1. Signal for prize fishing: Three whistles denotes starts and stops.

No. 2. Hours for fishing, 9 A. M. to 12 M., and 1:30 to 6 P. M.

No. 3. No two contestants on the same chosen side for banquet will be allowed to fish in the same boat. It is optional with members to enter in this contest.

No. 4. Each person will be allowed to fish with but one rod and line, two hooks and bait. Artificial bait allowed.

No. 5. Members in good standing only can compete for club prizes.

No. 6. Boats will be numbered, and the persons drawing the corresponding number will be entitled to that boat.

No. 7. Agreeable changes in boats may be made by persons wishing to do so, provided Rule 3 is observed.

No. 8. The high hook banner will be in the boat having the largest black bass.

No. 9. Each person will record his entire catch on the score book, and hand it to the judges at 6 o'clock, and exhibit the fish.

The leaders gave the signal and a hundred lancewoods flashed in air—and the leaders went to the bottom on taut lines as taught by Jerome Emerson, professor of angling. Two minutes had not elapsed after the fight was on before the first blood was scored. Dr. W. J. Ransom hauled in the first bass amid tremendous cheers from the reds and shouts of defiance from the blues. The banner to be taken by the boat catching the first bass, and held by the largest, was quickly conveyed to the hero, who gracefully acknowledged the honor with a military salute. The trophy remained with him but a short time, when it was claimed by another redman, D. Elwood Jeffery, on a 2½ lbs. bass. Ed. Williamson, the mighty angler, dispelled the blues for the blues by beating this and taking the flag which was held by Captain Hatch's side the rest of the day, M. N. Haskell clinching the claim to it with a 3½-pounder.

At noon-tide the tide was with the blues. W. W. Trevor had skillfully landed four elegant bass and with others on his side made the score 15 to 12 against the reds.

The fishermen, in spite of the repeated luncheons during the morning, served by an efficient tenders' boat, found themselves in good appetite for the bountiful dinner prepared at the hotels.

The fight was on again in the afternoon, fast and furious. Capt. Hatch had two fine bass to his credit and Capt. Millar, seeing defeat staring him in the face, abandoned his steam launch, the Louise, from which he had commanded his forces in the morning, and taking a smaller craft, went into the thickest of the fight. A cast, a tug, a short struggle, and he landed a beautiful specimen. This he continued until he had a string of six and a score of 300 to his credit. Thus encouraged by their leader the reds forged ahead, and the story of a memorable conflict is told. Somehow the great warriors of the blues had an off day; they played in hard lines.

At 6 P. M. the signal for the suspension of hostilities sounded and friend and foe assembled on the green while the judges on awards, Messrs. D. E. Brong, W. A. Williams, David Miller and C. W. Hatch made their decisions. The club scales, which cannot lie if some of the members can, were produced and the result reduced to pounds and ounces.

Following are the winners:

CLUB PRIZES.

1. Largest small-mouth black bass, Bristol rod, M. N. Haskell, 3½ lbs.
2. Second largest, pair shoes, E. C. Williamson, 3¼ lbs.
3. Third largest, landing net, D. E. Jeffery, 3 lbs.
4. Fourth largest, pocket knife, Perry Stowell, 2½ lbs.
5. Largest string small-mouth black bass, by number (in case of tie by weight), automatic reel, David Miller, 6 bass.
6. Second largest, dishes, W. W. Trevor, 5 bass.
7. Third largest, "Return of the Fishing Boats," L. H. Lureman.
8. Fourth largest, meerschaum pipe, G. E. Emerson.
9. First small-mouth black bass caught, three feathers killing bait, Dr. W. J. Ransom.
10. First double catch small-mouth black bass, Columbian stamp box (no award).
11. Smallest small-mouth black bass, silver charm, Jacob Fisher.
12. Largest string mixed fish, schedule value, silk umbrella, Joseph Dumville, Jr.
13. Second largest, quartet stand, J. E. Emerson.
14. Third largest, hammock, C. S. Rice.
15. Fourth largest, picture, water scene, Burt Hasckins.
16. Largest string perch, one ton coal, C. A. Murphy.
17. Second largest, French brier pipe, W. E. Jenney.
18. Third largest, three pounds coffee, Dr. Bement.
19. Fourth largest, oil silk line, George Harmony.
20. Largest string herring, sack flower, no award.
21. Second largest, rod and reel, no award.
22. Third largest, bushel of pop corn, no award.
23. Fourth largest, box line collars, no award.
24. Largest sheephead, one barrel salt, no award.
25. Largest pike, sack flour, W. A. Williams.
26. First eel, stove mat, no award.
27. Poorest luck and no fish, overalls (in case of tie to be determined by 100 yard foot race), deferred.

GUESTS' PRIZES.

28. Largest bass, bicycle shoes, Thomas Gross, 3 lbs.
29. Largest string of bass, match box, E. C. Hopkins.
30. Largest string of all kinds of fish, hammock, W. B. Stahler.
31. Second largest, brier pipe, Arthur L. Lerch.

BOATMEN'S PRIZES.

32. Boatman, whose party catches the greatest number of fish, brier pipe, and one pound of tobacco, Ed. Welch, No. 33.
33. Boatman, whose party catches the largest number of black bass, 50 pounds of flour, Joseph Sherwood, No. 13.
34. Boatman, for second largest number of black bass, silk line, John Schriber, No. 7.

After the announcements the merry party boarded the steamer for the homeward journey. By vote of the blues on the train it was decided to hold the banquet which they as the losers are to furnish the victorious reds, on Thursday, June 8. The reds will provide the speeches on the great occasion, but are respectfully asked to refrain from gloating. A canvas of the catch on both sides resulted as follows:

Captain Millar—35 black bass, 1,750 points, 5 blue pike, 75, 1 pickerel, 25, 167 perch, 324; total, 2,184.

Captain Hatch—24 black bass, 1,200, white bass 15, 1 herring, 5, 3 blue pike, 45, 188 perch, 376, total 1,641.

Reds over the blues, 541 points.

The trainload of weary anglers was whirled up the Niagara Valley, homeward. Tired, sunburnt indeed, but with a sense of having spent a day in the pursuit of a noble sport, everybody voted the excursion an unqualified success. It is not strange under these circumstances and others explained previously that there was not a blue man in the crowd. All felt in accord with the glowing red sunset of evening, while the Hatch men read in the last crimson streaks of day prophecies of another outing when perchance the skies would be bluer.

"Good-bye," sighed the breezes that played in the tree-tops overhanging the glorious Niagara; "come again," clicked the sleepers underneath as the coaches hurried toward Lockport, the beautiful city where rest the lodges of the proud members of the Niagara County Anglers' Club.

M. H. HOOVER.

The Maine Association and Non-Residents.

AUGUSTA, Me., May 19.—*Editor Forest and Stream:* We have a plenty of fish and game for the present time, but we are confronted with the fact that if the sportsmen tourists from out of the State increase for the next few years as they have for the past three years, the drain will be felt. We are determined to meet this with an increase in the propagation of fish and their protection, and the rigid protection of the game. In spite of the illegal killing of deer, caribou and moose, they are on the increase, and now there are but few towns in the State where deer are not living. If we can enforce the laws, deer shooting in Maine in ten years will be as easy to be done, as can be desired. Our association is but two months old, and we have expended and are arranging to expend several hundred dollars in aiding hatcheries now existing, and putting in others at desirable places. We find after a long experience that to meet with the best of success, the hatcheries must be located near the waters to be supplied, and the fish kept and fed from spring till fall and then put in when they are sufficiently large to take care of themselves. We shall be able to increase the supply by this season's work many hundred thousands. If those from out of the State would only see that the money they will give us is for their own pleasure, and help us generally, we might give the whole country abundance of sport.

E. C. FARRINGTON, Sec'y.

Connecticut Black Bass Law.

A BILL making May and June close months for black bass has passed both Houses of the Connecticut Legislature and gone to the Governor. Up to the time of going to press it had not been signed. Under the old law the season opens June 10.

ON THE NORTH SHORE.—VII.

The Return Trip.—VII.

[Continued from page 473.]

We arose early the next morning, expecting to find the "crimson cupola" in a perfect blaze of glory, but were sadly disappointed when a dark sunless sky and misty vapor-clouds were flying low and threatening to give us a momentary shower. We were undaunted, however, and broke camp immediately after breakfast, and headed for our objective destination, Grindstone Point. The breeze was so light it would hardly straighten the sail, and to increase our headway, the astutest Emery, of forecast fame, placed himself behind a pair of oars, and dug the blades into and against the shadowy waters with a vigor that considerably accelerated our speed. It was but a brief period before Jupiter Pluvius introduced us to a merry little tinkle of rain, just enough to make us render obeisance to his royalty by donning our protective robes, the rubbers. In a very short time it ceased, the heavens brightened, and then the aurate luster beautified the earth and the waters.

At 9 o'clock we were at Grindstone Point, and camp formed in a thicket of balsam so dense that not even an insect of blood-letting proclivities or any other kind harbored there. Their absence from the place was remarkable, and only accounted for by its being too shady for habitation. It suited us to a dot, as it permitted us to keep our faces free from the odoriferous repellent, and to again feel like a white man who could trace his lineage back to civilized ancestors.

After camp was pronounced tenable, Ned declared with barbarian dialect that as he had not caught a trout for three days he would strike an avenging terror into their hearts as soon as he had reached their abiding place. We, however, concluded to first invigorate with a good square meal, and then start on the warpath for those fish infrequently called "speckled beauties." You have probably heard the appellation, and so will descant no further upon it.

While the boys were preparing the feast, we opened our cases and got out the rods, which we put together with due care for the assault upon the fortifications, where, in fancied security, the knights of the golden drapery abide. I selected a coachman for my stretcher and a cow-dung for my dropper, and after affixing them went to the water's edge and there straightened both leader and flies by repeated casts, and then was ready to embark for the attack as soon as I had placed a meal under my jacket. That culinary essential having been duly secured, word rang out for the boat, and then in less than forty winks we were all afloat, and in about as many more were sending our lures in search of the quarry. Fortunately there was a light and rising breeze that made the desirable condition in which to coax the coveted fish, and if we caught none it would not be owing to unfavorable circumstances. We were full of hope and very earnest in our pursuit, and left not an inch of the water, over which we passed, uncovered. After a steady thrashing of the surface for about a mile with stubborn determination, not a fin responded. It looked a little ominous, I must confess, but I had so often been similarly placed and yet met liberal reward, was confident ere the luster of the sun departed that we would capture trophies sufficient to satisfy our aspiring ambitions.

Ned, who was growing impatient for a rise, cried out at last, "I believe the copper-colored devils who fish for the market have secured every trout here, big and little." This observation was freighted with a practical fact, for where we had made camp were substantially erected a couple of huge fishing reels, on which they dry and repair their gill-nets, while the beach in front was lined with their rude implements of direful slaughter. This we never saw here before, but as the tinted beauties bring a big price, you can henceforth look for the semi-savage working every bit of available shore.

I consoled Ned by calling his attention to the gray rocks just ahead, which were ribbed in sunshine and shade, and over which the waves were curling the snowy foam with poetic gentleness. "There," said I, "is the place where we have led many a handsome trout to an untimely departure, and where, I think, a few more still remain. Look at that bottom, what a lovely retreat for a brigade of the sky-dyed harlequins, what fastnesses to sortie from, what chambers to repose in."

"Here goes my persuader for an embrasure," and away went Ned's flies, alighting upon the water seemingly possessed of life, and then dancing along as if striving to arise. I followed with my dainty lures, which fell in such a choice spot above a creviced rock that I was positive some emboldened, if not inquisitive, scion of the red-gartered royalty would pounce upon it with a prowess insuring his annihilation. He came not, much to my disappointment, and then I tried again and again, there and elsewhere, around this magnificent cover of fractured rocks and planted boulders, but the surface remained unbroken, save by the rising waves, and then we continued our course along the shore till we reached a long line of broken crag which ran raggedly to the lake, and there formed in pell-mell confusion into what looked like coral castles of gigantic dimensions. Having no hesitation to rob an aqueous stronghold, or pierce the throat of any dweller therein, we deliberately went to work and stormed every outpost, intrenchment, moat, portcullis, gateway and turret, with the glimpse of only one spangled red-coat that ran for dear life, and another that turned tail as he sped through one of the intrenchments. It was a bloodless battle, and though we had engaged such old soldiers as Lord Montreal, Reuben Wood, Fiery Brown and Tomah Jo, not a scarlet jacket was captured. It was a fruitless attack, and so we gathered our forces and gave pursuit to the retreating knights that so gaily sport in costumes the colors of which rival the ruby of the flower and the red of the wine.

The wind was now gradually increasing, the rolling billows growing in grandeur, while the sky, like a boundless prism, was reflecting rich and shifting tints. Slowly we progressed, as if floating on the mystical boundaries of two worlds, one rich with the treasures of memory, the other radiant with the hues of hope. The shore that came in review, as we endeavored to secure a trout, was all that a devotee of the rod would desire, so wasted was it by the fury of the tempestuous waves that nought remained of it but a stern, ragged coast line of huge granite rocks, with occasional stretches of gravelly banks that ran into dense

forests of balsam, the fragrance of which is ever a delight and an exhilaration.

Fully three miles had we come, and not a scale to show as a reward. Ned muttered ever and anon, and then the red-handed pot-hunter had anathemas heaped upon his head sufficient for his burial. He was getting in a humor for returning, but as I well knew there were fine grounds a mile or less ahead, the word to advance was promptly given. Emery was alarmed as usual about the rising breeze, which was getting up quite a respectable sea, but as we wanted a rising trout or two, we cared little for aught else. On we went, indifferent to gales, and in the course of a half hour reached the desired waters. It was business now, and the flies fell and fluttered upon all sides. Soon I heard an exclamation of joy from Ned, who had at last hung a *fontinalis*. This was followed by another more joyous tone, which conveyed the pleasing intelligence that he was battling with two. "A dozen followed my flies," cried the delighted Ned, as he was manipulating the twain.

"That being the case, with your permission, I'll try your preserve," I selfishly responded.

"All right, go ahead."

My first cast secured one that soon liberated himself. Another dropping of the lures, and my stretcher disappeared into the ravenous jaws of an exasperated and fleckered *noblesse*, who fairly singed my fingers as he sped against time in a vain endeavor to run away from himself, as well as the interested angler. Here we were with our hands full, Ned holding a pair to my ace high and both good for a pot. I was not so busy with my racing trout but what the double catch of Ned's reminded me of the farical dip of the old astronomer at the Twin Sisters, which threw us all into convulsions. With an eye to a similar scene, I suggested to Emery that he land Ned's fish, which were about ready to be taken in. At the prompting he sprang with alacrity for the net, which hasty movement being observed by Ned caused him to heartlessly cry out: "Drop that," and the over-awed Emery did drop it, and very spitefully too, and then dropped on to his seat with a dull thud, as crestfallen as if one of his forecasts had ignominiously failed him.

Ned, after casting a furtive look at me with an avenging glimmer in his gray eye, turned to Peter, who had relinquished the oars to Emery, and requested him to net the twain, which he did with a perfection of artistic grace. The confusion of the old man, and the savageness of Ned at his audacity, as he thought, in again entering for another *faux pas* with the net, was a little piece of quiet comedy I hugely enjoyed. In fact, I was so ripling with mirth that I was fearful my captive at the end of the line would desert me. After Ned saw his trout glittering in their silken sheen at the bottom of the boat, he also realized to its fullest extent the attempted ambushade, and then his seriousness gave way to a broad grin that was truly diverting.

I finally, after much blundering, saw my trout signal his surrender, and then in a patronizing way called the sage old prophet, whom I wished to mollify, to land the lovely victim. During all this time the breeze was rapidly reaching its *fortissimo* notes, until it took the efforts of both oarsmen to manage the tumbling craft. There was but one broad crevice where the quarry poised in this locality, and when we failed to send the flies over it there was no response. The boys tugged manfully to hold the Mackinac steady, and it was only occasionally we could get our feathers at the desired place, but when they did fall with precision it was a snap born of desperation from one of the maculated dwellers down in that narrow abyss.

Ned held the choice position in the bow that afternoon, and of course had his pick of the lovely inhabitants of the fissures deep. His first double catch was followed by another, but one of them worked off, while the other, a dandy, was worked into the net. I was not long behind him, for when I could lay my flies in the populated precinct of narrowness, also had the pleasure of playing one of the brilliantly-studded princelings of that royal race.

The sea was now tumbling about so lively that a suggestion came from one of the oarsmen looking to a return, but just as long as the boat would live in the neighborhood of that populous preserve, just so long did we intend to stay. The boys evidently were not pleased with our determination, but we rather liked the wild tossing of the waters, and particularly the abundance of the scarlet-hued, and so remained. It required vigorous work to keep us near that crevice, and as the half-breeds were sick of the job, they finessed in such a way as to endeavor to make us also sick of it. Ned growled considerably at their apparent awkwardness, and I materially assisted in adding to the irritation; but we caught trout all the same, which, if it did not lighten their labors, added to our sum of infinite happiness.

As the time came for departure, I asked the boatmen what the wild waves were uttering, and with one accord they gleefully sang out, "Home," and then we gave the word to hoist the old rag and let her boil through the troubled sea. And she did boil, swiftly speeding with a fan-shaped wake spreading from her bow, and the milk-white foam curving with the dazzle of sifted snows from either side. We had captured eight magnificent trophies that were punctuated with tinted periods, carmined with the red of the cherry, and blushing with the purple of the grape.

It was about four miles to camp, and with the swiftness we were cleaving the furrowed lake would soon be there. The deep shadows were lengthening with the sinking sun, and great flakes of crimson clouds gathering around the evening throne of the dazzling luminary, to bid it an adieu as it kissed the crystal waters a good night.

We reached our quarters a little before sunset, and the oarsmen were really glad of it, as the afternoon had been a very vexatious one to them, particularly to the profound Emery, who felt as if he were in disgrace, owing to Ned not allowing him an opportunity to retrieve his fiasco of the ridiculous netting of the doublet at Twin Sisters. Ned stated that Emery's talent was altogether of a celestial character, and entirely in contradistinction to any accomplishment pertaining to the aqueous. Cloud life was his sole and only study from early morn to dewy eve, and whether of snowy drapery, mantling or crimson, flying, drifting or drowsy, he could snatch therefrom, with his intuitive knowledge, a forecast that would drive to desperation any scientist or student of the elements. It was his hobby, and he rode it often and he rode it hard.

The boys gave us an elegant supper that evening, the

pièce de résistance being a fresh trout broiled to perfection, that would have delighted the cultivated appetite of the most dainty epicure. A planked shad, in its perfection, is said to be one of the culinary arts, but a broiled trout, such as graced our table, is the *ne plus ultra* of all dishes served from the dwellers of the deep. Roughing it, with limited commissary stores and a cook who is only that in name, may be agreeable to some sportsmen, but we believe that camp life is much enhanced by a little extra attention to things toothsome, and, in affirming this, we wish it distinctly understood that we are not feather-bed anglers by any means. The comforts and comestibles materially assist in bridging over many a cold and stormy day, and bring frequent glimpses of sunshine when the heavens are veiled in a funeral pall. We are happily in accord with Byron when he declares that

"All human history attests
That happiness for man—the hungry sinner—
Since Eve ate apples—much depends on dinner!"

Our repast over, we had nothing to do till bedtime but sit in the deep shadows of the dense forest and mix the fragrance of our regalias with the health-giving odors from the balsamic woods, admire the brilliancy of the stars as they watched the sleeping earth, listen to the music of the beating waves as they strove to utter the story of the sea, and watch the silvered lake, as if looking for a rising Venus or a troop of Naiads. It was so supremely quiet, save the throbbing waters, that not even an orchestral note was heard from the cloudy army, nor a resonant sound quivered through the breathless air. Even the boding owl, that hails the rising moon, sang not his woeful dirges, while the ephemera that make shrub and bush burn with diamond-like glimmer, were nowhere to be seen. It was such a slumbering, death-like silence, such a deep solitude, so lonely and desolate, that we arose with a determination to shake off the oppression which held us so firmly in its embrace. A bonfire was suggested, and at it we went with activity and vigor, and soon the débris of cast-up timber along the serrated shore was gathered into a gigantic pile that would have sufficed for a funeral pyre for hundreds of widowed Hindoos. The torch applied, the flames leaped upon the air, carrying with them a golden rain of sparks that were tossed about like fire-flies in the eddying circles of the chilly atmosphere. Some faded and were speedily lost to view, while others of more body, gaining the limit of ascension, slowly fell, showing all the brilliancy of the bright stars of a firmament on a wandering journey through space. The deep red glare spread out as luminous as a beacon light, falling alike upon wood and water, which it peopled with weird shadows that stood boldly out like gigantic specters. After industriously feeding and watching the fire for hours, that capricious jade, the wind, suddenly shifted to the south, and then sent showers of bright sparks directly upon our tents, and from being carriers of wood we very suddenly became carriers of water, and very anxious guardians over our inflammable structures, until the dangerous flames ceased arising and the fire had fallen to embers. We then retired and slept as soundly as if on roseate beds.

ALEX. STARBUCK.

[TO BE CONCLUDED.]

THE "KINGFISHERS" IN CANADA.—IV.

Big Basswood Lake.

LOON LAKE lies off from the head of Big Basswood about a mile and a half, and is a mile or more in length, and according to brother Dobie, contains only brook trout that run large, from $\frac{1}{2}$ to $\frac{3}{4}$ lbs. He said the lake was deep and the fish very shy, but large strings had been taken under favorable conditions of weather and wind.

A couple of the boys got a bad case of "big trout fever" and made a trip up to the lake. They left their boat at the head of Big Basswood and walked to the Edgeson farm, a half mile or less from the lake—they were our cook's people and just as good and clever as they could be—and stayed all night. They were at the lake early in the morning, but it was so rough they could do nothing with the one old boat on the lake, and after a good deal of sweating and swearing they came back without having got a rise or a nibble, tired, disgusted, but not altogether cast down. Who ever knew a trout fisher to lose his grip without "one more try?"

This must have been one of the unfavorable conditions. Several days after they made another trip, but this time they got one of the Harris boys to take them up the road, and as near the lake as they could get on his buckboard. This time the lake was as smooth as a duck pond and "they fished, and fished, and fished, and fished, and then they fished some more," but nary a rise or nibble, "the same as it was before," nor did they see a fish of any kind except a few lazy suckers.

This ended the fishing at Loon-atic Lake, as it appeared the "favorable conditions" were not for us.

Mud Lake was tried with better results. Off and on, several days were spent on it by one or two of us at a time and always some fish were taken. This lake is about five miles long by one-fourth to one mile, or a little more, at the widest, and turns out bass, pike-perch, pickerel and maskinonge, and we got some of each except the latter. While fishing down at the foot of the lake one day a native told me that one of his neighbors had the head of one killed by a spear that weighed 42 lbs., and he invited me to walk back to the farm half a mile or so and see it, but I did not go—and that was as near as I came to catching a maskinonge. We didn't take a great many bass out of this lake, but those we got were good ones, running from 3 to near 4 lbs. in weight, and they were all small-mouths. We did not take into account the pickerel nor the pike-perch.

As before mentioned, Mud Lake is a half mile, perhaps a little more, south of Big Basswood and near 98 ft. lower. The upper end for more than a quarter of a mile is full of grass and bulrushes growing up from a mud bottom, and patches of rushes are found along the east shore for three or four miles down. The shores at the upper end are low and flat, but the west shore, after about a mile down, gets high and rocky clear down to near the outlet.

The water has a muddy cast, notably at the extreme upper end. The Indian name of this lake is "Pakawagamencau," that of Big Basswood "Waquakobing," which the reader is at liberty to twist his jaw on, as I did.

The names are taken from Dyer's Government survey map, but it does not give the Indian names for the other

lakes in the immediate region, which is doubtless a blessing in disguise.

Clear Lake is about three miles northeast of Dyer's place, and is a very lovely little sheet of water and alive with fish; bass, pike-perch and pickerel, although the latter are not plentiful enough to be much of a nuisance.

The first trip to it was made on foot by Harry and Charley for the especial purpose of getting some pike-perch for the table, as we all had a notion that pike-perch would improve the smell in the fryin' pans, although the bass in Big Basswood were as fine flavored and firm of flesh as any we had eaten in many years.

They borrowed a skiff of a Mr. Hagans, living near the head of the lake, and had some great sport, and were back before sundown with a string of wall-eyes carried between them on a pole, that reminded me of some "episodes" on the Tippecanoe River a good many years ago. They had taken twenty-five or thirty bass too, but returned them all to the water as they only cared to bring back the wall-eyes.

After this we all took a whack at Clear Lake by twos, but we got Will Harris to take us over on his buckboard in the early morning and to come back after us in the evening.

The lake is about one and a quarter miles long, or may be a little more, and a quarter of a mile wide—at least this is the guess we made on it—and surrounded by lovely green woods growing down to the water's edge, except twenty rods or so in front of Hagans's house. There are some burshes and patches of grass in spots around the shores, but the bottom for the most part is rocky and gravelly. The water is very pure and almost as clear as that in Big Basswood; in fact the lake is a little gem set in an emerald rim of evergreens surrounding it. The bass in it run at least a pound heavier than those in Big Basswood—3 to 4 lbs.—and there seems to be no limit to their numbers, and they take anything in the shape of bait, a rubber helgramite being a lure that they "fell over each other" after in the scramble to see which could first grab it.

A party of three or four could have great sport in Clear Lake, and there are two or three good camping places on it and a couple of skiffs that might be had, but the better way would be to take in a canvas boat or two and be independent. We did not try to fish Little Basswood, as Big Basswood, Mud and Clear lakes gave us about all the sport we could stand, not counting the two trips to Loonatic Lake.

We had heard a good deal about the rugged scenery over at the falls on the Mississauga River, and one evening a trip to them was planned for the next day by four of our boys and a couple of the Harris boys, over the portage from the foot of Big Basswood, Harry taking his Kodak along to procure some views of the wild, rocky gorge through which the river rushes. He got four or five good snap shots at the falls and the rocks, and they came back late in the evening, tired out and nearly starved, but Harry was happy in anticipation of having some fine views for us after he got home and had them finished up.

It may be noted, however, that when finishing up time came the film was found to have been defective, and there was "nary a view" on it, no more than had he used a pine board for a film, nor was there anything on it to show for the shots he had taken of the camp and wild places along Big Basswood; and then Harry made a few remarks that wouldn't look well in print, so it won't be worth while to jot them down.

The country round about us was well settled, and our neighbors were hospitable and obliging, albeit we were between two fires when we tried to please Dyer and the Harrises at the same time. The Harrises always had something derogatory to say about Dyer, and it was like shaking a red rag at a bull to mention the name of a Harris in Brother Dyer's presence.

We outsiders couldn't afford to take sides in a neighborhood quarrel, and we had a tough time trying to carry water on both shoulders and not spilling of it; but by a strict neutrality and a straightforward course we managed to maintain friendly relations with both sides and keep out of a snarl. We treated all our neighbors alike, with friendliness, respect and courtesy, and they could do little less than treat us in the same manner in return.

I am at liberty to say that the feud existing between Dyer and the Harris family was started by the death of a dog. When Dyer located there he brought with him a fine dog—a setter, or spaniel, I have forgotten which—that he loved better perhaps than he did any human, and not long after the dog was poisoned, whether accidentally or on purpose has never been thoroughly established in the minds of the neighbors, as they are divided in their opinions about it. At any rate Dyer laid it at the door of the Harrises, and ever since there has been hard feeling and bitterness between them, and the breach seems to be widening instead of closing up; more's the pity.

Dyer buried the dog at the foot of a tree near the corner of his house, wrote an epitaph (I have a copy of it but have mislaid it) extolling the good qualities of his dead companion, and scoring the unknown murderer, and nursed his righteous wrath, for it *was* a wanton act, if purposely committed.

However, there was no positive proof that the Harrises were the guilty party, but it was wasting time trying to convince him otherwise, and his bitterness abides against them and knows no abating.

He framed the epitaph and secured it to the tree 10 ft. over the grave, to be out of the reach of troublesome neighbors, and it stands sentinel over the dead dog in sun and storm, and rain and snow, to remind him of the best friend he ever had.

This love for his dog was one of the best traits in the old fellow's make up and atoned, in our eyes, for a multitude of his other eccentricities, for no man can be very badly out of plumb who loves his dog, his gun and his rod, and we kept on liking him better as we knew him from day to day.

We made up our minds (at least I speak for myself) that he was not half as black as painted by the Harrises, and at the same time we could have nothing but good words to say of them, for they were good neighbors and very accommodating to us.

They invited us all to dinner and supper at different times, and most of the boys accepted, but the Colonel, Kelpie and I sent our excuses; not that we didn't want to please them and be neighborly, but we felt that if we went over to the enemy in a body, Brother Dyer would take it as a slight, so we remained in camp and propitiated both sides by dividing our force.

But with all these little drawbacks, we enjoyed the camp

and the fishing, and especially did we enjoy the scenery around Big Basswood Lake, and we wished we could stay there the summer through.

At the end of a couple of weeks Harry had to make a trip back to Omena, Mich., to attend the annual meeting of the directors of the Omena Hotel Association, of which he was secretary, and Br'er Snider went out with him to return home. A week later Old Sam and Charley and "son Owen" left us for home, their time having expired, and there were only left the Colonel, Kelpie and "Hickory" to swap lies around the nightly camp-fire till the last chunk burned out.

While it is in mind I may mention that Brother Dobie wrote us to bring plenty of "dope," as the black flies and skeeters were very bad, but we were agreeably surprised to find not a solitary black fly and only a few vagrant mosquitoes that were too thin to make a shadow. These we paid no attention to, and the bars were not put up in any of the tents.

Harry was back in a day or two after the Kentuckians left, bringing Gooder with him, and in a few days my time was up, and I packed my traps and took the back track for home, leaving the Colonel, Kelpie, Harry and Gooder in camp, they having decided to stay a couple of weeks longer to see if the big lake trout would begin to bite. I got Tom Griggs, the storekeeper at Day Mills, to drive me out to Dayton, a station on the railroad three and a half miles from Dyer's place, and from there home the trail was plain. The other boys had gone out the same way, and it is much the best way out, as it saves nearly eleven miles driving, and it would be the best way to go in if the teams could be had at Dayton.

A short distance out from the Canada Soo our friend Hill got on the train, and recognizing me we shook hands like old cronies and had a pleasant chat while pulling up to the station. Meantime he asked me to point out my baggage, on which he put his "chalk mark," & which meant to the eye of the inspector on the American side to pass it without examination, and we "shook agin," and I went on my way under many obligations to brother Hill for his courtesy to me and the other boys, who had gone out under the same liberal treatment from him.

The four other boys remained in camp about ten days, and when they came out he handed the Colonel the deposit put up on going in, put his chalk mark on all the calamities and sent them on their way rejoicing. Long may he wave and continue to write "H. M. C." after his name, for he is a kindly gentleman and a friend to those who go a-fishing.

We will long remember Big Basswood Lake as the best bass pocket we have found since fishing Brown's Lake on the Upper Peninsula of Michigan, and Clear Lake is just as good for a smaller party. We took altogether 816 bass, and I really believe might have taken three times that number had we been so minded and not spent so much time "profligatin' round" over the country, but then exploring new waters is almost half the charm and pleasure of going to the woods.

Besides the bass, we caught near to a couple of hundred pike-perch, pickerel and brook trout, but none of the three latter in Big Basswood except the three trout before mentioned. We kept a daily score of all the fish taken, but like the epitaph of Dyer's dog, my copy of it has been mislaid and I can't just now put my hand on it. At any rate, I remember that the highest number of bass taken in one day was 81, and the lowest—when any of us fished—was one solitary bass of 3½ lbs. This one I took one Sunday at the very outlet of Mud Lake, when "feelin' round" the lower end of the lake by myself for a maskinonje—which I didn't find.

Besides the four lakes lying near Big Basswood, there is another small one, Round Lake, two miles east of Clear Lake, that Dyer says is full of big bass. Then twenty miles northeast of Dyer's is Chiblow Lake, that he says is strictly a trout lake, full of big ones. This lake has a great local reputation for trout and would no doubt well repay a visit.

Brother Dobie also wrote us about a wild region thirty miles east of Thessalon, the Blind River country, where he says the waters swarm with fish and the woods are full of game, and it has never been disturbed except by a few lumbermen and the Indians.

This region lies back north thirty or forty miles from the North Passage, and can only be reached with any comfort by going up Blind River (flowing into the North Passage) in boats or canoes to some virgin lakes and streams where bass and trout are as plentiful as huckleberries, and deer and bear abundant, besides "quite a few" caribou to give variety to the sport.

Taken altogether, this region drained by the Thessalon, Mississauga (I find on consulting the map that my previous spelling of the name of this river is wrong) and Blind rivers, is a paradise for the "rodsters," and when game is in season the "gunster"—I trust Brother Starbuck and "Hoosier" will not kick at my stealing a little of their shoddy—may revel in "pure delight."

But we found Big Basswood Lake and the region immediately around it "good enough for the Joneses," and there is not much use in looking further for the very best of bass fishing and solid comfort in the matter of a camp; there are "lashin's" of huckleberries and "rozberries," and milk, butter and eggs to be had, and a piece of fresh mutton from some of the neighbors whenever wanted, to take the taste of fish out of your mouth. Besides all these "natural advantages" there is an unpainted frame church-house a hundred yards or so southwest of Dyer's house, where religious services are held every Sunday afternoon and evening. The services while we were there were of the Methodist variety, and the camp attended in a body, except two or three old unreconstructed sinners who were satisfied to "find tongues in trees, books in the running brooks, and sermons in stones."

Since we were there last summer I have had considerable pleasant correspondence with Brother Dyer, and among other matters he said he caught in October after we left nearly 200 lake trout running from 3 to 12 lbs. in weight. He wrote, too, that in February the snow was 6 ft. deep where our tents stood, and added, "rather a pleasant prospect for a summer resort." He is also going to have four or five good boats built, which will be for hire at reasonable rates, but it is always a good notion for a party to have at least one canvas boat, in case a side trip to some other lake is to be made.

A party intending to make a camp anywhere in that neck o' woods will need to take their supplies in with them, such as bacon, salt pork, hard bread, etc., as commodities of this kind are scarce at Day Mills. However,

it would not be much trouble to hire a team and go or send in to Thessalon after them.

Tom Griggs keeps a little country store at the foot of the hill right in "the heart of the city," but although Tom is a good fellow his stock of goods is not extensive nor much varied; nevertheless, we found it handy to run to for odds and ends when needed.

I think the easiest way to get to Big Basswood is to get off the train at Dayton, 3½ miles from the outlet of the lake, but it would be necessary to write ahead to Dyer to have teams in waiting at the station. Tom Griggs and the Harrises have teams, but Dyer would rather undertake to swim the entire length of Big Basswood than to have any dealings with the Harris family. He even goes to Sowerby, 3 miles, after his mail rather than receive it of Harris, who is postmaster at Day Mills, a little more than a quarter of a mile from his house.

However, all needed information about teams and getting there may be had by writing him—Geo. F. Dyer, Sowerby, District of Algoma, Ont., Canada, or in case it is preferred to go in by Thessalon, write to Tom Glancey, liveryman, Thessalon, Ont., Canada. The other liveryman at Thessalon hauled us out, but as I never take notes his name has slipped out of my head. I remember Glancey as having paid our camp a visit one Sunday, and returning with his buggy full of bass, which of course he caught all by himself.

On looking at a map on a last year's Canadian Pacific Railroad folder it seems that the best way for one going to Big Basswood from New York or the East is to strike the C. P. R. R. at Brockville, Ont., opposite Morristown, N. Y. Change at Sudbury to the southern branch of the road that runs to the Soo and get off at Dayton or Thessalon as preferred. Or go around to Toronto, and from there north on a railroad that strikes the C. P. at North Bay, thence west to Sudbury and change to the southern branch as before mentioned.

But now, to reel up these already too long bass notes, I trust that Brother Dyer will not "hold a skunner agin me" for the little facetiousness that may have cropped out, for there is no malice in it, nothing but kindly feeling and a "proclivity," it may be, to portray things as we saw them.

To the brethren of the rod who may take a notion to wet a line in the Basswood region I may say, you will find him, with all his roughness of surroundings, a well-posted gentleman; a trifle crusty and stiff, perhaps, but get inside his shell and you'll find him better than he shows outside. He loves a dog, a gun and a fishing rod, and that's warrant enough to commend him to those who go a-fishing.

As to our other neighbors, I can't say too well of them, for they treated us the very best.

In regard to the wild beauty of the lake and the fishing therein, I have not overdrawn it in the least—rather the other way, if anything—and to the brother who yearns for a few weeks' rest, recreation and great sport with the rod, I can say with candor, make your summer camp on the bank of the ever lovely "Waquekobing." KINGFISHER.

CINCINNATI, O., May 27.

"Forest and Stream" Fishing Postals.

MAINE FISHING has been a little backward, though some fine catches have been made in every section. The coming three weeks (from June 1) will show the best of salmon fishing. At Weld, Franklin county, and Sebec, Piscataquis county, the salmon will be abundant without doubt for the next two weeks, and trout fishing in all the waters will be fine for several weeks. Owing to considerable rainfall, brook trout fishing will be good all through June and in the northern sections much later. Weld Lake is reached by going from Portland to Wilton and staging ten miles over a most picturesque section; and the lake is charmingly situated. Hotel and boarding very reasonable. David Phinney has a fine cottage, with all the comforts of bed and table, close to the lake at low day rates. Sebec is reached from Bangor over the Bangor & Aroostook road, an hour's ride, or by Newport and Dover by M. C. R. R. and Bangor. There is hardly any water in Maine but will afford fine fishing now. A large number of anglers are in the Rangeley region, and all are having good catches so far as heard from.

E. C. FARRINGTON.

GARDEN OF EDEN, Nova Scotia, May 26.—The fishing at this place has opened very fair. First guest of the season, Mr. R. F. Boyer, of Pugwash, N. S., caught 19 nice square-tail trout, all of good size, and Mr. A. R. Monroe, of New Glasgow, 60 large trout, all in one day's fishing. The fishing, I expect, will be still better in a week or so, when a catch of 125 lake trout in a day's fishing is nothing unusual. CAMP PHENIX.

PAUPAC, Pa., May 29.—The season is extremely late here in Pike county, and of course the trout fishing is governed somewhat by the weather and condition of the brook. Very little fishing in this vicinity has been done. I know of two very nice catches, first lot two weeks ago of 150, but they were very small and poor. But yesterday two fishermen caught 120, some very fine ones. But they are not in good condition yet. About June 10 or 15 will be soon enough for good trout fishing in this locality. O. J. RIMBLE.

SHOHOLA FALLS, Lackawanna, Pa.—Mr. E. F. Allen, of Sloatsburg, caught 120 trout, the largest weighing 2½ lbs., the smallest ¼ lb. Mr. E. Reviere, of Milford, caught 25 trout, the largest weighing 11½ oz., the smallest 6 oz. Mr. M. Lambert caught 35, the largest ¼ lb. Fishing prospects are good. G. W. HART.

ASBURY PARK, May 26.—Plaice are biting freely in Manasquan River; two anglers took 200 lbs. yesterday with rod and reel. Take C. R. R. of N. J. to Brielle Station. I would advise anglers to procure bait elsewhere, as I have always found it extremely difficult to get bait at that point. LEONARD HULT.

THREE LAKES, Wis., May 23.—Messrs. G. A. Barlow, O. J. Smith and F. R. French, caught eight maskallonge last week; the largest weighed 31 lbs. Fishing is good. The great bass lakes, Franklin and Butternut, can be reached in a few hours' ride from my place. F. R. FRENCH.

BLACK BROOK, N. Y., June 1.—Good fishing for trout has just commenced here. Snow water pretty well gone. Good catches are daily reported. W. L. Baldwin and small son caught 100 in a half day in one of the small

brooks near us on May 31. The best fishing will be for the next two weeks. W. W. PIERCE.

NEVERSINK, N. Y. (Fallsburgh), June 3.—Two large trout were caught in the Neversink to-day, one by Jay M. Freer and one by Willie Dean, both German trout, weighing 1½ lbs. and 2 lbs., caught just below the Neversink Valley House. The Neversink River was stocked with German trout four years ago. Prospects for next week are good. HENRY W. DEAN.

BOSTON, June 1.—I shall leave for the Marguerite River, Lower Saguenay, on June 8 or 10 to spend two months with nature and the salmon. I am in perfect health, never having had a sick day in my life. I shall be seventy years old on June 14, and can hold my own under all circumstances. I still pole the bow of my canoe as of old. WALTER M. BRACKETT.

HENDERSON HARBOR (Adams), N. Y., May 30.—H. L. Bawey caught twenty-six black bass, average 1½ lbs. each; Dr. H. L. O'Brien caught twenty-eight bass, average 1 lb., caught with minnows June 2. Dr. H. L. O'Brien caught twelve bass with fly. H. H. GILL.

THE THOUSAND ISLANDS.—Clayton, N. Y., June 2.—The St. Lawrence River season for bass fishing opened here last Tuesday, 30th ult., with several fine catches, Eel Bay, near Clayton, affording especially good fishing. The work of the Anglers' Association in the prevention of netting is now showing fine results, the guides reporting bass more numerous and larger than for several seasons past. J. G. FRASER.

CORTLAND, June 3.—A. E. Livingston of Syracuse writes me that Messrs. D. D. Candee, F. R. Candee and Dr. F. B. Putnam of that city, spent the 29th and 30th ult. trout fishing near Redfield, Oswego county, and returned to Syracuse with an unusually fine catch—over two hundred beauties. The heaviest weighed 2½ oz. and a very large number over a pound. A good many black bass were taken in this part of the State Decoration Day. Pickerel in Otisco Lake are said to be biting to beat the band now. W. A. Baker, of this city, who fished there May 30, tells me that at least 300 pickerel, some of them weighing 2½ lbs. each, were taken from that lake on that day. Skip bait, he tells me, was the most killing lure used. M. C. H.

DENVER, Col., May 24.—On Saturday, May 23, A. B. McGaffey, of Denver, caught twenty-two trout in Wellington Lake, which weighed when dressed 18 lbs.

A Pickerel Mortality.

PROVINCETOWN, Mass., May 21.—Hundreds of pickerel have died in one of the ponds in Provincetown. At some places on the edge of the pond could be counted from fifteen to twenty-seven dead pickerel, from very small ones to those of 2 and 3 lbs., which is as large as we ever get them. The winter was an unusually severe one, and it has been claimed by some sportsmen that they were frozen in the mud, but if that is the case why did the other ponds not produce the same results? They are no deeper, and this particular pond has always produced as good pickerel as any pond we have. CAPE COD.

A Shelved Trout Rod.

CHARLESTOWN, N. H., June 5.—I have shelved the trout rod for this year in this region. Four tramps of twice as many miles have produced only three trout over 5 in. long and perhaps three times as many fingerlings thrown back. Last fall's drought, also last winter's freeze have depopulated the brooks in this part of the State, and we must wait a few years ere they will restock. After the 15th I shall try the river for bass and pike-perch. I hear of a good many pike caught, but have seen none myself. VON W.

A Connecticut River Muscalonge.

HADLEY, Mass., May 25.—A 13-pound muscalonge was caught in a bayou of the Connecticut River in the Hadley Meadows yesterday. The water is very high yet and the fish keep in shallow spots as much as possible. I think we have better summer fishing after a cold wet spring than we do when the spring is warm and the water low. E. S. H.

Danvis Folks.

DENVER, Col., April 22.—Editor *Forest and Stream*: We read much in these days about "realism" in literature. Most of it is a sort of dry rot, or emotional. But commend me to such work as the second instalment of "Danvis Folks." The going away of the "old folks" was very pathetic, I remember, but the coming back of Uncle Lisha and Aunt Jerusha is conducive to smiles and tears. Mr. Robinson has surpassed himself, and I will not believe that he can better the second contribution until I see it. Convey my thanks to him, for one, with the prayer that his days may be lengthened to delight us with the tender, life-like work, so perfectly natural that in reading I anticipate the coming sentence, and that of itself is always a pleasurable sensation, and makes you feel that everything dovetails just as you would have it. It was done skillfully and tenderly. L. B. FRANCE.

THE QUEBEC & LAKE ST. JOHN RAILWAY COMPANY issue a very interesting and well illustrated little guide book to the country through which their railway runs. It pictures and describes the famous trout and muscalonge waters lying north of Quebec, and also the new route to the Saguenay, which this road has opened up. Formerly tourists to either Lake St. John or the Saguenay were obliged to go and return by the same route, but now by means of this new railway extension the lake is connected with the navigable waters of the Saguenay, and a delightful "round trip" from the city of Quebec made possible. The guide will be sent free on receipt of a postal by the Quebec & Lake St. John Railway, Quebec.—*Adv.*

PERHAPS the finest line of boats, skiffs, sailing and paddling canoes, steam, naphtha and electric launches, can be seen in the warehouses of William Wood, 25 West 125th street, New York city. We would suggest a visit to those who contemplate the purchase of anything in the line of boats or boating hardware. To those out of town a new and handsome illustrated catalogue will be mailed free on application. *Adv.*

THE BEST LINE TO CALIFORNIA from either Chicago or St. Louis is the Burlington route. Takes you via Denver, Colorado Springs, Leadville, Salt Lake and Ogden. Daily vestibuled trains, with Pullman sleepers, chair cars (seats free) and Burlington route dining cars.—*Adv.*

The Kennel.

Communications for publication relating to business should be addressed to the *Forest and Stream* Pub. Co. If addressed to an individual they will be subject to delay in that individual's absence.

FIXTURES.

DOG SHOWS.

June 6 to 9.—Wissahickon, Pa., Seminole Kennels, Sec'y, Chestnut Hill, Pa.
Aug. 30 to Sept. 2.—Blue Grass Kennel Club, at Lexington, Ky. Mr. Roger Williams, Sec'y.
Sept. 19 to 22.—World's Fair, Chicago. W. I. Buchanan, Chief Dept. of Agriculture.
Sept. 11 to 15.—Toronto, Canada. C. A. Stone, Sec'y.

FIELD TRIALS.

Sept. 4.—Northwestern Field Trial Club's second annual trials, Manitoba. Thos. Johnson, Sec'y, Winnipeg.
Sept. 12.—Manitoba Field Trials Club's Trials, Souris, Manitoba. E. D. Adams, Sec'y, Winnipeg.

CHLOE.

Nov. 6.—United States Field Trials Club's Fall Trials, Bicknell, Ind. P. T. Madison, Sec'y, Indianapolis.
Nov. 7.—International Field Trial Club's Fourth Trials, Chatham, Ont. W. B. Wells, Sec'y, Chatham.
Nov. 15.—Ohio Field Trial Club's Second Trials, Canton, O. C. V. Lellinger, Sec'y.
Nov. 15.—American Field Trial Club Trials, at Carlisle, Ind. W. J. Beck, Sec'y, Columbus, Ind.
Nov. 30.—Eastern Field Trial Club's Trials, at Newton, N. C. Members' Stake Nov. 16. W. A. Coster, Sec'y.
1894.
Jan. 22.—Southern Field Trial Club's Trials, New Albany, Miss. T. M. Brumby, Sec'y, Marietta, Ga.
Feb. 19.—United States Field Trials Club's Spring Trials, Grand Junction, Tenn. P. T. Madison, Sec'y, Indianapolis, Ind.

AMERICAN PET DOG CLUB'S SHOW.

The first show of the Pet Dog Club, which closed last Friday night, was not the financial success its promoters wished for, nor what they deserved. The attendance throughout, except possibly on Wednesday afternoon and Friday night, was meager in the extreme. Had the club gone to heavy expense the result no doubt would be disastrous; as it is the guarantee fund of \$500 will probably be largely drawn upon. No show could have been more prettily arranged nor better managed in many respects. At all times the aisles were kept well swept, and the many decorations on the cages lent a gala aspect to the whole affair. Mr. Rackham as superintendent was most attentive to his duties, and always ready with a pleasant word and courteous treatment. He is just the man for a lady's dog show. The secretary—we feel that the ordinary praise accorded to the show secretary conveys but little of the feelings that exhibitors felt for this

BEDGEBOY LION.

Owned by Retnor Kennels.

hard-worked official. Upon Miss Bannister has fallen the brunt of the battle, not only at the show but for weeks beforehand, and it is not too much to say that but for Sallie Pippin's owner no show would have been held. We are always ready to condole with a show secretary, but Miss Bannister is the first woman we have met in this position, and we are tempted to condole and praise some more. With all due respect to Mrs. Trevor's feelings, had the secretary's Glenheim won the special painting for the most popular dog owned by a lady, the verdict would indeed have been a popular one.

Additional names of those who attended the show are Mr. and Mrs. E. Clarke, H. G. Holmes, A. H. Heppner, C. D. Bernheimer, H. W. Huntington and daughter, H. Nelson, Robt. Lyons and others. Dr. Cattanch was the veterinarian, but he allowed several dogs in without examination. In fact

on Monday night the arrangements for receiving the dogs were not quite as strictly attended to as they should have been. One cocker spaniel slipped its collar, got out of the building and was going down Madison avenue when stopped by a bulldog fancier who, seeing it was a good one, thought perhaps it came from the show. He caught it and took it into the building, and finding the empty collar and stall, fastened the cocker up again. This was luck that might not happen again in a similar case. Spratts Co. benched and fed in their usual able manner and Thymo-cresol was the disinfectant. At noon on the first day the club gave a luncheon to the judges, and a very enjoyable hour was spent in discussing the good things provided by the host of the Madison Hotel. It ill befits one to quarrel with one's bread and butter, but a hearty meal in the middle of the day is poor training for the judge's ring.

COCKER SPANIELS (C. H. Mason, Judge).—With two of our leading kennels represented by some of their best stock, the quality of this exhibit could not be gainsaid. That more entries were not on hand is a matter for wonder, but probably the same causes affected this as in other breeds—the additional rule referring to more than three entries in one class or first prize money would be withheld; also the season of the year when most kennels devote the spring time to breeding operations. In the absence of Middy in the challenge dog class, Fascination, in excellent condition, had things his own way. In the corresponding class, however, there was a little more work for the judge; the winner, I say, is a better size besides beating Troublesome in skull and muzzle, though the latter has a better front. A nice little fellow, Duke Oban, though his appearance was marred by an ulcerated eye, won from Brantford Jet; he is more of a cocker than the other, but his coat was ragged and his head is not very well shaped and he is a bit long in body. Brantford Jet is coarse in head among other things, more of the field type, and his lathy long body is against him. Little Vix, vhc., is a little long and coarse in skull, needs more rib, good front. In bitches the well known winner Miss Waggle, crept up another notch nearer the challenge class; her legs and body are capital, and here she beats Rosedale Duchess decisively, the latter being a bit long in body, but well formed and very crooked in front. Lady Fidget, reserve, is a little on the large size and quite long enough in head and body, good front and rare substance and nice coat. Lady Phyllis was vhc., beaten in ribs and head. In any other color Othello, improved on his Boston form, but quite large enough, was placed over Cherry Punch, a rather coarse-headed red, but good front and body. Movement, reserve, has a faulty muzzle and flat skull, good legs, but is short of rib. Red Ragland, hc., has a bad front, weak muzzle, carries his ears too high and has a weedy look, not at all up to the Walker House standard. In bitches, a very sweet expression has Ruth S., the winner, though she is a little fine in muzzle, stands on good straight legs; she is a year old and her body will probably fill out yet; she had no difficulty in beating Mary Queen of Scots, indifferent in head and front. The novice class winners in ten entries have been commented upon above. First was withheld in pups and second given to Corktown Coy, whose pinched, narrow head, poor forelegs, and being undershot as well, served to throw her out. Fascination was deemed the best in the show, and by the aid of him and I say and Troublesome Mr. Bell won the brace and trio special.

POODLES (E. H. Morris, Judge).—This breed, thanks to Mr. Trevor's entries, principally, was well represented, and the curly-coated ones predominated. In challenge dogs, Tell, second at New York, faulty in muzzle and skull, was alone. In open dogs the class was a little more lively. A new one appeared on the scene, a strapping big well-made fellow with a grand muzzle especially, but his coat is too fluffy and needs not quite so much attention as it evidently has had; he was also fat. It is allowable to trim a poodle, and probably when we see Radjah again he will look more symmetrical. Milo, as they stood, was the best in the class and had the truest coat; he is well known. Tidi was at Boston; his quarters droop but his coat is fairly good. Vic, vhc., another Caniche, falls away in quarters too sharply and is not so good in shoulders, but has a nice coat. The bitch class was headed by the smart little Chloe, repeating her New York and Boston victories; she is one of the best we have. Frou Frou came second; she is a daughter of Milo and Chloe and is of good type. Dinah has a capital coat but is faulty in head. The novice winner was Radjah, and that easily, as Lisette's coat is too woolly and mixed and head poor. First was withheld from Victoria. Mr. Morris made his debut as judge in these classes and his awards gave satisfaction. Mr. Trevor won the kennel prize and most of the other specials.

BULLDOGS (James Mortimer, Judge).—The entries were not large in each class, and those in many instances were only mediocre, the presence of Bedgebury Lion, Pathfinder and one or two others saved the credit of the breed. Old Pathfinder looked well and was alone in the challenge dog class, and so was Addiscombe Gypsy in her division, Salem being absent. Open dogs, 4½ lbs. and over, brought out the great Bedgebury Lion, whose importation by Retnor Kennels we spoke of recently. The dog was sent over in bad condition, and it has been as much as even his owner could do to get him decently covered with hair; he was low in flesh, but there was enough of him to show that he comes well up to expectations; his head is exceptionally well wrinkled, plenty of skull, deep stop, broad, deep muzzle and just enough layback, eye might be a little more prominent, capital ears, well ribbed pear-shaped body and good swing in action; well out at the shoulder, but not too much so; his forelegs are not as straight in bone as they should be and his feet are too open; he is white with a small patch or two on body. Our old friend Handsome Dan can scarcely be considered as a serious competitor with the winner, but he in turn had his revenge in handsomely defeating Bill Sykes, whose narrow, long muzzle, poor stop and straight shoulders were much to his discredit; good ears and fair body. Rustic Sovereign was absent and Bathos took no part in the competition. In heavy bitches the well-known Dolly Tester was alone; muzzle and skull should be broader. Tim, the only representative in light-weight dogs, was only considered good enough for second in solitary competition; his head is not badly shaped, but it is very plain, lacks wrinkle, and he has bad forelegs, pasterns and feet, and is faulty behind, so he got all he deserved. Premier honors were also withheld from Dollie in the next class, though she is a much better specimen than the dog Tim; good shaped head and depth of stop, a sore on her head may have put her down. Handsome Jane is a misnomer in bulldog circles and does not do her breeding credit. A capital pup, English bred, by Bithnal Billy, was given first in its class; excellent skull and muzzle, good legs and body, well-ribbed, but too long, a promising youngster that has a sister, Venus, that is equally as good, but was under the weather and, like Eulalie, did not come.

BULL-TERRIERS (C. H. Mason, Judge).—A fair entry came forward in this breed; nearly half were duplicates, and many youngsters made their debut. In the absence of Attraction, Edgewood Wonder, looking a little above herself, well deserved the challenge honors. In heavy dogs, Lord Blandford, the only entry, is a bit out at elbow, has a long, clean head, is straight in loin, ears poorly cropped, good eye; as he is by the Duke of Marlborough he is entitled to his title. The second prize winner at Washington, Kit, was placed first in 30 lb. bitches; her head is good, though inclined to cheekiness; she is also to heavy in shoulders and coarse in tail. Edgewood Fancy II., second, has a spiky muzzle and was in dirty condition. Bull-terriers cannot be shown too clean and smart looking. British Queen, going cheeky and heavy in front, has however better head and legs, and though fat, should

have beaten Fancy. In light-weight dogs, first went to Sailor, the Brooklyn winner; he is a little too much like an English terrier, and is a little bit out at elbow and cheeky, otherwise smart enough. Soda Mint is small, too full in eye, short, chunky head—a runt. Nip, vhc., is too bulky and did not deserve mention. Lorna Doone and Nery were the only entries in the bitch class. Lorna was not well shown, has a good head, fair eye, feet open, body rather long and lathy, good legs; in these and head she is well in front of Nery. She also took the novice prize, second going to Lord Blandford, Edgewood Fancy II. reserve, and Retnor Dazzle, bad front, open feet, ears lying over, faulty stern, vhc. Nery, with only hc., was harshly treated; getting second to the winner in the open class, she surely deserved another letter. Lord Blandford and Edgewood Fancy II. supplied the puppy winners. Retnor Monarch, vhc., has a rather nice head, good eye, not quite straight in front, needs filling out in body yet. Mrs. Runtin's Kit won the special for best owned by a lady, being placed over Edgewood Wonder.

BASSET HOUNDS (*H. W. Lacy, Judge*).—Only one entry, but that about as good as anything yet seen out. Royal Hector has a good chest, low on the ground, plenty of bone, nice length of body, head well shaped on the whole, though stop too much defined and cut out before the eye, nice leather; shown low in flesh, but hard.

DACHSHUNDS (*C. H. Mason, Judge*).—The well known Don Quixote II. furnished the winner in open dogs, and he was the only one in the class. Three really nice ones put in an appearance in the bitch class. Two of them were litter sisters by Pterodactyl out of Jargonelle, but Polly Finders was rightly placed over Sister, beating her in chest, crook, muzzle and ear. Sister has an advantage only in loin, better arched and darker eye, both good length and nice skins and coat. Pollywog, that beat Janet in '92 at New York was third; this alone must be some satisfaction to Mr. Manice, as the winners are of his breeding. In the novice class Polly and Sister again won, while Pantalatte, vhc., has a mean head, good, deep chest, but slack back and flat loin, and has nothing like the quality of the winners. Polly Finders scored another blue for Mr. Matthews in the puppy class, and second was withheld from some terrier-like specimens.

BEAGLES (*H. W. Lacy, Judge*).—A fair entry of these little hounds was forthcoming. Several well known kennels would have been represented but for the rule about first prize money, as it was, eighteen turned up, and with fox and Irish terriers and Yorkshires had the largest number benched. In challenge dogs two good ones came up, the evergreen Frank Forest and Roy K; the former wins easily in head and from the shoulders back; only in shoulders and chest does Roy K have an advantage. We never, in late days, saw Frank Forest looking better. Jennie was absent in challenge bitch class. In 15in dogs Sport of Rockland, the winner, beats Diamond Forest in head, cleanness of shoulders and size, he showed himself badly, however; Diamond Forest is a very useful sort but a little coarse and quite big enough, looks as if he would shine at Nanuet in the fall trials. The bitch

placed first; she is more like a smooth at present, ears blunt. Suffolk Tease is a better type, but poor in front, fair coat and lots of it. Sister Grit took both novice and puppy prizes without competition; she had gone home when we came round. Mr. H. W. Smith took the kennel prize.

IRISH TERRIERS (*German Hopkins, Judge*).—Jackanapes was the only entry in challenge class and he did not turn up. The dog class, for quality, was probably as good as any in the show. Merle Grady was hailed the winner; he loses to Brickbat, Jr., Mr. Symonds's new dog, in muzzle, but taken all round is of a smarter style. Brickbat, Jr., is a well-modeled terrier and for those who like them big would, no doubt, be thought hardly treated; he has straight legs, excellent long head, with well-carried drop ears, fair coat,

TOOTSIE.

well-made body and excellent front, his size is his only serious fault in our opinion. Romulus, reserve, is a good stamp of terrier, but a bit big in ear. Fenian Boy, vhc., is too heavy in shoulders and coarse in skull, good muzzle and not true enough in front. The Alderman was third at Boston in puppies. Paddy P. has a short head, coarse skull and heavy, wide front; excepting for good wiry coat, hardly deserved his hc. In bitches the Washington winner, Judy, came to the front again and George Thomas had his revenge. Little Maid, second, has been commented on before in these columns. Erin, vhc., is pretty much on the large side. C. was given to Carna; bad expression, short head and muzzle. Brickbat, Jr., won easily in novices, followed by Shaun Rue, lately commented upon. Larry, hc., is coarse and heavy in shoulders, coat of good texture, but shedding. The Alderman won in puppies and second went to Edgewood Surprise, commended in novice class, faulty head and front. Huguenot Kennels took the kennel prize and Mr. W. J. Comstock's Merle Grady won the special for best in the show.

BLACK AND TAN TERRIERS (*C. H. Mason, Judge*).—Several new ones appeared here, but nothing very startling was brought out. Broomfield Sultan and Queen III. were placed in challenge class in the order named; the former beats in front and coloring. A new one, Glenwood, quite a likely terrier, came out in the open dog class; good long head, legs and short body, stern not well carried and markings on legs run in, plenty of bone and quite big enough. A youngster, Rochelle Lord, came next; he is uncropped, and has not the head, bone and substance of the other; faulty markings, but a fair sort. Jasper, reserve, is getting coarser in shoulders and head all the time. The well-known Broomfield Madge won in bitches; second withheld. Nellie is a poorish toy, with small, short head. Glenwood won in novice over Rochelle Lord, Lady Nellie Goodwood getting hc., for what we cannot tell, as she is a short-headed toy. Rochelle Lord was the puppy winner.

WHITE ENGLISH TERRIERS (*E. H. Morris, Judge*).—A very poor apple-headed specimen was the only entry and did not deserve a card, never name first prize; Blink Bonny, shown at Yonkers, is worth a street full of him.

DANDIE DINMONTS (*James Mortimer, Judge*).—Only one real one in the dog class, and this the new one, Raglan Sandy, not long or strong enough in muzzle, good bone, crooked front, nice body, but short of coat. Roxie is a Skye. Qui Vive was the only Bedlington shown; he is well known.

SCOTTISH TERRIERS (*C. H. Mason, Judge*).—Only two, and

ROMEO.

these good ones. Three had no difficulty in beating Rhudiman in head, front and coat.

SKYE TERRIERS (*Dr. Cryer, Judge*).—An entry in each class, but one turned out to be a Yorkshire. Endeliff Maggie, in challenge class, was alone and was in nice coat, but soft. Wheel of Fortune was also alone in bitches; she is of good type and carries an excellent coat of good texture. A Clydesdale terrier was entered, Belle of Clyde, lots of coat, but needed a brushing. The Welsh terrier was absent.

BOSTON TERRIERS (*James Mortimer, Judge*).—These were poor and bulky in appearance. Prince Walnut was absent in dogs, while Toby, removed from the show after his prize was withheld, was alone in open dogs. Bitches had two entries; Madge, the winner, is a nice little sort, but too bulky, good front; Ciney was third at Boston, very much of a round head. Ned won in novices he is heavy in front and bulky looking; second withheld.

WHIPPETS (*E. H. Morris, Judge*).—The well known Boston Model was the only entry.

YORKSHIRE TERRIERS (*Dr. Cryer, Judge*).—The entry here was quite a surprise, as interest in this breed seems to have dwindled down very much lately. Ch. Ben showed up once more in challenge dogs; he is now ten years old, but looking well; he has lost his color to some extent. In open dogs the well known Young Ted scored again, his nice tan and body color and length of coat being too much for Prince, whose tan is light but coat plentiful. The winner in bitches should be richer and brighter in tan; she is quite big enough. Judy was the New York winner and was the best coated one in the lot, nice body color but tan mixed; should have been placed first I thought. Jennie, reserve, has a light body color and smutty light tan. Spark, the novice winner, was transferred from the Skye class, is on the larger order with smutty tan, mixed blue, good long coat. Yipper, second, too dark in body color. Jocko, reserve, is one of the old sort and Tatters does not belie his or her name.

TOY TERRIERS.—Lots of them but none that really came up to the mark. In dogs first was withheld and second given to Jerry, who has a long string of wins to his credit; he is rather on the large size for a toy and very apple-headed. Prince, reserve, is better in head. In bitches, Gegan, better in coat than most of these terriers and not so apple-headed, won from Jennie, nice size, but little tan markings. Novice, first was withheld, second going to Jimmie, a rough-haired terrier, and Baby, reserve, is in whelp and not at all up to the mark.

PUGS (*James Mortimer, Judge*).—Champion Bob Ivy and Nellie Bly furnished the challenge winners, both looking well. The second prize winner at New York, Waddles, won in open dogs; he is a capital bodied dog, nice head and wrinkle, and ears can be made to set well; good legs; quite a nice sort. Ivy Boy, second, fair head, nice body, curl and trace. Tip Top, vhc., has been before us before; he loses in body and head to the others. First was withheld in bitches and second went to Lillie, whose light body, faulty quarters and loin and long muzzle hurt her chances. Jane was the only novice entry; she has good wrinkle and skull but is long in body and muzzle and has big ears. The winning pup, Gracie B., has a capital skull and curl for a pup.

KING CHARLES SPANIELS (*James Mortimer, Judge*).—With the exception of Romeo and King of the Charlies, well known winners in the challenge and open dogs respectively, there was nothing particularly meritorious; both were well shown. Bonita won in bitches but I could not find her. Lady Delina, second, has a better skull than muzzle, nice tan and plenty coat, but rather curly. Princess, reserve, has a rather good, short head, high skull and rich tan, light in body and is a bit leggy. Little Gracie has a good, short muzzle and high skull, ears small, coat not flat enough, and has dark, smutty tan. Bonita won in novices from the long-muzzled Minnie, who could only get hc.; body too light.

BLENHEIM SPANIELS (*C. H. Mason, Judge*).—We expected

MISS WAGGLES.

class had three, the winner, The Flute, a new one, is rather long in body, but has a well shaped head and good legs. Fanny Racer, well known, is not quite true in front, faulty muzzle. Prudence, very high com., was heavy in whelp, and her head is long and muzzle snipy. In challenge dogs The Rambler had little difficulty in beating Rockland Boy, who however excels the other in shoulders, his skull and ear are also very good, the other however is a better beagle. Ch. Lou, showing himself quite well, added another challenge win to her score. The next class for 13in. bitches brought out four, and the typical Minnie Mite scored easily. Fanny Read, much too fat, would have been second but for that, it made her long fine muzzle look still finer. Weenannon, second, is slightly dishd faced and needs filling out more in body, good front. Queen of the Forest, very high com., has nice skull and ear, but muzzle is poor, good legs, body and type, but for her muzzle would be quite good when she fills out, being only a puppy yet. The novice class had Sport of Rockland and The Flute, in front only does the latter score, as Sport is rather wide there, but is all round better type and of cobbler build. In puppies Cey Baby beat Queen of the Forest in head and substance. The Rockland Kennels took the kennel prize and the specials for best beagle with Frank Forest.

FOX TERRIERS (*German Hopkins, Judge*).—The classes were well supported for such a show and little if any fault was found with the judging. In the absence of Ripon Stormer, champion Dusky Trap and Beverwyck Punster did battle. The old dog looked well, barring his coat, which was ragged. Punster had to take second place, losing in body and skull to the other dog and also in terrier character. Open dogs had three entries, two absent, which left Baby Domino barren honors; he is a much improved dog on his Toronto form, he has a good front but is long in body, broad in skull and faulty in quarters. Becky Sharp was absent in bitches, only entry. The novice winner was Arrandale Mixture, who beats Bar None in body and skull; the latter's feet are not close enough, ears big, just a useful sort. Paul Pry, vhc., has a thick coarse skull and short muzzle, and ears are pricked most of the time. In bitches, Daisy scored, her skull is coarse and head too short, good front, lots of coat but soft. Second was withheld, and vhc. given to Danity, whose heavy shoulders, short chunky head, big ear, small size and not very good front sufficed to put her down. Lady Madge is weak in pasterns and turns her feet out, ears badly carried and is too full in eye, a poor lot altogether. Arrandale Mixture won in dog puppies, beating Prince easily, who has a mean chunky head. Lady Bess was counted the best of the bitch puppies, beating Trix, faulty in ear, shown too fat, but has not a badly shaped head. The wires were much better quality and this is something unusual. St. Broom, in fair trim, furnished the challenge entry. Three turned up in open dogs, the New York winner, St. Brittle, scoring again; behind him was the well known Suffolk Grip, coarse in skull and coat should be crisper, good bone and front. Suffolk Trimmer has a long head but little expression, ears well carried; he is, however, rather leggy and light and long in body. In bitches, a previous winner in Sister Trick, was

to see more and better entries of these at such a show, but good ones are scarce as hens' teeth. Murilla ably filled the challenge class. She has the best head in the lot, but is getting cloddy in body and curly coated. In open bitches Queen, small head, coat not flat enough, and not straight enough in front by any means, was alone and took the blue. The novice class was hard on the judge, as three ladies brought in the three entries and all expected to win; only one could do so, and Lill took the cake, better and shorter faced than Sallie Pippin, who in turn is better than Snooks both in body and head, the latter being too leggy and long faced. Sallie gained fame afterward in the popular vote contest.

PRINCE CHARLES SPANIELS (*James Mortimer, Judge*).—A capital little one in Snob was to the fore in the dog class, not quite enough tan, but is very short faced, deep in stop and good skull, and is an active little spaniel as well. He repeated the win in the novice class over Queen Vic, first in bitches, who is long in muzzle and has a poor expression.

RUBY SPANIELS (*C. H. Mason, Judge*).—Ruby Prince, the winner in dogs, has a well-shaped head, muzzle of course could be shorter to advantage, plenty of coat, but not a very bright, rich color. King Rufus, second, is rather long faced and short in ear, capital legs, but tucked up in body. Campanini, reserve, is lathy and leggy, but has not a bad head and eye better than the average spaniel, and his legs are straight, though too long. He won in novices.

JAPANESE SPANIELS.—We expected to see many more entries in this breed. Mrs. Clarke's dogs not showing up robbed the competition of some interest. Ch. Nanki-Poo, without opposition, scored another challenge win; he looked well. Mrs. Senn farmed the next class, getting first and second with Prince Yodo and Royal II., both new ones; the winner is a fairly well headed one, with good body and legs and nice coat; the second winner occupied the same position at San Francisco last month; his skull is capital but he should be shorter in muzzle; he is also a trifle large. There was no questioning Tootsie's superior merit in the bitch class, in fact she was the best in the show, and won the Japanese vase for that distinction; very short faced and deep stop, nice coat and body. Tamah, second is an old winner, and Kiku, vhc., is quite a nice little thing and should have been, I think second. Tozzo, first in novices, is long in muzzle and coarse in skull.

ITALIAN GREYHOUNDS (*C. H. Mason, Judge*).—Spring was again to the front in the challenge class; he was nicely shown. Louris, first at New York, is a little too full in skull and weak in muzzle before the eye; nice otherwise. In the bitch class first went to Timmie, a nice size, well carried ears and nice head, good legs. Lady Lee, second, is faulty in muzzle and rather apple-headed. Folly, reserve, could have changed places with the others; better head, size and ears than Lady Lee. The only Schipperke, Imp Jack, won in open and novice classes.

MEXICAN HAIRLESS.—These were given to Dr. Cryer, and we suppose they were rightly placed. The winner in dogs was the well known Pippo; he looks as if he had a nice home.

Pedro, second, is fat. Jewell, winner in bitches, is a light flesh color and looks on the Chow Chow order without the sprigs of hair and spots. Beauty was second, seems too short in head and eyes too prominent. Jewell won in novices. In the absence of Sheffield Lad the only "Pom" was Bob, good coat and tail, but too prominent in skull, and short-faced. A fair Maltese terrier was shown in Tont-Tu, nice coat, well attended to; Doc is not so good in the latter respect. Flossie, in novice class, should have been thrown out, black ears, first withheld, and got second.

Mr. H. W. Smith's special for the best dog in the show owned by a lady went to Mrs. R. L. Crawford's Tootsie, the Jap. The smallest dog in the show was adjudged to be Miss M. E. Randolph's Yorkshire, Tinty.

In the bull-terrier bitch awards given last week we placed Castle Point Kennels' Nervy first and F. F. Dole's Lorna Doone second. The positions should be reversed. We marked our list from the award board, and hence the mistake.

H. W. LACY.

Homing Instinct in Dogs.

Editor Forest and Stream:

Having read the article on "The Homing Instinct in Dogs," by M. C. H., allow me to give you one. R. D. Thompson, constable, 618 So. Eleventh street, Philadelphia, was the owner of an intelligent Irish setter named Don, who found his home after a journey of 68 miles and under very trying and peculiar circumstances. It happened in this way: Mr. T. had taken his dog to his boat house on Salem Creek, 8 miles from that ancient city. It was his intention to spend a week or two there, but a message called him suddenly to Philadelphia on business. So rather than bother with the dog, and intending to return in a few days, he left his dog with the farmer residing on the ground with instructions to tie the dog up until he returned. Judge of his surprise the next evening to find his dog scratching at his door at Fourth and Spruce, where he was boarding. The story seems almost improbable but it happened this way. After Mr. T. had left, the farmer unchained Don, when he instantly made a bee line 8 miles to Salem, hung around the station until a train was ready, when he boarded one bound for Camden. The conductor, knowing the dog well through his master, was on the train with him. When he arrived at Camden, after a 60-mile trip, he made a streak for a ferry boat, crossed to the Philadelphia side, when he had no trouble to make the eight squares home. This can be vouched for by farmer, conductor, ferry slip master, the boarding house mistress and others.

A. C. J.

DOG CHAT.

Pacific Kennel Notes.

The Pacific Kennel Club is in high feather just now, as they realized about \$800 from the dog show they held last month. This is particularly gratifying, as, for so small a show, the club is under considerable expenses in getting a judge. Mr. Raper was paid nearly \$800 for his trip.

Mr. Campbell, the well-known California breeder of Irish setters, has lost by distemper his Glenmore Hoodlum, that won first at Los Angeles and San Francisco.

Mrs. E. B. Grace intends to bring a suit for damages against the Pacific Kennel Club for the loss of her Yorkshire terrier Sis, it having been run over by the cable cars opposite the Pavilion doors. The club claim the dog was killed owing to Mrs. Grace's neglect and that they cannot be held responsible. There is a rule in the premium list that covers this, we believe.

In regard to the Brooklyn medals, the National Greyhound Club was advised by Messrs. Elkington & Co., England, that they had shipped them on May 6, but did not advise the club on which vessel they would come. Mr. C. F. R. Drake tells us that he does not know whether they have come or not, as they have heard nothing further about them and do not know where to look for them. They will be sent to the winners as soon as they arrive.

Dates Clash.

It seemed to be the general feeling at the Pet Dog show, that the Rhode Island fixture which will be on the same week as the World's Fair show, Sept. 19 to 23, will be supported in place of the latter one. Considering all interests, Canadian and American both, would it not be well to postpone the Chicago fixture till the early part of October? If the show is to amount to anything, this had better be done while yet there is time, and get the premium list and judges list out by July 1.

We are afraid the Pet Dog show will have a serious effect on some of the "boys." It will scarcely be credited, but it is none the less true that we saw four of the "regulars" sitting mildly at a table eating ice cream, with evident and unwanted relish. This points a moral, and we earnestly draw Mr. Wade's attention to the fact, for certainly this vice should not be paraded—not for very long anyhow.

St. Bernard Importations.

This journal does not keep its issue back a day or two to enable its editor to get some news. Our "exclusives" come out on time and quite early enough for some of our contemporaries. St. Bernard men were placed in possession of the news of Mr. Reick's purchase of Young Bute a week ahead of any other kennel journal. This is an important purchase, as Young Bute was considered in the very front rank of the holy breed. In three months he won sixteen firsts and thirteen specials. He is by Lord Bute out of Baroness Cardiff, and was bred by Mr. T. Shillcock. Whelped March 29, 1890, he is just in his prime, and is said to be well marked. Among his best wins was first and cup at the St. Bernard Club show. This dog is to take the place of Refuge II., that Mr. Reick lost lately. The owner of the New York St. Bernard Kennels has also been getting some young stock, four altogether, three are mere puppies, but the other is nearly two years old. He is by Marvel out of Princess Florence, and is therefore the same breeding as the Duke of Maplecroft, though from a younger litter. This youngster is said to be, by all odds, the tallest dog in England, and is perfectly marked, like his sire. His name is Duke of Fairmont, and his breeding alone should enhance his value as a stud dog. Unlike most of the winners that come over here, he has never been mated, and should therefore be more valuable to breeders here. Mr. Reick also bought several bitches, so it is probable that he will go into breeding again. On inquiry we find that Mr. Reick will return on the New York June 10.

Spaniel Deaths.

Mr. Geo. Bell, whose advertisement in our kennel columns this week shows the kind of dogs this well known breeder has in his kennel, is in sore trouble. He shipped his spaniels on Saturday afternoon from New York to Philadelphia, and they were not delivered or the box opened till Monday afternoon. The heat must have affected the dogs terribly, for when the box arrived, and Troublesome, the well known little black cocker, was at the last gasp. Mr. Bell sat up with her all night, but in spite of every attention and effort to keep her alive she died this afternoon. This is quite a

blow to Mr. Bell as it breaks up his team, and he has the sympathies of his fellow exhibitors.

Performing Dogs.

Prof. Stedman gave a very interesting performance with his trick dogs at the P. D. show. Some of the acts were quite novel. The one representing the circus horse with a fox-terrier as the bareback rider, was capital and very natural. The Irish setter walking the tight rope with the terrier on his back was another difficult feat well performed. Jim Cassidy, described as a Cheshire bull-terrier (we have heard of Cheshire cats, but never of bull-terriers), was a most intelligent and clever animal, that looked like a cross between a black and tan and a bull-terrier with something else. One thing we noticed about these dogs, they were all clean, healthy and slick in appearance, and this is more than can be said of many other performing troupes.

It was rumored that Infanta Eulalie would come to the show on Friday afternoon in response to the invitation of the president of the club, and in expectation thereof the boxes of the Lyceum were well filled by an elegantly dressed crowd of ladies all more or less interested in the show. Eulalie did not come, however, but slipped out of the Hotel Savoy with her husband and walked over to Sixth avenue to look at the elevated trains instead. The rumor, however, served its purpose at the show.

The Sewell Prize.

The competition for the most popular dog owned by a lady, the prize a painting, value \$200, of the winner, afforded no little excitement during the Pet Dog show. After the start the only two really in it were Mrs. H. G. Trevor's Milo and Miss M. E. Bannister's Sallie. On Friday Sallie obtained a commanding lead and held it till late in the evening, with 904 votes to Milo's 800. Mr. Trevor, however, settled all doubts of the result by walking up and handing Mr. Burt, who had the board in charge, \$50, which gave Milo a total of 1,800 votes, and the admirers of Sallie heaved a sigh and wished they could do the same for her. To clinch the good effect, Mr. Trevor at the same time handed the club another \$50, and hoped the show would be a success after all. This kind action was as fully appreciated as it was unexpected. The votes and names at the close of the poll were as follows, each vote representing 5 cents:

Miss Bannister's Sallie.....	904
Mrs. Blakely Hall's Snooks.....	80
Mrs. Crawford's Tootsie.....	300
Miss Tessie Coman's Lady Spot.....	101
Mrs. Barnum's Glen.....	43
Mrs. Manning's Toppu.....	10
Mrs. Senn's Romeo.....	20
Mrs. F. F. Dole's Edgewood Wonder.....	26
Miss Chapman's Pinta.....	22
Mrs. Senn's Lill.....	3
Mrs. Haverstick's Waddles, Jr.....	35
Mrs. Trevor's Milo.....	1,800
Mrs. Freeman's Frou Frou.....	94
Total.....	4,467
Amount received.....	\$223 35

It is peculiar that *Stock-Keeper* should be led into the mistake of saying that the American Kennel Club would not make entries at the World's Fair show unless the judges were announced at once, when *FOREST AND STREAM* distinctly quoted Mr. Vredenburgh as stating that no such communication had taken place.

The Curs Must Go.

At a meeting of the City Council of Newark, N. J., a new ordinance relating to dogs was introduced by the chairman of the license committee. It provides that a tax of \$2 shall be imposed on male and \$5 on female dogs. A dog warden is to be appointed with a salary of \$1,200 per year; also assistant wardens. Each licensed dog is to bear a collar marked "Licensed Dog, Newark, N. J." and dogs not licensed and found running at large will be impounded by the warden or his assistants and be kept two days for redemption. A penalty of \$2 will be imposed on a dog owner who fails to comply with this ordinance.

We really did not think that any one would be foolish enough to consider seriously our little squib regarding the ferocity of the Russian wolfhounds at Denver. For ourselves, we thought the sarcasm was beautiful, but evidently some people take everything but sermons *ou serieux*. If the dogs had really been judged on their benches, our staff reporter, Mr. Waters, would have told us about it. Mr. Davidson, the judge at Denver, is made of sterner stuff than that.

Arthur Trickett has arrived at Little Rock, Ark., to take charge of Mr. Pratt's kennel of St. Bernards. Mr. Pratt has built new kennels and intends to go it strong. Another bitch he has in his kennels is Adelaide II. He is now on the lookout for a first-class rough-coated dog.

In declining to act as delegate to the A. K. C. for the Southern California Kennel Club, we none the less appreciate the honor the invitation conveys. Our duty is first to the *FOREST AND STREAM*, and we believe that no man connected with a kennel journal should accept such a position, or become an officer of the A. K. C. This leaves him free from any official restraint he may feel when called upon to criticize or comment on the club's actions. The Southern California Kennel Club requires a delegate, not only in name, but one who will look after the Pacific Coast interests. We should be pleased to receive the name of any independent man who feels that he could be a delegate, not only in name, but actually so.

During the Pet Dog show sales were light and many breeders were disappointed. Frank Dole sold his young bull-terrier bitch Edgewood Surprise to Mr. Paul, of Pittsburgh, Pa. Mr. Fred Schmidt arranged with the club to exhibit some St. Bernards with puppies, and he had little difficulty in disposing of several at good prices. They were by Roland, Jr. out of Norma.

George Thomas sold the greyhound Wild Rose, winner of first and special at Indianapolis show and other prizes, to Joe Lewis. Since Mr. Lewis got her she has whelped ten pups to champion Gem of the Season.

Paris Dog Show.

A successful dog show was held May 19 to 28 on the terrace of the Tuileries Gardens, Paris, France. Society people were present in numbers and a band of huntsmen in dark green cloth enlivened the scene with inspiring airs. The show was divided, one show being reserved for hounds, watchdogs, pointers and setters of foreign breeds, and this took place on after the "sports" have gone home. The exhibit of Danish and German hounds is said to have been very good. Several English exhibitors were present, and Messrs. John Proctor, Geo. R. Kroll and S. E. Shirley were the English judges who officiated in conjunction with several Frenchmen. *Stock-Keeper* (Eng.) says that one "tiger" dog would make a sensation at any show. A feature of the show was the bantam bulldogs, exciting much interest, several changing hands at

big prices. Mr. Lee-Bulld pulled off some of the prizes with his team of pointers. According to the above journal the show is not conducted very satisfactory, the length of time the dogs are on the benches and the fact that several purely English breeds are judged by Frenchmen does not appeal to the suffrages of English exhibitors. Mr. W. C. Reick was present at the show and made a big offer for the first prize bantam bulldog, but failed to get him. We ought to have one or two of these over here.

Mr. W. L. Washington has been making some purchases. From Mr. Bishop, of Coffeyville, Kan., he bought Ruby Glenmore II., said to be a very promising one; she is by Finglas out of champion Ruby Glenmore. He has also bought Bushrod, a dog sired by champion Duke Elcho out of Red Rose, the dam of so many champions. The latter dog is one year old.

If "Lover of the Breed" will send us his name and address, not for publication, we shall be pleased to publish his letter.

Pacific Coast Field Trials.

The entry blanks for the Pacific Coast Field Trial Club's eleventh annual Derby are being mailed by the secretary, Mr. J. M. Kilgariff. Entries close June 15, entrance being \$20, forfeit \$5. First prize will be 50% of the stake, second 30% and third 20%. The grounds have not yet been decided upon.

A Dog Poisoning Case.

An interesting dog poisoning case has just been tried in court. The plaintiff, Mr. Hardy, testified that he owned four setters which he valued at \$500. He kept them chained all the time excepting a short time in the morning and at night, when he gave them a run. The dogs never howled, nor were they a nuisance in any way to the defendant, Prof. E. H. Wilson. The plaintiff's wife caught the Wilson boys in her hen roost, where they had disturbed the nests and killed some small chickens. This led to bad feeling between the mothers, and Mrs. Wilson sent Mr. Hardy a note threatening to poison his dogs. The dogs were let out one day, and Mrs. Hardy finding a plate at her back door suspected the dogs had been poisoned. The dogs were taken very sick the same day, but Mr. Hardy by giving them antidotes, with much difficulty, however, saved their lives. Mr. Hardy was at the same time informed by the Wilson's servant that her mistress had poisoned the dogs. Mr. Hardy brought suit for \$100 damages, and counsel was engaged on both sides. The defendant procured no evidence to show whereby he was justified in administering poison to the dogs, as he could not show they were nuisances, and Judge Barrett rendered a verdict awarding plaintiff \$15 damages and costs. We cite this case as an evidence of the progressive feeling in regard to dogs as property.

A Texas Kennel.

We received a pleasant call last week from Mr. C. M. Rounds, of San Antonio, Texas. Mr. Rounds was on his way to Syracuse, near which city he has a farm where he will reside until about September, when he returns to the Lone Star State. Mr. Rounds is well known to southern field trial men. At San Antonio he has a capital kennel of English setters which he calls the West End Kennels. Among the best known dogs in his kennel are Manitoba Frisk, by Dick Bondhu—Western Belle. Among his field wins is the all-age stake at Bexar field trials last winter. Rod's Deuce is another, this dog won first in the puppy stake at Bexar trials, 1893. Among his brood bitches are Darling Flora, a full sister to Daisy, that won first in open class at New York, 1886; she herself took very high com. at the St. Paul show in 1887. Another, Sophie Hill, by The Corsair out of Ellie Hill, is a half sister of Our Pet, a New England field trial winner. Rod's Clip, a sister of Rod's Deuce and second winner of the puppy stake, Bexar trials, 1893, is another well bred one, being a granddaughter of Roderigo. Mr. Rounds also has some pointers, Duchess of Kent, by King of Kent, being one of them. She won the all-age stake at Bexar trials, 1893, and a spirited picture of this bitch on a bevy is given in a handsomely arranged kennel catalogue; another capital half tone represents Rod's Deuce and Rod's Clip both claiming point. Mr. Rounds says there is a good demand for well-bred stock down his way. He has now over forty dogs in his kennel.

Coursing.

The noted greyhound Short-Stop, a brother to that most excellent hound Skyrocket, died soon after the last Newark coursing meeting. The Occidental Coursing Club will hold another meeting somewhere about June 3.

Coursing Judges.

A correspondent writes us, that in considering the advisability of getting Mr. Hedley over to judge the International Coursing Meeting that may take place, that the question of a judge does not altogether consist of ability to render correct decisions. "The riding necessary in England does not compare with that of America." Could Mr. Hedley keep the dogs in sight? Mr. John Grace is the only man in California that can ride to the hounds. The numerous prairie dog and squirrel holes make the riding both dangerous and difficult, and the faster American have calls for harder riding. Practice makes perfect. Mr. Grace attends a coursing meeting every week for at least six months of the year, sometimes oftener, and his judgment is rarely questioned. As a slipper, Jas. Wren stands without a peer. A born athlete, with one eye on the hare and the other on the dogs, and with ample muscular power to control the biggest pair of greyhounds ever slipped, he combines unerring judgment and unquestioned integrity. No two better men can be secured for these important positions.

The Rinada Pointer Kennels, although they have sold a good deal of stock lately, are preparing for more to come. The following well-known bitches are in whelp: Westminster Ina to Ridgeview Panic, Bloomo II. to Duke of Hessen, Belle of Winchester to Lad of Beppo, and Dauntless to Chancellor, the latter a dog Mr. Pickhardt purchased from Mr. Anthony recently. The former he purchased from Mr. S. S. Banks, Bridgeport, Conn. He has lost by death Westminster Nan.

Dr. L. C. Sauveur tells us that the well-known English setter Sir Frederick died yesterday afternoon from general decline. His death was accelerated no doubt by the extreme heat. He has been gradually breaking up for some weeks past. Dr. Sauveur has our sympathy in his many recent losses. Sir Frederick was imported in 1891 by Mr. Smith, of Wheeling, W. Va., from whom Dr. Sauveur purchased him.

English Setter Beverly.

ADRIAN, Mich., June 3.—I noticed an article in your last paper in regard to an English setter named Beverly owned by me. This is a mistake for I do not own any such dog. In answering my question of March 30 you also added some information in regard to this dog, and I intended to write you in regard to it, but in some way slipped my mind and I had forgotten all about it until I just read this in your paper again.

H. L. W.

Wissahickon Dog Show.

WE have seen many *locales* for a dog show, but one might search the world over for a prettier spot than that in which the Wissahickon Kennel Club held their first show. St. Martin's Green, where the show is held, was last week the scene of the horse show, and we question the wisdom of holding such a humdrum affair as a dog show so soon after the gay and stirring scenes of last week. Society gets tired, like everybody else. The show is the nearest approach to an open air event without actually being so that it possibly could be. The Philadelphia horse show people have their ranges of stables here, and down the broad aisle of one range of stables a double row of Spratts' benches accommodates about 200 dogs; entries number 254. The roof of the aisle is iron, and this morning the broiling sun just about made everything and everybody as uncomfortable as possible. In the afternoon, however, a very heavy thunderstorm developed and rain poured in and cooled us all off.

The dogs are not yet properly arranged in their stalls and the catalogue is so full of mistakes owing to the very limited time there was to get it up after the entries closed, that another edition will be issued to-morrow. Judging has been postponed and will not commence until just about the time FOREST AND STREAM goes to press to-morrow.

There was a very limited outside attendance to-day, those present being owners and others interested in the dogs. Among the visitors we noticed A. Laidlaw, G. F. Fenton, Geo. Bell, Geo. Thomas, W. Turner, Andy McGregor, G. Hopkins, C. A. Bousfield of Bay City, Mich., J. H. Winslow, F. G. Taylor, G. Derby, Ben Lewis, Fred Kirby. Among the ladies present were Mrs. Smyth, Mrs. Meeham and Mrs. Gilligan. A nice lot of dogs are here; cockers are particularly good, with Laidlaw, Bell and Swiss Mountain Kennels represented. Setters and pointers turn out well, considering, and there are lots of fox-terriers and some good St. Bernards and mastiffs. There is also an excellent show of wolfhounds; the Seacroft and Huntington Kennels are both out in force. Dr. Sauvour and his right-hand man Will Connors are working like Trojans to get everything shipshape, but it is a big undertaking.

The pet dogs are benched in a separate building; about 250 dogs are benched.

H. W. L.
PHILADELPHIA, June 6.

KENNEL NOTES.

Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.

BRED.

Prepared Blanks sent free on application.

Too-Too—Blenion Vesuvian. Mrs. C. P. Murray's (Sierra Madre, Cal.) fox-terrier bitch Too-Too (Toby—Monte) to C. A. Sumner's Blenion Vesuvian (champion Lucifer—Blenion Vesta), May 12.

Katie—Soranets. C. S. Hanks's (Manchester, Mass.) Russian wolfhound bitch Katie to his Soranets (Vikha—Raskeda), April 30.

Svodka—Soranets. C. S. Hanks's (Manchester, Mass.) Russian wolfhound bitch Svodka (Kiedia—Krasotka) to his Soranets (Vikha—Raskeda), March 18.

Flodeyka—Soranets. C. S. Hanks's (Manchester, Mass.) Russian wolfhound bitch Flodeyka to his Soranets (Vikha—Raskeda), April 17.

Seacroft Boaster—Seacroft Bourbon. C. S. Hanks's (Manchester, Mass.) fox-terrier bitch Seacroft Boaster (champion Domine—Brokenhurst Queenie) to his Seacroft Bourbon (champion D'Orsey—Danson), May 27.

Idle Ob—Corktown Cupid. Rideau Kennels' (Ottawa, Ont.) cocker spaniel bitch Idle Ob (Bob Ob—Cleto) to Corktown Kennels' Corktown Cupid (Ob, Jr.—Dot Smirle), March 23.

Senora—Happy Toby. Eberhart Pug Kennels' (Cincinnati, O.) pug bitch Senora (Spokane—Lady Verve) to their Happy Toby (Spokane—Nello), May 7.

Katie—Patsy Bolivar. Bellevue Kennels' (Newport, Ky.) pug bitch Katie (John Bull—Lady Thelma) to Eberhart Pug Kennels' Patsy Bolivar (Eberhart's Cashier—Flossie II.), May 5.

Sara Bernhard—Bradford Ruby II. Eberhart Pug Kennels' (Cincinnati, O.) pug bitch Sara Bernhard (Lord Roseberry—Cora) to their Bradford Ruby II. (champion Bradford Ruby—Puss B.), May 7.

Cashier's Daughter—Eberhart's Cashier. Eberhart Pug Kennels' (Cincinnati, O.) pug bitch Cashier's Daughter (Eberhart's Cashier—Flossie II.) to their Eberhart's Cashier (champion Kashi—Lady Thora), May 7.

Lady Noble—Count Noble. Inwood Kennels' (Providence, R. I.) Gordon setter bitch Lady Noble (Don—Lady) to their Count Noble (Ben—Belle), April 3.

Belle C—Count Noble. F. L. Cranston's (Pawtucket, R. I.) Gordon setter bitch Belle C (Don—Lady) to Inwood Kennels' Count Noble (Ben—Belle), April 29.

Juliette—Count Noble. D. S. Bennett's (Wrentham, Mass.) Gordon setter bitch Juliette (Captain Dan—Mollie Pitcher) to Inwood Kennels' Count Noble (Ben—Belle), May 3.

Rideau Renah—Black Jacket. Rideau Kennels' (Ottawa, Ont.) cocker spaniel bitch Rideau Renah (Bob Ob—Flora Kay) to Corktown Kennels' Black Jacket (champion Brant—Woodstock Dinah), March 31.

Gypsy—Tip Ob. H. C. Bates's (Kingston, Ont.) cocker spaniel bitch Gypsy to Corktown Kennels' Tip Ob (Bob Ob—Cleto), March 30.

Rideau Rhea—Black Jacket. Rideau Kennels' (Ottawa, Ont.) cocker spaniel bitch Rideau Rhea (Ob, Jr.—Rideau Flossie) to Corktown Kennels' Black Jacket (champion Brant—Woodstock Dinah), April 2.

Rideau Roma—Black Jacket. F. A. Grant's (Ottawa, Ont.) cocker spaniel bitch Rideau Roma (Bob Ob—Flora Kay) to Corktown Kennels' Black Jacket (champion Brant—Woodstock Dinah), April 8.

Rideau Retzie—Corktown Cupid. A. F. Grant's (Ottawa, Ont.) cocker spaniel bitch Rideau Retzie (Bob Ob—Flora Kay) to Corktown Kennels' Corktown Cupid (Ob, Jr.—Dot Smirle), April 21.

Nellina—Corktown Cupid. Rideau Kennels' (Ottawa, Ont.) cocker spaniel bitch Nellina (Rover Banger—Josephine) to Corktown Kennels' Corktown Cupid (Ob, Jr.—Dot Smirle), April 26.

Rideau Robina—Corktown Cupid. A. F. Grant's (Ottawa, Ont.) cocker spaniel bitch Rideau Robina (Bob Ob—Flora Kay) to Corktown Kennels' Corktown Cupid (Ob, Jr.—Dot Smirle), April 28.

Countess—Black Duke. D. Batynus's (London, Ont.) cocker bitch Countess (King of Obos—Vermilion) to Luckwell & Douglas's Black Duke (Ob II.—Woodland Queen), April 26.

Black Duke. Jos. Spracklin's (Woodstock) cocker bitch Ina (Duke—Maud S.) to Luckwell & Douglas's Black Duke (Ob II.—Woodland Queen), March 26.

King Phon's Sister—Brantford Red Jacket. Luckwell & Douglas's (Woodstock) cocker bitch champion King Phon's Sister (Ob II.—Woodland Queen) to C. M. Nelles's Brantford Red Jacket (champion Brant—Woodstock Dinah), March 31.

Galusky—Black Duke. Luckwell & Douglas's (Woodstock) cocker bitch Jealousy (Ob, Jr.—Woodland Queen) to their Black Duke (Ob II.—Woodland Queen), April 11.

Woodland Jude—Black Duke. Luckwell & Douglas's (Woodstock) cocker bitch Woodland Jude (champion Dork—Smitty) to their Black Duke (Ob II.—Woodland Queen), April 11.

Stella Brush—Woodland Duke. D. Brash's (Woodstock) cocker bitch Stella Brush (Rover Banger—Josephine) to Luckwell & Douglas's Woodland Duke (Black Duke—Woodland Queen), April 30.

Woodland Cricket—Woodland Duke. Luckwell & Douglas's (Woodstock) cocker bitch Woodland Cricket (Ob II.—Woodland Queen) to their Woodland Duke (Black Duke—Woodland Jude), April 21.

Flossy P—Woodland Duke. W. Henderson's (Woodstock) cocker bitch Flossy P (Glester Shiner—Dido) to Luckwell & Douglas's Woodland Duke (Black Duke—Woodland Queen), April 25.

Margueritta—Woodland Duke. J. G. Jorgensen's (Woodstock) cocker bitch Margueritta (Black Duke—Lady Nell) to Luckwell & Douglas's Woodland Duke (Black Duke—Woodland Queen), April 29.

Brantford Red Riding Hood—Black Duke. C. M. Nelles's (Brantford) cocker bitch Brantford Red Riding Hood (Red Jacket—Pearl) to Luckwell & Douglas's Black Duke (Ob II.—Woodland Queen), April 30.

Brantford Flirt—Black Duke. C. M. Nelles's (Brantford) cocker bitch Brantford Flirt (Red Jacket—Brantford Dorah) to Luckwell & Douglas's Black Duke (Ob II.—Woodland Queen), April 26.

Chatham Queen—White Wonder. Chatham Kennels' (Boston, Mass.) bull-terrier bitch Chatham Queen (champion Jubilee—My Quip) to H. A. Harris's White Wonder (Gully the Great—Kite), April 10.

Lady Melville—Gully the Great. Chatham Kennels' (Boston,

Mass.) bull-terrier bitch Lady Melville (champion Trentham Dutch—Old Lill) to F. F. Dole's Gully the Great (Gladstone—Florie), April 17.

Daisy—Eberhart's Cashier. J. W. Mack's (Dayton, Ky.) pug bitch Daisy (Harry—Bess) to Eberhart Pug Kennels' Eberhart's Cashier (champion Kashi—Lady Thora), April 29.

Fairy—John Bull. Miss H. Belt's (Milford, O.) pug bitch Fairy (Sir Victor—Daisy) to Eberhart Pug Kennels' John Bull (champion Loris—May Queen), April 6.

Moxie—Eberhart's Cashier. B. J. Crimmin's (West Superior, Wis.) pug bitch Moxie to Eberhart Pug Kennels' Eberhart's Cashier (champion Kashi—Lady Thora), April 22.

WHELPS.

Prepared Blanks sent free on application.

Bonnie Buzz. C. A. Sumner's fox-terrier bitch Bonnie Buzz (Blenion Shiner—Bonnie Bess), May 7, three (two dogs), by W. H. McFee's Le Logos (Veronese—Regent Virtue).

Black Belle. C. A. Sumner's fox-terrier bitch Bonnie Belle (Blenion Belle (Blenion Vesuvian—Bonnie Bess), May 9, two (one dog), by his champion Blenion Volunteer.

Dell. A. G. Roemer's (New York City) pointer bitch Dell, April 28, eight (three dogs), by J. Reilly's Harrison.

Tony. M. Hewitt's greyhound bitch Tony (Dart—Flirt), April 28, twelve, by imported Babouin; four killed by bitch.

Black Maria. St. Patrick Kennels' greyhound bitch Black Maria, April 28, nine, by their Flying Dutchman.

Corktown Charm. Black cocker spaniel bitch, whelped Feb. 9, 1893, by Black Jacket out of Dot Smirle, by Corktown Kennels, Ottawa, Ont., to W. B. Palmer, Hamilton, Ont.

Quip. Black and tan cocker spaniel dog, whelped Oct. 6, 1892, by Tip Ob out of Corktown Bebe, by Corktown Kennels, Ottawa, Ont., to J. A. Ellis, same place.

Corktown Coco and Corktown Copsy. Black cocker spaniel dog and bitch, whelped Feb. 9, 1893, by Black Jacket out of Dot Smirle, by Corktown Kennels, Ottawa, Ont., to G. Bell, Toronto, Ont.

Corktown Cleo. Black cocker spaniel bitch, whelped Dec. 12, 1891, by Tin Ob out of Dot Smirle, by Corktown Kennels, Ottawa, Ont., to G. Bell, Toronto, Ont.

Corktown Bebe. Black cocker spaniel bitch, whelped Feb. 5, 1891, by Bounce out of Cleto, by Corktown Kennels, Ottawa, Ont., to G. Bell, Toronto, Ont.

Corktown Clipper. Black cocker spaniel dog, whelped June 29, 1892, by Tip Ob out of Dot Smirle, by Corktown Kennels, Ottawa, Ont., to G. Bell, Toronto, Ont.

Tip Ob. Black cocker spaniel dog, whelped June 30, 1890, by Bob Ob out of Cleto, by Corktown Kennels, Ottawa, Ont., to G. Bell, Toronto, Ont.

Black Jacket. Black cocker spaniel dog, whelped Sept. 28, 1890, by champion Brant out of Woodstock Dinah, by Corktown Kennels, Ottawa, Ont., to G. Bell, Toronto, Ont.

Corktown Copsy. Black cocker spaniel dog, whelped April 20, 1892, by Tip Ob out of Tough, by Corktown Kennels, Ottawa, Ont., to G. Bell, Toronto, Ont.

Corktown Coy. Black cocker spaniel bitch, whelped May 29, 1892, by Pekoe out of Rose Palmer, by Corktown Kennels, Ottawa, Ont., to G. Bell, Toronto, Ont.

ANSWERS TO CORRESPONDENTS.

There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherman, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will also receive careful attention.

J. H. W., Brooklyn, N. Y.—I own a thoroughbred Scotch collie bitch. I bred her to a very fine looking dog whose owner told me was thoroughbred too. I inquired further back and found that he was part Irish setter. The Irish setter was evidently his sire. If I keep one of the male pups of this litter and breed him to a pure collie, would the pups be considered thoroughbred collies? Ans. They might appear to be, but of course they are not pure bred. The cross is a little too near.

Delaware River, N. Y.—I have a Scotch collie bitch. I bred her to a very fine looking dog whose owner told me was thoroughbred too. I inquired further back and found that he was part Irish setter. The Irish setter was evidently his sire. If I keep one of the male pups of this litter and breed him to a pure collie, would the pups be considered thoroughbred collies? Ans. They might appear to be, but of course they are not pure bred. The cross is a little too near.

17. Phila., Open Race, 15ft. Boats, Delaware River.
- On the first of the present month there went into effect in the State of New Jersey a new and excellent law recently passed, creating a board of steamboat inspection, which shall have control of all the waters of the State that are not under the control of the U. S. inspection service. The provisions of the law are similar to those of the U. S. service. We believe that New Jersey is the first State to pass such a law, but the others cannot move too quickly in the same direction.

The instances in which clubs which have once adopted the length and sail area rule have abandoned it for another, and in particular have gone back to a length rule, are so very rare that the action of several of the Boston clubs this spring is likely to attract general attention. From what we can learn, the most that is advanced against the Seawanhaka rule is that in one season's trial it did not work an immediate cure of certain evils of long standing, the greater number of which are due to causes entirely foreign to the question of measurement. We have yet to hear any substantial objections to the length and sail area rule or valid arguments in favor of the mean length rules which have been adopted where it has been discarded.

The condition of affairs among the large number of small clubs about Boston, nearly all of which are doing a good deal of active racing, is by no means satisfactory; but those who are looking for a remedy will have to go a good deal deeper into the matter than a mere change of the measurement formula. The interests of these clubs, some thirty in all, are so closely identified that there is an im-

mediate need of concerted action looking to a uniform system of method of measurement, sailing rules, allowance tables, fixtures and measurement rule, the last perhaps being the least important of all. What is most needed now is not only harmony and good feeling which in fact quite generally prevails, but positive action on the part of every club to harmonize its rules with those of other clubs. This much accomplished, the task of improving the rules will be a comparatively easy one; but until it is done it will be idle to expect a millennium in yacht racing through the taxation or non-taxation of sail or the incorporation of some particular amount of overhang in a formula.

In the present mixed condition of racing rules, methods of measurement, class limits and formulas about Boston, it is absurd to expect a fair test of any formula; but at the same time there is, in the large number of keen racing yachtsmen and the immense fleet of yachts from 15 to 30 ft. which are regularly raced, the opportunity to build up a system of racing clubs and racing boats such as is found neither on the Clyde, the Solent, the Thames nor the Hudson. Boston is far better situated than New York in these respects, and it only rests with the members of the various local clubs to make Massachusetts Bay the center of a model system of yacht racing.

The letter of the Corinthian Y. C., which we publish elsewhere, is most interesting in showing that, like the Eastern Y. C. last year, the club is fully awake to the changed and constantly changing conditions of yacht racing, and the necessity of some strong effort on the part of the clubs to infuse a new interest into racing rather than to follow the set course of the old club regatta with many classes and few entries in each. The impossibility of again securing fairly good entries in all regular classes has been demonstrated only too frequently of late years, and it is quite evident the racing of the future will be done by such particular classes as happen to be in favor for the time, rather than on a general turn-out of the whole fleet. In this case the best results will be obtained by intelligent efforts to concentrate the prize moneys and the labor of the regatta committees entirely on such classes as promise to make some return, rather than in indiscriminate attempts to promote racing throughout the fleet. We hope that the owners of the schooners will give such a response to the committee's letter as it deserves, and thus encourage other clubs to similar efforts.

MR. CARROLL'S experience thus far in his transatlantic venture has been rather discouraging, and in addition to the delay of the necessary changes in his yacht, he has been further annoyed by the desertion of a number of seamen. The most probable reason for this is the certainty of four large yachts sailing a number of races promises good winning money to all who are fortunate enough to get on the winning boat; and the prospect of a season on a possible Cup defender here is much more alluring than that of making two ocean passages and racing on Navahoe in British waters.

The reasons given by the men, of overwork and poor pay, are interesting only because they have been used as the basis for a comparison of wages on this side and the other, which is entirely incorrect, it being stated that the sailors on British yachts are paid \$42 per month as compared with \$30 here. The pay of a British sailor is really 26 shillings per week, or \$37 per month as compared with \$30 here; but with one very important difference—the British seaman boards himself, while on an American yacht the entire crew is fed by the owner, in addition to the wages stated. In the matter of racing money the British seaman has somewhat the better of it, as he is paid \$5 for losing as well as \$10 for winning, only the winning money being paid on this side. He has, too, an allowance of 2s. 6d., about 63 cents, for "grub money" on racing days. On the whole, however, the seaman on an American yacht is better fed and better paid. The sum of \$42 per month quoted as the regular rate on a British yacht has only been paid in the case of Galatea and one or two other challengers for the America's Cup, in consideration of the double voyage and the certainty of sailing only two or three races in place of perhaps fifteen, had the yacht finished the season at home. We understand that the crew of Navahoe have been paid \$35 per month and of course their board.

The races of Saturday and Monday have each been won by Valkyrie, thus retrieving her previous defeats by Britannia, and showing that it is entirely too early yet to form a fair opinion of these two. In the race from Southend to Harwich, 50 miles, Valkyrie won by 10m. elapsed time, and in the race off Harwich she won by 1m. 2s. corrected.

The Yachting Annuals.

The new volume of "Manning's American Yacht List" for 1893 was ready by Decoration Day, and is even an improvement on its predecessor.

HANDESEL.

cessor of last year. The size, style and general subject matter is the same, but the various lists of yachts, owners, clubs, etc., have been revised and extended, increasing the accuracy and value of the book. The list of races sailed is very complete, and it is further supplemented by the record of each yacht, given in a separate column in the regular yacht list. The list of owners, club flags and private signals is also issued separately as a smaller volume at a reduced price.

"Kiley's Yachtsman's Guide," just ready, is the same indispensable hand book as ever, giving an enormous amount of information in a condensed and convenient form. Among its varied contents are tide tables, charts of the principal harbors, club flags, international code, details of pilotage, knots and splices, buoys and much other kindred matter. The numerous illustrations have as subjects the leading yachts and the officers of prominent clubs.

We have received from the author, "Thalassia," a copy of the useful little handbook of the Solent and the Coves clubs. The new edition contains a list of the fixtures of the Solent and Coves clubs, a list of the clubs, giving officers, date of organization, prize funds,

courses, etc., a summary of the Y.R.A. rules, allowance tables, and charts of the various courses.

Andrew Thompson's "Yachting Guide," that minute but useful compendium of British yachting, has been further improved this year, and gives all needful information regarding tides, racing rules, fixtures, etc.

The 85-Footers.

NAVABOE is now at Bristol, the work of cutting out the lead not yet being completed. Lawley has completed her hollow boom and gaff. She will now receive her cruising rig under which she will cross.

The Paine boat is not yet named, but she is nearly completed so far as the hull goes, and will be launched on June 14.

It was expected that Pilgrim would be launched this week, but owing to delay in laying her decks she will not be launched until next week, when she will be towed at once to New York to ship her fin.

Colonia is so nearly completed that her trial trip is set for Saturday. The Morgan-Iselin boat, as yet unnamed, has her decks about completed and the lead keel cast in place. The report is current that her builders will be liable to a penalty of \$3,000 if she is not ready for a trial trip by June 30.

At the last meeting of the Monaquet Y. C., on the recommendation of the regatta committee, it was voted to amend Rule II. by striking out the section relating to waterline and sail area, and to adopt in its place the following measurements: Length on the waterline, plus one-fifth the after overhang; the full crew must be aboard and stationed amidships. Also to amend Rule IV. so that it will read, "Yachts shall be divided into classes according to their sailing length,

THRUSH.

as follows: First class, 22ft. and less than 30ft.; second class, 18ft. and less than 22ft.; third class, 15ft. and less than 18ft." The following fixtures for the season, arranged by the regatta committee, were adopted: Opening day, June 8; club race, July 8; ladies' day, July 20; first championship, Aug. 2; second championship, Aug. 16; championship sail-off to be announced later. There will be a race on Aug. 26 for a cup offered by ex-Com. E. S. Hunt, to be sailed for by all the boats of the club without classification. The club adopted the Seawanhaka rule last season.

DECORATION DAY—MAY 30.

THE weather, which throughout the whole spring has been bad beyond criticism for fitting out and for early yachting, made a determined effort to redeem itself on Decoration Day; and, as our reports indicate, clear bright skies prevailed, with fresh or strong breezes for the various events along the coast and on the lakes. In most cases the clubs were content with an informal sail; but such races as were set came off quite successfully, the principal one being the open race of the South Boston Y. C. About New York, the largest fleet out was that of the Harlem Y. C. Many clubs which are not reported celebrated the day as the formal opening of the yachting season by short sails and an entertainment of some kind at the club house.

South Boston Y. C. Open Regatta.

CITY POINT—BOSTON HARBOR.

WITH a large membership, a good fleet of yachts, a convenient clubhouse and admirable sailing and racing waters, the South Boston Y. C. has not of late years shown that life and spirit which might be expected from it. Of late, however, some of its members have started in to stir up the club, especially in the direction of racing, and the immediate result of these efforts was the very successful race with which the Boston season was inaugurated on last Tuesday. The members of the regatta committee have been at work for some weeks over the details of the race, and as the result of their labors a very good fleet was assembled, in spite of the late season; while the race was most successful in all details. Out of the 92 entries over 80 yachts started and 62 were timed at the finish. The race was open to all yachts of 35ft. down to 15ft., enrolled in any club and boats under 15 whether enrolled in a club or not. All shifting ballast was prohibited and a time limit of five hours was set. The yachts were divided into five classes, keels and centerboards sailing together. First class, 25ft. and over 35ft., sailing length. Special class, all jib and mainsail yachts under 21ft., waterline length. Second class, 20ft. and less than 25ft., sailing length. Third class, 15ft. and less than 20ft., sailing length. Fourth class, all boats under 15ft., sailing length. The prizes were: First class, \$30 and \$20; second class, \$25, \$15, \$10 and \$5; third class, \$15, \$10 and \$5; fourth class, \$8, \$5 and \$3; special class, \$30 and \$10. The measurement rule of the club, i.e., l.w.l. plus one-fifth total overhang, was used. The start was a flying one, with five minutes interval between classes.

The early morning was cool and calm, but at colors a light easterly breeze sprung up. Although it promised to continue light and variable, by 10 A. M. there was a good sailing breeze from S. E., and this gradually increased to a stiff breeze that stirred the whitecaps on Boston Bay, and made most enjoyable sailing. The older boats in the first class were rather out-classed by the larger fin keel Handels, their superior in size and type. In the special class, made for the 21 footers as the club's regular classes are 30 and 25ft., only three boats started, Exile, Thrush and Romance. Thrush was hastily put in commission for the race and had hardly enough ballast. Romance was built last year but did not race, being completed late in the season; this year she is in better shape and will sail in the local races. Violet parted a preventer and lost a little time, and ideal carried away her bowsprit early in the race. The full times were:

The Good Luck protested the Ustane on measurement, the Magpie and Egeria entered mutual protests on measurements and the Princess protested the Marion for fouling her at buoy 7.

The judges of the race were ex-Commodore Arthur Fuller, Thomas Christian, C. McKenna, W. H. Godfrey and Hubert Pope.

The regatta committee included Edward L. Stickney, chairman; William Allerton, secretary; Charles J. Chance, Frederick E. Bowker, Thomas F. Bruen, Newton B. Stone, John V. Young and Com. Morrill and Vice-Com. Ferdinand ex-officio.

Harlem Y. C.

COLLEGE POINT—LONG ISLAND SOUND.

THE tenth annual regatta of the Harlem Y. C. was sailed on May 30 from the new club station at College Point, the courses being: For classes A, B, C, D, E, F and G is around Sand's Point Buoy, 15 miles; classes H, I and J, around Gangway Buoy, 15 miles, and classes K and L, around Stepping Stones Light, 12 miles. The first half of the course was made before a strong southeast breeze and the beat home was to windward with even more wind, not a few of the starters failing to finish. The times were:

	CLASS A—CABIN SLOOPS, 35FT. AND OVER.

Star, H. Douglass.....	14.06	1 10 00	0 45 50

The judges were H. A. Norwood, Aaron Brown, Franklin Davis and J. R. Frigle. Viola wins \$10, Mavis \$6, in the first class; Chippie \$9, Madcap \$5.25, in the second, and Vona \$8 and Star \$7.75 in the third.

Atlantic Y. C.

As the first yacht club to institute a formal observance of Decoration Day, the Atlantic Y. C. still rigorously maintains the custom, and as usual a large fleet mustered off Bay Ridge on Monday. The principal object of the regatta was the new schooner Emerald, still far from completion, but Mr. Maxwell had determined to have a sail on Decoration Day, and he did it, though the yacht returned to Elizabeth early next day for further work. On Saturday and Monday all was bustle aboard, rigging was set up, sails bent, and everything fitted in place, and the yacht was ready to get under way for a trial trip on Tuesday morning. The topmast rigging was not spliced, the ends being merely turned up and seized, and much of the other work was suitably hurried. The programme for the day, which was carried out to the letter, was as follows:

FLAGSHIP WATER WITCH, {
New York, May 21, 1893.

GENERAL ORDERS NO. 2.

I. The regular excursion of the fleet of the Atlantic Y. C., provided for in Section 1 of Chapter 10 of the by-laws, will take place on Decoration Day, Tuesday, May 30.

II. The fleet will assemble off the club house, foot of Fifty-fifth street, Brooklyn, promptly at 10 o'clock A. M., anchoring in two lines, 100 yds. apart and parallel to the shore. All steamers, schooners and classes 1, 2, 3 and 4 of sloops will form the offshore line, the sloop Rival, Vice-Com. Sanford, on the right, and all other classes the inshore line, the Saona, Rear-Com. Ketchum, on the right. The southerly end of each line shall be the right of line and shall be off the westerly corner of the Atlantic Basin. The flag officers designated shall take position promptly at 9:30 A. M., anchoring as near as practicable in line with the southwest corner of the basin. Yachts will take position in their respective lines without delay, regardless of size, and without interfering with yachts already in position.

III. At 10:30 A. M. a gun will be fired from the flagship and the club signal will be hoisted at the club house. The club will then salute the flag as follows: Commencing on the right of the offshore line, each yacht in line, in quick succession, and in the order of its position, shall fire a gun, the inshore line firing in like order after the offshore line.

IV. After the salute a gun will be fired from the club house, which will be the signal for the fleet to weigh anchor and start. No time will be taken either at the start or finish. All schooners and classes 1, 2, 3, 4 and 5 of sloops will sail to and around buoy 12, on the southwest spit, keeping same on the port hand, thence home to club anchorage. All other classes will sail to and around Swash Channel bell buoy, keeping same on port hand, thence home to club anchorage. Yachts must pass to the westward of Fort Lafayette and the Romer Beacon and to the eastward of buoys on west bank, both going and returning.

V. Yachts will sail in cruising trim, with anchors, chains, deck fittings, cabin furniture and fixtures in their usual places, and boats on davits, on deck, or towing astern, as they are usually carried in cruising. Promptness in taking position is particularly requested. By order of the Commodore, GEORGE H. CHURCH, Fleet Captain.

With a fresh breeze up the Bay the sail was lively and exciting, and those present were treated to a scrub race between Emerald and Iroquois, the latter schooner, with Mr. Iselin, Capt. Hansen and the racing crew of the new syndicate boat on board, having towed down Vona to Rochelle to try the new boat. As a race the brush did not amount to much, the one boat in perfect form and manned by a picked crew, while the other was just out of the yard and with no regular crew, while all gear and sails were new. Emerald was handicapped by the absence of a spinnaker on the run in, and by the fact that her topmast rigging parted the seizing and made it necessary for her to stow her light sails, but on the whole she made a very good showing. After the race Iroquois returned to her quarters at New Rochelle. With the fleet were Water Witch, Rival, Saona, Tigress, Anaconda, Hydriad, Nautilus, Shamrock, Aglaia, Iola, Cavalier, Beatrice, Gevalia, Awa, Signal, Rover, Coronet, Ventura, Vidette, Daffodil and Agnes. A dinner was served in the club house after the return of the fleet.

Seawanhaka Corinthian Y. C.

The Seawanhaka Corinthian Y. C. in selecting May 27 for the opening of the Oyster Bay house missed the pleasant weather of Decoration Day and met with a chilly and windy day, the races being postponed as the boats had not reached Oyster Bay. The members of the club were on hand, however, Com. Center coming in on Vice-Com. Benedict's steam yacht Oneida, Medusa, the flagship, not being yet in commission. The gun was fired by Mrs. A. F. Montant, wife of the fleet captain, and the colors duly hoisted, after which a luncheon was served. There were present Com. Robert Center, Vice-Com. Benedict, Mr. and Mrs. John L. Lawrence, George Work, Mr. and Mrs. J. Forbes-Leitch, Mr. and Mrs. Henry Stanton, Mr. and Mrs. Stanley W. Dexter, Mr. and Mrs. Colgate Hoyt, Mr. and Mrs. Arthur Weeks, Mr. and Mrs. E. C. Benedict, Mr. and Mrs. F. T. Underhill, Mr. and Mrs. John Agar,

Mr. and Mrs. O. B. Jennings, Mr. and Mrs. A. P. Montant, Mr. and Mrs. J. K. Gracie, Dr. and Mrs. Derby, Mr. and Mrs. Charles H. Leland, Mr. and Mrs. E. M. Townsend, Dr. and Mrs. J. C. Barton, the Misses Du Vivier, Weeks, Swan, Leland, Townsend, Randolph, Van Schaick, Webb, Johnson and Willis, Rear-Com. Herman Clarke, F. Delano Weeks, George Bullock, R. C. Townsend, Gerard Beekman, John Hyslop, J. F. Taus, Irving Cox, Walter C. Keer, Mr. and Mrs. Arthur M. Dodge and Mr. and Mrs. C. W. Wetmore.

In the harbor were the steam yachts Oneida, Vice-Com. E. C. Benedict; Reverie, Frederic Bourne; Avenal, G. W. Loper; Emu, E. Du Vivier; Jean, James Renwick, and Linta, Walter Luttrell; schooners Brunhilde, David H. King, Jr., and Ramona, Henry F. Gillig; sloops Gracie, Arthur M. Dodge; Katrina, George Work; Pilgrim, E. M. Townsend; Banshee, Arthur M. Scribner; Kathleen, Capt. Rathbone; Nady, A. P. Montant, and Mirth, J. W. Beekman; cutters Bedouin, C. W. Wetmore; Oriva, Rear-Com. Clarke; Nymph, W. H. Harris, and Lotovana, M. G. Fosdick.

The first race for the Rouse and Wetmore cups was set for May 30, but only Nameless and Toboggan were ready, the others not being in racing condition. A match was made between the two, Mr. Wetmore sailing Nameless and Mr. Cornelius Roosevelt, an old member of the club, long absent in Paris, sailing Toboggan. Nameless parted her hobstay and withdrew, leaving Toboggan to finish alone. The club house in this city will be open all summer.

Pavonia Y. C.

COMMUNIPAW.—NEW YORK BAY.

The Pavonia Y. C. had arranged for the opening of the Atlantic Highlands club house on Decoration Day, but as the alterations to the house were not completed, the opening was postponed to June 15, and

Two Stars, H. M. Jones.....	16.06	1 56 51	1 17 04
Thelma, F. C. Holmes.....	15.07	1 59 06	1 17 28
Wild Eawn, W. T. Eldridge.....	17.02	1 59 25	1 20 42
Ida F. J. E. Jordan.....	17.05	1 59 06	1 20 46

Nancy Hanks is a new boat, built and sailed by Capt. Nat Watson, of the schooner Constellation. The club has arranged the following races for the season. Open to all boats of the following classes: 1st, class, catboats 20ft. and under 26ft. w.l.; 2d, class, catboats under 20ft. w.l.; 3d, class, spritsail boats, with foresail and mainsail; 4th, class, boats with gaff foresail and sprit mainsail. The dates are: May 30, June 17, July 4, Sept. 16 and Oct. 7. The other events of the season are Aug. 3, ladies' day, and Sept. 4 outside races.

The regatta, Sept. 4, will be sailed in the outside harbor, starting about 1 1/2 hours before low water. The other races will be sailed in the inside harbor, starting about 1 1/2 hours before high water.

Besides the general prizes that will be offered amounting to about \$250, a club pennant prize will be offered to each of the four classes of boats; to be awarded to boats of this club making the shortest corrected time in the greatest number of the first five races.

The races are to be sailed under such conditions as may be prescribed in the regatta notices of each race, subject to the rules of this club. The regatta committee is composed of Messrs. Nathaniel Morton, F. N. Eldridge, A. O. Fay.

Brooklyn Y. C.

BATH BEACH—GRAVENSEND BAY.

The fleet of the Brooklyn Y. C. was ready as per orders early on Tuesday morning, the first ceremony being a review and inspection by the officers, who were rowed through the fleet in Com. Sutton's gig, each yacht saluting with the ensign as they passed. Then the fleet got under way for a sail down the Bay, and on the return all captains were invited on board the new flagship Loyal, lunch being served at the same time at the club house. There was a reception and dance ashore in the evening. The following yachts took part in the proceedings: Acorn, P. H. Jeannot; Addie, E. S. Anderson; Alma, J. S. Hale; Carrie, Charles H. Oliver; Dolphin, G. L. Robinson; Edda D., R. W. Rummell; Grace, J. V. P. Shields; Grimaldin, S. S. Ballou; Lorna, Dr. H. E. Spencer; Juanita, C. F. Larzelere; Mabel, Peter Mahoney; Pan-chito, G. P. Foote; Sun-beam, John Macrae; Sappho, G. B. Lyons; Triant, F. L. Townsend; G. B. Townsend; Alice, John Cotter; Emmie, Albert Clunan; Faustina, R. C. Hopkins; Isolda, F. W. Bobbell; Waif, W. E. Hart; Annie, R. G. Austin; Alper, W. E. Doggett; Boss, M. J. Han; W. T. Murphy; Fair Wind, J. G. Meehan; Gypsy, North McLean; Golden Rope, F. Prentiss; Ida, Frank McCarthy; Helka, E. H. Converse; Iroquois, E. H. Chandler; Kangaroo, Franklin Beams; Mary A. Tracy; Mary A., J. J. Lyons; Senoiole, J. Brown, Jr.; Seneca, J. P. Tribeken; Tropic, E. M. Rewey; Vixen, Louis Wunder; Water Lily, W. D. Anderson, Jr.; Laura E., J. J. Bookee.

American Y. C.

The house of the American Y. C., at Milton Point, was opened on May 30, the colors being set at 4 P. M. Among those present were: Com. Frank R. Lawrence, Vice-Com. John H. Flagler, Mr. and Mrs. M. F. Polhemus, Walter O. Jones, Geo. W. Place, C. H. Lauteran, James Brisbane, Frank Porter, Horace L. Hotchkiss, Miss O'Hara, Miss Vernon Brown, Frank Hall, Mr. Morris, H. B. Taylor, J. R. Livingstone, Mrs. Storm, G. B. Charlick, Mr. and Mrs. E. Davidson, Dr. L. L. Seaman, David H. King, Jr., Preston Watson, G. B. Watts, John P. Townsend, John S. Tilney, John W. Rooman, Robert Glover, Geo. W. Hall, Rear-Com. G. Weaver Loper, Thos. L. Scovill, Dr. Chas. L. Pardee, Charles H. Haswell, Chief Engineer George W. Magee, United States steamship Miantoumoh; W. S. Alley, Isaiah Faxon, John R. Hegeman, W. H. Starbuck, W. H. Catlin, E. H. Weatherbee, Clement Gould, Mr. and Mrs. A. B. Alley, ex-Com. G. C. W. Lowrey, of the Larchmont Club; F. W. Flint, C. R. Flint, Frederick M. Dey, C. M. Wayland Thomas Manning, Mr. and Mrs. Buchanan, Mr. and Mrs. Howard Wainwright, W. Tunis, Mrs. Roach, Miss Roach, Stephen Roach, Dr. Samuel Hall, Mrs. E. Millbank, Mr. and Mrs. John E. Wayland, Dr. Collins, H. J. Buzbee, G. Dessauer, James Fairbrother, Miss G. Doscher, S. H. Van Sicklen, and Mr. and Mrs. R. M. Jordan.

Oceanic Y. C.

COMMUNIPAW—NEW YORK BAY.

The Oceanic Y. C. sailed its first race on May 30 in a strong S.E. wind, which disabled three of the boats. The times were:

CLASS A—SLOOPS.			
	Start.	Finish.	
Osceola, M. Roseman.....	2 22 15	4 06 15

FOURTH CLASS.			
Aphrodite, A. G. Fay.....	16.08	1 54 28	1 14 55

THE JUNE REGATTAS.

The programmes for the June regattas of the leading clubs have mostly been issued and this week the racing will begin with the important regatta of the Larchmont Y. C. starting at 11 A. M. over the regular club courses and under the club classification.

On Monday, June 12, the regatta of the Brooklyn Y. C. will be sailed; the conditions were published two weeks since.

The twenty-eighth annual regatta of the Atlantic Y. C. will be sailed on June 13 and will be open to yachts enrolled in the following clubs: New York, American, Corinthian, Seawanhaka Corinthian, Larchmont, Philadelphia, Marine and Field Club, Philadelphia, Corinthian of Philadelphia, Eastern, Riverside, Cedar Point, New Haven, the Pequot Association and New Bedford.

The start will be at 11 o'clock. The starting and finishing line for all classes will be between Buoy No. 11 and a stakeboat anchored to southward and eastward thereof. The signals will be given from the judges' boat. The preparatory signal will be a whistle and the lowering of the club burgee for all yachts to approach the line. The start will be for the 30ft. class, 7, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

The classes are as follows: Schooners.—Class 1, all over 90ft., prize \$150; class 2, all over 70 and not over 90ft., prize \$125; class 3, all of 70ft. and under, prize \$100.

Sloops, cutters and yawls.—Class 1, all over 70ft., prize \$100; class 2, all over 61 and not over 70ft., prize \$75; class 3, all over 53 and not over 61ft., prize \$55; class 4, all over 46 and not over 53ft., prize \$30; class 5, all over 40 and not over 46ft., prize \$35; class 6, all over 35 and not over 40ft., prize \$30; class 7, all over 30 and not over 35ft., prize \$25; class 8, all over 25 and not over 30ft., prize \$40; class 9, all of 23ft. and under, prize \$35; class 10, all open sloops, prize \$30, and class 11, all cut rigged yawls, prize \$25.

The courses are: All classes of schooners and Classes 1, 2 and 3 of sloops to Southwest Spit, thence to Scotland Lightship, thence five miles south-southwest to turning mark, and return over same course. For Classes 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

For Classes 6 and 7, same as foregoing, to Scotland Lightship, thence to finishing line.

For Classes 8, 9, 10 and 11, to said stakeboat near Buoy No. 6, off Sandy Hook, and return.

Yachts will be rated for time allowance according to the following system: To the square foot of the sail area add the load waterline and divide the result by 2. The result is the measurement for time allowance.

Yachts entering to sail in cruising trim shall be rated for time allowance at 94 per cent. of their racing length. Yachts so entered must sail in ordinary cruising trim, and carry their complete cruising outfit.

The prizes to be sailed for are as follows: Schooners.—Class 1, \$150; Class 2, \$125; Class 3, \$100. Sloops, cutters and yawls.—Class 1, \$100; Class 2, \$75; Class 3, \$65; Class 4, \$60; Class 5, \$55; Class 6, \$50; Class 7, \$50; Class 8, \$40; Class 9, \$35; Class 10, \$30. Catboats.—Class 11, \$25.

In case of only one yacht starting in any class, the prize will be one-half of the amount named in the above list, and where five or more yachts start on a class a second prize amounting to one-half of the first prize will be given. The prizes may be received in cash or the equivalent in silver, at the option of the winner.

Entries must be in writing and filed with the chairman of the regatta committee, Mr. Henry B. Howell, No. 109 Wall street, this city, not later than 11 o'clock A. M. Saturday, June 10.

The 48th annual regatta of the New York Y. C. will be sailed on Thursday, June 15, the conditions being as follows:

Schooners.—Class 1, over 100ft.; class 2, over 80ft. and not over 100ft.; class 3, over 80ft. and not over 90ft.; class 4, over 70ft. and not over 80ft.; class 5, of 70ft. and under.

Sloops, cutters and yawls.—Class 1, over 80ft.; class 2, over 70ft. and not over 80ft.; class 3, over 61ft. and not over 70ft.; class 4, over 53ft. and not over 61ft.; class 5, over 46ft. and not over 53ft.; class 6, over 40ft. and not over 46ft.; class 7, over 35ft. and not over 40ft.; class 8, over 30ft. and not over 35ft.; class 9, over 25ft. and not over 30ft.; class 10, of 23ft. and under.

Any yacht launched prior to June 1888, exceeding the higher limit in any class by not over the fraction of a foot, shall be included in that class. Any yacht when alone in her class can sail in the class above.

There will be no time limit to the race. The start will be off buoy No. 11 in the lower bay, and the preparatory signal will be made at ten minutes to 11 o'clock A. M., wind and weather permitting.

The courses will be as follows: Class 1, from the Judges' boat, anchored to the east of buoy No. 11, to buoy No. 12, near the South Spit; thence south of buoy No. 10 and north of the bell buoy off the point of Sandy Hook to Sandy Hook Lightship, turning from the north and east and returning over the same course.

Course No. 2.—The same as course No. 1, substituting the Scotland Lightship for the Sandy Hook Lightship. This course is intended for classes 6 and 7—sloops, cutters and yawls.

A stakeboat displaying a large club signal will be anchored to the westward of buoy No. 11.

To mark buoy No. 12, a boat displaying a large red flag will be anchored at the eastward of it.

Yachts sailing in cruising trim must carry at least one anchor on the bow with cable bent, cruising complement of boats, cruising deck, cabin and galley fittings and fixtures in place; topsails extended above the truck or beyond the end of the mast.

The Brooklyn, E. D., Schuetzen Corps, Captain Charles Heinbockel is holding a festival in the new Schuetzen Park at Glendale, L. I. to-day. Fifteen cash prizes, ranging from \$20 down to \$1, will be divided among the lucky winners. Three gold medals will be found there waiting to be pinned to the bosom of some sharpshooter.

The ninth annual tournament of the Sportsmen's Association of the Northwest will be held in Victoria, B. C., on Wednesday to Saturday, inclusive, next week and a big crowd of enthusiasts are expected. The programme has already been summarized in these columns. The association has been extremely liberal, and offers cash and medals aggregating in value over \$700.

Idred, 1111010110101111111111111111-23

DETROIT, Mich., June 1.—*Editor Forest and Stream:* The fourth tournament of the Manufacturers' Trap-Shooting Association will be held at St. Louis, Mo., July 6 and 7, and will be followed by a live bird shoot on the 8th. The association will give away \$100 a day and an elegant gold trophy emblematic of the individual championship of Missouri. This shoot ought to draw well as everybody who participated in the three previous shoots, was highly pleased and speaks in the highest terms of the liberality of the association. The association has been successful in the past, and has been able to give away \$1000. It has been done before, give them something to shoot for, and has so far given away \$600 in cash, and three elegant trophies, has made about \$800 for the clubs where the tournaments have been held, and created quite a boom in trap-shooting in each place. Numerous applications for tournaments have been received from gun clubs throughout the country, the places have been selected, as the applications have been received (just come first served). I hope to see you at the shoot for St. Louis shoot.

JOHN PARKER, Manager,
Manufacturers' Trap-Shooting Association.

Connecticut Trap-Shooters' League.

Publications.

Names and Portraits of Birds
Which Interest Gunners; with descriptions in language understood of the people.
BY G. TRUMBULL.
Contains the local names in popular use, and eighty-nine illustrations, which, with the clear descriptions in the text, will enable any man who can read to identify the contents of his game bag.
OPINIONS OF THE PRESS:
It is the first, so far as we know, of a class of books of which the need is felt in every department of natural history.—*Troy Press.*
To all dwellers by the water and in the country and especially all who shoot, the book will supply a great need, and every one who is interested in birds will be interested in it.—*Boston Evening Traveller.*
The book should find its way to a choice place in every sportsman's library.—*Chicago Inter-Ocean.*
There is a delightful dearth of dead languages in this book. The sportsman who looks between the covers for a description of some game bird—a description which will enable him to identify the creature should he meet it in the woods or on the water—is not compelled to shut the book, drop a bad word or two upon it and go in search of some Greek and Latin dictionaries to find out what the description means.—*New York Herald.*

Routes for Sportsmen.

When planning your annual tour remember that this company controls over 4,100 miles of railway equipped in the most approved modern style, passing through a magnificent country noted for its unsurpassed facilities for sport.

A FEW OF THE PRINCIPAL RESORTS.

ANDROS-COGGIN LAKES (via Bryant's Pond or Bethel).—Excellent trout fishing and game, large and small, of every description.

THE WHITE MOUNTAINS (via Gorham, N. H.).—For trout and varieties of game.

THE SALMON RESORTS OF QUEBEC, New Brunswick and Nova Scotia (reached via Quebec).—For salmon, trout, caribou, bear, moose, beaver, otter, etc.

THE RIVER ST. LAWRENCE (in the neighborhood of the line for 400 miles).—For muscalonge, pike, bass, whitefish, pickerel, perch.

THE THOUSAND ISLANDS (via Gananoque or Kingston).—For pickerel, black bass, muscalonge, pike.

MUSKOKA LAKES.—The best place on the continent for fishing, shooting and camping. All varieties of fish and game.

PARRY SOUND AND GEORGIAN BAY (reached via Penzance, Midland, Collingwood, etc.).—For black bass, pickerel, deer, partridge, bear, otter, etc.

LAKES ONTARIO, ERIE, HURON AND MICHIGAN (via stations at all principal ports).

LAKE SUPERIOR (via Collingwood, Warton, Sarnia in connection with steamship lines).

The charges for hotels, guides and camping at many of the fishing waters named above are extremely low. Full particulars of same are published in a pamphlet descriptive of the "Fishing and Hunting Resorts of the Grand Trunk Railway," which will be forwarded free on application to the company's principal agents, or to the General Passenger Agent at Montreal.

N. J. POWER, General Passenger Agent, L. J. SEARGEANT, General Manager.

A BLANK DAY.

The sportsman of the North often has a blank day. Indeed, no Northern shooter knows much about shooting until he has shot in the South, where the superb natural conditions have left the game in undiminished plenty in the covers.

Don't Go After Bear to the Rockies. Go to the wide river bottoms of Mississippi or Louisiana and you will get one.

Don't Go After Turkeys to the Great West, but to the Great South, in Mississippi and Louisiana, where the unbounded woodlands hold abundance of these noble birds.

Don't Go After Ducks in the North, and work hard for days for a dozen ducks. Go South, to Louisiana and Texas, and learn what wildfowl shooting is.

The Quail, Woodcock and Snipe shooting of the South is such as the Northern hunter never dreamed of. A genial climate, a pleasant people, a six months open season, and birds until you want no more.

The Illinois Central Road runs direct to all this country, and is the only road that does.

A. K. HANSON, Gen. Pass. Agent, Illinois Central R. R., Chicago.

Rome, Watertown & Ogdensburg Railroad.

N. Y. C. & H. R. R. CO., Lessee.

The Rome, Watertown & Ogdensburg Railroad is the route to the best fishing grounds in New York State and Canada. Through cars are run from New York City, Chicago, Detroit, Buffalo, Niagara Falls, Suspension Bridge, Utica, Syracuse and Rochester, to Cape Vincent, Clayton, St. Lawrence River, Massena Springs, Ogdensburg, and all principal places on Lake Ontario, and to Norwood for all points in the White Mountains and Maritime Provinces.

This line reaches the best and most famous fishing grounds in America for salmon, muscalonge, whitefish, black bass, brook trout, lake trout, white fish, pickerel, perch and other fish. Information in regard to the fishing grounds and how to reach them will be cheerfully furnished upon application to THEO. BUTTERFIELD, General Passenger Agent, Syracuse, N. Y.

At the New Fishing and Hunting Resort ATTEAN LAKE

You can get more game and larger trout than anywhere else in northern Maine. No stage or buckboarding. First-class table, new camps, boats and canoes. Only 19 hours from New York; 15 hours from Boston. Write for circular giving rates, etc., to

ITHAMAR HOWE, Prop., Moose, River, Me.

CAMP PHENIX

At Garden of Eden, Nova Scotia,

will be open for sportsmen and hunters from May 1 till end of season. No better trout fishing or moose hunting can be found in Canada. Forty lakes with finest of trout fishing within a radius of five miles of the camp. Write for circulars.

M. SJOSTEDT, Garden of Eden, Nova Scotia.

DEER LICK CAMP.

situated at Hell Gate Falls on the Dead Diamond River, Wentworth's Location, N. H., in the wildest, most picturesque and romantic section of New England. The sportsman's ideal camp and the finest fishing and game regions of the northern wilderness. First class table, boats and canoes. Reached by M. C. R. R. from Boston to Colebrook, N. H., thence by stage and boat to camp. Open from June 10 to Oct. 15. Write for full particulars and terms to F. A. FLINT, Colebrook, N. H.

HOTEL ALCONQUIN, CAPE VINCENT, NEW YORK.

ON THE ST. LAWRENCE RIVER. F. D. MIDDLETON, Proprietor. SEASON OPEN JUNE 21. Rates.—Transient, \$2.00 to \$3.00 per day; weekly, \$12.00 to \$21.00. Special rates to families. For information address F. D. MIDDLETON, 182 Duane St., New York. Care E. N. JACKSON until June 15.

Attention Bass Fishermen!

Gill House, Henderson Harbor, is the place you have been looking for for years. This is a place where you can take your families and have all the pleasures of country life and get the best black bass fishing in New York. For circulars, address H. H. GILL, Proprietor, Henderson Harbor, N. Y.

MITCHELL HOUSE, (Formerly Elting House).

W. E. MITCHELL, Proprietor, Ellenville, N. Y. Good trout fishing in near by streams.

On Lake Champlain.

"SAMSON'S" LAKE VIEW HOUSE, Fishing and Health Resort, opens May 15.

Wants and Exchanges.

Advertisements under this head, strictly limited to Wants and Exchanges, will be inserted at the special rate of three cents a word each insertion. The money must accompany the order.

CHAMPION BRED POINTERS, LIVER AND white and lemon and white, ten and twelve months old. Make offers, Lock Drawer 14, Watbury, Vt.

WANTED.—COPIES OF FOREST AND STREAM of May 6, Sept. 23, 1886, and Sept. 25, 1890. Address FOREST AND STREAM office.

Property For Sale.

FOR SALE. MEMBERSHIP SHARES IN THE Triton Fish and Game Club, CANADA.

There has just been incorporated under the above title the finest fishing and gunning association in Canada. This preserve consists of 102,000 acres, having within its borders over fifty lakes and a score of rivers and mountain streams, all of which swarm with trout ranging from 6lbs. (*Salmo fontinalis* only.) The virgin wilderness teems with small game. Of the larger kinds the caribou abounds. Moose and black bear are fairly plentiful, as also beaver, otter and other fur-bearing animals.

The Triton Club is situated 100 miles north of Quebec, on the line of the Quebec & Lake St. John Railway, and is reached in twenty-four hours easy journey (by rail) from New York City. (See prospectus.)

A limited number of shares is offered to gentlemen of unexceptionable references.

As a summer resort for both gentlemen and ladies the Triton Club offers great attractions, in addition to the best fishing and shooting to be had on this continent, at a very low cost.

The shares are \$250 each, and are an absolutely safe investment. Intending purchasers should carefully examine Sec. 4 of constitution, also pages 12 and 24 of by-laws about membership certificates, agents, membership cards, route and mode of payments.

For Prospectus, By-Laws, Maps, etc., and full information address

Messrs. TOWNSEND & HOWARD, 928 TEMPLE COURT, NEW YORK CITY, AND THIS PAPER.

PUBLIC NOTICE.

The Commissioner of Crown Lands will lease, for a period of ten years, to the highest bidder, on the 15th of June next, in one of the rooms of the department, the fishing rights belonging to the province of Quebec, in the river "Grand Cascapedia," (Baie des Chéniers), subject to the lease now existing in favor of His Excellency the Governor General of Canada, until the expiration of his term of office. The upset price will be four thousand dollars (\$4,000) per annum, and the rental must be paid in advance. For further information, apply to the undersigned.

E. J. FLYNN, Commissioner of Crown Lands. Department of Crown Lands, Quebec, 10th May, 1893.

TROUT LAKES FOR SALE.

I offer for sale a portion of my Adirondack preserve, from 1,000 to 2,000 acres of land, with four lakes. There are two cabins on the property, good road to two of the lakes, easy trail to the other two. This property is suitable for a club or for private resorts. One lake is stocked with salmon trout, the others with speckled trout, 30,000 planted last May, and shall plant as many more this year. Will sell any one lake with a portion of the land. Address DR. J. DE V. MOORE, 157 Park avenue, Utica, N. Y.

Hunting Grounds For Sale.

We offer for sale one farm, 600 acres, situate in Warren county, North Carolina, six miles from Macon, same from Littleton. Quail, deer, wild turkey, ducks, geese and old hares on and near the farm. Fine grain, cotton, tobacco and fruit farm. Fair dwelling and outhouses. Hunting privilege on adjoining farms can be bought cheap. 14 hours from New York via S. A. L. Apply to owners. Price, \$6 per acre. EGERTON BROS., Macon, N. C.

TO LOVERS OF FISHING.—WE NOW have on our list membership shares at reasonable figures in some of the best salmon, trout and black and sea bass fishing clubs of the country; also rights in two Canadian salmon rivers. The season just opened promises to be a remarkable one, and we invite correspondence. TOWNSEND & HOWARD, Room 919, Temple Court, New York City.

ALBEMARLE AND PAMPHICO CRUISING and Hunting Association.—Bear, Deer, Wild Turkey, Quail, Swan, Geese, Brant, Duck, Curlew, Snipe. Finest fishing: Bluefish, Striped Bass, Westfish, Drum, etc. Membership limited to 20. One more subscriber wanted. H. A. Weeks, 74 Murray st., N. Y.

FOR SALE.—A MEMBERSHIP IN THE LAURENTIAN Club, of Canada. For particulars, address J. B., of this paper.

SALMON FISHING.—SEVERAL POOLS ON Restigouche. Address P.O. Box 192, Savannah, Ga.

Increasing Sales attest the Popularity of THE GENTLEMEN'S CIGARETTE.

SPECIAL FAVOURS.

Manufactured only by KINNEY BROS. (KINNEY TOBACCO CO., Successors.) Also manufacturers of the Old Reliable SWEET CAPORAL.

Answers to Queries.

means, or any visible inclosure or distinctive boundary which indicates separation from the surrounding or contiguous territory of whatever nature." An examination of the records of recent enactments in the various States will show that the whole trend of legislation is in the direction of guarding more closely the privileges of those who control shooting and fishing preserves.

Nor is much to be accomplished by appealing to the preservers on the ground of anything they as individuals owe to the public. The average man who can secure for himself a sure supply of game and fish will do this, whether Tom, Dick and Harry, to him unknown, have their fishing or shooting or are obliged to go without it. That is human nature.

What, then, shall be the solution of the problem of providing fishing and shooting opportunities for all when the best of those opportunities are absorbed by the few?

The problem has already been solved, in a measure, at least, with respect to fishing, by the Onondaga Anglers' Association, of Syracuse, in this State. To be sure the association has not wrested any fish preserves from their proprietors and restored them to the public; but it has demonstrated the possibility of stocking public waters and protecting them against net and unseasonable fishing, and of so conserving the supply that there shall be fishing for all.

THE NATIONAL CONVENTION DELUSION.

THE ambitious scheme of a grand national sportsmen's convention for the protection of the game and fish of this whole blessed country is one of those enticing delusions which hold sway for brief periods at irregular intervals, their recurrence being governed perhaps by the spots on the sun. The project of a national convention to be held in Chicago this summer in connection with the World's Fair has been discussed for several months in a vague way; but nobody has ever given us any light on what practical purpose was to be served by the meeting, and of late the plan appears to have been lost sight of. It was revived in the annual meeting of the Illinois State Sportsmen's Association in Chicago last week, when a committee was appointed to devise means for calling "a national convention of sportsmen for the purpose of securing throughout the different States reasonable and consistent laws for the protection of game."

The most illuminating, suggestive and instructive comment it were possible to offer on this project was embodied in a statement which had been made just previously in the same meeting by a member of the Illinois Association Law Committee. Called upon to report to the members on the legislative possibilities of the year at Springfield, he said that the year had been one of loss and not of gain for game protection. The query naturally presents itself to the man of average intelligence, who can see a reasonable distance beyond his nose, how do the sportsmen of Illinois, who have proved themselves powerless to withstand a loss for game protection in their own one single State, propose to set to work to take care of game protection in the fifty odd other States and Territories? Or how do they hope to receive aid from the others to control legislative action at Springfield?

If the Illinois Legislature will not listen to Illinois sportsmen, there is little likelihood of its giving heed to national convention likelihood from New Hampshire and Utah. The truth as declared by common sense and demonstrated by experience is that efficient game and fish protection in any one of these fifty odd States and Territories must be achieved, if at all, by the citizens of that State. Where home effort and influence fail, so-called national action will avail not a whit. It never has; in the nature of things it never can. If the sportsmen of Illinois or of Oregon or New York, Pennsylvania or any other State cannot take care of their own home interests by the machinery of their own State organizations, they need not aspire to regulate the whole country, nor need they hope to find any cure-all magic in the *Be it resolved* of a national convention. Fifty years of such gatherings will not save a single prairie chicken in Illinois nor a single caribou in Maine nor a single blue grouse hooting in a pine tree in Oregon.

The last national sportsmen's convention, built on ambitious lines, was held in St. Louis some five or six years ago. The only tangible result of it was a huge list of names of sportsmen living in different parts of the

country. These had been collected by the promoters of the scheme, and afterwards copies of them were peddled about to folks who wanted to mail circulars. For a long time subsequently the fortunate individuals whose names were on the list were in receipt of circulars of new gun wads and cartridge belts and patent mange cures; possibly they are getting them yet.

A THOUSAND TROUT.

ACCORDING to a statement in one of our "Fishing Postals," four men who fished four days in the vicinity of Bloomingburg, in Sullivan county, N. Y., took a thousand trout. If these fish were all of the lawful size, and if there were a thousand more left for the next four men ambitious to make such a score in such a time, and a third thousand for the next two count fishermen, and yet other thousands for the succeeding anglers of 1893, and of the years to come—this Bloomingburg record would be something of which the men who delight to measure their success by numbers, might be justly proud. Their satisfaction indeed might be second only to that of the heroes of the Kekoskee bullhead performance, who carted their fish away by the wagon load; and the trout scorers might reasonably enough claim that they were entitled to a handicap of some sort, for while the Kekoskee bullheaders pitchforked their fish, the trouters were obliged to catch theirs one by one.

It is reasonable to recognize a diversity of tastes with respect to trout fishing. Some fishermen measure their pleasure by the number scored. Others, as in the case related in our Boston correspondence to-day, by the size and strength of the fish caught and the skill and time required to take it. With these many men of many minds it would be foolish to quarrel, however much he who enjoys one style of fishing may fail to appreciate the claims of the other.

But one thing is as clear as the sun at noontime. In this day, when the number of anglers is multiplying out of all proportion to the supply of fish, it behooves every person interested in fishing to frown down and discourage fishing for count in trout brooks. Something is out of gear, when two men can catch a thousand trout in four days and make a boast of their achievement. The first thought that flashes through one's mind is that such trout fishermen are getting more than their share. One wonders what will be left for those who come along a little later. There is precious little satisfaction for the late comers in that old refrain, "You'd order been here last week; two sports caught a thousand."

The count-fishermen and the count-shooters have their share to answer for in bringing dearth of fish and game. Our entire system of sportsmanship in this respect appears to have been founded on a thoroughly bad sentiment in the beginning. Man's memory runs not to a time when success with gun and rod was not measured by pounds or linear feet. He who could catch the most or slay more than his fellows was the hero. And he is the hero to-day, or appears to believe that he is. The sooner those who are laboring under such a delusion, shall realize that there are better elements of enjoyment in the field and with the rod, the sooner shall they come into the inheritance of the true sportsman of to-day.

SNAP SHOTS.

OUR recent discussions of non-resident shooting and fishing laws has found an echo in a resolution adopted by the Illinois State Sportsmen's Association declaring the conviction of the members that "laws passed by State legislation, which do not give to sportsmen of all States the same privileges that are given to sportsmen in States passing restrictive laws, are unwise, unfriendly and not conducive to the best interests of game preservation."

We are not very proud of the illustration of the FOREST AND STREAM's rustic letter sign at the World's Fair, but the sign itself is happy in conception, admirable in execution, pleasing in effect, and wonderful, for like the rod of Aaron it has budded. It is one of the neatest bits in the Angling Pavilion.

When you visit the World's Fair do not miss the FOREST AND STREAM's corner in the Angling Pavilion of the Fisheries Building. It is just at the right of the aisle at the entrance to the pavilion from the main building.

For Prospectus and Advertising Rates see Page 533.

MORE ABOUT ADVERTISING.

"THE old Tennessee seems to have subsided," ventured the stranger, looking out over Chattanooga from the point of Lookout Mountain.

"Yes, she gone down some," was the reply, "but just wait for the back-water. There'll be a big rise yet."

When the FOREST AND STREAM advertising flood reached high-water mark the other day we accepted the foregone conclusion that the "back-water" when it came would overflow the record limits. Here it is to-day. Look through the pages of announcements. They are a substantial indication of the substantial condition of all the various interests represented. They demonstrate by the very best and most practical method in the world that the FOREST AND STREAM is the recognized and accepted medium chosen by sportsman supply dealers to reach the sportsman buyer.

With the advertising "back-water" has come a volume of news, the proper presentation of which has compelled us to add four extra pages. The purchaser who asks for the FOREST AND STREAM at his news-stand may always feel assured that he is getting the best sportsman's newspaper, as well as the one carrying the largest amount of interesting, readable and *bona fide* paid advertising.

THE GAME PRESERVE SYSTEM.

TWO VIEWS of the growing game preserve system are given in our shooting columns. The subject is one upon which many people are thinking very seriously just now. To encounter a trespass sign newly set up on the familiar brook where for years one has fished with none to say him nay, is exasperating; and the heart beats faster with a sense of outrage at sight of the staring notice with its threat of the law. Under stress of feeling then provoked one is apt to talk about the time-honored privileges which have come to be regarded as rights; and to denounce the preserve people as selfish and over-riding the liberty of others.

Those who are opposed to the preserves are not likely to find in legislation any aid to withstand the growth of the system. The preserve is based on the trespass law. The owner or lessee of a quail-producing field has precisely the same legal right to keep people out of that field as that which he has to keep them out of his apple orchard. The stranger has no more privilege in law to invade one field than he has to invade the other.

Moreover, the trespass rules as applied to fish and game preserves are becoming more rigid year by year. In New York the law has been so amended as to constitute trespass on inclosed game preserves a misdemeanor, and in addition the trespasser is subject to a fine of from \$15 to \$20. On the other hand the requirements as to boundaries of inclosed lands have been lightened; "inclosed lands" are defined to mean any lands whose boundaries are marked "by water, by a wire, ditch, hedge or fence, road or highway, or partially by one or more of said

The Sportsman Conquist.

"THE TROUT OF THE MOUNTAIN STREAM."

(REVISED.)

SOME sing of the bass, with his glistening mail,
Or the giant tarpon, with silver scale,
But the angler's joy, and the artist's dream
Is the spotted trout of the mountain stream!

With his mottled sides and his shapely mould,
And his crimson stars with their fringe of gold,
With his painted fins and his silver gleam,
He's the jeweled prince of the mountain stream!

With wide-spread mouth and glittering eye,
He springs from his lair at the dancing fly,
Then, swift as the shaft from the banded bow,
Shoots down to his home in the depths below.

When soft from the south the breezes blow,
When the waters are cleared from the melting snow,
When the earth awakens from her winter's dream,
I will seek for the trout in his mountain stream.

When the apple blossoms are snowy white,
And the swamps with the scarlet maple bright,
When the silvery birch has donned his sheen,
And the marshy meadows are fringed with green.

When the bobolink on the polk stalk swings,
And the hermit thrush in the woodland sings,
Then I'll seek for the trout in his mountain home,
In the sparkling verge of the catarract's foam!

'Tis there in the waters' wildest play
That he lies in wait for his floating prey,
Or shoots on his course through the swiftest stream,
With an arrowy rush and a meteor's gleam!

When the skies grow warm and the sun rides high,
'Neath the spreading alder he loves to lie,
Or he seeks his lair by some mossy stone,
Which the frost from the hanging cliff has thrown.

Then, angler, if you would his capture try,
Choose your finest line and your daintiest fly,
Let your step be light and your cast be true,
Or the trout will have nothing to say to you!

When your fly, like the down from a thistle blown,
Drops soft on the ripples around your stone,
That silvery bar, which shoots up to air,
Says the starry monarch was lurking there!

When the bending rod and the ringing reel
Give proof that you've fastened the tempered steel,
Be sure that the battle is but begun,
For not till he's landed is victory won!

Pleasant to you is the mimic strife,
But the fight with the trout is a fight for life!
And not till his utmost strength is tried,
Will he, fainting, roll on his glistening side!

Then give me the trout of the mountain stream,
With his crimson stars, and his golden gleam,
When the conquered hero gasping lies,
The angler has won his fairest prize!

VON W.

IN THE LAND OF THE KALISPELLS.

I LITTLE thought a year or so ago when reading Mr. Hallock's entertaining letters from this part of the great State of Montana, telling of the game resources of this region, that in so short time I should be on the spot enjoying the magnificent scenery and viewing the gigantic strides made by this new aspirant for fame and prosperity, the young city of Kalispell. Where is Kalispell? In the famous valley of the Flathead, the northwestern county of the State, lately set off from Missoula county, which was a county as large as two or three Eastern States (of the proper size) and now large enough to get lost in. Though she has lost a matter of forty or fifty thousand square miles, which is now Flathead county, of which Kalispell is the county seat, situated in the center of the rapidly becoming famous Flathead Valley and about twenty miles north of the beautiful Flathead Lake. Kalispell was platted in April, 1891, when the Great Northern Railroad was being built, and now is reported as having all the way from 1,500 to 3,000 people, depending upon the enthusiasm of your informant. At all events, she is a robust and lively infant, and expects to be a robust giant ere long.

This whole region, until the advent of the Great Northern, was known only to peripatetic miners, and cattlemen whose herds found luxuriant feeding on the widespread prairies where the rich soil now attracts the wheat grower, producing thirty or forty bushels of the finest hard wheat to the acre, more of oats, which run forty and more pounds to the bushel, and fine barley and hay, and as a consequence the best lands are rapidly being secured by new blood at good prices. I say new blood because the old settlers are not, as a rule, such as make the most out of the capabilities of the soil. Roaming was more to their liking, both as to themselves and their stock. No irrigation is practiced, which can not be said of any other considerable body of land in the State. This fact is attracting many people to this valley, for irrigation is the bugbear of most Eastern farmers. Yet I think that now and then a season will happen along kind o' careless like, when the farmers will jump up and down and shout for rain. It has been so, they tell me. The valley, lying between arid lands east and west, naturally would get a whiff of aridity now and then. It is not all open prairie. Belts of open prairie timber are interspersed here and there which add to the value and picturesque quality of the valley, besides there being a deer now and then, and echoing to the roll of the grouse. Very fine pine, spruce, tamarack and cedar timber is found further north, and the more valuable claims are all taken up on the surveyed part, and being rapidly secured by squatters on the unsurveyed lands, pending the survey and acceptance by the government of the same.

Demersville, at the head of navigation on the Flathead, four miles below Kalispell, previous to the founding of the latter, was the chief town of the valley, the entrepot of the same, and if reports are credible, and I guess they are, was as tough a place as the West produces, and that is saying all that is necessary. The county seat and the sheriff were a hundred miles away, and the latter and

justice quite unswift. A stage line ran from the N. P. R. R. to the foot of the lake, and small steamers thence to Demersville in those days when the place was filled with saloons, lawlessness rife, and the man handy with a gun as common as dirt.

The town is almost deserted now, many buildings moved bodily to Kalispell, likewise divers and sundry gamblers, the steamer line discontinued, and ere long the gophers will return unto their own.

But Demersville will not be forgotten as long as the murder cases continue to be aired in court. Flathead Valley's first court is now in session in Kalispell and at present busy with some shooting and murder cases. One was a murder, wilful and premeditated pure and simple, where a bad man called another bad names and said, in a maudlin state, that he'd shoot him. The other, like Uncle Remus' tar baby, "kep' on sayin' nuthin'," but went over to his house and got a Colts repeating rifle, and not having time to go to the woods for game, crept in at the back door of the saloon without unnecessary noise, and knowing about where his game roosted against a whisky barrel behind the door, potted the other bad man, who passed away in the act of unlimbering his artillery. Self-defense is now set up, and the majority of the busy three score men, who daily hold the benches down in the court room, are with the defense. *Hee fabula docet.* Another case of shooting would have been murder had the gun shot straight. As it was, however, two men got leaded in their suburbs, and the third got shot with an axe in the head about three times in a claim jumping interview. But "such things are (were) common, I had a brother once," as remarked formerly by O'Relius or 'Rastus' 'Gustus' in the olden time, when men went gunning for each other with cross-bows and fascies and such like. The above instances are not strictly in the line of legitimate sportsmanship, though both come within the shooting pale, and of the two may be perhaps the "legitimate" is the more one-sided. It is hoped now that such christianizing and civilizing influences as the courts and the railroad have come into our midst, that men will think twice or thrice ere they shoot once, when they hunt each other.

There is in town now a gentleman who is making preparations to take a herd of fifty or sixty buffalo belonging to, if I mistake not, Mr. Allard, somewhere down the valley, to the Columbian Exposition. May they get there safe and sound. Speaking of buffalo reminds me that at intervals all along the railway across the Great Plains are still to be seen distinctly the trails and wallows made by the innumerable hosts that furrowed the earth for ages in their yearly migrations, and sadness ensues in contemplation of the fact that no more forever will the mighty animals darken the plains in their harmless wanderings, and that we must be content with unsatisfying imagination alone as we gaze upon the silent and deserted trails, mute protests against the rapacity of humanity.

On the east of Kalispell, 15 miles distant, rise the lower chains of the main Rocky Mountain range, now covered as to the tops with snow, while in deep contrast the lower sides and gorges are clothed in dark evergreen, and looking afar up Bad Rock Cañon through which the railroad winds from the summit of the range, alongside the beautiful and ever widening Middle Fork, the eye catches a single precipitous peak, white and glistening, 50 miles away, which rises thousands of feet into the heavens from the far notch of the cañon, catching the latest glow of the sinking sun in rosy flush most gloriously beautiful. On the west is the Cabinet Range, of lower altitude. The north, middle and south forks of the Flathead join forces before leaving the mountains, while the Stillwater and Whitefish rivers have their sources far to the northward in this valley, mingling their trout waters just to the east of town, and flowing into the Flathead a couple of miles south, where the latter stream is a large and deep river, probably 150 or more yards wide, and floating steamers which, before the advent of the railroad, furnished communication between the upper valley, via the river and the lake and the country to the south.

Ninety miles to the north of Kalispell runs the international boundary line, and this valley reaches, in varying width, alternate prairie and timber, almost or quite to the line. Cold mountain streams are everywhere, and as a matter of fact trout are likewise. I expected to have some sport with them, but find that they spawn in May and June, unlike well regulated trout elsewhere, and that therefore the Legislature last winter passed laws protecting them. So I have been out but three times, and it being rather early in the season and the snow lying late in the mountains, success has not been brilliant, though I have had a taste of it with the black spotted fellows of a pound and a half. They have but just begun to run up the rivers and are not ravenously hungry, not taking the fly, so that meat and spawn have been the only means of taking them.

The Flathead from here up is a lovely stream, and in the season affords as fine sport as any man could wish, both with the black-spotted and pink-spotted or, as they are called here, salmon trout, which latter run very heavy in the lake and deeper waters of the river. The lake abounds in whitefish also. As for game, deer are everywhere, mule and Virginia, and one does not have far to go for sport in that line. Bear won't trouble you if you let them alone, but they can be found without great hardship. Ruffed grouse, prairie and fool hens and the large blue grouse are very numerous, while ducks and geese are plentiful on the streams, sloughs and lakes.

I find that there is a decided objection to the game law, particularly among the old settlers, which is very natural, but it is to be hoped that time and experience will educate. Elk are numerous in some sections, but the law protects them for six years, a fact which three or four Indians seem to have been ignorant of, as they were taken red-handed in the act of selling some heads lately, and now are nicely provided for in the shack with barred windows which they call the jail. The authorities couldn't have suited the noble red men better. They are fed and comfortable now, and don't have to carry a blanket around and walk pigeon-toed.

I put some breakfast inside and a snack in my pocket a few days ago and wandered out to the ferry across the Flathead, some three miles away, and as I had my rod with me, put in a very enjoyable forenoon along the banks of the beautiful stream, but without returns in the shape of foundation for a very big fish yarn. After dinner, however, the trout began to be interested a little bit, and I was sitting on the bank around a bend out of sight and having just dead loads of pleasure all alone, when I

heard the bushes rattle, and looking around there was J. W. Conner, one of the editors and proprietors of the Kalispell *Graphic*, and pioneers here, whose acquaintance I had made recently, and who had ridden out and hunted me up on purpose to invite me to go down with his editorial partner, Mr. H. J. Mock, and Mr. Dixon, an acquaintance and new-comer here, to Flathead Lake just to afford us a day's pleasure. Well, do you know, that was just as kind as it could be; but that is the way with men who love to fish, especially if it is out in the big West, but how I'm to even up on this thing is what puzzles me. I love to fish, too. Of course I went to town shortly, and at 4 o'clock, behind a pair of spanking (why "spanking" I never could see. What do they spank? blacks, in a roomy wagon, we turned our faces southward for a twenty-five-mile drive. Mr. Mock couldn't go, as he was seized with some forgotten business, which we much regretted.

The road for the greater part lay across the open plain or prairie, where in one place we came across a flock of wild geese doing something or other—there wasn't any feed there. As we neared the lower end of the open country we found the old roads, which hitherto had led the nearest way, cut off by fences, as land has been taken up, and new roads laid out along the section lines. This made trouble for us, as we had to go a long way around to get anywhere; but we finally came by a new blazed road through a dense piece of timber along the river to the ferry, where was a flatboat about as wide as the wagon and not much longer, railed lightly on each side. The ferryman pulled us across by means of a wire rope. Then through more timber, until about 7 o'clock, when we rode out into the open by a ranch, and from a bluff looked afar across the lovely lake, thirty-five by fourteen to fifteen miles in widest part, resting in the shadows of the mountains which surround it.

Soon we crossed Swan River flowing from a lake of same name eight to ten miles distant in the fastnesses of the mountains to the eastward, and ere long drove up to the club house on a bluff 100ft. above the lake, from which the eye took in a charming view, while on either hand and rearward the evening breeze sung a lullaby among the branches of the pines and spruces. This neatly built log club house and 120 acres of forest adjoining are owned by a number of gentlemen of Helena, and the property is cared for by Mr. Wiser, the former owner of the land, who cordially welcomed us and who soon had a hot supper facing us. Down below the ducks were quacking and wheeling here and there, while two or three geese were faring back and forth with trumpet cry on busy errands connected with nests which Mr. Wiser had located. There were no swans visible, though there had recently been many, resting on their way to the distant northern breeding grounds. During the night a flock of geese near shore awoke me by their clatter, which they kept up until I was disgusted.

In the morning after a nicely cooked substantial breakfast prepared by Mr. W., we took rods and walked back to the Swan to try for trout. This is a lovely stream dashing, roaring and foaming down its boulder-strewn bed, perhaps 75ft. wide, with swift rapids here and there, and elegant swirls and holes for trout. But they weren't in the humor for business, and a meagre half dozen, four of a pound and a half pound each dressed, composing our catch. But the day along that rushing river was enjoyment enough. Deer sign was everywhere, down among the rocks by the brink, up on the side hill, through the woods it constantly caught the eye, and I yearned to be there in September and October or later. Mr. W. said that only a day or two previous, three had come to within 50yds. of the club house, and that he could without doubt in a half day's time show us two or three dozen, as he was well acquainted with their haunts.

There were four fishermen on the stream besides ourselves, and they had some nice fish. I had a little experience on this occasion that was as exciting as I could wish and that called for strict attention to business for a spell. A huge rock as large as a small house rose from the river's brink almost perpendicularly. From the up stream side a narrow bench ran along the face of this rock about ten feet above the water and just wide enough to stand on. Down along the face of the rock the water ran some feet deep and in swift descent. Out in the stream some eight or ten feet were some large boulders and below these was an eddying swirl. I clambered out on the bench from some convenient rocks, and though I saw that there was trouble ahead if I hooked a fish from that spot, yet the water was so tempting that I made a cast, and trouble began sure enough. As the fish struck I followed suit, and the way he made that 80z. Henshall work and the reel hum was interesting enough. The second time he came to the surface I saw that he was hooked just back of the pectoral fin, and then I understood what I had cut out for me, and why I couldn't begin to control him. Of course he persisted in keeping broadside to the stream and in the swiftest current, and all I could do was to stand there with my back against the rock, look down on the battle, and hope almost against hope that my rod wouldn't go to smash, while the enraged fish surged back and forth, doing just about as he pleased. I dare not give him much line, for twenty feet below there was a tangle of rocks, and if he reached it the game was up. I don't know how long I played him, but at last I had him so nearly exhausted that I towed him up against the swift mill race of a current, with the lancewood bent to a wonder, picked my way along the rocks above the bench up stream for thirty feet or more until I found water convenient and led him ashore, a black-spotted beauty of a pound and three-quarters—and nobody can buy that rod for shelds.

We slowly worked back down stream, reaching the club house in time for a 3 o'clock dinner; and then hitching up the team rode comfortably and pleasantly homeward. Flathead Lake is very clear, deep and cold, and many and large are the stories of huge trout of 20 to 40lbs. caught therein. The outlet is Clark's Fork of the Columbia, and there is but one fall, so reported, that prevents salmon coming up into the lake. That may be removed in the future and another source of pleasure and profit added to the many now enjoyed in this region. About thirty miles east of Kalispell on the railroad is the station of Belton, three or four miles from which lies Lake McDonald, a large and most beautiful sheet of water surrounded by lofty mountains and literally teeming with trout of large size. But the snow yet covers the country there and no fishing can be done for some time, which is fortunate, for there be plenty of fishermen who have no

Natural History.

TURTLES ON THE GULF BEACH.

OSPREY, Fla., June 1.—“Time—time,” is the cry from the North, and alas! in a few days I must close up my shanty. Once more I must turn my back to the alluring Gulf and exchange this azure sky and this fresh salt air for the dust of your overcrowded centers of population. Good-bye for a time to my Nature, my palmettoes, my moon flowers, my jungle, with its many curious plants and living creatures. Farewell to this quiet, broken only by the ripple of bay and the splash of fish, as they leave their native element to escape their hungry enemies. Once more for a time to elbow my way through the surging crowd, with its never-ending roar and bustle. Seven months is long to linger “away down South,” but not long enough, for each month brings out some new excitement. In October tarpon fishing is at its very best, and from month to month either in the water or in the woods one can find some fresh excitement. Just now turning turtles is in order.

With the moon in May a new visitor comes to us from the Gulf. The female loggerhead turtle emerges from her native element to deposit her eggs. Madame *Thalassochelone cavanana*, as the scientific man prefers to call her, if undisturbed, makes a bee line for the upper margin of the sand beach above tide level. From the water's edge to the point selected for her nest she leaves a broad trail, just such a trail in fact, as a man would leave if he saw fit to lie flat upon his chest and stomach and propel himself by the use of hands and feet. In this case the flippers are called into service, to be used as legs. If, upon reaching the higher zone of the beach, the turtle finds suitable texture of sand for her purposes, she proceeds to make a hole in which to leave her eggs. If, however, the

TAKING HIS MEDICINE.

The illustration is of a pet antelope owned by Mrs. W. T. Doster, of Eddy, New Mexico. It was captured on the plains by a Mexican, and brought into Eddy when only two or three days old. It is now three months old and is about half grown. It has become very fond of Mrs. Doster, follows her about like a dog, and still takes its food from a nursing bottle. The photo was sent to us by Mr. G. O. Shields.

spot happens to be too solid on account of layers of coarse shell, she returns to the water, making a new trail or “crawl,” and never by the route selected in emerging from the Gulf.

By dint of hard work she digs a funnel-shaped cavity, which has a diameter of from 8 to 10 in. and a depth of about 18 in., tapering to a diameter of about 3 in. at the bottom of the repository. This opening into the sand is made by the use of the rear flippers. When it is completed, Madame proceeds to drop her eggs into the nest. She lays from 70 to 140 and covers them up carefully by gently pushing the sand over them with her back flippers. Then she presses the sand down compactly with her heavy body, makes an effort to conceal the spot, and after a short rest, for the labor seems to exhaust her thoroughly, she returns to the Gulf.

These turtles weigh from 100 to 250 lbs., and each turtle has a store of meat which is eaten with relish by the average Florida cracker. The meat is coarse in texture and tough, but when carefully separated from the fat and ligaments makes a broth of choice flavor. The eggs, which are protected by a tough skin in place of a shell, are very nourishing, easily digested and of fine flavor. In form these eggs are spherical, with a diameter, say, $1\frac{1}{2}$ to 1 in., and three of them weigh as much as two average-sized hen's eggs. When boiled, the albumen or “white” does not harden as in the case of the eggs of our domestic fowls. A person with a capacity of two or three hen's eggs for breakfast could easily eat ten turtle eggs either boiled or scrambled. We think nothing of eating twenty-five turtle eggs in one day. They are particularly good scrambled or prepared as muffins; they can be whipped up very light, and a good French chef could no doubt make a grand *omelette soufflé* from loggerhead eggs.

In addition to the eggs deposited on the beach, the female has within her from 500 to 800 yellow eggs, which vary in size from 1 in. in diameter to the size of an ordinary marble. It is said that later in the season—in fact up to about August—many of these eggs become sufficiently developed to enable the turtle to lay them.

The eggs are sought after by man and beast, and it is doubtful if one egg out of every thousand left by the mother is ever hatched out. By day and by night the beaches along the outer keys are patrolled by hungry natives, who carry pointed sticks and bags or baskets. The stick with its sharp point is used as a probe, and is poked into the sand until the deposit is located. When the point strikes a soft place our Florida man claws very vigorously, and in the course of a very few minutes manages to transfer about 100 eggs from the nest to his bag.

It is quite a picnic for the hungry “cracker” to get away from the pine woods to the Gulf beach. Some go by ox team, others borrow boats, and on bright moonlights they tramp up and down the beach. They are happy indeed, if after many disappointments they come to a place where there is only a single “crawl” to be found. This single line of “footprints in the sands of time” means that the turtle is still up on the beach. Bag, basket and sharp stick are discarded. The turtle hunter notices a dark form looking like a rock, behind a tall tuft of grass away high up on the beach. He approaches and notices a slight movement. The turtle is so busily engaged in performing her function that she makes no attempt to retreat; in fact, she pays no attention to her natural enemy. She has evidently just arrived, for the cavity is only a few inches deep, but she works hard. The hunter may light his pipe and go and sit down right behind her; he may even wait and place his hat where the nest should be and thus get the eggs without being forced to remove them from the sand. When he is ready he seizes her by the shell near the hind flipper and out of reach of the front flippers, each one of which is armed with a rather dangerous claw. A single quick movement, a lift with might and main, and the poor creature lies prone upon her back, entirely helpless. So she is allowed to remain until the next morning, then a blow of the ax across the neck and all is over for that turtle.

While the females are doing all they can to perpetuate the race of loggerheads, the gentlemen turtles are not having a life in the Garden of Eden. Not by any means, for at this season they fight and tear each other in the most bloodthirsty manner. They frequently tear each other's eyes out and bite the front flippers off with their powerful beak-like jaws.

It is said that the young hatch out about four weeks after the eggs have been laid. In size they are not much larger than a silver dollar when they quit the shell. These defenseless little fellows are devoured eagerly by sharks and other large fish which prowl along in the breakers. Coons, with their fine scent, discover and destroy many entire nests, and it is a wonder indeed that any escape.

NONE SUCH.

Wild Birds in the Fair Grounds.

BOONE AND CROCKETT CABIN, World's Fair, Chicago, May 30.—The cabin appears to be a great attraction; thousands come here every day. When night comes, and I get it shut up, it don't seem as though I were in Chicago or anywhere near the World's Fair.

Early in the morning it is very quiet and beautiful on the islands. Besides all the water fowl, there are a great many very pretty birds, several that are quite new to me; as yet I have found no nests of these birds; I suppose they are on their way north. There is one nest, though, whose owners and the few that know of it keep very quiet about it. It's an owl's, in the top of one of the large oak trees. The top of the tree has been broken off and in the hollow sits one of the owls on guard, while its mate is on the nest. The one on guard is almost impossible to distinguish from the dead wood. It is a small bird, and I suppose common to this country. He sits up watching the thousands of passing visitors below, with now and then an eye open. I sometimes look up at him and attract his attention, and then he winks, as much as to say, “Don't give the snap away. Keep dark!”

During the day only a few of the birds are to be seen, but I often hear them in the shrubbery about the cabin. There are three ducks' nests and one wild goose nest close by the cabin. The goose nest is back of the old log chimney. I have run wire screening and ropes out from the front of the cabin to keep people from going back of the house and from disturbing the birds. This little island is a great resort for all the water fowl.

Just now I can hear the twitter of wrens and the songs of other birds blended with the distant sound of brass bands and the hum of electric machinery in the electric exhibit. The ducks and geese and gulls keep up a racket that at times drowns the noise of the electric railway. Sometimes they appear to be trying to answer the electric launch signals.

The whole thing here on the island—cabin, birds, fowl, fire, lights and all—is in great contrast with the surroundings of buildings, electric lights, launches, guards, patrol wagons, fire engines and everything modern. I have only to turn my eyes from the window to be transported back to the Rocky Mountains, for here I can see everything from my home there.

Nothing so lonesome in the world as a big crowd where you don't know any one. I am getting used to the crowds. At first I would rather have faced a big grizzly (if I'd had a good gun) than the crowd here on the first of May. But after thirty days' practice I am getting so I can inspect them and give them as good a game as they do me at times, all in a pleasant way.

E. HOFER.

That Habit of the Robin.

A COMMUNICATION from Mr. English informs me (and me) that Mr. Gibbs “took issue” with me in the matter of the “detestable habit” of the brown-breasted songster. If Mr. Gibbs’ “protest” was in the FOREST AND STREAM I did not see it. Had I seen it I would have replied. Now, I do not doubt the statements of Mr. English in regard to his observations of the bird's habits, which do not coincide with the habit of the particular bird that came under my notice. But this I wish to reiterate: The bird did swallow the excrement, and oftener than once, I was not deceived—I could not have been. I looked right down upon her; she was perhaps less than 10 ft. from me. I cannot say that the habit is general; this case may be anomalous. As to the habit being “detestable” I may not say. Animals frequently exhibit peculiarities of taste as well as man. Some dogs eat candy, some cows leather, and I knew a horse that would eat tobacco.

N. D. ELTING.

Hawk Migration.

MONTCLAIR, N. J., May 26.—The hawks began to pass through Montclair, on their way north, in the latter part of March. Since then have been shot specimens of red-shouldered, red-tailed, sparrow, marsh, Cooper's, sharp-shinned, broad-winged and American osprey. On April 18, thirty-seven hawks were shot from three blinds on Orange Mountain and many others seen. The most common were broad-winged and sharp-shinned.

KARL V. S. HOWLAND,

regard for the law. That region is a fine game ground too, if the many flattering reports are credible, deer, bear, cougar, grouse and elk enough for everybody, while to the westward of this valley in the Cabinet range, the supply is, if possible, even greater, and to the northward on either hand, the streams and mountains, all unharvested, are waiting to yield to the sportsman fruits satisfying to the most exacting. Long may an ever-growing public sentiment preserve them in this condition.

O. O. S.

KALISPELL, Mont., April, 1893.

DANVIS FOLKS.—VII.

At Work in the Linter.

NEXT morning Uncle Lisha laid aside his holiday attire with a sense of great relief from the constraint and care which their wearing had imposed upon him, and put on his ordinary garb with the comfortable feeling of being rehabilitated in his real self. Making such haste with his breakfast that Aunt Jerusha said he was “in a bigger hurry 'n a boy a goin' a fishin',” he put on his leather apron and set about the odd jobs of mending for the family.

Sam and his father went out to their husking, and the door between the kitchen and the shop being opened, that the old man might have the companionship of the women folks, the house presently rang with the merry thud of the hammer on his lapstone.

Huldah was paring apples with a worn out shoe knife discarded from Uncle Lisha's kit, and Aunt Jerusha quartered and cored them with frugal care that the least possible share should go to the pigs, while the baby made frequent excursions on all fours between the two great objects of interest presented by the two industries.

Now he brought a chubby fistful of stolen shoe pegs to his mother's knee, then made restitution to the owner with a slice of apple, begrimed by repeated contact with the floor during its transportation.

“Why, yes, bub,” said the old man, beaming down a kindly glance through his round glasses upon the up-turned baby face as he took the proffered gift and laid it on the bench beside him, “it's turrible nice, but Uncle Lisher don't 'pear tu feel like eatin' on 't jest naow. He haint apple hungry, guess he eat tew much breakfus' er suthin'. Ta' keer. Don't put his leetle hanny ont' the lapstun. Git it smashed finer 'n a barn. No, bubby, could n't hev the wax. Gaum him all up so 't mammy 'd hafter nigh about skin him tu git him clean agin; an' haow she would scold both of us, an' haow we would cry, wouldn't we? Here, take a pooty paig tu Aunt Jerushy an' ask her 'f she ever see sech a curiosity, Clipper, naow.”

“Thank ye, a thaousand times, you darlin' creetur,” cried Aunt Jerusha, when the child had scrambled to her with his gift, “I never see a neater paig an' I'm agoin' to keep it tu hev me a shoe made. These er apples seems if they was gittin' turrible meller, Huldah, an' wan't a goin' tu keep no gret spell.”

“I know it,” said Huldah, putting a thin slice between her lips and meditatively munching it. “There's lots an' sacks on 'em that's all squash, an' if we save many of 'em we've got tu hev a parin' bee if you an' Uncle Lisher could stan' the rumpus.”

“Stan' it! Law sakes. I could stan' a leetle o' the young folkses catousin, an' he'd en'jy it jest as much as any on 'em, furzino. But apple cuts is turrible wasteful an' mussin' an' gin'ally cost more 'n they come tu.”

“But we'd get the apples worked off an' the young folks 'd have a good time. I wonder if Father Lovel would care?”

“Law sakes alive,” said Aunt Jerusha, “if he c'd stan' S'manthy twenty year, I guess he c'n stan' one evenin's catousin. But hear me talk, an' she an' ol' neighbor an' your mother-in-law if she was a livin'. Lisher!” she called, “du you s'pose you an' Timertly could stan' it, if we had a apple cut?” and she shook her knife at Huldah while they paused in their work to hear his answer.

“A apple cut? A parin' bee? Good airth an' seas. You jest try it an' see. I bate ye, me an' him 'll shake our hommels wi' the spryest on em.”

“What 'd I tell ye?” Aunt Jerusha whispered triumphantly.

When the subject was broached to them at dinner, Sam and his father made no objections and it was settled that the entertainment should be given as soon as the necessary preparations could be made.

A whole day was spent in bountiful if not elaborate cooking; the frying of at least a bushel of doughnuts and the making and baking of pumpkin pies, whose crowded ranks filled half the pantry shelves. Then the rooms were put in cleanly order, which Aunt Jerusha declared while giving her best efforts to it, “A useless work, a scrubbin' an' puttin' tu rights just tu hev 'em mussed an' cluttered intu jest a hoorah's nest.”

Meantime invitations were issued, not on perfumed paper, but by hearty word of mouth and given pretty generally yet discreetly.

“Don't ye gin no invite tu none o' them Forge fellers,” said Huldah as Sam lingered on the threshold in indecision between the various routes, “They 're such a rantankerous passel o' critters, allers fer raisin' a rumpus. An' don't ye forget tu gin Tom Hamlin a bid, an' his parin' machine, both on 'em, fer one haint no good without t'other. An' come raound by Joel Bartlett's an' git ten pound o' his best cheese, but don't let him know what ye want on 't. He wouldn't knowingly let his cheese git mixed up wi' no sech worl' people's fryvolity.”

“Sho, I guess his scruples haint with more 'n seven cents a pound,” said Sam irreverently.

“An' I hope you'll make it a pint tu give Peltier a bid tu the apple cut,” Uncle Lisha called from the shop, “he needs chuckin' up wust of any on us, the poor love-cracked creetur. Ef Danvis gals is pooty 's they was when aour womeen was gals, Samwil, the'll be some here pooty enough tu take his mind off 'm that lake shore gill flirt, maremaid I d' know but she is. Did he find her in the lake, Samwil? An' ef ye can scare up a fiddler, git him. What's come o' that leetle hump-backed feller 'at when he sot in the corner a fiddlin', you couldn't see nothin' on, behind his fiddle. But good airth an' seas, he'd saw that fiddle all up into tunes. He'd be ekernomical for a kitchen tunk, gitten' intu a corner so, aout'n the way.”

Sam hurried away before he should be burdened with further instructions, lamenting as he went, the loss of so fine a hunting morning.

ROWLAND E. ROBINSON.

FERRISBURGH, Vt.

Game Bag and Gun.

"Game Laws in Brief." June, 1895, revised. Game and Fish laws of all the States, Territories and Provinces. Correct, reliable, handsomely illustrated. Published by the "Forest and Stream." Sold by all dealers. Price 25 cents.

DUCKING ON THE MUDDY MISSISSIPPI.

THE duck season in this latitude is practically over in March. A few are found here even as late as April, mainly the dusky duck and blue-winged teal. The latter is not with us during winter, but early in the fall—about October—passes here on its way further south, and in April passes again on its way to the far North. The last season we had very good sport. Ducks were fairly plentiful and we bagged enough to satisfy us.

Christmas week being a holiday for the boys, we made a special trip for them, and they indeed had a grand time. Austin Warner is only 12 years old, but he had a light single-barrel 12-gauge with which he tumbled over a number of ducks fully in proportion to his size. My son Paul is two years older, and takes as naturally to a gun as a duck to water. He claims a score of sixteen without aid, and has grown, in imagination, several inches since the trip.

But that is not the outing that I wish to write about. In January we made another trip, and while we did not get so much game as on the Christmas hunt, we had an unique time. On this trip we had a couple of guests, and we strained the Rambler a little to afford the necessary accommodations. Marx Loewenberg was one of them. He is an all-round sportsman, his specialty being an angler, probably the best here, and takes to duck shooting tolerably well, though sometimes he fails at the critical moment to come right up to the scratch. Mr. Mack Lawrence is a brother-in-law of Mr. Warner, and along with Marx was a welcome guest, though he is possessed of no ducking proclivities to speak of. I speak of this advisedly, after having been with him on this trip. Nevertheless, he is endowed with talents of a high order in certain lines, and was by no means a source of burden to us, whatever he might have been to himself. His business is railroad-ing, and having been upon the water very little, he had some experiences on this trip that took him amidst ships and upset his equilibrium on more than one occasion.

We left Vicksburg early one morning in January with provisions and fuel for a four days' trip. We had a rapidly declining river and that was a decidedly unfavorable feature, as the ducks had no fresh feeding territory, and the receding water left a loblolly of mud for the shooters to operate on in building blinds and shooting from them. This rendered the land work vastly and extremely tiresome and disagreeable.

We went down the river, and our stop for first shoot was made on the bar in front of Big Black Island. The weather was dark and chilly and so far favorable. At the upper end of the Willow Bar we cast anchor, when Mr. Warner and I took the canoe, Amateur, and paddled down the bar on a prospecting tour. Not many ducks were seen until we reached the lower end. There a grand sight met our view, as an immense number of green-winged teal rose and flew away from the switch willows. There must have been fully 5,000 in that one flock, and the air roared with the noise made by the beating wings as they flew away. The prospecting being satisfactory, we determined to locate and take the evening and morning shoot at this place. W. and Mack L. located at the lower end while Marx L. and I took a position about midway between them and the launch.

Owing to the stage of the water and the boggy condition of the bar Marx and I had great difficulty in constructing a blind. We had to boat willows a quarter of a mile for the purpose, and when built the blind was so much higher than the surrounding switch willows that it was mainly a scare-crow and far more calculated to frighten ducks away than was our bewitching spread of decoys to entice them to us. Nevertheless we bagged a few ducks at this blind.

Down at the other blind better luck was had for building it, large willows being close at hand, and for securing game. The blind was not nearly so conspicuous, the flight there was better, and Marx and I were decidedly outscored, though none of us did as well as we had expected, after seeing the immense flock that had been using there. After a little shooting, the game appeared to leave for other parts mainly.

Next morning at daybreak we went back to the blinds, but what a mess did we find! The water had receded nearly a foot. Most of the decoys, which the evening before had been resting gracefully on the water, were now in a loblolly of mud. Especially was this the case at the lower blind, which had to be moved altogether. This required very irksome labor, for the ground was boggy, and as the decoys were beyond reach of the boat, we had to corduroy out to get them. Mr. W. is light, agile and a great worker. He is the most faithful and plucky duck hunter I have ever met. He got every last one of those decoys, but he came near losing a prominent railroader in the operation. Mack was assisting him in a limited way, and being of a stout build and not so active as a double somersaulter, at a certain juncture he got a shade out of equilibrium, went off of the temporary corduroy and landed full length in the slush, except about a quarter section of him, which struck one side of the retrieving boat. This quarter section was the only redeeming feature of the performance. Otherwise one Mack L. would have been buried in the mud past all comfort and far beyond recognition.

During the morning we got a few teal, though not as many as we had hoped for. About noon we took up the decoys, paddled to the Rambler, raised steam and went further down the river to another bar of switch willows. We found quite a number of teal here, but the territory they were rising on was altogether unfavorable to a successful shoot. There was no natural cover for the shooter and a vast area of soft mud. W. and Mack L. again went below the switch willows for location, while Marx L. and I again went into the switch willows and slush, and made our blind around the cockpit of the Amateur, leaving the decked ends to project on the outside. While we were constructing the blinds, a cold rain set in which necessitated a resort to rubber coats. The wind blew very chilly out of the northwest, but it was propitious duck weather, such as delights the soul of the veteran,

for he knows full well that such condition is favorable to a good flight and successful shoot. And the flight proved not altogether bad, though we had hoped for something better. One blind was too prominent and the other somewhat out of position. An hour after getting into them the cold rain turned to snow. At first this melted freely, but later remained where it fell and very soon clothed all surrounding objects in pure white. To us Southerners who see so little snow it was a grand sight to behold, and it was worth all the labor of the trip to witness it. However, we did not neglect the ducks that chanced to decoy between times, and for a while we bagged a snug little pile of them. But it was not long before the decoys ceased to melt the rapidly descending snow, when each individual one looked more like a ghost of a decoy than a real live duck. After that the birds gave our layout a wide range and we got but few.

When it grew nearly dark all four of us pulled away for the launch, which had been anchored about a quarter of a mile up the wind. In this paddle, short as it was, we got a genuine taste of old Boreas. We had already been chilled to the bone in the blinds, and as our clothing was damp and our hands wet the wind penetrated to the very marrow.

Mack was the funny man of the party, and generally managed to keep us in good humor, though sometimes we got enjoyment out of him in a way that he had not intended. The river and all pertaining to it was a novelty and sometimes a perplexity to him. In getting aboard the Rambler he generally came in head foremost on all fours, and looked more like a cow plunging into a pen than a civilized individual getting into a boat. But on this occasion he was benumbed with cold, and when the Boss boat was paddled alongside and the curtain raised, he took a tilt toward the interior of the Rambler, got the bulk of himself on the inside of the coaming, and literally fell in. We had our laugh. "Gentlemen," said he, after having gotten on his paws, "I'm frozen. This boat is the very last inch I could have gone alive. If Jay Gould's residence was only 200 yds. further up this arctic blizzard, and I had a free run of the establishment, nothing on earth would induce me to try to go there. As it is I may recover, but absolutely I have reached a point where a man ceases to live and begins to die."

Not long after getting aboard the launch we were comfortable enough, Mack included. A fire had been left in the furnace, and by the addition of a few shovels of coal a steam pressure of about 50 lbs. was raised, and as the curtains were kept securely fastened, we proceeded to enjoy ourselves in spite of the conflicting elements on the outside. We had a substantial supper which included four broiled teal; passed around a few jokes and went to bed. This bed is composed mainly of a mattress 5 in. thick, by 6 ft. square. It accommodated four of us snugly. The two guests were placed in the middle where they could be kept warm, though they protested against so much consideration for their welfare. Toward morning when the boiler had cooled somewhat, W. and I crowded a little and kept the two L.'s from becoming chilly. It is a habit of ours to look after the comfort of our guests.

Another thing about the Rambler's guests—they are required to conform to civil service rules. If only one is along, he is made fireman and deck hand. He sometimes kicks against this rule, but to no purpose. It goes along with sleeping in the middle. He has to shovel in dirty coal, keep the grate bars well scraped, clean out the ashes and cinders, leap ashore in the rain and mud to make fast a line, take up the dripping anchor, and perform sundry other work. On this trip Marx got some aid from Mack, and had the satisfaction of being one grade higher than him. It being Mack's first trip he had the principal drudgery to do, but I think Marx rather hectoring over him. Mack had the muddy line to handle, the coal to take from the bunkers, break up and provide convenient for firing. He spouted around and fretted considerably and would occasionally appeal to the pilot or engineer for relief from the fireman's demands on himself, but he was speedily given to understand that he was a "decker," and must serve his superior, the fireman, as well as others in authority over him. His work made him black, dirty and tired, but he had to knuckle to the rule. After a bit he worked well in harness, and on the way home was promoted, for a brief time, to the position of assistant engineer. This pleased him very much. He was allowed occasionally to open and close the throttle in order that the pilot or engineer or his immediate superior, the fireman, might operate on sundry wild geese which were numerous on the sand bars. Over this little distinction he swelled and strutted about the boat considerably and got so peacocky that he had to be reduced back to coal cracker, to keep him from taking charge of the boat entirely.

As a duck shooter Mack did not develop rapidly. W. was very patient with him, would give him easy shots, wait for him to shoot and persuade him that he had killed his full share. Sometimes, when the flight was dull, Mack would lose attention and had to be prompted, when suddenly the birds had decoyed.

"Marx, I want to tell you a good one on myself," he said one day softly in Marx's ear, "but you must not repeat it to a soul," he went on. "I would not have W. or P. know it for the world. Why if P., that scribbler, got hold of it he would sow it to the four winds. You keep it, do ye hear? On one occasion I got a little drowsy and failed to keep a close watch out for ducks. Do you know I got tired of this thing and think it's all a grand humbug, this going out in such bad weather in the cold and rain and mud and sometimes snow, to kill a few trifling ducks that I could buy in Vicksburg for a very small per cent. of the cost of the game we get on one of these trips, to say nothing of the absolute suffering we undergo. Those two men are regular cranks. Of course I've got to make a pretense of enjoying it to keep things smooth. I just can't stand the racket."

"I think myself," said Marx, "that sometimes this is more exposure and fatigue than sport."

"Yes," resumed Mack, "and I am losing interest very fast. Why, on one occasion—and don't you tell it—W. suddenly asked me if I was ready. I had just heard something splash on the water, but did not know a large flock of ducks had decoyed until spoken to. I had been thinking how comfortable it would be at home before a roaring fire during such weather instead of being frozen nearly stiff, with a cold loblolly of mud liberally smeared all over me. But I awoke, assumed a position as quick as I could, and you know that is not very quick, said 'yes,' and fired. And what do you reckon I did? Why, I just

poured both loads into the decoys. I made a fearful commotion among them. I never shot within ten yards of a duck, and did not get the location of them until they were flying away. The decoys deceived me. But three dead ducks lay spread out on the water, and would you believe it, W. gave me the credit for having killed two of them, and I didn't deny it. By Jove, W. is the most unselfish man I ever saw in giving me the credit for killing ducks. I have managed to fill the air pretty full of lead, but as to ducks, I haven't killed a thousand, by a jug full."

But Mack's little secret leaked out. Probably when he told it the engineer was close by and got the gist of it. So, sure enough, here it is scribbled into print.

The next day, after the snow, about noon, we took up the decoys and steamed back up to Big Black Island. The snow had melted. On the way up a brisk cold rain set in. It was by no means agreeable except to a genuine lover of wildfowl shooting. To such it was *par excellence*.

It was not long after getting under way before Mack began to complain of feeling unwell. At first no attention was paid to his remarks. But soon he became more prolific and specific in his complaints. About that time I got a smile askance from W. which was sufficiently significant to be understood. Mack's bones ached; he was stiff; he felt like one who was taking the grippe; he was prostrated generally.

When we anchored the Rambler off the middle of the Big Black Island bar, which location this time was preferred to our former position at the head of the bar, it was still raining. It was about this time that Marx began to develop a disease. He had the cramp or rheumatism in one foot; this rapidly grew more acute. By the time W. and I were ready to go out both invalids were altogether out of condition for a duck shoot. Mack was drawn up into a shape indicative of much suffering, while his countenance, usually beaming with a look of good humor, now wore an expression fully equal to the requirements of the occasion; and Marx played a fine second to Mack's lead as he limped about the launch in excruciating pain.

Of course W. and I were not going to insist on our guests going out and exposing themselves to severe weather under such conditions, though I must confess we were not apprehensive of serious results ensuing from the physical ailments of our complaining friends.

Soon W. and I were in the little boats, having left the M. L.'s by the warm boiler in the Rambler, out of the rain and protected by the closed curtains from the wind.

We two old "cranks," as Mack would call us, paddled off to take a few shots at the gamy teal. W. went to his former blind at the foot of the bar, a decidedly good position both for flight and an obscure blind, while I paddled off to a cove at the upper end, where I had a blind to build as before in the switch willows. As had been done down river, I surrounded the cockpit with a combination of willows and old sacks, ripped up for the purpose. I had no more than commenced work, when W. opened up down at his stand in a manner sufficiently energetic to indicate that he had business to attend to and was doing it promptly. I continued work on the blind, while W. continued to shoot. This, together with the sight of an occasional flock of ducks that passed my way, enlivened me to brace up under the depressing effects of the rain. Soon all was ready, when I crawled into a snug little nest. Quite soon a single teal decoyed at long range. It strained the old gun to get him, but he was taken out of the wet and stowed away under the deck of the Amateur. Ten minutes or so later three more teal decoyed, rather beyond range. A considerable time was given for them to do some swimming toward the blind, but they showed suspicion, and did not swim nearer according to my wish. To the contrary, they started away, when quickly a couple of shots were sent after them, which did nothing more than accelerate their exit. In the meantime the reports from down the river were animated and frequent, in fact so much so that I got very restless and dissatisfied with my location, concluded W. had need of help, yanked my boat unceremoniously through the little blind, jumped into it and paddled off vigorously to join in the sport below, leaving the blind and decoys to manipulate the deserted stand as circumstances might dictate. It was about three-quarters of a mile paddle, but it did not take long with W.'s gun as an assistant motive power. On the way a touch was made at the Rambler to see how the twin invalids were faring. From here W.'s stand was in full view. When the nose of the canoe was pushed alongside, the canoeist beheld one corner of the Rambler's curtain drawn aside while the two L.'s watched the progress of the contest below.

"I wish some one would kick me," said Mack. "I might just as well have been down there as not. W. is getting a grand shoot. Just see the ducks go in there!"

"And he is killing them, too," added Marx. "I expect we have missed it this time. Who could have known such a flight was going to be had! But that rain, I don't like it."

"Nor I, and the mud. Crackey!"

"What has become of P.? He don't seem to be getting in his work. I haven't heard him shoot but three times."

Pushing the Amateur into view, I said: "Well, you can just put it down in your little book that P. isn't getting in his work just now, but soon will. Say, boys, are you much sick? Hadn't you better go to bed?"

"Oh, yes; we are sick now, sure enough," said Mack.

When I got to W. he had killed and retrieved twenty-seven ducks, which had been done in about one hour's time. I went into the blind with him and we two enthusiasts sat there and killed fifteen more in short order, when, from some cause, the flight stopped short off without any apparent reason. Not another duck came in that evening, though we sat there nearly two hours, and until dark, waiting for them. On going to the launch the twins called me a Jonah, saying I had stopped the flight.

That night, with the patients again between us in bed, W. and I gave them an entertainment in the way of relating anecdotes, adventures, etc. We became quite conversational and spread ourselves, as it were, in an effort to entertain the two feeble gentlemen, one with aching bones and the other with a rheumatic foot, who lay innocently and unsuspectingly between us. Generally on a trip we devote one evening to an entertainment (?) of this kind. Marx had been with us on previous trips, but so far had not been initiated. Mack, who, as a rule, is very quick in conception, failed promptly to "catch on" as the slang phrase goes. He did not appear to be wholly satisfied with the talks and wanted to sleep, especially as the novelty of the situation had prevented him from sleeping soundly the previous

nights aboard. After a while we managed to talk him into a comprehension of the situation.

"How was it," he finally wanted to know, "that you," addressing me, "and W. are enabled to relieve each other so promptly in relating your yarns? As soon as one gets tired the other begins."

"Oh! We have a string under the mattress connecting each other. When I am about through I pull, and W. begins; when W. tires he pulls and I resume."

Marx, especially, wanted to sleep along with Mack, and as he is a born sleeper from away back, he was not long in developing the premonitory symptoms. Mack, however, had "caught on," and when the heavy breathing would begin he would nudge Marx vigorously—

"Marx, Marx, wake up, W. is pulling the string. Marx, Marx—Marx, Marx, oh! Marx, P. has pulled the string. Here, here, wake up and hear P. tell his panther story. Wake up, Marx, wake up, that won't do, here is something too good to let get away. We want to bottle it. Just listen. W. is going to tell some more about his trip in the Gulf of Mexico to the snapper banks. Wake up."

By such nonsense we kept all aboard awake until 11 o'clock, when the two M. L.'s proceeded to pull the string on their own account, at least Mack did. Marx was slow to aid him until about 12 o'clock he lost all patience at being punched and talked to, when he hustled out of bed in a hurry, and with much pretense proceeded to make and drink a cup of strong coffee made from hot water which he drew from the boiler. It was evidently his game to join Mack at last, and if possible outdo W. and me. That is the way it looked, though it may have been one big bluff. W. and I then shut up like two clams and not another word could be gotten out of us. We were tired of the string, and Marx and Mack quit, claiming victory. Soon all were asleep.

Did I say all were fast asleep? Well, hardly! I should have said one man was fast asleep. And that was Marx Loewenberg. He is a champion snorer as well as a sound sleeper. Marx and Marx alone slept. But the rest—well, we just tumbled in bed and could not sleep at all for the infernal noise Marx was kicking up. It took the combined efforts of three of us for two hours to keep Marx sufficiently toned down to allow us any rest at all. Finally we managed to get to sleep.

In the morning at daybreak we were again ready for the teal, at least all were except Mack, who was still suffering with his numerous maladies. Marx went out but I think it was under protest—he was not altogether recovered. I had hoped to get with him alone for a brief period that morning in some unfrequented spot, after which I think he would have inflicted a human being with that snore of his no more for ever. He sententiously declined to accompany me to a neighboring lake which I urged as being quite a duck roost. I had to go to the lake alone, where I got wrongly located but nevertheless had an exciting shoot as night came on. A great many flocks came in to roost, and though but a small portion passed or lit within range of me, I got many shots, and went back to the Rambler not altogether dissatisfied.

In the morning Marx first went to my deserted blind of the day before, which, not proving to be good for a morning shoot, he soon deserted and went down to W., as I had done the day before. W.'s blind, however, did not afford a good shoot, and but a few birds were obtained. At noon all were on hand promptly for dinner, after which Mack and Marx exchanged positions, the former going down with W., while the latter remained on the launch.

On the next and the last morning it was clear and cold. At daybreak W. and I were in the lower blind, having left the other two on the launch. We found the ice well formed a considerable distance from shore. We had this to break to free the decoys, which were also white with frost. The frost was removed by pushing them under the water for a moment. Only one flock came in, and it was in such a hurry to get away that we failed to get a shot.

At 7 o'clock we took up the decoys, paddled to the Rambler, raised steam and went home. The trip up stream took six hours to make. On the way the two invalids recovered considerably. Mack got entirely well. Marx would limp occasionally after reaching Vicksburg. He kept this up spasmodically for two or three days, when finally he recovered altogether.

After all, we could not blame either much for kicking in the traces under the existing conditions. We had almost too much weather and altogether too much lollolity. The mud especially was horrible, to say nothing of the wind, the cold, the rain and the snow.

Since our return Mack has fought shy of us when we were planning for another hunt, and Marx has not been as conspicuous as usual. Mack says he may take another hunt, on a rising river, but on a falling one, never. Should he go out again, which I doubt his doing, I shall take out a snug accident policy on his life, and would advise his family doing the same. As before mentioned, he is not a river man. He don't get along on water smoothly at all. A jolty swinging train of cars fits his talents better. On the river he is liable to swamp a boat or fall overboard at any time, and as he could not swim it would be a job of no mean magnitude to rescue him, especially if the accident policy had been properly attended to. As to handling a canoe, he just can't do it. The canoe generally under his manipulations goes somewhere else. It took him an hour one day to retrieve a duck which he had wounded while W. was off on a tramp to get warm. From our blind Marx and I could see him. It was a season of enjoyment for us. Any way, Mack is a funny man. He kept us in a rollicking good humor on the whole trip. I suspect that even W. and I would have gotten in the dumps over the many adverse conditions had it not been for him. He must go with us again, when we propose to even up with him on points where we failed this time. He shall be promoted to fireman if Marx is not along.

We will take Marx again also, but he must take along some rheumatism medicine and sleep on the roof. We just can't have that snore of his on the inside any more.

Vicksburg, Mississippi. W. L. P.

Iowa Birds.

ROCKWELL, Ia., May 31.—Our spring has finally come and with it fine prospects for a good stock of chickens for this fall. We have had excellent jacksnipe shooting this spring; they have been here in double the numbers of any previous year.

W. L.

"FOREST AND STREAM" AT THE FAIR.

A Good and Timely Omen.

JUNE 3.—The big white birch *fac-simile* sign which surmounts the FOREST AND STREAM exhibit at the Fisheries Building has done a very wonderful and beautiful thing, and one which is an omen of a very good and timely sort. It has put forth green leaves! The sap locked up in the cold boughs when they were wrought into shape last winter has now under the warmth of spring begun to move and three very distinct shoots of green are now in sight upon the lower rail of the sign. The paper itself has done more, it has not only put forth leaves but has some fruit, but that its sign manual should go ahead by itself and show such life, and push and go, is a happy proof of the depth to which the paper's roots take on, and of the strength of the vital force which feeds it. This is the FOREST AND STREAM year—you hear that everywhere. The paper has broken all records, discarded all uselessnesses, kicked out of all ruts of journalism and gone ahead by itself outside of competition. That which has "FOREST AND STREAM" on it is bound to grow, as this pretty little miracle of the sign shows. *In hoc signo vincit.*

The "Forest and Stream" Visitors' Register.

Two days ago a little register was put in the FOREST AND STREAM space, whereby now stands a dainty silver hand holding up an invitation to all interested in sports to inscribe their names. This visitors' book is to be a fixture, and it is hoped that none will neglect it.

A City of Dreams.

The Fair grows steadily in interest as the finishing touches go on. The leaves and flowers are now coming out, and are still bright and fresh, before the scorching summer days. June is a good time to come to the Fair. It is all like a city of dreams now, and no one can regret the vision.

June 10.—The Lefever Arms Co., of Syracuse, N. Y., write me in regard to their exhibit at the World's Fair—

"FOREST AND STREAM" IN RUSTIC LETTERS.

which exhibit, by the way, I had already visited and made notes upon, and intended to mention this week, or as soon as this cruel war for space in FOREST AND STREAM is over. The salient points of the exhibit are well taken up in the letter, nor do I consider that even the manufacturer of these goods has written praise too high. The exhibit is a very pretty and attractive one, and well worth a visit from any one interested in guns. The letter follows:

SYRACUSE, N. Y., June 3.—We read with pleasure your World's Fair communications to FOREST AND STREAM. We regret we have not had an attendant at our exhibit to make you fully familiar with it. With a view of giving you some information regarding it we are tempted to take the liberty to write you regarding the same.

We have not attempted to make a large display as to numbers, but to present a few guns of each of the grades we manufacture, and we flatter ourselves that for quality of work no exhibit of the kind will outrank ours. You will observe that we have broken adrift from the conventional method of displaying our guns and have placed them in position where the material and workmanship can be shown to best advantage.

The side view which we present gives a favorable opportunity to examine the external ornamentation of the gun. You will notice in the higher grades the delicacy of the checkering and engraving; it will bear the closest inspection under a magnifying glass. You will notice also the inlaid gold work and engraving are of the highest class.

We have a number of automatic ejector guns in our exhibit, and we are the only American manufacturers of guns to make an exhibit of self-ejecting guns. You will find in our exhibit a number of guns of the \$400, \$500, \$800 and \$1500 grades as well as guns of the lower grades.

The sectional view of the ejector gun, as we understand, attracted a great deal of attention, as has also the high grade gun finished and left in the bright condition—not browned or case-hardened.

In evidence of the improvement in double barrel shotguns, please examine the three old guns; there are descriptive cards attached to them.

Two of them are over 100 years old. One of them was built in 1753 by Twigg & Bass, of London, for Henry Laurens, of South Carolina, who was Commissioner of the Treaty of Peace between the United States and Great Britain.

We believe that a careful examination of our exhibit will satisfy any one that sportsmen need not go outside of America for high grades, for we think no gun on earth can outshoot ours and none can excel it in symmetry of proportion or in artistic workmanship.

Pardon this communication under a magnifying glass. It will be of service to you in giving you points for your letter to FOREST AND STREAM. We expect within a few days to have a representative at our exhibit. In the interval, anything you can suggest in way of hints to us regarding it will be acceptable.

LEFEVER ARMS CO.

Upon the method employed in the display it would be difficult to suggest improvement, just as it is difficult to make additional comment after the above. A good, able-bodied assistant, however, to answer questions and speak understandingly of the merits of the goods shown, will be found a distinct benefit to any exhibitor.

They Are Valuable.

As an advertisement alone these exhibits at the Fair are of unquestionable value, and more persons see them and notice them than would at first be supposed. For instance, it may be said for FOREST AND STREAM (which, by the way, is the only sportsmen's paper of its class enterprising enough to have an exhibit at the Fair, and incidentally also the only one to benefit its advertisers by telling about their exhibits) that the persons stopping at its corner far outnumber the widest first estimate. It was once thought well to publish the names of visitors which drop down upon the FOREST AND STREAM register so rapidly, but the book has so filled up each day that it seems

doubtful if there will be room to publish even these bare names each week, and the attendant in charge has been obliged to develop a faculty of answering questions with both hands. This will be necessary also for the Lefever attendant, and of course as usual.

Should any others of the FOREST AND STREAM family be missed in the crowd at the Fair, it will be taking no liberty but conferring a favor to ask a FOREST AND STREAM man to call around to look at the exhibit. Any delay after that must be ascribed to a press of matter of all sorts that is unprecedented in the history of this paper or of any paper of this class. FOREST AND STREAM has not only broken the advertising record, but the news record, and the enterprise record, and the cleanliness record, and several other sorts of records. But I digress.

E. HOUGH.

"FOREST AND STREAM'S" BUREAU, Angling Pavilion, World's Fair.

ABOUT THE PRESERVE SYSTEM.

SAN FRANCISCO, May 30.—*Editor Forest and Stream:* It is gradually dawning upon me that the man who writes for newspapers or papers of any kind stands in the position of the fellow who has only to show his head to find a dozen other fellows armed with shillaleys ready to hit it.

I am led to this conclusion in taking a second glance at your issue of the 11th and discovering a communication that I had overlooked, sailing into my humble self for some notice in my "Commentaries" on the question of the recently enacted game law of this State, and also some remarks intended to be sarcastic in the sporting columns of one of our daily papers here. In the latter article I am charged with being a bloated aristocrat, belonging to sundry such shooting clubs here, that propose to monopolize the best shooting grounds and exclude "the down trodden" from any show. It is the old argument of the demagogue, and the writer poses as the champion of the "poor and lowly." The chances are that the writer never shot a duck in his life, and characteristic of the chap who undertakes to write learnedly of the things he knows

nothing about, he thinks it the popular thing to sail into any sort of an association that happens to be willing to pay for its sport—a crime of itself.

The principle could as consistently extend to any other luxury that a man is able to indulge in. What right has one man to own and drive a horse when others are unable by being less fortunate in the possession of the world's goods to drive horses? What right has one man to own a yacht if his neighbor cannot afford to indulge in the pastime? Shooting clubs pay pretty dearly for their sport, and those who are able to pay for it are as much entitled to the privileges money gives in that direction as in any other.

It is enough to make a dog sick to read all this talk about equal rights and the deprivations of the poor man. There is very little in the way of luxuries that the rich or poor do not have to pay for, and as sporting is a luxury those who indulge must pay the fiddler. But it is simply wasting time to continue the argument, and all this talk about one class of men who propose to be free from all restrictions because they are unable to indulge in luxuries that men of means can afford, is simply rot.

As to the charge that your humble servant argues from the standpoint of a bloated aristocrat and bond holder, in his remarks about the California game law, it falls to the ground when the fact is, by virtue of having been long absent from the State, he is not a member of any one of the shooting clubs charged with monopolizing the shooting grounds in this vicinity, has not pulled a trigger for five years, and has no more privileges in that line than has the "down-trodden," whom these writers commiserate so pathetically because they seek to pose as the champions of the dear people. It seemed to be the popular thing to oppose the bill, therefore certain newspapers did it, without any idea of its merits and caring less. They ought to feel greatly obliged to me for giving them a head to hit and supplying the editorial shillaley with practice.

PODGERS.

LAWRENCE, Mass., June 4.—*Editor Forest and Stream:* Many a good man just hugged himself and felt good after reading "A Maine Paper Answered," by Mr. Henry O. Stanley, in FOREST AND STREAM of May 4, saying that the lakes of Maine were practically free in spite of clubs and preserves, because of a wise law. In this week's "Snap Shots" the first thing you do is to throw a little cold water, by saying that the system is likely to grow; and with giant strides, too, as you aver; and you mention a few of the ways of making lovers of nature in freedom unhappy. And in spite of a just law, too. That men can be found with hearts so small as to sell themselves to warn off others and make folks uncomfortable, is pitiful. And you say not a word to condemn such meanness. You should be impartial. But if you must be partial, you should throw your influence on the side of freedom and justice.

Sea and River Fishing.

BOSTON RODS IN MAINE WATERS.

BOSTON, June 10.—The height of the trout season in Maine waters is over, so far as the spring season is concerned, and many of the parties have returned and are returning. Still there are others who will go for fly-fishing purely, and they will follow up all of the month of June, and well into July. There will then be a lull till late in August, or during the heated term, when the fall fly-fishing will begin. Thus far the season is proving fairly satisfactory as to numbers of trout, but there is a lack of size noticeable in the trout taken in the Rangeleys and Moosehead, showing that the supply of trout is being heavily drawn upon, and showing the great need of artificial stocking to keep up the supply. It is suggested by some of the best trout fishermen who visit the Maine waters that the quantity of trout that any one fisherman is allowed to take and bring out is far too great. It is suggested that 25lbs. to a trip is all that any angler should be allowed to catch and bring away, and this would seem to be a most reasonable restriction. Such a restriction is also advocated by some of the best guides and camp keepers in the Rangeleys. They believe that only by some such measure can the supply of trout be kept up. The readers of the FOREST AND STREAM will generally agree with them, and will grant that the man who desires to catch more than 25lbs. at a trip had better go into the fresh fish business somewhere on the wharves, where he can glory in the quantity he can handle.

The Akerman party, Mr. and Mrs. Akerman and Mr. and Mrs. Harris, of New York, had fair success at the Upper Dam, and later at The Birches, Moosehucmaguntic Lake. Mr. Harris got a trout of some 5lbs. The Magee party, a very large one, early mentioned in the FOREST AND STREAM, was at The Birches for some time. The ladies took some big trout. The senior Magee, the founder of the Magee Furnace Co., of Boston, was with the party after all, though it was feared that sickness might hinder him. He has visited the Rangeleys nearly every year for many years. Mrs. Magee, one of those most kindly ladies that everybody loves for their experience and excellent good sense, was with the party.

The Camp Steward party had excellent success, not so much in the great quantity of trout taken as in the way the fates decreed, or the luck turned. Miss Blanche M. Stanley, of Newton, who never put a line into the Rangeley waters before, or indeed ever fished for trout at all, took a 6lbs. trout before she had fished an hour on her first trip out. Indeed this young lady went to the lakes wholly for sketching, and did not fish at all till the trip was nearly over. Miss Edith M. Hayward, of Chestnut Hill, also a novice in trout fishing, who also went for sketching, took thirteen handsome trout, with one over 3lbs. Mrs. W. T. Farley, another lady who had never visited the Rangeleys before, made a good record of nineteen trout, though thoroughly tired out from a recent visit to the Columbian Exhibition. Mrs. W. K. Moody, who has a previous record of an 8lbs. trout, took a 6-pounder this time, and hooked another that parted the line that had just held the 6lbs. fish. The guide, Charles H. Cutting, claims that it was a 10lbs. fish. The gentlemen of the party, W. T. Farley, of the dry goods firm of Farley, Harvey & Co., H. S. Kempton and W. K. Moody, both of the Boston Herald, each made good records of trout.

The party of the Inglewood Club, members and invited guests, returned to Boston on Friday after a two weeks' absence at the home of the club, Inglewood Manor, in New Brunswick. To say that the party had a good time and a most successful trip only about half expresses the fun and the general enjoyment. Much of the success and comfort of the trip is due to Mr. Leroy S. Brown, chairman of the house committee, and of the firm of Blaney Brown & Co., of Boston, and a good deal of the fun the boys enjoyed is due to Harry B. Moore, of J. E. Soper & Co., whom the readers of the FOREST AND STREAM may have heard of before. The fishing was excellent and some big strings were made, that of Harry Moore and his cousin, Geo. C. Moore, being the biggest for any one day. It numbered well up into the hundreds of trout and salmon. But the small ones were all immediately returned to the water as soon as counted. The best part of the fun was that the fishing was all with the fly. The most successful cast was made up of the Parmacheene-belle, brown-hackle and professor. Brook trout and landlocked salmon were the principal fish caught, though one or two members of the party think that they caught English brown trout, with which fish some stocking of the Inglewood waters has been done. But they were little fellows, and so quickly returned to the waters that identification was not thoroughly established. Brook trout were taken in abundance up to 2½ and 3lbs. in weight, with landlocked salmon up to 3lbs.

The annual meeting of the club was held on June 7, and two new directors were chosen, Mr. J. Nelson Parker, of Cobb, Bates & Yerxa, and Mr. Harry B. Moore, of J. E. Soper & Co.

The list of those present at the annual meeting is as follows: Andrew S. March, Newton; Gen. D. B. Warner, St. John, N. B.; Samuel Shaw, Newton; Joshua Knight, Musquash, N. B.; Leroy S. Brown, Cambridge; Albion H. Brown, Boston; H. F. Sparrow, Cambridge; J. Nelson Parker, Boston; J. A. Faulkner, Lowell; Henry B. Moore, Jamaica Plain; George C. Moore, North Chelmsford; E. Noyes Whitcomb, Boston; J. Merrill Brown, Boston; Henry P. Brigham, Boston; George E. Barnhill, St. John. The number of members of the club at the annual meeting would have been greater had the meeting been earlier in the trip, since several members had stayed their allotted time and gone home.

Speeches were made by President A. S. March and Gen. D. E. Warner, George E. Barnhill, Samuel Shaw, Leonard B. Knight, Geo. C. Moore, John A. Faulkner, E. Noyes Whitcomb and H. B. Moore.

Gen. Warner stated there was no doubt whatever as to sea salmon entering these waters, which information gave much satisfaction to members of the club. Mr. Harry Buck, of Orland, Me., an expert in the construction of fishways and a man of much experience with salmon, confirmed the above.

Mr. Moore mentioned what he considered to be a growing tendency among fishing sportsmen to exaggerate as to the weight and number of fish they take. He had

noticed this tendency with some degree of pain during the past few years, and he feared that it was growing. He dwelt upon the beauties of truthfulness upon all fishing occasions. Rod and line sportsmen should stick strictly to the truth on every occasion. "It is beneath the dignity of a trout fisherman to stretch the truth concerning the size of his fish. To feed a trout with pebbles or railroad iron should be frowned upon."

The boys cheered him, and Harry smiled. They could not help thinking of the moose stories and the deer stories he has told for the FOREST AND STREAM. They wondered who made up that bogus telegram on the way down. The porter rushed into the car—the party had its own private car both ways—and shouted "Dispatch for Mr. Leroy S. Brown." Poor Brown came forward. It read: "Meet me in Bangor." It was signed by Charles T. Spear, or appeared to be, one of Brown's best customers. Brown rushed out of the car at the next station. There was not time to send a message. Harry followed him. The train was about to start. "Boys," he shouted, "I can't go!" Then to Harry Moore, "Look out for my baggage!" The train was starting. "It is bogus," Harry whispered hoarsely in his ear. Brown's face lighted up. He got on board the train a happy man. The boys got hold of the idea, and how they cheered. The dispatch was entirely the work of Harry Moore, the advocate of truth. At first it had been signed by H. F. Sparrow, but behold Sparrow was one of the party, and it had to be changed after the train started.

June 12.—The finest catch of trout of the season thus

BLACK LAKE STRINGS.

The above strings of fish were caught by ex-Secretary of the Treasury Foster, and ex-Assistant Postmaster-General Rathbone, members of the Black Lake Club, in Black Lake, New York. The smaller string, consisting of twelve black bass and two pike, was caught by ex-Secretary Foster in two hours on the morning of Oct. 11, 1892, after which he drove twelve miles and made a political speech, probably the best he ever made. The large string was caught by Mr. Rathbone, on Oct. 9, 1892, in violation of the Fourth Commandment.

far was seen in the window of Messrs. Appleton & Bassett to-day. It consisted of three brook trout, the largest weighing 7½lbs., the next 6½lbs. and the third 6lbs. These beautiful fish were caught by Messrs. Chas. Z. Bassett and his friend, Mr. G. N. Smalley. On the same day the lucky sportsmen took a trout of 3lbs., one of 2½lbs. and several smaller fish. They were all taken in Toothacher Cove, Cupsuptic Lake, and near Billy Soule's camp. The gentlemen are high line of anything that has been in that section this spring. But Mr. Bassett also has a record of a 5lbs. trout taken at the Upper Dam with a fly the other day. The veteran angler and annual visitor to that fishing ground, Mr. Freeland Howe, of Norway, Me., was in the boat at the time, but he had not been having the luck that fell to Mr. Bassett. It took nearly an hour and a half to bring the big fish to the net, Mr. Bassett's rod being only a small one of 6oz. He says that he is convinced of the possibility of subduing even larger trout with light rods. The only requisite is plenty of patience and skill. The 5-pounder in question was hooked through the under jaw in such a manner that his mouth could not be forced open by the power of the rod, and hence the long time it took to bring him to the net.

The Col. Rockwell party, at Allerton Lodge, had fair fishing, though no big trout were taken till towards the end of the stay, when Mr. C. H. Andrews, one of the senior proprietors of the Boston Herald, took a trout weighing 5½lbs. But such is luck. A day or two after the party came out, Mr. Rice, of Springfield, was fishing in Bugle Cove, the very point where the Rockwell party had done much fishing, with a friend whom he was very anxious should take a big trout. Soon other sportsmen heard some loud shouting, and they rowed up. The friend of Mr. Rice—I have not his name—had succeeded in landing a 9lb. trout. This is the largest trout mentioned this season, at the Rangeleys. As luck always has it, the lucky gentleman had never fished the Rangeley waters before.

At the Narrows, Richardson Lake, some good trout have been taken, but not as large as are usually caught there. In fact, the fishing, as a whole, at all points in those waters, has not been up to former seasons. The gentlemen of the Stevens party, at Camp Vive Vale, did not have their usual good luck with big trout. Mr. Fred Stevens thinks he was too early, having arrived as soon as the ice was out, and he would like to go again a little later.

SPECIAL.

BLACK LAKE.

IN St. Lawrence county, N. Y., near the St. Lawrence River, is a lake, dotted with islands, with a picturesque shore, which fills the fisherman's dream. It is twenty miles long, four miles across at its widest part and contains more fish than any other body of fresh water of the same size in the country. U. S. Fish Commissioner McDonald says it is the best fresh-water fishing in the United States, and he ought to know. At least thirteen different varieties of fish there abound. There is no end of black bass and wall-eyed pike (and they bite), Oswego bass, muscalonge (not thick, but a good many), pickerel, rock bass, yellow perch, eels, catfish, bullheads, sturgeon, mudshad, and suckers (swimming and on shore). All are caught there in quantities that makes the lake appear like a feeder to a fish market. The lake gets its name from its dark, vegetable water that comes out of the Adirondacks. Its foot is three miles from Ogdensburg and it extends south parallel with the St. Lawrence river about five miles back. In 1891 a party of gentlemen, among whom were Hon. Lorenzo Crouse of Nebraska, now Governor, Assistant Postmaster General Rathbone of Ohio, U. S. Fish Commissioner McDonald, Hon. Amos J. Cummings, Hon. Eugene G. Blackford, Hon. Robert B. Nooney, Thos. J. Murry, John W. McDonald, and others visited the lake as the guests of Amasa Thornton. The result of their visit was the organizing last year of the Black Lake Club, whose members and officers are as follows:

John R. Andrews, New York; Jas. M. Allan, Chicago; W. Bourke Cochran, New York; Lorenzo Crouse, Omaha, Neb.; Eugene G. Blackford, Brooklyn; Jas. A. Briggs, New York; Emanuel Einstein, New York; Charles Foster, Ohio; Wm. R. Grace, New York; Charles W. Hackett, Utica; John S. Learman, Catonsville, Md.; Edward Lauterbach, New York; Thomas J. Murray, Washington, D. C.; Marshall McDonald, Washington, D. C.; Robert B. Nooney, New York; Frank Pomeroy, New York; Jas. Phillips, Jr., Fitchburg, Mass.; Thos. B. Reed, Portland, Me.; Estes G. Rathbone, Hamilton, Ohio; Isaac Seligman, New York; Amasa Thornton, Popes Mills, N. Y.; Jere. M. Wilson, Washington, D. C.; Wm. R. Weed, Potsdam, N. Y. Officers: Charles W. Hackett, President; Eugene G. Blackford, Vice-President; Robert B. Nooney, Secretary and Treasurer. Managers: Charles W. Hackett, Eugene G. Blackford, Estes G. Rathbone, Robert B. Nooney, Amasa Thornton. House Committee: Eugene G. Blackford, Robert B. Nooney, Wm. R. Weed.

The club has a fine club house, boat house, etc., and members' wives and families can accompany them.

The illustration was made from a photograph of fish caught in the lake. The inscription explains by whom.

Niagara Anglers' Banquet.

LOCKPORT, N. Y., June 10.—The tournament banquet given the victorious Reds by the conquered but conquering Blues at the Niagara last night was a fitting companion piece to the most successful outing ever held by the Niagara County Anglers' Club. "He wins who waits," it is said, and this occasion realized as never before the significance of this old aphorism. Stinging under the defeat of May 31, the Blues especially enjoyed the paroxysms of the once gloating Red men, as they arose in response to an imperious summons from Toastmaster Hatch, to speak to text and sentiment heard for the first time at the moment of trial. The time waiting for the signal for banqueting was spent in swapping fish stories, and some big ones were told. The dining hall of the hotel presented a pretty appearance with its long lines of tables. At the head sat President Jerome E. Emerson and near him C. W. Hatch, leader of the forlorn hope of Youngstown. The Rev. G. W. Powell said grace. Mine Host Jackson had ransacked the bountiful storehouses of the four quarters of the globe and presented a menu over which a gastronome might gloat. The service was excellent. Beautiful roses adorned the board, and above the feasters floated the banner and title of the now famous club. Right cheerily they dined, and the while Lawson's Orchestra discoursed inspiring music. Soon the solid feast was over and the lighter began. Fragrant Havanas were lighted and all were in a receptive mood for fun.

President Emerson in a felicitous speech presented to Judge Millar the club gold badge for the largest string of black bass. The winner thought it ought to be called the "good luck" badge, as he attributed his success as much to luck as science.

John A. Merritt made the presentation speeches. The press prizes for reports of the excursion were announced as follows: 1st, Sun; 2d, Journal; 3d, Union.

Captain Hatch, as the toastmaster of the evening, presided with ease and ability. Nearly all the Reds were present, and the responses to the toasts were excellent. For impromptu addresses a body of men could not well be gotten together anywhere who could well excel in apt replies and telling hits. As story tellers F. K. Sweet, W. A. Williams, Judge Millar, W. J. Ransom, Dr. E. W. Gantt and W. J. Jackson carried off the palm, although all deserved a prize.

M. H. H.

Connecticut Legislative Ways.

HARTFORD, Conn., May 26.—Editor Forest and Stream: In an editorial in the FOREST AND STREAM of May 25 you say that "Connecticut game and fish bills are referred to the Committee on Agriculture." This is an error. The bills relating to fish are referred to Committee on Fisheries or to Judiciary Committee. Your other words hold good, however. We are indebted to the Committee on Agriculture for a bill taxing female dogs \$10.15, while male dogs are taxed \$1.15. The same committee have reported favorably on a bill appointing a dog warden for each county, and also making the owner of dog liable to fine of \$7 if his dog is off his premises from 10 P. M. to 6 A. M. This committee's room is very appropriately named the "Hay-mow."

The committee on Agriculture consists of nine members, one senator and eight representatives. I am indebted to Senator Coffey for many courtesies, but the other members did not look with favor on some measures (that were good) with any degree of interest. They cling (and always will cling no doubt) to the idea that any legislation touching game, is to get at the poor farmer's boy. When a rural legislator gets that idea firmly rooted in the gray matter then:

"They say he has no heart, but I deny it; He has a heart—and gets his speeches by it."

This committee makes no pretensions (and could not rightly) of knowing anything about game protection—except Senator Coffey, but he is only one of the nine.

A. C. COLLINS.

ON THE NORTH SHORE.—VIII.

The Return Trip.—VIII.

(Concluded from Page 192.)

THE next morning, as soon as the delicate illusive gray of dawn appeared in the air, we were all up, had a hastily prepared breakfast, the camp dismantled, everything aboard, and off for Gros Cap, with as cheerful hearts as ever beat under fustian jacket. The gleam of the early morn spread in one golden glow over the sparkling surface and the green woods. The sun laughed as it raced o'er hill and vale, river and lake, beautifying everything it touched with its crimson-tipped arrows. It was a morning that awakened every living thing. The bees hummed as they sought the honey of the flowers; the myriad insects that haunt the woods and revel in the sunny stretches, sounded their little clarions; the jay and the chickadee, the white-throat and the warbler, and all the choristers of forest and grove were in tuneful melody with the splendor so generously abroad.

"The morn is up again, the dewy morn
With breath all incense, and with cheek a-bloom,
Laughing the clouds away with playful scorn,
And living as if earth contain'd no tomb,
And glowing into day."

Ned had his rod in hand, ever ready to let his flies drop into some inviting spot, while I gave myself up to the beauties of the lovely shoreline, which was constantly developing views "like apples of gold in pictures of silver." The persistent angler finally reached a friendly rock, so ragged, splintered and creviced, that I was positive he would arouse a fitting representative of the spangled tribe, but it only sent forth an adolescent delegate that lazily toyed with the fly and then went back to its retreat, where we hope it will remain and grow in shapely and dappled beauty until it reaches maturity. Again and again dropped the flies as light as thistle-down, but not a mottled knight rose for an investigation of the subtle lures. Finally he was satisfied that nothing would here respond to his lightly delivered flies, and then the boys rowed quietly along the weather-beaten rocks in search of other caverns where dwelt the tattooed tribes.

We quietly went by a grand stretch of waving hills, revealing a wildness and beauty of scenery which awakened emotions that struggled in vain for expression. Here the dreamy loveliness of the moving forest contrasted strangely with the huge walls of granite, so typical of all that is stubborn, rugged and relentless.

After half an hour of constant work with the rod, Ned was rewarded with a double strike, both of which he hung. He was in high feather now, but it was of short duration, for the one struggling at the lower fly soon escaped, and a moment later the other kissed him a farewell, and then there was a sadly disappointed angler in the boat beavelling his hard luck. Emery smiled at Ned's loss, and doubtless thought it a retribution for dismissing him from service with the landing net when talent was required and applause to be gained.

We had now reached Goulais Bay, and as it was nine miles across and four more to Gros Cap Island, our destination, we consulted the oracle of the scuds as to the continuance of the fair weather. He slowly gathered himself together, and then rubbing with his right hand his massive forehead, as well as scratching where the combative organ is supposed to have a habitation, took in the magnificent splendor of cloud life above, gazed along the rim of the horizon where his friendly scuds are supposed to lie, and after staining a spot of the crystal waters with offensive saliva, and giving an extra hitch to his cross-ribbed pantaloons, said, solemnly: "It looks very mixed; may blow a little, but safe, I think, to chance it." As this was the first forecast which he had favorably reported during the trip I took his swarthy hand and shook it with a warmth that threw him completely off his balance, and set him wondering why white man so friendly.

Ned having now ceased his efforts to arouse a trout, the make-skiff of a sail was hoisted, and with the gentle breeze then prevailing headway was very slow indeed. One of the boys, however, attached himself to a pair of oars, which somewhat increased our speed with hopes of reaching the coveted island by noon. Delay mattered but little, as the day was such a luxurious one. Great flakes of golden clouds were lazily sailing to a radiant home in the east, the hills afar and the thousand leafy isles that graced the shore, partook of the magic of the morning glow, while the lake, which was stirred by the low wind that sighed across it, was in a lustre of silver so bright that its reflectiveness imprinted itself upon the broad and discolored sail as if to also beautify it. Gently we glided along in all this brilliant refugence, like dreams of delight on an enchanted sea. Feeling its soothing influence, we gave ourselves up to its voluptuousness.

"And I wrapped me about in the sunlight,
On the marge of a dimpling stream,
And there in a tangle of lilies
I wove me a wonderful dream;
And a song from my dreamland went floating
Far up where the angels must be,
But deep in its under vibrations
I heard the sweet song of the sea."

It was indeed slow progress over that rimpling lake, for nothing but zephyr breezes and the warm glow of the sun prevailed. When about half way across it became so unpleasantly warm that we began to think of the scorch and the stupor of tropic lands, and courted the shady side of the flapping canvas. It was next to a calm, and as the dilapidated old rag could not straighten in such a wind an additional man was put to the oars and then we made better time.

After about two hours and a half of hard work with the polished blades we were over our Hellespont, and then ran along a stern and dismal-looking shore of lofty crags, narrow breaches, overhanging crests and crumbling rocks, the whole resembling the frowning front of a dismantled fortress, with towers and turrets, bastions and ramparts, archways and buttresses in one mingled mass of shattered ruins, over which grew lichens, mosses and ferns, with here and there a tiny wild flower springing into the warm rays of the sun from her slender storehouse of soil, the crevice. Here, if you have an eye for color, you see long lines of gray and green and purple, which the sparkling glow of the sun's glistening silver so richly enhanced; infrequently they thicken below and break above in flashes of delicate amber upon the edges of

these massive and ragged walls that have for ages battled with turbulent seas, crushing ice and destructive frosts. Over all this the majesty of the clouds is incessant; sometimes they are of terror and boding storm, and again of magnificent sweep and ethereal beauty. They were now in their glory and trooped the sky like bands of happy lovers, and their shadows followed them over the mountain top and through ravines, darkening the landscape for a moment till sunshine could again conquer the scene, and then repeating the beautiful movement above and below till they had faded away like the brilliant impressions of a dream. The soft, balmy feeling in the atmosphere corresponded with the tenderness of the green foliage, o'er which the sunshine danced in impish play. Anon, as we quietly moved along these ragged walls of grandeur were greeted with rippling rills running o'er the faces of these scarred and weather-stained rocks, that dropped into the lake with the most soothing of lullaby notes.

Peter, who was always prompt in dining, now flashed his silver timepiece upon us, and then imparted the cheerful information that it was precisely 12 o'clock, and at once began looking around for some little cove, with a beach that would permit of landing and serving the meal. After going about half a mile, we found a lot of tumble-down granite promiscuously scattered at the foot of a cliff, which gave us the room desired, and so we landed, and the work for pleasing the appetite commenced. Ned, who had a weakness for hot cakes and maple syrup, one of our standard breakfast dishes, insisted that they be served, despite the horrors of unities or the terrors that might overcome our chef. We had them and plenty of them, and hugely enjoyed them without even as much as a tremor reminding us of the inversion of culinary order. Not only that, but Louis Miron, one of Ned's old boatmen, who was passing by us in a Mackinac, was called ashore and invited to the feast of hot cakes and syrup, which he and his helper dined on till they were filled to repletion. Ned and he, after the repast, got down to the relation of trout tales, while I hugged the shady side of a high cliff a few feet away, and listened to the romances, edging a word in now and then merely as an interrogation. Miron, during the pow-wow, stated that a couple of anglers stopped over night, a few days ago, at the mouth of the Montreal River and caught the next morning at the first rapids about half a mile up a dozen fine brook trout, a place where you rarely get one, and where anglers seldom fish. The river for many years has yielded no satisfactory returns, and I simply make the statement above as an exemplification of trout turning up in unexpected places, and that it is always best to practically illustrate before passing judgment or passing by a stream in bad repute with anglers. Miron was off long before us, and as the rising breeze was just beginning to vibrate the foliage, he caught it with his broad and clean white sail, and slipped over the gentle ripples with a velvet smoothness to the accompaniment of a tinkling symphony as pleasing as the music of the wandering brook that comes from "haunts of coot and hern."

As we intended fishing along the shore this side of Gros Cap, I put my rod together and prepared for the pleasant pastime, but counted no trout in advance, though I assure you my heart was full of ardent hope.

About 2 o'clock we left the little rocky cove, with a slight breeze that seemed to shake out the fragrance of the forest. It was fully a mile ahead before we would reach the waters that we expected would yield us a few of the handsome victims, and as the boys were indifferent about hoisting the makeshift, they pulled quite lazily and carelessly, giving us a fine opportunity to feast our eyes upon the beetling cliffs and the huge rocks at the base, many of which seemed to have human forms, and one might imagine them great giants rising from the shore to beckon you on to sweet repose or painful wakefulness. We gave ourselves entirely up to the fancies that were awakened, and felt as if we were floating on the Vesuvian bay, the sport of the wind; the freedom of the lake matching the freedom of the mountain outlook; the spirit as light and glad as were the airy nothings in the sky that gave it wing and made it their confidant, "the whole world moving to the rhythmical harmony that was borne into the silence of the soul as the message of Nature to man."

Around some towering and frowning crags just ahead, which stood out in rocky raggedness, were the waters in which we must display our skill to secure the quarry. At once I took position at the bow, the post assigned to me, and there I worked myself up to great expectations. Ned, who, of course, remained in the stern, was also in fervent glow and doubtless counting his catch in the prospective. Arriving at the flinty point we at last swung by it, and then my flies were sent in search of *S. fontinalis*. Nothing came of the first dropping of the feathers, nor of the second and the third, and not till full ten minutes after the maiden cast did I receive a rise, and then, much to my disappointment, missed it. Once more the artistic lures, vent out on a captivating mission, and this time a tigerish trout was impaled as a fast companion of the "royal coachman," and not liking the over-ardent company, made a terrible struggle for a separation with the courage of a true knight errant. His strength and strategy availed naught, and then he was carefully given over to the artistic mercies of the guardian of the net, who laid him tenderly away on the shady side of the boat. He was not above a pound and a half in weight, but such a ravishing beauty that he must have idled many hours under the gorgeous sunsets, for he had undoubtedly stolen the lustre of their hues. Ned was at it, shovel and tongs, with his rod and flies, but they fell to no purpose, as it was evident the census of this place was only counted in units. Yonder, where the shadow of a passing cloud shows the scarred side of a declivitous rock, must assuredly repose some Apollo Belvidere of the icy deep. We reach it in a moment or two, and Ned, in expectancy, lets his flies fall gently upon the surface, and then there is a silvery gleam, a violent splash, and a wolfish snap, and another dandy, inlaid with opal and violet and dashes of orange and amethyst, is singing his death-song with a bravery so characteristic of this noble tribe. The victorious angler, glowing with the excitement of the strife, renewed his vigilance with an industry that kept his flies falling like snowflakes upon the long dark lines. It was in vain, however, for these studded, striated and veined knights of the reef were either surprisingly limited in the waters that should theme with them, or were not seeking to toy with surface illusions.

Reaching a ledge of rocks touched with a grace that

softened the impression of age and sublimity, that we fondly hoped would give us some diversion, were, sad to relate, disappointed, as the flies fell fruitlessly. It is advance again, and this time we strike a recessed crag, so green, scraggy and savage, and within so damp and o'ergrown with moss, that you would think the sunlight never played upon the sullen and ragged frontispiece, which awe sufficiently to overshadow all sense of pleasure that one so earnestly desires in scenery where so oft he lingers. Down into the deep translucent waters are antechambers so spacious that you feel assured some shapely beauties of the golden garter abide therein, and that the fall of a dainty tid-bit upon the dome of their dwelling would arouse to a sense of investigation. Thus impressed we showered the tempting feathers and tinsel bright upon this fascinating formation with fervent hope in every cast, until we had about run through our entire catalogue of artistic lures. "There," said Ned, pointing with this index finger, "is evidence of a sparse settlement, if not complete desertion." Following the direction of his significant finger, I saw two or three crawfish moving along the surface of a honey-combed rock. This bold and open display of these crustaceous crawlers satisfied me that the game was further away, and, per order, the music of the dropping blades was once more heard.

We try a mountain wall just ahead, rooted, massive and majestic, that could tell the thrilling story of a thousand stormy winters, and which seemed to say to the Prince of the powers of the air, as Shelley makes the Titan demi-god say to Jupiter—

"Let alternate frost and fire
Eat into me, and be thine ire
Lightning, and cutting hail, and legioned forms
Of furies, driving by upon the wounding storms."

No one answers here to the pull of the string, and concluding all absent in the palatial subway, we still press on and reach a low range of hills swelling with the verdure of the forest, and every curve of grace suggesting fairies and frolicsome fays, and yet no *fontinalis* would break through the sapphired deep to even glance at the fascinating flies so richly and deftly wrought:

"Alas! alas! no music of the silver spool,
No tinted trout with lures to fool."

A caressing wind, manifesting an increasing desire, carries us at random beyond these illusive haunts, until we come to a *chevaux de frise* of charred timber and gigantic ramparts of rock in golden and silver light, and once more strive to snatch a prize of beauty from this wild solitude of grand fascination. It proves a dismal failure, and then on reaching an opening where rich opaline tints are flashing and birds filling the air with sweetness, the lures again court the waters, and still no scarlet Hebe arises to gladden us with emotions of delight. We now begin to feel as if the rainbow of promise is departing, and that all these magnificent homes in the deep are a mere *ignus fatuus* to the knight of the rod. Gros Cap was just ahead, draped in a gorgeous tunic "whose warp seemed to be aerial sapphire o'er-shot with threads of gold," and

"Standing alone twixt the earth and the heavens."

Here was our last chance, and if that failed we would indeed be in the very abyss of despair, and doubtless sound a retreat that would sweep us on to the raging rapids below where solitude is unknown. The little island shows a frowning front where many a mottled warrior has fallen to the skill of the angler, and long before we reach its seductive lairs which lie all around it, our flies are covering every inch of water in hopes of finding some of the golden and scarlet-draped in their sportive revels. The ambitious desire went not amiss, for I caught one spangled knight and lost a black fly on another and a weighty savage that must have been a redoubtable athlete in his race, for he took not only the fly, but part of the leader, without the least particle of mannerism. It was simply a vicious snap, a sudden jerk, and that was the end, quick and decisive. The fly was replaced and the work of alluring commenced afresh, but only one more feeble rise was the result after a half hour's hard and earnest work.

The breeze had now risen sufficiently to make luxurious sailing, and as Ned suggested it was best to take a wind when you have it, it meant home and a termination of the delightful trip. I acquiesced, and then that old checkerboard of a sail was hoisted for the last time and we were off for the "Soo" with the sun sinking westward lower and lower, till it glowed in a globe of flame, from the edge of which the perfume of the invigorating balsam saluted our senses with hill after hill of green verdure arising before you strike the river and the low ridges. Like the tower of a stronghold the lighthouse now greets you, soon the sense of loneliness departs, the rosy lights disappear, shadows fall around, and ere the entire drapery of night is drawn we are at the "Soo" with only the bright recollection of happy days spent in the pursuit of the gamiest fish, whose ravishing charms of graceful symmetry and matchless beauty have been the theme of poet and painter in every land where the gentle art is acknowledged as the contemplative man's recreation.

CINCINNATI, Ohio.

ALEX. STARBUCK.

Black Bass at Clayton.

CLAYTON, N. Y., June 9.—The black bass fishing is fair at present. The bass have not yet come up on the rocks, but are still on the "white bottoms" and in the weeds. The season is about ten days to two weeks late. Nothing can be done with flies at present, but there is promise that the fly-fishing will be good in a couple of weeks. We were so fortunate as to secure the services of a most capital guide (said to be the best here), Stephen Layere. He is an excellent boatman and good cook; knows all the best spots and is untiring in his efforts to find the fish. As a natural result our boat has been the most uniformly successful of any; and on five evenings out of the last ten days we found on returning home that we have brought in not only the most fish, but the heaviest as well. On one occasion we had eight weighing 20lbs., and on another twenty weighing 40lbs. During the last ten days our best catches have been 35, 33, 31, 28, 20; total for the ten days 214, for the three rods. The largest fish caught was a 4-pounder, but several 3½, 3¼ and 3-pounders have been secured. Any fisherman or woman who would not be comfortable at this house (the Hubbard) would be hard to suit. Everything is done for one's comfort, and the table is excellent. I trust the above details will be interesting to you.

WILLIAM BUNKER.

LAC TSCHOTAGAMA.

"LA BAS, Lac Tschotagama," said François Goyon, tall, gaunt, weather-beaten and gray-bearded, the rugged, stern Montagnais face lit with enthusiasm as he pointed to the dim Laurentian Peaks, shining far distant on the other side of Lac St. Jean.

"Une belle rivière! La Grande Peribonka," he paused as the name of the river, gravely intoned, full of sweet cadences and majesty, fell upon the ear, creating an indefinable sensation akin to the feeling caused by the half-breed of the North Shore when one first hears them utter the word "Labrador."

François, oracle among voyageurs, spokesman of their united experience and premier among the guides, addressing us with laconic sentences, divided by silences that spoke volumes the Indian nature would not deign to use, tempting us to make the journey.

There we stood, that July morning, 1891, upon the piazza of Hotel Roberval, Lake St. John, Arnie (Arnold W. Koehler, of New York) and I, with the four half-breed guides, François, Josef Savoir, Davide Phillippe and Louis Tremblay, discussing whether we should go. Roberval stretched around us with a cordon bleu of Laurentian ranges, running around the rim of the horizon like a necklace of sapphires, while in its center lay Lac St. Jean, now glistening in the sun like a great emerald, then changing into a great turquoise, and then as fleecy clouds raced across the sky neutralized into a great pool of quicksilver, smooth as a mirror, stretching far beyond vision, until it was lost in

"The silvery haze of the summer dawn."

I heard Josef Savoir say, "Alo tshipa miluetamots epinan ka mishalits meshtoko mithuiapits at uitshe-utok tshe otinamok ouananche kie mashimekush nete shakaikants" (they would rather stay in the big wooden house—Hotel Roberval—than go with us and catch ouananche and trout at the lake).

The strong contemptuous Montagnais accents arrested my attention and made me think of the Nepigon, the Ottawa, the Everglades! Who does not know the Indian's inbred dislike of the permanent home? Who that has fared these out-ways of the woods has not seen some deserted log shanty or abandoned tepee with birch bark strewn around and the significant arrangement of poles, telling the cause of abandonment? "Some man died there!" The superstition that the spirit of the dead haunts its earthly abode!

"Par ci par la, les ouananche, six, ai, huit livres" (here and there the ouananche are 6lbs, aye, 8lbs.). I shook my head doubtfully, whereupon Davide indignantly ejaculated "Surement."

Arnie laughed, and the others muttered their disapproval of Davide's interference as though François did not require any assistance to establish the truth of his statements and win us over.

"The river is filled with long weeds in which lurk pike of an enormous size," and François turned to his confreres. Davide put up his hand to show the length of the fish, and Josef with a "ugh" nodded a grave approval. Louis Tremblay, bearer of a name which finds its echoes among the Gascon Crusaders and the French Canadians of the sixteenth century, leaned against one of the pillars with true Indian indifference.

"There are magnificent falls and rapids filled with salmon jumping and rising through the surge, and trout leaping at the fly the instant it flits upon the foam. There you will get the salmon glittering white and gleaming like burnished silver in the sun—further on at the Lac you will get them dark and gray, oftentimes quite black, but they all fight like devils! Ils se combattent comme des diables."

"Where the clouds kiss the mountains, is the Lac, and thence the Grande Rivière pours down to the St. Jean," said François pointing to the dark blue peaks outlined against the Canadian sky, luminous in the clear atmosphere, an hundred miles away.

"The whitefish, the large great pike," with what contempt, but how vividly, how keenly, I call to mind the softening of speech and mien as he said, "La belle truite et le beau saumon-ouananche! eh, mes frères?" and then he looked at us. What need of more words, François?

Who could withstand such a temptation? Who could be such a sceptic as to doubt the sincerity of the voyageurs? Who could gainsay the kingly sport that awaited us beyond the blue mountains? for royal and keen-edged as the quest for the *Salmo salar*, the sovereign of all finny game, is the fight with the ouananche.

Within every intendment of his Montagnais patronymic he has in miniature every attribute and quality that his royal progenitor, the *Salmo salar* of the Atlantic, possesses and a little more.

Beneath the thundering tons of water rushing over the falls, amid eddies and whirlpools encircling like miniature maelstroms, under foaming torrents tossing logs and drifting trees like playthings, where never a salmon was stabbed, and like unto only the trout of the Virgin Falls upon the Nepigon, the ouananche lives in a home of tumultuous, turbulent floods. Naturally a fighter, acquiring highest development of muscle and form from habitat and environment, the ouananche savagely wars upon all that dare invade his realm, be it flashing phantom minnow, glittering spoon or elusive flitting fly.

Who has not failed to rise the salmon, although his dark, bluish green shape could be seen in the pool, and had his patience tried beyond expression after days of vain casting? For that monarch will not rise to anything save the fly, and often not even to the most dainty creation of variegated feather. But the ouananche will seize darting minnow or swirling spoon, or swimming or flitting fly with an indescribably savage ferocity, as though the invasion of its realm were resented.

Oftimes when confidence is lost and the arm is tired of casting the fly, one may loiter indolently in the canoe on a mass of fragrant balm o' Gilead and troll with a 5oz. rod. In a canoe dancing on the seething waters like a cockle-shell, and a battle between the instinct of the Indian and ouananche to keep the canoe free from his rushes—the fight goes on. Here is a fish whose weight runs up to 8lbs.—best fighting form is 3lbs.—which wages a terrific combat often lasting an hour, straining dainty coach-whip rods and silken tackle like unto which verily only

the initiated can speak. Resorting to expedients and exhibiting tricks, the *Salmo salar* has never been known to exhibit, if he possess them!

Furiously thrashing the water and rolling over and over on the surface, often until the line is inextricably tangled, leaping high in the air, often five feet high, six to seven times, savagely shaking his head; jumping slipping somersaults with a splurge-like roll, darting again and again toward the canoe and often under it, and then, infinite regret and chagrin, dashing with a wild jump into the midst of the torrent and rushing far down the foaming current, until the white axle of the reel strikes terror to your soul and the slender 5oz. rod is unable to hold the weight of line, with the ouananche madly struggling to escape an hundred yards away; when your only hope to save the fish is to get on some rock in the midst of the foam, with the Indian crouching at your feet, and give the rod fair play, where the fish may fight in open water—thus the battle goes on.

Do you doubt that trout and bass are outclassed—that this is a worthy rival of the *Salmo salar*?

"HER LADYSHIP'S WORD WAS LAW."

My favorite outfit is the Wood 4oz. lancewood rod, built for me by Thomas J. Conroy, with a "G" Hercules water-proof silk line, a 6ft. salmon leader with a No. 6 Jock-Scott fly. Then, with a 3lbs. ouananche fairly stabbed, the world, for the next hour to come, is forgotten.

"Eh, François," said I, coming back from Dreamland. "C'est la vérité," said Josef Savoir, and, surrendering, we bade them get stores and needful kit from Mr. Kenna of the Hotel Roberval, and have canoes and packs ready for an early start in the morning.

Sunday, July 4, 1891, the little steamer Undine waited for captain and guides to come from Mass to take us twenty-five miles across the lake to the mouth of the river. Scarce were we out, when a terrific storm broke and followed us across the lake. Across and then backward and forward, this way and that, following little bushes stuck in the shoals, running through imagined channels, sounding with a pole, and the captain filling the air with oaths in all tongues—Indian, French, Patois and what not—we tried for the channel and finally made the block house.

Up the river, skirting the shores, trolling for brochet until we wearied of their sight, we went along and caught pike. One frantic leap in the air when struck with the barbed hook, a brief thrashing of the water and the great cowards came to the canoe without a struggle. Reaching down and plucking them by the eyes with second finger and thumb, lifting them from the water, Josef Savoir would deliberately take his knife and stab them in the brain, and with an Indian "ugh" throw them in the bottom of the canoe a glittering mass of gleaming yellow, golden spots, bronzed and copper scales, with shining eyes and great cruel jaws filled with merciless fangs. I never could find game qualities in any of the family *Esocidae*! From François in the bow and Davide and Louis in the other canoe came laughter keenly merry with delight over the slaughter, and applause for the skill of Josef.

But indeed is the Peribonka "une grande rivière!" On the way up the change and variety of the scenery is marvelous, for verily lath nature spoken "in various language." The river widens out for miles, threads a mazy way through numberless islands covered with dense growth of fern and bush, tree and forest, or rising in naked rocky shapes of strange misshapen form, barren, with scarce a shrub thereon. It narrows down and pours through gorges and precipitous passes with a deafening roar, forming magnificent falls, with rainbows gleaming whenever the sun shines. The flood rushing and whirling over rocks and around points forms pools covered with great patches of foam, sometimes a foot thick, oft times quaintly rising in columns two or three feet high, through which the ouananche and "poisson blanche" can be seen rising after the flies lighting on the brilliant bubbles.

At Frazier's Chute the river, passing down between rocky cliffs, narrows into what Arnie aptly termed a "V-shaped cassage." It was strikingly appropriate. The water rushing V-shaped to the point was like quicksilver, with a mirrorry sheen of a brilliant emerald green hue, while along the shores it broke into filmy lace of whitest foam, with bubbles gleaming like gems; and as the water leaped over the fall it seemed to widen like the flowing skirt draperies suggested by the simile.

Fickle as a woman's whim, lightly humored as a spoiled beauty, we found the ouananche in the pools below the falls! We were indeed in sore plight, for rig our flies as we might, cast as we would, it was only few and far between, the ouananche which we caught. Still, enough for camp, and on we journeyed.

What skies and what weather, Jupiter Pluvius! It was rain morn and noon, rain by day and rain by night. But oh, what of that cry, nay half animal plaint of the Indian guide, be he half-breed or full-breed, that is never hushed when you wish to go on in the rain, "trop mouille!" When flour and bread, tea and coffee, are mercilessly exposed to the down-pour, while the bacon and all that rain would not harm is carefully protected! How can you assert your authority and settle that question, ugly and always to be avoided, that your guide must go as and when you wish regardless of wet or dry, the problem of the bush!

"Eh bien, François! Vous êtes le premier des guides, et si vous ne voyagerez pas à travers la pluie comme je veux je vous ne payerai pas pour le temps que vous ne travaillez, pas, et de plus je vous ne donnerai rien à manger" (Very well, François. You are the chief. But you will travel through the rain as I wish or I will neither pay you for the time you are not going nor give you anything to eat).

A short conference apart, the braves in council. Josef speaks in Montagnais, the alternative is accepted, on we go. M'sieur is recognized.

Across portages where the men carried loads like mules and through water-abandoned gorges, where, with canoes on their shoulders, the guides went leaping from rock to rock like goats, onward we journeyed, up the gradual ascent of the river. Few ouananche, trout enough for two meals, caught where we camped over night, beneath lynx heads and claws nailed to trees, trophies of some long past chase, and catching pike past all numbering, we killed time and enjoyed the ascent until early in the afternoon on the third day, we arrived at Lac Tschotagama. It is an irregular body of water about eight miles long, at its widest extent about two miles, shut in by lofty mountains jutting far out in the lake, and covered with woods and thick underbrush, fragrant and odorous as all Canadian forests; a miniature Lake George.

On Dappler's Point we pitched our tents and put everything in readiness for our stay of a week. It was a beautiful day, the rain had stopped, the clouds disappeared, and there was not a ripple on the lake. Out on the water were great flocks of wildfowl, and our ears were filled with the call of ducks. Later the fish began leaping from the water, "la truite," send'ng widening circles of ripples, which rolled on and on until broken by the "sortez le ouananche," the salmon-like splurge of the beau saumon of the Lac St. Jean region.

Excitedly, François cried, the French instinct stronger than the Indian, "Thshitajram, tshi uapamau a naie ouananche, kushkants uets e kuashkotit, usham meshte mishishto" (see the ouananche jump at the fly; what a big one), and the guides were talking with each other, whether "les m'sieurs" we were satisfied with the Lac.

On Friday Arnie determined the quality of the fishing by bringing in two ouananche of 8lbs. each. What a pity that Arnie so detests hard work that he will not even tell of the struggle—of the battle royal with the only finny antagonist worthy of being mentioned with the *Salmo salar*. He threw himself on the sand and stared first at me and then at the fish. "By Jove! old fellow, just read Victor Hugo—fight with—devil fish—you know—that's about—size of it!"

It was that afternoon we were all out on the lake in the midst of sport when Joseph shouted, "Le feu!" and before I knew what the excitement was, two canoes with four guides madly, aye, frantically paddling, shot for the shore with a wake bubbling and smoking behind us. I thought it was a race, as the shirts falling down showed the muscles standing out in great cords and bunches as the paddles smote the water and the canoe fairly leaped beneath the impetus of the paddles. Then I looked up and the whole camp seemed afire, with the flames leaping from the grass and the smoke drifting in black clouds. An hundred miles away from Roberval, and tents, blankets, food and tackle all in flame! The canoe struck the beach and four men rushed like deer up the shore. I saw Josef and Davide throw themselves on the ground and roll right into the fire. When Arnie and I got there the fire was under control, but it was a close shave. A little carelessness in extinguishing the camp-fire—a little wind fanning the embers, a spark in the dry grass—and, what might be called a calamity, barely averted. But as the guides brushed the ashes and coals from hair and clothing, with pain killer and whisky—internally administered à la Irlandaise—as their reward, we laughed, but I think just a little hysterically on our part at least.

Saturday afternoon I reminded Davide of the "gros plus gros brochet," "Oui, me voici, m'sieur," and they

got the canoe ready. I tied two large red-ibis flies to trail after the silver spinner and we started for the further side of the lake. As we reached the further side and ran into the cove Davide, turning to me, nodded and I let the line, a Conroy fifteen-thread Silver King, run out, and the spoon, rotating in glittering revolutions, whirled out of sight, amid "beau, beau," from the guides, and with paddles so softly dipping that scarce a ripple was caused, the canoe went noiselessly on.

As we rounded the point I cried, "Stop, a tree or the bottom;" but a slackened line answered my call and Josef sent the canoe on, when the line straightened and out of the water rose a huge dark form that made my heart jump to my throat and Josef cry "Sacr   Dieu!" As if caused by the fall of a great rock, rose a mass of water caused by the splash of the fish. In less than an instant the form darted straight toward the canoe with a white foam lashed in its wake; it seemed to me impossible to get out of the way. I heard Josef cry, "Ashekanush. tshilipi." (Back the canoe, quick.) Then, as if by magic, the canoe swung round and shot backward at right angles to the fish, that fairly straightened the line out of the water, leaving my face to the fish—smart work that! Another rise in the air, as the fish felt the stab of the spoon, a quick slack of the line, a fall with a fountain rising around, a rapid hauling in until I had the line taut, and then the fish went to the bottom, where it sulked and then slowly came to the side of the canoe. What an ugly brute—how viciously merciless a pike looks in and out of water, with gavial muzzle and fangs and eyes that make you shiver. They picture the sightless eyes of the drowned. Josef reached down and gripped the pike by the eyes with thumb and second finger, and taking his ready knife stabbed it in the brain and threw it in the bottom of the canoe. What a monster! He was 52in.

PIKE AND OUANANICHE.

long, 17in. in girth, mouth 11in. wide, tail 9in. broad and weight 47lbs.

Sunday morning, the cat's tail and the mare's tail floating lazily across the sky, casting great shadows on the mountains and changing the turquoise blue of the lake into pearl gray. Not a ripple on the mirrory stretch of waters and "Sortez le ouananiche." "Sortez pas, c'est une truite," from the guides (That is a ouananiche jumping. No, it is a trout.) "Well, Arnie"—but that individual was reading "Thomas-   Kempis" under the mosquito canopy, with blue wreaths from the fragrant bouquin blown around him. I could not endure it. "Fran  ois, shall we try la roche noir?" "At once m'sieur."

Black Rock, that had been pointed out to us again and again, jutting out into the lake miles away. Black Rock, like unto which no place could be found, and whereof the fabulous to the verge of language had been told.

An hour and a half later I returned. What success did I have? I think of the old lines always chanted in the old university days. Who does not recall "Vos Cyclops" and ending with "H  c olim meminisse javabit."

I quote from the Quebec Chronicle, July 24: "He [myself] mentioned as a specimen of fishing on the lake, catching three ouananiche weighing 21lbs., three speckled trout weighing 17lbs. and two pike weighing 22lbs., all in an hour and a half."

One of the trout weighed 8lbs., the skin of which I took to Roberval. If Col. James L. Breese and Mr. Louis Webb should read these lines, I wonder if they will remember our conversation as to the fight I had to capture the big fellow. Mrs. Beemer declared the trophy worthy of a place on the walls of the Hotel Roberval, and there it hangs to-day. Her Ladyship's word was law and I dared not transgress it.

So many pleasant hours, kindnesses and gracious courtesies went into the days spent at Roberval—the gems in the flagree of the necklace, the colors in the painting, days stolen from sport. Some message then to Roberval:

E'en weave it as thou wilt, thy garden musters
Mute hints of ditties to inspire the lute,
And to thy face and sense stoop mingled clusters
Of glowing flowers and fruit.

Wednesday we left the lake, and Friday night we supped at the Island House, Grande Decharge, on our way home,
E. J. MYERS.

SPRING FISHING IN NORTHERN CANADA

FEW seasons have afforded so much sport in recent years to anglers in Canada as this spring time. Fishermen who could get away to our northern rivers and lakes during the last half of May, were indeed fortunate beings. The weather continues rather raw and cold, and so long as the temperature of the water remains low, may we expect to find the monster *fontinalis* postponing his summer sluggishness and descent to his deep-water hiding

DAPPLER'S POINT, LAC TSCHOTAGAMA.

places. Lake Beauport has yielded plentifully the bright silvery trout for which its crystal waters are so widely noted. Messrs. H. H. Sewell, H. C. Austin and others of this city have been extremely successful there. Lake St. Joseph has also yielded better sport recently than for some three or four weeks past; especially during the past week have a number of very heavy fish been taken from its waters. In Lake Edward the spring fishing is always good and this year is proving no exception to the rule. J. U. Gregory and L. S. Odell of this city, whose angling successes have long been widely known, took a number of trout over 4lbs. in weight out of this lake in the early part of the week, the best fishing in this large body of water having been found near Shirt Point, off the Brul  , and in the vicinity of the Press Club House, a short distance north of Kit Clarke's Camp. The fishing at these points and between the islands off Farnham's Camp, will continue good until the arrival of the dog days, and then the fish will have to be sought in deeper water or up Rat River. It will surprise nobody who knows the beautiful lake to learn that a number of additional fishing camps are being built this year on its shores.

The members of the Stadacona and Laurentide clubs are vying with each other as to the size of the trout in their respective territories. In each of these tracts fish have been killed this spring exceeding 5lbs. in weight. Messrs. J. L. Bell, Frank Holloway and Thomas, have been extremely successful on the Stadacona lakes, and Messrs. E. B. Garneau, L. Stafford and others have done splendidly on those of the Laurentide lakes.

The spring fishing for ouananiche has so far proved exceptionally good, and some anglers have killed over forty in a single day. Mr. E. J. Meredith, N. P., has had splendid sport in the mouth of Metabetchouan. Ouellet's

A 47-POUND PIKE.
"Lac Tschotagama."

pool at the mouth of the Ouitchouan, has also afforded some very large catches to Messrs. Bailey and Floyd of Boston, John Wallace of Ansonia and Frank Ross of Quebec, the latter of whom took seventy fish last week, some weighing 6lbs. each.

Senator Read and party have returned from their visit to Lake Kiskisink with glowing accounts of their sport there. Mr. and Mrs. G. W. Davis, Stewart Davis, W. Austin and servant from Narragansett Pier, R. I., are in town, on their way to the Cascapedia to fish for salmon.
E. T. D. CHAMBERS.

QUEBEC, June 8

Fishing in Sullivan and Ulster.

LIBERTY, N. Y., June 7.—*Editor Forest and Stream:* A 10 days' trip among the hills and streams of Sullivan county has given me information that may be of interest to your readers.

Starting over the New York, Ontario & Western R. R., Ellenville, Ulster county, was the first stop. There we found most of the waters closed streams, the overflow of fish, however, affording fair trout fishing for short distances. The only open stream near the village is Rondout Brook, where some good catches have been made this season.

I then returned by way of Summitville to South Fallsburg. This is one of the best points to reach good fishing. Four miles to the west is Pleasant Lake, well known as one of the best points in the county for black bass. Two miles north of this same station is Fallsburg, on the Neversink River, where are found trout of good size. The same can be said of Woodburne, a little beyond.

Eight miles further are the Neversink Flats. Here you find fine trout streams, excellent hotels, and hacks meet all trains at South Fallsburg. This is a good half-way place to the wilder sections around Claryville and DeWittville, where the number of trout is legion.

Liberty also affords the best of accommodations, and from here the places already mentioned can be easily reached as well as many others that interest a lover of the rod and gun. It would be hard to find better pickered fishing than that at Stevensville Lake, six miles away. At Loch Sheldrake, three miles, bass and pickered are plenty.

Livingston Manor and Willowemoc need special mention, as the streams Beaverkill and Willowemoc have been thoroughly enjoyed by fishermen this season. The tanneries which formerly dotted the small streams in this part of the country and completely destroyed the fish,

AT NIT
Lac Tschotagama.

have nearly all been given up, and where a few years ago no trout could be found there is now a goodly number, and this stocking of the streams is increasing every year.

Excellent shooting can be found at nearly all these places for partridge, rabbits and some larger game in their season. I.

Quarles and The Catfish.

CHICAGO, Ill., June 8.—The following special was cut from one of our daily papers, and it interested me inasmuch as it has given me a clue to the invention of a new weedless hook. Verily science is making rapid strides, although many suggestions are due to accident. This tale is undoubtedly true, for I find, upon consulting the map, that there is a Tippecanoe River which runs through Indiana, which proves beyond a shadow of a doubt that the story is true. Alas, for the probity of fishermen when it becomes necessary to furnish proof in order to substantiate their exploits. This is the adventure: "WINAMAC, Ind., June 7.—[Special].—John Quarles has for a long time been in great misery because of an ingrowing nail on one of his big toes. Yesterday he went on a fishing excursion along the banks of the Tippecanoe River, and after a while he found a nice shady spot, and seating himself, pulled off his slipper. As he was rubbing his aching toe a bright idea came to him. Were he to hold his foot in the water it might ease the pain. He did so, and the sensation was so pleasant that he went to sleep. Suddenly he was aroused by something pulling at his sore toe. He gave his foot a tremendous jerk and landed a 10lb. catfish. He lost his toenail in the operation, as it remained in the fish's mouth, but is a gainer thereby, for his toe gives him less pain to-day." OLD AVALANCHE.

A Casting Record.

NEW YORK.—*Editor Forest and Stream:* At a casting tournament held at New Dorp, S. I., May 30, the following long distance casts were made by Mr. E. Holzman and witnessed by seven other reputable fishermen. The distance was measured off by myself. Ten consecutive casts were made by E. Holzman on perfectly level ground with 8ft. 8in. bamboo rod, 2-0 patent reel 18-thread linen line, 2  oz. sinker:

1st cast.....	240ft.	6th cast.....	255ft.
2d cast.....	257ft. 4in.	7th cast.....	246ft.
3d cast.....	195ft.	8th cast.....	271ft. 9in.
4th cast.....	245ft.	9th cast.....	230ft. 4in.
5th cast.....	233ft.	10th cast.....	250ft.

A. H. D.

CHICAGO AND THE WEST.

[From a Staff Correspondent.]

Camping at Gogebic.

CHICAGO, Ill., June 3.—Not long ago I wrote Mr. S. D. Thompson, who has lately opened public quarters and cottages on the north end of Lake Gogebic, to learn something about the facilities for camping parties in his neck of the woods. This I did partly for myself and in part for the benefit of a gentleman and his wife, who were debating over the question of a two months' residence under canvas at Gogebic, and who were somewhat deterred by reports that the shores of the lake are not suitable for camping. Mr. Thompson replied as follows May 29:

You can find excellent camping grounds on Lake Gogebic, as good as any place. It is a mistake about the shores of the lake being too high. You can find first-class camping grounds right close to our house, and I assure you that I will do all in my power to make you comfortable, and will furnish you with all kinds of supplies at cost. You can obtain everything you want from me and not be robbed. I shall take especial pains to make your stay pleasant if you come in my vicinity. Will meet you at the station with the steamer and transport you and your traps all right to first-class camping grounds within a mile of the house, and even nearer should you prefer. At the same time you will be located on good bass fishing grounds and within easy distance of excellent trout streams.

I sincerely trust that you will come, also Mr. B. and his wife, because I want you to know this country and can guarantee you a good time and lots of fish. I have had quite a number of people here already and some good catches have been made. Messrs. H. P. Dillon, E. K. Bennett and D. W. Mulva, of Topeka, Kan., have just left here after a two weeks' stay, during which time they had excellent fishing, taking in one day forty-seven black bass that weighed 136lbs., largest one weighing 54lbs. Mr. Robt. Hammell (Chicago Board of Trade man) and his wife are staying here now, but are a couple of days away to the Cascades for trout. I expect they will bring in some beauties, as the trout caught there are all large. Mr. Arthur T. Whitman and wife will arrive this P. M. Mr. W. is secretary of the Northwestern Fertilizing Co. at Union Stock Yards. Mr. E. L. Baker and wife of the J. I. Case Threshing Machine Co., at Racine, have just left after a very successful week's black bass fishing.

One thing noticeable is that nearly all the fish caught so far are large ones. I trust that you will come up and take some of them.

Mr. Thompson is himself a fisherman, and I feel a bit inclined to advise Gogebic tourists to go against his game at the Instep House, the more so because of his frank disclaimer of intention to rob visiting sportsmen. There has been too much disposition toward robbery at Gogebic and many other places in our north country. Of this I had some experience last week, about which I intend to write as soon as I have time.

Fly-Casting Tournament.

The Chicago Fly-Casting Club met Friday evening, and listened to the report of the tournament committee. It was decided to appropriate \$180, \$50 each for three championship medals, for competition in a world's tournament, to be held about Aug. 9 (Walton's birthday), and \$10 each for three club medals. Mr. C. F. Johnson was chosen captain of the tournament team, he to choose twelve men, the same to go at once into practice. The first club contest will be held Wednesday next, at Washington Park. The Walton Lodge is well along, thanks much to Mr. E. E. Wilkinson's personal work. Director-General Davis holds out good promise that a platform for casting may be erected over the water near the lodge.

Another Chicago Club.

The Waltonian Club, capital stock \$100,000, with \$50,000 to be paid in, has been organized, with grounds of about 10,000 acres about the Interval Farm of Mr. C. E. Rollins, near Wausaukee station, Wisconsin, on the Milwaukee & Northern R. R. This project was mentioned in an earlier issue. Next Wednesday night, Mr. Rollins, accompanied by Messrs. C. F. Johnson, H. L. Stanton and Chas. Loughridge, of Chicago, with Col. Choffey, of Kentucky, will leave for a week's trip at the club grounds. It is supposed to spend about \$25,000 in a hotel and cottages. Mr. Rollins was interested in the organization of the Wausaukee Club. The grounds of these clubs are about 250 miles north of Chicago. The attractions are trout, bass and deer. It is a pleasant summer country and in the center of a good fishing region.

The Bass Are Beginning.

Mr. J. R. Payson of this city has caught seventy-two bass and pike so far this spring, fishing at Twin Lakes, Wis. Mr. F. B. Davidson has had fair sport at Momence. Mr. C. F. Johnson, of the Waltonian Mfg. Co., with Messrs. J. and Arthur Rossiter, spent four days in the Fox Lake region, taking in all forty bass. The season is not yet fully on, but the bass are beginning to bite.

Trout This Week.

Trout fishing in Wisconsin and the north peninsula should be good this coming week, barring heavy, local rains. Good advices and personal inspection the past week show that the streams are rapidly reaching the proper stage. The trout are moving out from under the dams into the riffles and pools, and are rising much more freely and boldly than any time before during this season. They are just beginning to take the fly keenly enough to make sport.

A Princely Gift.

One day this week news came over the wire that the town of Fargo, N. D., was in ashes. That same day there started from Chicago to Fargo a carload of provisions. It was sent by one house, that of Montgomery Ward & Co., and it went not by freight, but by the fastest express. It had no C.O.D. on it, but was absolutely free, the princely gift of this unique Chicago firm. Among other things this car contained 15,000lbs. of flour, 10 barrels of bacon, 10 barrels of ham, 10 barrels of corned beef, 2,000lbs. of sugar, 1,000lbs. of rice, 500lbs. of coffee, 250lbs. of tea. The resources of this great house in the sporting goods trade may be argued from its action in a matter like this. One likes to write of magnificent things, and this was magnificent.

We have over 400 customers in Fargo," said Mr. W. C. Thorne, the youthful-looking but long-headed young gentleman who is manager of this house, "and we wanted them to feel that we would do as we had been done by. The car went as fast as it could go short of telegraph, the day after the fire, and I heartily hope it may be of benefit to them out there in their trouble."

I asked Mr. Thorne how the State of Dakota stood in order of magnitude of trade with the house, and he replied:

"The Dakotas are good States for us—among the first. The order is Illinois, Iowa, Nebraska, Kansas, the Dakotas, Texas and Colorado. Singularly enough, Florida is the eighth or ninth State in volume of business for us. It comes from all over the Union."

June 9.—The dispatches have the following: "SPRINGFIELD, Ill., June 5.—Ex-Representative George Langford, of Havana, who was a member of the Thirty-fourth General Assembly, is slated to be made State Fish Commissioner to succeed Col. Bartlett, of Quincy. It has been understood that Mr. Langford would also succeed Col. Bartlett on the United States Fish Commission, but there is now some doubt about this."

If He Has No Family?

The Sni Ecarté Club, of Hannibal, Mo., send me the following invitation:

"Yourself and family are cordially invited to attend the annual fish fry of the Sni Ecarté Hunting and Fishing Club at their club house, Friday, June 16, 1893."

The above is all right, and I know I can eat as much fried fish as anybody, but I don't like such careless allusions to a fellow's family. Suppose he didn't have any family, he couldn't come and eat fried fish at all. This basis is unjust. Fried fish ought to be open to the world.

A Practice Meet.

A few members of the Chicago Fly-Casting Club met for the first club contest at Washington Park last Wednesday. Mr. Elmer E. Wilkinson won the club medal, casting 68ft. Mr. B. W. Goodsall was second with 65ft.

Are Starting Out.

The fishing season is now on, the fish are rising well, both bass and trout, and a number of parties are starting out. Wausaukee Club is sending up a good delegation to its pretty lodge in the pine country. Mr. W. H. Comstock tries the Kankakee Saturday. A party goes to Twin Lakes (near Genoa Junction) and yet another to the Madison Lakes, Wisconsin. These should have pleasant sport if the good weather holds. On the whole it has been a late season, and the tackle dealers also report this.

In the East.

Mr. W. E. Pond, representing the Horton Manufacturing Co., makers of the Bristol steel rod, tells me of a trip with

ATLANTIC CITY DRUM AND DRUMMERS.

Three black drum caught at Atlantic City Pier, N. J., by Mr. W. C. Lanning. See "Fishing Postals."

a friend, Mr. Johnson, taken in New York just before he left for Chicago this month. They went to Loon Lake in the Adirondacks, but soon left for Black Lake via Morris-town, and there they had fine sport, taking, the first day, 50 bass and wall-eyed pike, the largest bass weighing 41lbs. The second day they had even better sport, and their two days' catch there was in all about 150 fish, running as heavy as 54lbs. At Clayton they found the water too high and the wind heavy. We do not have fishing so good as the above anywhere about here. E. HOUGH.

909 SECURITY BUILDING, Chicago.

Adirondack Trout.

CLEAR POND, Franklin County, N. Y., June 5.—There is no place probably in the North Woods that offers as much sport to the lover of trout fishing (both brook and lake species) as Lake Clear. Though unknown to a large portion of our fishermen, it has its regular patrons who come each year. Only two miles from Lake Clear Station on Dr. Webb's new road, it is easy of access for those contemplating a fishing trip from the metropolis in comparatively a short time, considering the distance. In May and June there is trolling for both varieties, and during August fly-casting at the mouths of the brooks. E. D. Griswold, of Brooklyn, prominent as an admirer of the latter method, has here succeeded in capturing 18 one afternoon which dressed 16lbs., several weighing over 2lbs. Louis D. Pillsbury, warden of Blackwell's Island, and an old-time patron of these waters, killed 96 in four days, 7 weighing over 2lbs. Lakers are equally as numerous and are fast increasing owing to the large amount of fry deposited each year. Messrs. E. E. Darling, J. W. Gardner and H. Schneider, all of Troy, returned home last week after a week's stay, with 100lbs. Hon. Henry H. Porter, of New York, was equally as successful after a few days' visit. In looking over the hotel register this spring I notice the following registered: A. C. Cheney, president Garfield National Bank, New York; Wright D. Pownall, New York; L. A. Bevin, New York; James McCutcheon, Greenwich, Conn., and many others. Two speckled trout taken from this lake four years ago by two gentlemen from New Haven, and which now adorn the office of Paul Smith's, weighed 5½ and 5½lbs. each. These are among the largest of their kind ever secured in the North Woods, and bear testimony to the future in store for Lake Clear. J. T. G.

"Game Laws in Brief," June, 1893, revised. Game and Fish laws of all the States, Territories and Provinces. Correct, reliable, handsomely illustrated. Published by the "Forest and Stream." Sold by all dealers. Price 25 cents.

"FOREST AND STREAM" FISHING POSTALS

Send us a postal card report of your own luck, your partner's luck, your neighbor's luck, your father-in-law's luck. And—her luck.

ASBURY PARK, N. J., June 9.—The largest pickerel ever taken in Deal Lake was captured Wednesday by Fred Nelson of this place. It was a female weighing 63lbs. Our veteran angler, William Brumaker, of Trenton, N. J., captured a 21lbs. drumfish from our pier yesterday. Kingfish are numerous but they are all taken in the ponds. None, so far, have been taken by the anglers. Prospects are good from now on. L. H.

THOUSAND ISLAND PARK, N. Y., June 11.—Mr. George Penn, of the firm of Penn & Lee, of Syracuse, made a nice catch of fifty black bass near Thousand Island Park, River St. Lawrence, on Friday last. His friends at home received them in good shape by express on Saturday. INGELHART & HADGECCK.

NEVERSINK (Fallsburgh), N. Y., June 9.—Two large California trout were caught to-day by Mr. J. Brown of New York, one weighing 1½lbs., the other 2lbs. 8oz. They were taken near Johnson's saw mill. He caught twenty-two other trout ranging from 7in. up to 9in., the whole weighing 16lbs. Prospects for fishing are the best this season. FRANK DEAN.

VERMONT.—Waterbury, June 10.—Trout fishing now on, though the season was very late. The fishing shows no improvement over last year, to say the least, and the general opinion among our fishermen is that our trout are bound to go—and that soon. Six-inch law a dead letter, as usual, and hundreds of small trout being taken away every week. But few large trout are taken here, but many brooks are full of small ones—or were, when the season opened. LANCEWOOD.

ANGLESEA, N. J., June 10.—The black drum fishing has been unusually good on Delaware Bay two and three miles from the Cape May lighthouse. When the wind is south or southwest many big fish (drum) have been pulled in out of the wet; 18 were caught last week from the Iron Pier in one day. The fishing will be good till July, and the drum are caught at flood tide and young ebb. The supply of sea bass is still unlimited, but nobody can tell where the weakfish and sheepshead have gone to. They have not put in appearance off Cape May county. J. M. S.

ATLANTIC CITY, N. J.—Last week eighteen drumfish were caught on the pier that extends from the board walk (Atlantic City's promenade on the beach) out into the ocean. For 250ft. back from the end each side of the pier is now lined each day with people, some fishing, and others taking the benefit of the sea air and watching the fishermen. In addition to the eighteen drumfish caught last week were two weakfish, the first of the season, and a great many bass, kingfish and flounders. The largest drum, and the prize winner as far as heard from along the beach, was caught by Mr. W. C. Lanning. It weighed 76lbs. good weight. Jas. Boothroy caught six drum in one day. Three of his catch weighed over 100lbs. The first sheepshead of the season was caught in the Inlet on Saturday by Mr. A. Adams, Sr. It weighed 7lbs. Messrs. Young and McShea, the owners of the pier, have at all times lines and bait for fishing, so a person can spend an hour or a day just as suits him, and does not have to be bothered with any preparations to fish. HARRY.

BLOOMINGBURG, Sullivan County, N. Y., June 12.—B. B. Williams and John Wilkin, of Middletown, N. Y., caught this week 1,000 trout, the largest and nicest catch I have seen this season, four days' fishing. Prospect good for coming week. Thos. Perry and wife, Theo. Perry, Byron Perry, Fred. Henry and lady, George Hunter, Alex. Skinner, Wes. Decker, Chas. Worcester, chief engineer Middletown State Hospital, George Palmer, P. Van Gorden, all of Middletown, N. Y., one day's fishing June 10, 168 fine pickerel in Yankee Pond. Fishing good. DELL CASE.

EAGLE RIVER, Wis., June 9.—In the Twin Lakes waters, Mr. C. L. Sherman, of Leavenworth, Kan., caught on June 3, in three hours' fishing, 50 wall-eyed pike, weight 90lbs.; June 4 he caught in two hours' fishing 25 pike, 39lbs., and one black bass 4½lbs. Abe Steindler, of Leavenworth, caught on June 3 8 black bass, weight 14lbs., largest 4lbs. B. F. K.

LIBERTY, N. Y., June 6.—The trout fishing has been poor for the last two or three weeks, although this warm weather may make them hungry. Most of the fishermen are turning their attention to pickerel and are making good catches in Stevensville Lake, Revona Lake and Hills Pond. I caught twelve in Hills Pond weighing 21lbs. GEO. COOPER.

NEVERSINK, N. Y. (Fallsburgh Station), June 12.—R. B. MacLea, R. Kenneth MacLea and J. B. Burt fished the Neversink two days; caught 330 trout. R. K. MacLea caught two weighing 3½lbs., one 1½lbs., the other 2lbs. Stopped at Freer's Hotel. H. S. Blake, Neversink, one day's fishing, Hall's mill to covered bridge, about five miles, caught 97. Four weighed 5lbs 2oz, 1lb. 15oz., 1lb. 8oz., 1lb. 1oz. and 15oz respectively; total weight 17lbs. Stream just about right and good prospects for ten days. Fish taking both flies and bait. My best catch on this stream. F. FREER.

PORT HENRY, N. Y., June 2.—I returned last night from a prospecting trip after some of the brown trout that I have planted in the waters around here for the last four or five years. In Towner Pond three were caught, weighing respectively 4lbs. 2oz., 1lb. 9oz., the third by a man who measured his but did not have any scales, and I could not get to him with mine; the fish measured 13in. These fish were planted there four years ago this spring, none being there before. In Duck Puddle I did not succeed in getting any, although they say that very large ones have been seen jumping there. Trout Pond, where I planted both the brook and brown trout, and which had some brook trout before, yielded two browns weighing 3½lbs., 2½lb. and one brook of 2½lbs. weight. This speaks pretty well for stocking, doesn't it? W. C. W.

Blooming Grove Park Trout.
CHESTNUT HILL, Phila., June 8.—*Editor Forest and Stream:* I think it would interest many of your readers who are members of the Blooming Grove Park Association, in Pike county, Pa., to know the result of the trout fishing in the streams owned by the club and in Lake Giles, as shown by the records of the club.
The season open April 1, and from this date to May 31, inclusive, there were trout taken as follows:

In Lake Giles.....	912; weight, 423lbs.;	average w't, 734oz.
In Blooming Grove.....	3267; weight, 3267 lbs.;	average w't, 514oz.
In Shohola.....	787; weight, 2409lbs.;	average w't, 476oz.
Totals.....	2,666	1,008123 lbs. av. about 60z.

In Lake Giles the fish were taken by 214 rods—216 lbs. per rod. In the Blooming Grove 69 rods—43 lbs. per rod. And in the Shohola 46 rods—53 lbs. per rod.
This is a remarkable showing for Pennsylvania stream fishing for two months of the season. During June larger fish will doubtless be taken by fly-fishermen in the open waters of the Shohola and Blooming Grove.
Many baskets have been taken with bait from the Upper Shohola weighing from 8 to 10 lbs., for the limit per rod 25 fish.
It is true that the large fish were put in the streams from the hatchery last March, but the fish are in fine condition and afford good sport.

A Large Chinook Salmon.
A ROYAL chinook salmon, weighing 82 lbs., was received by President Myers of the World's Fair Commission yesterday from Hapgood & Co., well-known Columbia River cannerymen. This big fish, which Mr. Myers says is the largest and finest specimen of its kind he has ever seen, was taken from the Columbia River near Oak Point by Henry Frischkorn early yesterday morning. It is 4 ft. in length and measures 40 in. in circumference. The monster was at once shipped to Smith & Lovett, of Oregon City, who have offered to freeze all fish for the World's Fair free of charge. To encase this salmon it will take a solid block of ice 6 ft. in length, 30 in. in width and 24 in. in thickness. By a slow freezing process the ice will be kept clear as crystal and when the fish is ready for shipment it will appear as fresh and beautiful in form and color as when taken from the cold waters of the Columbia. While on its way to Chicago, the big block of ice will be encased in an air-tight box, and carefully packed in a freezing mixture. The express charges will be in excess of \$60 unless the railroads are willing to give reduced rates. It is safe to say that a more unique exhibit, in the fisheries department at least, will not be found in the whole of the "White City."—*Portland Oregonian*, June 1.

A Serviceable Fishing Boat.
CENTRAL LAKE, Mich., June 1.—*Editor Forest and Stream:* In the last instalment of "Kingfisher's" notes on our "Big Basswood" trip, he makes mention of a small boat which belonged to the family of our cook, and which we used and found very satisfactory in a seaway. Mr. Geo. F. Dyer recently wrote me that he wished to build some boats on the same model, and as he had noticed that the colonel and I were one day taking measurements of this craft, he asked if I could send him the description. This I did, and as it was a simply constructed and cheaply made affair, though thoroughly serviceable, I have thought that some of your readers might also like to have these notes. They are as follows: Bow and stern posts 13 in.; sides 13 in., besides bottom board 1 in.; keel 4 in.; dead rise 6 in.; length over all 10 ft. 10 in.; inside measure amidships: Top 3 ft. 4 in., bottom 2 ft. 8 in. Both ends sharp.

Quebec Trout.
QUEBEC, May 31.—I have had some days with trout and recently killed some 24 lbs. of speckled charmers at the camp of Mr. L. S. Odell, on Lake Edward. I expect soon to visit our Tourilli Club, where there is fly-fishing of the very finest quality for big fish. I think I may safely say we have the finest club quarters and fishing of any in Quebec, and we are by far the nearest. Mr. Odell returned yesterday from Lake Edward with a splendid catch of 90 beautiful speckled trout, some of which weighed as much as 5 lbs. each.

Game Laws in Brief.
THE *Game Laws in Brief* is now ready, revised to June 10, the latest change being in the Connecticut black bass laws. The present edition records changes for 1893 in more than twenty States. Every angler and gunner should have a copy. It is the only reliable up-to-date digest printed. It is sold by all dealers or will be sent postpaid by the Forest and Stream Publishing Co.; price 25 cents. It has 24 half-tone engraving from FOREST AND STREAM.

The Fishing Parson.
NEW YORK, June 7.—In your last issue, 1st inst., under head of "Sick-Bed and Trout Brook," I find the quotation "Fishing parson." I have been looking for years for a poem entitled "The Fishing Parson." Can you tell me where I will find it? If so you will greatly oblige,
SUBSCRIBER.
[We do not know the poem; possibly some reader may tell us of it. We know many fishing parsons.]

Connecticut Black Bass Season.
THE Governor has signed the bill changing the black bass season in Connecticut. The close time prescribed by the new law includes May and June. The fishing season this year does not open until July 1. Under the old law it would have opened last Saturday. The new law, however, does not apply to persons who fish in waters owned or leased by them; in such waters they may fish for bass at any season, provided they do not sell the fish caught.

Moosehead Lake Square-Tails.
BOSTON, June 6.—Mr. F. S. Harrison, of Newark, N. J., while stopping at Capen's, at Deer Island, Moosehead Lake, caught in one spot in two hours 16 square-tail trout, aggregating in weight 38 lbs.; one of them pulled down 4 lbs. 5 oz., another 4 lbs. 6 oz., and three of them 3 lbs. 8 oz. None under 1 1/2 lb.

The Kennel.
Communications for publication relating to business should be addressed to the Forest and Stream Pub. Co. If addressed to an individual they will be subject to delay in that individual's absence.

FIXTURES.
DOG SHOWS.
Aug. 30 to Sept. 2.—Blue Grass Kennel Club, at Lexington, Ky. Mr. Roger Williams, Sec'y.
Sept. 10 to 22.—World's Fair, Chicago. W. I. Buchanan, Chief Dept of Agriculture.
Sept. 11 to 15.—Toronto, Canada. C. A. Stone, Sec'y.
FIELD TRIALS.
Sept. 4.—Northwestern Field Trial Club's second annual trials, Manitoba. Thos. Johnson, Sec'y, Winnipeg.
Sept. 12.—Manitoba Field Trials Club's Trials, Souris, Manitoba. E. D. Adams, Sec'y, Winnipeg.
Nov. 6.—United States Field Trials Club's Fall Trials, Bicknell, Ind. P. T. Madison, Sec'y, Indianapolis.
Nov. 7.—International Field Trial Club's Fourth Trials, Chatham, Ont. W. B. Wells, Sec'y, Chatham.
Nov. 15.—Ohio Field Trial Club's Second Trials, Canton, O. C. V. Lellingier, Sec'y.
Nov. 16.—American Field Trial Club Trials, at Carlisle, Ind. W. J. Beck, Sec'y, Columbus, Ind.
Nov. 20.—Eastern Field Trial Club's Trials, at Newton, N. C. Members' Stake Nov. 16. W. A. Coster, Sec'y.
1894.
Jan. 29.—Southern Field Trial Club's Trials, New Albany, Miss. T. M. Brumby, Sec'y, Marietta, Ga.
Feb. 19.—United States Field Trials Club's Spring Trials, Grand Junction, Tenn. P. T. Madison, Sec'y, Indianapolis, Ind.

THE A. K. C. MANAGEMENT.
At a meeting of the Great Dane Club of America, held June 7, 1893, at the Astor House, New York city, among other important business, the following resolution was unanimously adopted: "Resolved, That the position taken by the delegate of this club to the A. K. C. be unqualifiedly indorsed and approved, and that this report, along with this resolution, be forwarded to the different leading sporting papers."
W. H. SHEPARD, M. D., Secretary.
Secretary of the Great Dane Club of America:
I beg to make the following statement in support of the position I have taken in favor of the maintenance of the present constitution and system of the American Kennel Club; and also subjoin my arguments against those offered by the originators and supporters of the amendments as submitted at the meeting of the A. K. C. held May 18. My object is to convince you that, although some egotistical, exaggerated and often false statements have appeared against that club in its present form, there is nothing wrong with it. I beg to review some of these hostile paper reports and more especially the exaggerated speeches made in support of the movement for a change of affairs, and I think you will conclude, as I do, that the dignity and strength of the A. K. C., and not its alleged weakness, allows it to remain silent. Every delegate of the A. K. C., however, as I perceive the situation, must, in a measure, consider himself responsible for the action and the policy of that body. As a delegate for another club for the past eighteen months, I have made it my business to study and watch the policy and proceedings of the A. K. C. very closely, and I wish to come before my club now and declare that the A. K. C. is all right. Inasmuch as your club has been formed but recently, I consider it advisable to answer, for the A. K. C., those inspired newspaper allegations, and also more especially that part of Dr. Perry's speech which has not yet been answered. Many of these newspaper attacks against the A. K. C. are false on their face and vicious in character, and an editor *au fait* with the affairs of the times and uninfluenced by personal prejudice could not admit them to his columns. For instance, the FOREST AND STREAM had an item the other day from its Western correspondent to the effect that the A. K. C. taxed the doggy world too highly and piled up a great deal of money which really belonged to the dog men, and wound up with the remark that there was some \$6,000 in bank. Now, I say that such a statement should not be admitted, and if it appears in connection with arguments in favor of the formation of a rival club, then I say to the embryonic rival of the A. K. C., "Beware of your friends!"
The fact is, that at that time and at present, the A. K. C.'s balance in bank, after satisfying bills for stud book and other expenses, is \$2,800.
I have investigated as to the advisability of a reduction of the stud book fee. The editor of the FOREST AND STREAM suggests that it be cut in half. Unless he has a desire to cripple the A. K. C. this cannot be his intention. I am willing to serve the FOREST AND STREAM, and to canvass among the delegates in order to get them to agree to vote for a cut in the stud book fee, if the FOREST AND STREAM will guarantee to settle quarterly for the actual loss sustained by the A. K. C. in acting as suggested by this "friendly" newspaper.
A discussion was carried on in the *American Field* that occupied from three to six columns of that journal for six consecutive weeks, and consisted more or less of an attack on the "clique" of the A. K. C. Now, this whole controversy could have been stopped if the secretary of the A. K. C. had written to that newspaper: "The A. K. C. declares officially that it has never received nor answered any communication from the World's Fair Agricultural Department regarding the appointment or availability of anybody as a judge at the World's Fair." These few lines would have done away with all that quibble. But the A. K. C. considers it beneath its dignity to answer anything that is outside of an interpellation by a delegate at the proper time of quarterly meetings. The history of the A. K. C. is the best evidence in favor of continuing this policy. Compared with the past struggles of our grand A. K. C. and its institution, the present situation is insignificant. Take my assurance that that club, or its officers, as such, have never at any dog show, though frequently requested to do so, suggested, recommended or in any way supplied a list of judges. This also applies, of course, as stated before, to the World's Fair show. I do not believe, gentlemen, that any fair-minded American could conclude, however, that, because a man is an officer of the A. K. C., he should be deprived of the privilege of expressing his private opinion on any subject whatsoever, even as to World's Fair judges.
Of course, when a gentleman of the authority and standing of Dr. Perry of Boston, in an open meeting, considers himself justified in making a speech of the nature of his speech at the meeting held on the 18th inst., you, gentlemen of the Great Dane Club, not being familiar with the history of the A. K. C., may hesitate to ignore the points raised by him in the same manner that I then and there most positively condemned the spirit and the alleged facts as untrue and unbecoming a man who was then, and apparently proposes to remain, a delegate and a member of the advisory committee, after a rejection of his ideas by a vote of twenty to three.
I cannot understand how the delegates of the A. K. C. can remain silent in regard to the statements of Dr. Perry, when they remember the fact that their majority is directly responsible for any mismanagement or selfish policy or cliqueism perpetrated by the club. It has been claimed that the delegates of the different clubs do not represent the sen-

timents of their respective clubs, because they are chosen by compulsion among New York men, and, of course, cannot represent the sentiments of a club in another locality existing under different conditions. In what way would this be changed if, under the new rule, five clubs should be represented by one person. If these five clubs attended strictly to their business and took interest enough, this one person would possibly have to represent five different official opinions and his own besides. If the different clubs do not direct the actions of their representatives it is their own fault and neglect. If thirty-three clubs to-day instruct their delegates to vote for Mr. Jas. Watson's amendments, the latter would become law, and it seems to me that as long as sub-clubs pay their dues, appoint delegates and let the delegates go on without instructions there can be nothing radically wrong with the A. K. C.; otherwise these delegates would be instructed. Any subject, by-law or rule of merit, and clearly to the benefit of the doggy world, I would ask you, gentlemen of the Great Dane Club, to make a test case of and to submit it to the A. K. C. through your own or some other delegate, and I am convinced that the majority of the A. K. C. will be with you for its adoption. This majority is not within an advisory committee, is not within a ring of thirteen; this majority is the majority of direct representatives of clubs located in the different sections of this great country.
I now refer you, gentlemen, to the attempt to monopolize the power, at present resting in the hands of a majority of representatives of dog clubs, by lodging it for three years with thirteen gentlemen to be chosen out of fifty delegates. The canvass for the adoption of these amendments seemed to me to be very peculiar. I noticed that delegates were buttonholed by a promoter, and in the case of one delegate, I can positively prove that an inducement was offered for his vote. This gentleman was told that if he would vote in favor of establishing the power of the "unlucky thirteen," he would afterward become one of the "lucky thirteen." I confess that this action naturally prejudiced me very much, because our old system does not admit of such lobbyism. The last time our president was unanimously elected during his absence. A year before that he was elected in spite of his protest and of his declaration that he could only devote just so much time to the A. K. C.'s affairs, owing to the pressure of business. What a characteristic difference between two men. On one side a gentleman who favors the tearing down of present institutions, who has been ambitious to become a delegate and sought the advisory committee office, and then declares that there is something "practically burlesque" about the A. K. C.; on the other side, our present president, solicitous at all times to give way to a man who can devote more time to the affairs of the club, and yet he is unanimously preferred before parties who seek offices. Suppose that amendment had been adopted and the thirteen members elected, seven of them being elected with the same "inducement" as the delegate mentioned above (I cannot resist the temptation to spin out the thought), who would have been the president of that committee? The man elected would have been the same one who tried to elect seven of the thirteen in the manner intimated above. This state of affairs I submit, compelled me to look upon the amendments as drawn up, though I am sure in good faith, by Mr. James Watson as an attempt to break down all there is good about the A. K. C. If I am sent to the A. K. C. only to be instrumental in concentrating the whole power into the hands of a few promoters of a scheme, I wish to lay down my office and you may elect some one else less scrupulous in this direction. Under the present system I can, even if in the minority, record my opinion and thus protect myself against being identified with the perpetrators of a bad measure or rule.
Dr. Perry wanted to go on record "for this proposed resolution," and made two speeches which, I claim, are contradictory of each other. He says, "There is much about the A. K. C. which is practically burlesque." If this has been so in the past it will be so in the future. Yet Dr. Perry retains the offices "which he sought, the offices did not seek him." The remedies proposed for the "burlesque" proceedings of the A. K. C. were rejected by a vote of 20 to 3. But Dr. Perry is with us, though it costs him \$20 every time he comes from Boston. He says, "These clubs from a distance cannot be really represented. Their credentials are given to men who act on their own individuality." Would not the "unlucky thirteen" have gone from bad to worse in this respect, because now a delegate represents only one club, as aforesaid, while the new idea would do away with all possibility of instructions, since no club has any official right to instruct anybody belonging to the government of the A. K. C.? Would not these thirteen men be expected to act on their own individuality, with the danger of becoming overbearing while in power for three years?
Dr. Perry says, "It is either railroaded through or you leave it to the advisory committee." "Between meetings the authority practically rests." This is not a fact. The authority does not rest. The advisory committee, consisting of five, can be called at any moment, and the present president and secretary only act in such cases as the same officers of the "unlucky thirteen" would act in correspondingly. Again, he says, "You elect 13 men; it is a small body. You can meet in New York, you can meet in Chicago." Practical experience shows that 13 men who live in different parts of the United States would never get together. This seems to have been anticipated, because the quorum is limited to five, if you please, the same number as at meetings of the present advisory committee. Remember that the decisions of the advisory committee can be overthrown and undone in quarterly meetings of the representatives of the different clubs. Again, "You select 3 men of the 13 for the first three months," etc. "All matters of detail can be referred to them by the secretary." This new system would appoint three comparatively inexperienced men, in place of the present advisory committee of five or in place of the president and secretary of our present system. Which would you rather have, gentlemen?
The Doctor says "Is the A. K. C. popular with dogmen?" I spent four days in the show building in Boston. I went quietly from one to another dogman, exhibitor and breeder. I am willing to say that I went to them somewhat diplomatically, and, telling the actual truth, there was one man that spoke for the A. K. C., and that man was so identified with the management of the A. K. C. that he has a personal pecuniary interest." If the Doctor spoke the actual truth in the above then there was not a soul speaking in favor of the A. K. C., because I defy Dr. Perry to point to me such a man in this wide world who is pecuniarily interested and identified with the management of the A. K. C. A man alleging such a thing I claim knows nothing about the A. K. C. I say that such an allegation is "practically burlesque." Pray, why did Dr. Perry act so "diplomatically?" Why did he not put his questions in a straightforward manner as man to man? A doctor who wants to perform the operation of cutting out an abscess must actually feel and look and form an opinion of his own from symptoms which he personally perceives, and not take hearsay statements for a basis of his diagnosis and afterward wield his knife blindly in cutting into some vital organ of the system. There is no evidence in regard to what these same anti-A. K. C. dogmen would have said had the Doctor told them that he wanted superficial evidence for a move toward forming a clique intended to govern the A. K. C. Again, I venture to say that had the Doctor been less "diplomatic" and had he instead told his hearers that he wanted to gather evidence in favor of tearing down the solid building of the A. K. C., in order to substitute in its place an uninsurable frame structure, he would not have received the same replies. I am at any time ready to take issue with Dr. Perry and enter into a controversy

with him in the press on this subject, and show the dogmen that if his ideas had prevailed it would have been at the expense of their best interests.

In his speech the Doctor refers to mild-mannered gentlemen, and to others whose temper he does not state, who are all antagonists of the A. K. C. I will find fifty dogmen in all antagonists of the A. K. C. to every one Dr. Perry will name as antagonistic, with the only proviso that those men antagonistic to it must never have been before our tribunal accused of any misdoings, and that they must not be men who have no other occupation than libelling, dog handling and selling. What weight is there in his argument claiming to have found a number of dissatisfied people, if there be no evidence to show that he ever tried to ascertain the number of those who are satisfied? "There is a big storm brewing for the A. K. C. that will take wise leadership to avoid disaster." This is an astounding thought!

Read the second division of Dr. Perry's speech as the best proof that the leadership is wise, and read the constitution of the A. K. C. to show you that the leadership as defined is limited to such an extent that were it unwise and incapable it would have very little bearing on affairs anyway, because there is a check to the action of every individual officer as well as of the advisory committee, or even of the executive committee. I claim that the A. K. C. leads and controls itself, as a body, as long as "wise" men do not press themselves forward to tear down and injure its constitution.

I am awaiting your instructions as to whether I am representing your club as you desire. Respectfully submitted,

A. H. HEPNER.

NEW YORK (436 Produce Exchange), May 29.

WISSAHICKON HEIGHTS DOG SHOW.

"I WANT to make you all feel good," so said Dr. Sauveur, the proprietor of the Seminole Kennels, last week. This was the keynote of the whole affair that occupied the attention of dogmen at this pretty suburb of Philadelphia from June 6 to 9. The horse show people have erected on St. Martin's green ranges most excellent stables to accommodate the horses to their annual fixture, which happened the week previous to the dog show. No sooner had the last neigh of the horses died away than our noisy friends the dogs took possession of the grounds. Down one long range of box stalls two rows of Spratts' benches held the more robust animals, while in a building some distance away the pet dogs had an exclusive and cool retreat. At a rough guess we should have thought the whole show could have been benched in this latter building; it was very cool and would have kept things together better. Still everything went along pretty well as it was. The first morning was intolerably hot and the dogs suffered severely; a thunder storm, however, came along in the afternoon, and while the rain wet many a dog's stall and coat, it was relished and no harm was done. The rest of the week the weather was all that could be desired, though warm of course. The judging was done in the large tan bark horse ring, and it is safe to say that with the exception of the ring at Lexington, Ky., in 1891, no better opportunity to afford a dog every inducement to show off his best points has been seen in the history of our dog shows. The rings were well served, considering the distance from the stalls. In consequence of the storm and the confusion in benching dogs, owing to the incomplete catalogue and late receiving of entries, judging was postponed till 11 A. M. of the second day. This is why FOREST AND STREAM was unable to get its usual list of awards in the same week as the show was held. In fact, the judging of specials, excepting those allotted to Mr. Davidson, who it may be remarked is always on hand and gets through his duties at once when everything is ready, was delayed through the absence of the other judge on Thursday. The "Ashmont" trophy and other specials were therefore not judged till Friday afternoon.

The show having been arranged in such a hurry and entries closing so late it is a wonder there was not more confusion. The arrangement of the catalogue had, it is said, been left to Mr. Watson, and after the first catalogue was issued it was found that a number of dogs entered were not in it at all; these had to be given half numbers, and even at the time of judging many of the dogs' names were consequently unknown except to those directly interested in them. Later in the week a marked catalogue was issued, and besides being very accurate gave the names, etc., of the late entries.

The management of the whole affair seemed to be in the hands of Dr. L. C. Sauveur, and in Will Conners he found, as usual, a very able lieutenant; both worked hard, in fact the doctor on Thursday was almost completely *hors de combat*. Frank Smith also lent a willing hand to straighten things out. John Reed was also on hand to attend to Spratts Co. benching and feeding, and he is a host in himself at such a time. Spratts Co. had their usual stand of dog necessities under Mr. Ehrmann's charge. The only drawback to one of the most enjoyable shows we ever attended was the slim attendance. We all know what a drawing card a dog circus is, but even Prof. Hampton's troupe, which performed in the open ring, failed to round up more than a hundred people at any performance. The greatest good feeling prevailed throughout the show except when Mr. A. Laidlaw protested Lady Fidget and Miss Chloe for overweight, but as these interesting little ladies had kept themselves well within the limit the horizon cleared and all was serene again. Messrs. John Davidson and C. H. Mason judged, and while they probably satisfied themselves, some exhibitors thought of course that they might have done much better. It was ever thus—but no one could find much fault with this part of the show. A description of the awards follows:

MASTIFFS (C. H. Mason, Judge).—There was one for each class in this breed. Champion Merlin, shown well in challenge dogs, and the well known Ethel in that for other sex, the latter was not shown so far as usual and so looked better. The open dog entry, Bruce Caution, has a mean, flat head. Quite a nice sort was Creme, a daughter of Munting; she shows a good deal of quality, has a well shaped head, but scarcely enough of it; well formed, active, good body and legs, in pasterns and feet is she a bit faulty. The kennel prize did not fill.

ST. BERNARD competition was confined to local competition, the Swiss Mountain Kennels on its own heath had a gala day. There were no challenge roughs, but in the open dog class the decision that placed Bevis over Eboracum at the Keystone Kennel Club show was reversed, Eboracum, though shedding coat, was a better looking dog all round, and especially in hindlegs, while Bevis had lost his beautiful spring bloom and looked ragged. Reserve went rightly to Seminole Kennels' new purchase, King Regent, who, had he anything like decent legs, could beat any of those over him; as it was he beat James G. Blaine immensely in head, chest, color markings, etc.; in fact J. G. B. is a very ordinary sort, besides being nearly all white. The Swiss Mountain Kennels again furnished the winners in Florette, looking very well, and Duchess of Arlington, the former scores well in head and coat, Duchess being very rough-and-tumble in the latter respect, and her head is snipy, needs more stop, and general lack of quality. She is, however, a much improved bitch in body and coat. In smooths, that boisterous member, Scottish Leader, had his challenge class to himself; he looked in great form, though the heat affected him greatly the first day. There were no entries in open dogs and Leitha was the only bitch; she has improved on her early spring form, her pasterns and straight hindlegs are still noticeable, and her head is rather long, but this is counteracted now by good body and bone. A pup by Leader brought up the end of the holy breed; he is a bit long-faced, and not deep enough, but a big sort. Mrs. Smyth won the kennel prize,

and her Scottish Leader the special for best St. Bernard in the show.

GREAT DANES (C. H. Mason, Judge).—Only two of these, one for each class. Bismarck in dogs is too short between eye and ear and too long in muzzle, good neck, legs and fair body. Flora II. is a rather poor sort, too straight-faced but good on her legs. One Newfoundland, and he but a moderate one, small-sized, turns his feet out and muzzle too fine; fair coat as they go.

RUSSIAN WOLFHOUNDS (C. H. Mason, Judge).—A capital lot of these and all from the two leading kennels, which are giving us a good exhibition of friendly rivalry. Argoss and Groubian met once more with the verdict again in favor of the dark dog, who beats in chest, front, loin and head; both were in the pink of condition. In challenge bitches Mr. Hanks had his revenge, for Vinga, once more beat Princess Irma, the latter never looking better; both show great quality, but Vinga excels in loin, depth of chest and quarters and thighs. Open dogs had two, both from the Seacroft Kennels, Leekhoi, the winner, I never saw in such beautiful condition; he is a most handsome animal, and a fit exponent of the peculiar Russian type. Peter the Great is more on the Groubian build, though perhaps showing a little more quality. Leekhoi excels in height and head, but Peter gets him, an agent in loin and quarters. Bitches had an entry of five, one absent. Zerry could not be denied, having evidently left her chorea at home, at least it could not be found. Mr. Hanks showed a new one in Abroudy, a big, prettily-molded bitch who only loses to Zerry in size and substance; both are good on their pins. Reserve went to the well known Modjeska, whose faulty front threw her out. Rarheda, vhc., is crooked in front, but nicely formed otherwise; this bitch had received a nasty bite at the base of the ear. The kennel prize went to the Seacroft Kennels.

DEERHOUNDS (C. H. Mason, Judge).—One in open dogs, Macgregor, a good, strong-headed dog, falls away too sharp in quarters, loin flat, good legs, plenty of coat but soft. In the next class, Ellen Douglas had much the best of it; a nicely formed bitch all round, better in coat than the dog, and she afterward beat him for the special. Second in the bitch class, Lasie Jean, was in poor fettle, and lost in loin, quarters and ribs to the winner.

GREYHOUNDS (C. H. Mason, Judge).—Thanks to Mr. Purbeck's entries, the quality here was strong, and with Pious Pembroke and Bestwood Daisy he captured each challenge prize. Open dogs were drawn blank, but five turned out in the fair division. There was only one in it for first, Southern Beauty, commented on before. Then came Maid Marion, a daughter of Babazon, a small-sized but well-made one if she had a little more swell of rib. Nellie's Girl, reserve, is a little straight behind, ribs should be better sprung, and is light throughout. Flora, hc., is too heavy in shoulders, flat in ribs, and does not stand straight enough in pasterns. The kennel prize went to Mr. Purbeck.

FOXHOUNDS (John Davidson, Judge).—Not a very difficult lot to judge. In the absence of Ranger II., Denmark had no competition. The well-known bitches Rosemary and Torment, both from the Chestnut Hill Kennels and described during the late circuit, were placed as named, the winner having an advantage in head and bone, and probably loin as well.

POINTERS (John Davidson, Judge).—Several well-known animals of the second class were on hand, with some new faces. The challenge winner was Glamorgan, repeatedly commented on; he was well shown. In open dogs (4), a new one of Mr. Winslow's, Admiration, by Sandford Bang, was placed over Riverview Faust. The winner has rather a nice head but bitchy, is short in neck and throaty, faulty ear carriage, nice legs if a little more bent in stiles, small-sized; taken all round, Faust is a better pointer. Rock II., plain-headed though he is, can also run the winner close. London is straight in shoulders, full in skull and cheeky, and a very light eye does not improve his expression. In the next class, Fan Fan's excellent front, much better head, though shown too fat for this weather, sufficed to put Grace IV. in the cold; her feet come too close in front, faulty in pasterns, but otherwise nicely formed. A daughter of Fan's won in puppies. Marks, long and light in muzzle, second, is also not bent enough in stile.

ENGLISH SETTERS (John Davidson, Judge).—The well known Edmark represented the challenge division. The next class for open dogs brought out eight. Cactus, a Rockingham—Myrrha II. pup, is a nicely built young dog, perhaps a little plain in loin and hind parts, nice legs. The Earl, second, boasts a nice type of head. Ben Hur of Riverview is well known. A taking one in Robin Goch should have had more, though he loses in expression, skull and loin, quarters and thighs, and a bit in feet and pasterns not true enough. Ezra Noble was rather harshly treated with only hc., though fairly at base of skull, his body and legs are good. The bitch class was also warm and disappointment reigned supreme, the Boston winner, Maid Marian, could do no better than reserve, the well known Victress, Lewellyn coming in a winner. Katie Noble II., that renowned bitch whose record is both of the field and bench, was second; Maid, beautiful head that she has, loses in expression and body to Katie Noble, who should have won. A son of Ben Hur of Riverview won in puppies, he loses, however, to Edge Mark, Jr., in head and stop especially.

IRISH SETTERS (John Davidson, Judge).—It is difficult to beat the Seminoles anywhere, but much more so when they fill the Irish setter classes with their best as they did here. Thanks to this kennel, there was a goodly show. Challenge dogs saw champion Tim add another scalp to his belt or rather collar, this time it was Pride of Patsey'. Then champion Laura B., in better shape than usual, not so fat, had only Elfreda to vanquish, which she does in muzzle, loin and ribs. The open dog class was a pretty sight, eight lining up. Most of them are so well known they do not need repeatedly commenting upon. Doubtless the judge had his own reasons, he generally has, for putting Barney Jr. first, but a dog called Montauk, Jr., vhc., should have been better treated, the latter may lose slightly in head but is better from shoulder back. Young Tim was second, his skull is a bit too domy. Tim's Dandy, reserve, is another one known to fame. Seminole Barney, Mike and Seminole Jr., have all been seen out before. Max deserved his letters. In bitches repetition must again be the order. Delphine, Lady Cleveland, Claremont Heather and Rose Morton, are they not all well known? Nina, a fair one was alone in puppies, and champion Tim won the field trial class prize. Of course, Seminole won the kennel prize.

GO. DOG SETTERS (John Davidson, Judge).—The showing here outside of several of the old rounders, was only fairly commendable. Leo B. and Duchess of Waverley furnished the challenge winners, this, we suppose, will be their accepted function till the grave closes over them. Three turned up in open dogs, the winner, Duke, beating Powhatan nicely, as he is only an ordinary sort and showed badly and was not in good shape. Spider, reserve, has a coarse, thick head, good coat. Two young bitches, Pocahontas and Santa Maria, daughters of Lady Waverley, by Ivanhoe, are very promising youngsters, nice tan and markings, good coats and hard to separate. Edgewood was alone in pups, a pretty dog, nice coat, but scarcely enough character about him, full in skull and knuckles a bit. The bitch pups were the winners in the open class. To Dr. Dixon went the kennel prize.

CHESAPEAKE BAY DOGS (John Davidson, Judge).—There were two in open dogs, both Mr. Alton Smith's. Rough, the winner, has a much better head and coat than Marengo II., whose head is short and chunky. Rose, the winning bitch, from the same kennel, is quite a nice one, intelligent face, well formed, and has good texture of coat.

SPANIELS (C. H. Mason, Judge).—A number of these were

seen at the Pet Dog show, and in addition Mr. Laidlaw came down with a few more "Canucks." The local kennel, Swiss Mountain, could not be denied, and its fair owner held her own more than well. Trouble, the only Irish water entered, was *non est*. In fields, challenge class, champion Newton Abbott Laddie, looking as if Mr. Bell had forgotten he owned him he looked so ragged and out of condition, had no competition, in fact was the only field. Then Fascination and Middy came up, and the first named walked out with the ribbon for challenge cockers. In bitches, the local kennel had its revenge—in a trot—so they say. Miss Waggles beat I Say, to our mind better in body, shorter, but losing in skull somewhat; Waggles's muzzle is long but better shaped than I Say's, she is also straighter in front but loses a little in bone.

Poor little Troublesome had gone where the good cockers go, and every one sympathized with Mr. Bell in such a severe loss, which, added to the loss of Rosedale Duchess at the same time, effectually broke up his kennel for this trip. In open black dogs first went to King Raven, who is a little undershot and not true in front, little full in skull but nice short body. Tartar is little more than a pup but promising. Brantford Jet, reserve, loses in body particularly to the other. Commodore, very high com., is a bit light and long in body, turns his feet out, nice skull, faulty muzzle. In bitches there were seven entries, Rosedale Duchess dead. First to the Toronto high com. bitch Lady Fidget, commented on last week, second to Miss Chloe, from the same kennel. Rideau Reine, that was placed so far above the winner at Toronto under the same judge, looked even better here and should have been higher up, as her head and body are better but losing in forelegs except pasterns to Fidget. Miss Chip, very high com., is a "darling" but small yet, she is very cobby built and will yet make a winner. Corktown Coy was at the Pet Dog show, and Tot loses in head and front. Then came a black puppy class, and the winner was Tartar. Challenge dogs, any other color, saw Red Roland once more to the front with no opposition. In bitches, the same owner's Jessie C. beat Seminoles Cherry Ripe, the latter losing in muzzle and wide, poor front, nice body and coat. Open dogs, Othello again won, beating a very likely youngster in Golden Rod, who has the better head, is a nice height from the ground and is cobby built. Punch, reserve, should be straighter in front, is quite long enough in body, his skull is coarse too. Movement was at New York. In open bitches Red Rose, a nice type, excellent front and good head was placed ahead of Ruth S., a sweet little-headed bitch, but faulty muzzle, who gains a little in shortness of body but is a pup yet. Tonita, reserve, is plain in muzzle and light in eye, a bit bowed in front but nice height. Swiss Mountain Kennels won the kennel prize.

COLLIES (C. H. Mason, Judge).—Champion The Squire, looking just about as well as we could expect a dog of his age to do, was alone in his class, and old Flurry II. thought she'd take another ribbon, so Metchley Surprise had, of course, to step back in the next class. In open dogs Wellesbourne Charlie's superior head, bone and coat sufficed to beat a very stylish youngster in Al De Ber Eclipse, who is as yet a little full in skull, lots of coat but a bit soft, nice ears well carried, would do with more rib, but is certainly a more than ordinarily good dog, he was bred by Mr. John A. Long and is by Archie L. Glenmarlin was entered, but he was unfortunately under the daisies. Dr. Sauveur expected a good deal from him. Christopher and Goldstun were marked n.f.c. In bitches, Bertha II., well known, was placed over Stonehurst Lassie, whose nice long head and very pleasing expression and good legs and body are much in her favor, but a heavy ear, well carried though, and shedding coat were against her. Crissey, reserve, is another of the Seminole tribe; she is short of coat and fat. Charm, vhc., is broad in skull and light in loin, coat not all in, well ribbed, shows lots of quality. Al De Ber Eclipse had an easy win in pups and the same in novices, beating Charm in coat and substance in the latter class. Seminole took the kennel prize and The Squire the special for best collie as well as the Ashmont trophy. Now he should be retired while his honors are thick upon him.

POODLES (C. H. Mason, Judge).—There was little new here. In blacks Berri looked after the challenge class and Bismarck, formerly Ben L., was the only one in open dogs; both are familiar faces. Black Duchess, a pup, a rough and tumble sort, was the only bitch. The Washington Kennels' Mikado, a white, had a bloodless victory in any other color; he is faulty in head.

BULLDOGS (C. H. Mason, Judge).—Addiscombe Gypsy was the challenge winner while Handsome Dan got first without competition. Lorna Doone, a poor sort with long, narrow head, was given a second; first withheld.

BULL-TERRIERS (C. H. Mason, Judge).—These were slightly better. In challenge class Edgewood Wonder triumphed over Attraction; the former is better in front and head, though a lump under the jaw disfigures her. Top Sparkle, an old face, going off now, heavy and wide in front and cheeky, faulty pasterns and feet, was first. Second was withheld from the other entry, Nitchee. The winners in the bitch class, Edgewood Fancy II. and Lorna Doone, won at the Pet Dog show. Reserve went to Lansdowne Velma, good front, too much stop, short, chunky head; I like her kennel mate Thelma better; much smaller eye and head, needs furnishing in body yet—a yearling only.

DACHSHUNDS (C. H. Mason, Judge).—Only one in it in the dog class, Don Quixote II. Dasch's, second, is too short in head and body; light, too.

BEAGLES (John Davidson, Judge).—Ch. Frank Forest met Doctor in challenge dogs; it is scarcely necessary to go into a criticism. Ch. Lou was alone in her division; she does not seem so cranky as she used to be. In open dogs five turned up, the winner being Mr. Winkle, a son of Little Duke; he is not cobby enough, ears faulty. Second went to Brittle, who, but for head, which is weak and poor, is a very typical little dog; in this body—he beats Sport of Rockland. Tony Weller II. and Royal, vhc., are but moderate ones, wrong in heads and front. The winner in bitches proved to be the long-headed Fanny Racer, second going to Jenny Lind, a new one from the other side; she beats the winner in expression, head and body, and type, not so good in front and bone. Rockland Kennels took the special.

FOX-TERRIERS (C. H. Mason, Judge).—Classes fairly well filled, but quality not very conspicuous. Dusky Trap and Grouse II. furnished the challenge winners. In open dogs Raby Trigger had rather an easy win, though a bit coarse; he is more of a terrier than Myrtle Lad, second, whose rather mean head is much against him. Victor, reserve, is big in ear, faulty loin and quarters, but a fair sort. Lansdowne Triton is faulty in head, coarse. Pavarmo, hc., I liked better, pretty good head, fair front, bit light in body yet—a pup. Lady Roseberry, well known, won in bitches, followed by Myrtle Lady, whose wide skull is against her. Seacroft Myrtle is known to fame; her light body and big ear are against her. The others deserved their letters. The winners in the puppy classes are mentioned above. In wires Saint Brittle disposed of Jockey, whose big ear, ragged coat and long body are against him. Sister Trick did it in bitches.

TERRIERS (C. H. Mason, Judge).—As Mr. Mason judged all these and space is at a premium and most of them have been noticed before, we will simply allude to them under one heading. In Irish, Galtees was transferred to challenge class and took the ribbon. Open dogs saw Brickbat, Jr., an easy winner over Shaun Rue. Roslyn Patrick, reserve, has too much coat, and black on face. Three again won over Rhudiman in Scotch terriers, Ashley Plug coming in a moderate vhc. Ruglen Dandie was the only Dumont. In Skyes, Lovett had little difficulty in defeating Bruce, better coat, action and stronger muzzle. Endcliffe Maggie was

alone in bitches. In Yorkshires the entries were poor, Dixie, light in tan and body color, beating a lighter one in Jacko. Fanny, in bitches, is a little runt, no coat, etc., and very light colored. Black and tan terriers had Broomfield Sultan in the challenge class, and Gypsy Girl won over Queen III. in bitches, the latter being thrown out for skin disease; she was out of coat, that was all, and was shown the week previously at New York. Boston Model represented the whippets again. The well known Skipper and Mieke, getting thick, were the Schipperke winners. In Italian greyhounds Tinnie had no difficulty in beating Golden Rod and Lady Lee, one too big, the other Lady, second, is faulty in head, nice size, smutty color.

PUGS (C. H. Mason, Judge).—Bob Ivy was again the challenge winner in dogs, and Midget took the bitch prize. In open dogs, Medlar, a well-known winner, beat Tip Top, who showed much better in the open. Little Jewel, reserve, has gone off, wide front and weak behind; the others were poor. A very poor lot came forward in bitches and prizes should have been withheld. A nice little pup in Little Ruth won well from Prince III., long and coarse in head.

In King Charles spaniels the well-known Duke of Wellington, light in tan and curly in coat, had to succumb to Dandy, who is only beaten in hind action, has better coat, better stop and shorter face. The bitch was a very poor one, long-faced and light throughout. Blenheim prizes withheld. Two undescript-looking bob-tails, one a "bob," the other with a tail that would do credit to a mountain sheep, were given equal first in heavy miscellaneous. These were a very poor sort, coats as soft as putty. The "Pom" Sheffield Lad and Maurice Barrymore's Clydesdale took equal first in the light-weight class. A Pekin poodle, so Fred Kirby said it was, and her interesting family came next; Pekin spaniel would be more the mark in nomenclature. She partakes somewhat of a long-faced Jap in looks, long tail, ears, and hair brindle in color. H. W. L.

AWARDS

MASTIFFS.—CHALLENGE—Dogs: 1st, Mrs. Chas. Wallace's Champion Merlin. Bitches: 1st, B. F. Lewis's Ethel. OPEN—Dogs: 1st, Jos. C. Roberts's Bruce Caution. Bitches: 1st, Hon. Jas. Gay Gordon's Crene.

ST. BERNARDS.—ROUGH-COATED—OPEN—Dogs: 1st, Swiss Mountain Kennels' Eboracum; 2d and high com., C. T. Ashman's Bevis and James G. Blaine. Reserve, Seminole Kennels' King Regent. Bitches: 1st and 2d, Swiss Mountain Kennels' Duchess of Arlington and Florette.

ST. BERNARDS.—SMOOTH-COATED—CHALLENGE—Dogs: 1st, Swiss Mountain Kennels' champion Scottish Leader. OPEN—Bitches: 1st, Swiss Mountain Kennels' Leitha. Puppies: 1st, Swiss Mountain Kennels' Scottish Rex.

GREAT DANES.—OPEN—Dogs: 1st, Weisbrod & Hess's Bismarck. Bitches: 1st, Weisbrod & Hess's Flora II.

NEWFOUNDLANDS.—OPEN—Dogs: 1st, Phil. J. Walsh's Carlo.

BARZOIS.—CHALLENGE—Dogs: 1st, H. W. Huntington's Argoss. Reserve, Chas. S. Hauck's Grubbin. Bitches: 1st, Chas. S. Hauck's Vinga. Reserve, H. W. Huntington's Princess Irma. OPEN—Dogs: 1st and 2d, Chas. S. Hauck's Leckhol and Peter the Great. Bitches: 1st and reserve, H. W. Huntington's Zerry and Modjeska; 2d and very high com., Chas. S. Hauck's Abouard and Rarheda.

DEERHOUNDS.—OPEN—Dogs: 1st, S. F. Houston's MacGregor. Bitches: 1st, S. F. Houston's Ellen Douglas; 2d, Roger Williams's Lassie Jean.

GREYHOUNDS.—CHALLENGE—Dogs: 1st, Arthur W. Purbeck's Pious Pembroke. Bitches: 1st, Arthur W. Purbeck's Eestwood Daisy. OPEN—Bitches: 1st, Arthur W. Purbeck's Southern Beauty; 2d, Roger Williams's Maid Marian. Reserve, H. W. Wolf's Nellie's Girl. High com., Walter S. Lieber's Flora.

FOXHOUNDS.—OPEN—Dogs: 1st, Chestnut Hill Kennels' Denmark. Bitches: 1st and 2d, Chestnut Hill Kennels' Torment and Rosemary.

POINTERS.—CHALLENGE—Dogs: 1st, L. A. Biddle's Glamorgan. OPEN—Dogs: 1st, J. H. Winslow's Admiration; 2d, Victoria Kennels' Ridgeway Faust. Reserve, O. E. Connell's Rock II. Very high com., C. H. Clark, Jr.'s Loudoun. Bitches: 1st, Chas. E. Connell's Fan Fan; 2d, Luke W. White's Grace IV. Puppies: 1st, C. E. Connell's Fan Fan III; 2d, Luke W. White's Marks.

ENGLISH SETTERS.—CHALLENGE—Dogs: 1st, F. S. Brown's Edge-mare. OPEN—Dogs: 1st, H. Pape's Cactus; 2d, Victoria Kennels' The Earl. Reserve, F. G. Taylor's Ben Hur of Riverview. Very high com., D. J. Peters's Robin Good. High com., L. A. Shuster's Ezra Noble and H. Pape's Buckingham. Com., G. O. Smith's Count Noble. Bitches: 1st, J. Lewis's Viatrix Lewdly; 2d, F. G. Taylor's Katie Noble II. Reserve, J. Brett's Maid Marian. Very high com., J. L. Kidzey's Maize. Puppies: 1st, J. Mucke's Ben Hur, Jr.; 2d, J. E. Norden's Edge Mark, Jr.; FIELD TRIAL CLASS—1st and 2d, F. G. Taylor's Katie Noble II. and Ben Hur of Riverview.

IRISH SETTERS.—CHALLENGE—Dogs: 1st and reserve, Seminole Kennels' champion Tim and Pride of Paisy. Bitches: 1st and reserve, Seminole Kennels' champion Laura II. and Elfreda. OPEN—Dogs: 1st, T. Sharpless's Blarney, Jr.; 2d, reserve, very high com. and (2) com., Seminole Kennels' Young Tim, Tim's Dandy, Montauk, Jr., and Seminole, Jr. and Seminole Alike. High com., Seminole Kennels' Seminole Blarney and C. E. Van Pel's Max. Bitches: 1st, reserve and very high com., Seminole Kennels' Delphine, Claremont Heather and Rose May. 2d, Dr. S. G. Dixon's Lady Cleveland. Puppies: 1st, Dr. S. G. Dixon's Nina. FIELD TRIAL CLASS—1st, Seminole Kennels' champion Tim.

GORDON SETTERS.—CHALLENGE—Dogs: 1st, Dr. S. G. Dixon's champion Leo B. Bitches: 1st, Dr. S. G. Dixon's champion Duchess of Waverly. OPEN—Dogs: 1st, C. C. Culham's Duke; 2d, Dr. S. G. Dixon's Powhatan. Very high com., C. E. Van Pel's Spider. Bitches: 1st and 2d, Dr. S. G. Dixon's Pocahontas and Santa Maria. Puppies: 1st, D. B. Holton's Edgewood. FIELD TRIAL CLASS—1st and 2d, Dr. S. G. Dixon's Pocahontas and Santa Maria.

CHESAPEAKE DOGS.—OPEN—Dogs: 1st and 2d, B. Alton Smith's Rough and Marengo II. Bitches: 1st, B. Alton Smith's Rose. FIELD SPANIELS.—1st, G. Bell, A. & M. Spaniel Kennels' Ch. Newton Abbott Laddie.

COCKER SPANIELS.—1st, G. Bell, A. & M. Spaniel Kennels' Ch. Faidon. Reserve, Swiss Mountain Kennels' Middy. BLACK—CHALLENGE—1st, Swiss Mountain Kennels' Miss Waggle. Reserve, G. Bell's I Say. OPEN—Dogs: 1st, W. B. Palmer's King Raven; 2d, Swiss Mountain Kennels' Tartar. Reserve, Field & Lyke's Brantford Jet. Very high com., Andrew Laidlaw's Commodore. Bitches: 1st, 2d and very high com., Swiss Mountain Kennels' Lady Fidget, Miss Choe and Miss Chip. Reserve, Andrew Laidlaw's Rideau Reine. Puppies: 1st, Swiss Mountain Kennels' Tartar; 2d, Andrew Laidlaw's Tonita. OTHER THAN BLACK—CHALLENGE—Dogs: 1st, Andrew Laidlaw's Red Rowland C. Bitches: 1st, Andrew Laidlaw's Jessie C. Reserve, Franklin Dundore's Seminole Cherry Ripe. OPEN—Dogs: 1st, Frank S. Dole's Othello; 2d, Andrew Laidlaw's Golden Rod. Very high com., G. Bell's Movement. Reserve, Swiss Mountain Kennels' Cherry Punch. Bitches: 1st, Andrew Laidlaw's Red Rose; 2d, Swiss Mountain Kennels' Ruth. Very high com., G. Bell's Mary Queen of Scots.

COLLIES.—ROUGH-COATED—CHALLENGE—Dogs: 1st, Seminole Kennels' Ch. Squire. Bitches: 1st, Chestnut Hill Kennels' Ch. Furry II. Reserve, Seminole Kennels' Ch. Metcally Surprise. OPEN—Dogs: 1st, Chestnut Hill Kennels' Wellesbourne Charlie; 2d, B. Alton Smith's Al De Ber Eclipse. Bitches: 1st, 2d, reserve and very high com., Seminole Kennels' Bertha II., Stouehurst Lassie, Crissy and Mattie. Very high com., James Watson's Charm. High com., Pomona Kennels' Lady and Puppies. Puppies: 1st, A. Smith's Al De Ber Eclipse; 2d and reserve, Seminole Kennels' Dolly and Beauty. Very high com., Pomona Kennels' Maud. VOICED—1st, B. A. Smith's Al De Ber Eclipse; 2d, J. Watson's Charm. Reserve, Seminole Kennels' Mattie.

POODLES.—BLACK—CHALLENGE—1st, L. A. Biddle's Berri. OPEN—Dogs: 1st, Dr. S. N. Duer's Bismark. Bitches: 1st, Dr. S. G. Dixon's Black Duchess. ANY OTHER COLOR—Dr. S. N. Duer's Mikado.

BULLDOGS.—CHALLENGE—1st, A. B. Gruser's Addiscombe. OPEN—Dogs: 1st, A. B. Gruser's Handsome Dan. Bitches: 1st, withheld; 2d, W. Mauderson's Lorna Doone.

BULL-TERRIERS.—CHALLENGE—1st, Mrs. F. F. Dole's Edgewood Wonder. Reserve, F. F. Dole's champion Attraction. OPEN—Dogs: 1st, F. F. Dole's Top Sparkle. Bitches: 1st and 2d, F. F. Dole's Edgewood Fanny II. and Lorna Doone. Reserve and very high com., Lansdowne Kennels' Lady Velma and Lansdowne Thelma.

DACHSHUNDS.—Dogs: 1st, Mrs. E. A. Manice's Don Quixote II.; 2d, F. H. D. Wolf's Dachs I. Bitches: 1st, Mrs. E. A. Manice's Sister.

BEAGLES.—CHALLENGE—Dogs: 1st, Rockland Kennels' Frank Forest. Reserve, B. F. Lewis's champion Doctor. Bitches: 1st, Rockland Kennels' champion Lou. OPEN—Dogs: 1st, W. H. Child's Mr. Winkle; 2d, W. Rebmann's Brittle. Very high com., W. H. Child's Tony Weller II.,

P. F. Bolay's Royal. Bitches: 1st, Rockland Kennels' Fanny Racer; 2d, Toon & Symonds's Jenny Lind. Very high com., P. F. Bolay's Lady Vernon.

FOX-TERRIERS.—SMOOTH—CHALLENGE—Dogs: 1st, G. Bell's champion Dusky Trap. Bitches: 1st, C. S. Hanks's Grouse II. OPEN—Dogs: 1st, The Grove Kennels' Ruby Trigger; 2d, D. McVicar's Myrtle Lad. Reserve, Mrs. W. F. Presgrave's Victor. Very high com. and high com., Lansdowne Kennels' Lansdowne Triton and Lansdowne Pavenno. Bitches: 1st, Toon & Symonds's Lady Roseberry; 2d, D. McVicar's Myrtle Lady. Reserve, C. S. Hanks's Seacroft Myrtle. Very high com., Lansdowne Kennels' Lansdowne Trim and Lansdowne Dimity. PUPPIES—Dogs: 1st, D. McVicar's Myrtle Lad; 2d, Mrs. W. F. Presgrave's Victor. Reserve, Lansdowne Kennels' Lansdowne Pavenno. Very high com., J. Barber's Arrondale Mixture. High com., P. J. Farrell's Jack Dandy. Bitches: 1st, D. McVicar's Myrtle Lady; 2d, C. S. Hanks's Seacroft Myrtle. Reserve, Chestnut Hill Kennels' Roslyn Dolly. WIRE-HAIRED—Dogs: 1st, H. W. Smith's St. Brittle; 2d, Chestnut Hill Kennels' Jockey. Bitches: 1st, H. W. Smith's Sister Trick.

IRISH TERRIERS.—Dogs: 1st, Toon & Symonds's Brickbat, Jr.; 2d, T. Wise, Sr.'s Shaun Rue. Reserve, G. T. Newhall's Roslyn Patrick. Bitches: 1st, Toon & Symonds's Judy.

SCOTT TERRIERS.—Dogs: 1st and 2d, Toon & Symonds's Tires and Rhudman. Very high com., R. Elliott's Ashley Plug.

DANDIE DINMONT TERRIERS.—OPEN—Dogs: 1st, A. C. Bradbury's Ruglen Sandy.

SKYE TERRIERS.—OPEN—Dogs: 1st, T. Miller's Lovett; 2d, Mrs. A. P. Smith's Bruce. Bitches: 1st, H. K. Cane's Endcliffe Maggie.

YORKSHIRE TERRIER.—OPEN—Dogs: 1st, Mrs. Mitchell Harrison's Dixie; 2d, Pomona Kennels' Jacko. Bitches: 2d, Pomona Kennels' Fanny and puppies.

BLACK AND TAN TERRIERS.—OPEN—Dogs (over 7lbs): 1st, Rochelle Kennels' Bloomsfield Sultan. Bitches: 1st, Toon & Symonds's Gipsy Girl.

WHIPPETS.—1st, Toon & Symonds's Boston Model.

SCHIPPERKES.—OPEN—Dogs: 1st, Seminole Kennels' Skipper. Bitches: 1st, J. Barry's Mieke.

ITALIAN GREYHOUNDS.—1st, J. Lewis's Tinnie.

PUGS.—CHALLENGE—Dogs: 1st, M. H. Cryer's champion Bob Ivy. Bitches: 1st, Seminole Kennels' champion Midget. OPEN—Dogs: 1st, E. Adams's Medlar; 2d, G. Bell's Tip Top A. K. C. Reserve, Seminole Kennels' Little Jewel. Very high com., Miss Bisbing's Prince II. Bitches: 1st and 2d, M. H. Cryer's Bess and Panzy G. Reserve, Seminole Kennels' La Belle Feteite. Com., Pomona Kennels' Princess Royal and puppies. Puppies: 1st, M. H. Cryer's Little Ruth.

KING CHARLES SPANIELS.—OPEN—Dogs: 1st, J. J. Arbello's Dandy; 2d, Mrs. J. Brombach's champion Duke of Wellington. Bitches: 1st withheld; 2d, Pomona Kennels' Minnie.

BLENNHEIM SPANIELS.—Prizes withheld.

MISCELLANEOUS CLASS (over 25lbs.).—Equal 1st, Chas. Rosser's Dame Urs and Dame Orson. Under 25lbs.: Equal 1st, Maurice Barrymore's Belle of Clyde and Tcon and Symonds's Sheffield Lad.

PEKIN POODLES.—Fred Kirby's (Agt.).

New England Beagle Trials.

Mr. W. S. CLARKE writes us: "No doubt your many readers think the New England Beagle Club 'out of existence,' as they have heard nothing from it since the Boston show, when the election of officers took place, but the club is still alive. The officers are considerably scattered, and therefore can't get together very often, still when they do meet they dispose of considerable business." He then goes on to say that a meeting of the executive committee was held June 9, at 1 P. M., at 266 Washington street, Boston, Mass., the following members being present: F. W. Chapman, H. S. Joslin, Henry Hanson and W. S. Clarke. President Chapman in the chair. Minutes of last meeting read and approved. One new member was taken into the club, namely, Mr. Thomas Shallcross, Providence, R. I. In regard to the coming field trials it was voted to offer the following prize money in the various classes. In the All-Age class, dogs and bitches, 15 to 13in., first prize, \$75; second prize, \$50; third prize, \$25. In the All-Age class, dogs and bitches, 13in. and under, same money will be given. Entry fee to the above classes \$5 to nominate and \$7 additional to start. The nomination fee to be paid at the time of closing of entries, the balance to be paid at the trials before starting. Entries close to the above classes Oct. 15.

In the Derby, open to all dogs and bitches whelped on or after Jan. 1, '92, the following money will be given; 1st prize \$50, 2d prize \$30, 3d prize \$20. Entry fee to the above class, \$3 to nominate and \$7 additional to start. Entries to the above class close Sept. 1. Should this class have 20 or more starters, it will be divided according to height same as the All-Age class. In the champion class, dogs and bitches, 15 to 13in., the entry fee is \$15 and 50% of the entry fee goes to the winner. Entries close for this class after the All-Age class has been run. Dogs and bitches are eligible to this class that win first at these trials in the All-Age stake, or that have won first at any recognized beagle field trials, in the All-Age class. Champion class 13in. and under conditions same as above. A class was provided for Bassett hounds. Entry fee to be \$3 to nominate and \$7 additional to start; 50% of entry fee to go to winner of first, 35% to go to winner of second, and 15% to winner of third. Entries close in this class Oct. 15. It was voted to hold the trials Nov. 6, and every day after till completed. In case there are less than 10 starters in the open classes the prize money will be given on the percentage plan, namely: 50% of entry fee to winner of first, 25% of entry fee to winner of second, and 15% of entry fee to winner of third.

The place for the trials has not yet been fully decided on, but the committee have several first-class places in view, and wish to hold them where it will be the easiest of access to all concerned, and where good accommodations can be had at reasonable terms. The place will without doubt be decided on at the next meeting. The secretary was authorized to correspond with the different judges in regard to terms, these to be selected at the next meeting, if possible. Also to make inquiries through the sporting press if any one can give information in regard to a suitable place (in the New England States) where the trials could be held. The committee desire to make this the largest and most successful beagle field trial ever held, and as the prize money offered is more than has ever before been given, they are confident of success. Owners and handlers can depend on getting their prize money promptly, as it is all guaranteed by several of the club members. The date when the trials are to be held comes the week after the National Beagle Club trials at Nauvut, and owners and handlers can come right on and lose no time. Further particulars will be given as soon as possible.

New England Field Trial Club Entries.

Editor Forest and Stream:

I send you herewith list of entries for N. E. F. T. Club Derby Stake, nineteen in all, to be run at Assonet in November next.

DERBY ENTRIES.

Geo. W. Lovell's Corsair's Fancy, Marion Dan, Dolly S. Avent & Thayer's Thalid, Tale, Bowles. Robert Leslie's King of Lynn, Kentwood. E. B. Eames's Jack. F. R. Hitchcock's Rod, Topaz, Amethyst. Hobart Ames's Rowdy's Boy. D. A. Goodwin, Jr.'s unnamed. Oakland Farm's Tennessee Mamie, Tennessee Jean. John J. Scanlan's Gath's Flake. Dr. G. W. Hayward's two unnamed.

W. M. LOVENING, Sec'y.

TAUNTON, MASS. We learn that Mr. Malloy won the spaniel Glen with chance No. 47 in the raffle at the Pet Dog show.

DOG CHAT.

The Open Air Show.

That open air shows at this time of year will become popular is rather doubtful. Any one who saw the state of the poor dogs owing to the heat the first day at Wissahickon would veto such a show at once. In a tent such a show would certainly have meant death to a number of the dogs. Another important matter to be considered is the fact that at an open air show the ground where the show is held will more than probably be some distance from a center of population—a suburb or some such, for the majority of people, out of the way place. This was the case at Wissahickon. Held in connection with the horse show, as it probably will be another time, success would be assured at once. This is the way most of the successful outdoor shows are held in England—in connection with agricultural meetings. That the Wissahickon show was not better attended is much to be regretted. Another disturbing element in summer shows is the question of safe traveling. Geo. Bell's accident might perhaps have been avoided had he not put thirteen dogs in a crate, though it was amply ventilated. The box was locked up from Saturday afternoon till Monday afternoon through some misunderstanding, the Pet Dog people shipping the dogs to Philadelphia without orders. The wonder is that more were not suffocated. If dogs are shipped this weather the crates should be left open so that the expressmen can water the dogs whenever they choose.

Those who were enabled to attend the Wissahickon show will not readily forget Dr. Sauveur's kindness and attention. On judging day every one adjourned for lunch to the Inn, and here the Doctor dispensed hospitality in his usual open manner. On Thursday when judging was over the boys were "kind of hanging around," when a large bus with a four-in-hand was driven up, and on the Doctor's invitation those present to the number of about twenty enjoyed a most pleasant drive round Chestnut Hill, through the Wissahickon Valley, alongside the river rendered famous by Fenimore Cooper, to Indian Rock, where the last of the Mohicans took his final plunge into eternity, then through Fairmount Park to the Ridge and back again. This drive is one of the most beautiful that can be imagined and was fully appreciated by those lucky enough to take part. Kirby handled the horn, and though the latter reminded one rather of Christmas times, still for a makeshift it served its purpose well and effectually drowned all competing chords.

Dr. Sauveur, who lost Sir Frederick last week by death, also had to bear the loss of a promising young collie he had imported, Glenmarlin, by Border Sniff out of Villi, an almost white bitch. This dog succumbed to the heat on the way to the show from his kennels.

The judging of the Ashmont trophy was delayed till Friday afternoon at the Wissahickon show. This prize is given for the best in Mr. Mason's classes. The trophy is a ramble, and though Tires, the Scotch terrier, who has only one more to score before winning it outright, was present, the report got about early that his condition was not tippit. To the naked eye he appeared about as grand as ever and a little better. It was not Tires's day, and despite "Andy's" efforts, which rattled the judge, and the clever way in which George Thomas showed him, the collie champion The Squire walked in a winner. That the latter should win the trophy this time is peculiarly appropriate, as he lives within a block or two, and no one will begrudge the honor, as he is a collie all through, and we never saw him looking better. Wellesbourne Charlie, who was a favorite in the betting, must be content with his Boston win. Others specially awarded during the show were the studded collar to Scottish Leader, of the Swiss Mountain Kennels, as best St. Bernard of the show; the cup for the best deerhound to S. F. Houston's Ellen Douglas; cup for best beagle pup to Phil F. Bolay's Lady Vernon, and the cup for best uncropped bull-terrier to L. S. Green's Nitchie, Jr.

Mr. Muss-Arnolt sends us a copy of a letter addressed by him to Acting President John S. Wise, of the Pointer Club, in which letter he resigns from the executive committee of the Pointer Club and from office of Pointer Club delegate to the A. K. C. The reason given, he states to President Wise, "is my inability to serve in harmony and self-respect with you, its present presiding officer, on account of your refusal to substantiate or apologize for the preposterous insult to all delegates of every club, members of the A. K. C., & c., 'that every one had to do in the A. K. C. what its president wanted, or had to get out.'" Mr. Muss-Arnolt goes on to question the taste displayed by Mr. Wise in making such a charge, while himself remaining a delegate.

Death of Bull-Terrier Surefoot.

We regret to hear that this well-known terrier was killed by the electric cars in Albany, N. Y., June 7. He was a well-known winner, his principal wins being two firsts and special at Crystal Palace, also prizes at Birmingham, Liverpool, Manchester, Kennel Club, Preston, Southport, Prescott, Birkenhead, Langolton, Bakewell, etc., in England; in this country at New York, Philadelphia, Baltimore and Washington during the last circuit. Surefoot was imported by Mr. T. S. Bellin and sold to Mr. Keeler. Last month at the New Brighton (Eng.) show the second and third prize winners in puppy class are by Surefoot and are expected to do a lot of winning in the light-weight classes.

The committee of the N. E. Beagle Club would be pleased to hear from any one that can give them any information in regard to suitable grounds to hold their first field trial on Nov. 6 next. The grounds must be in New England and should be handy to good hotel accommodations; rabbits should be fairly plenty, and grounds so situated that the dogs can be seen by the judges the greater part of the time. Any information will be gladly received by W. S. Clark, Secretary-Treasurer, Linden, Mass.

The Clifton Kennels are coming to the front again. Mr. J. H. Phelan's son Alfred C. has started in very well for a beginner, he has sold a fox-terrier pup by Checho out of Nellie, to Dr. Miller, Red Star Line, to go to England, and has bred his Graphic bitch on June 8 to Mr. Chas. Heath's Arthur. If he will show his dogs in as good condition as did his well known Pater he will no doubt win prizes.

Death of Champion Twinkle.

We are indeed sorry to hear of the death of one of the most typical beagles we had champion Twinkle (3,434) died June 6. She whelped Saturday, June 3, six puppies, the finest litter since Mr. Zimmer owned her, by his Ransack. The puppies all appear healthy and strong, and as he had a bitch whelp June 1, he gave her three of them. He is feeding the others by hand. Myrtle the Mouse was due on June 7 and he depended on her to help with the orphans. Mr. Zimmer writes: "Although Twinkle was getting old, still it made us feel sick at heart to bury the grand old bitch."

Connecticut Dog Law.

The following law will go into effect on July 1, 1893: "Every person owning or having the custody of any dog accustomed to go out on any highway or common and growl, snap or bite, or otherwise annoy any person or horses lawfully using such highway or common, shall be fined not

more than \$7 or be imprisoned not more than 10 days, or both: provided, that written notice of any grand juror, justice of the peace or prosecuting attorney of the town where said dogs are owned or kept, has been previously given to said owner or keeper."

International Field Trials Derby Entries.

THE entries for the International Field Trials Derby closed on June 1, with 34 entries, the largest received since the trials were started. The list is composed of 25 English setters, 8 pointers and 1 Irish setter.

- Sir Cassimer Gzowski and Christopher Robinson, Q. C., have very kindly donated a cup to be run for either in the Derby or All-Age Stake as the committee may see fit, and it is probable it will be given to the All-Age Stake, to be won three times before becoming the property of kennel or individual winning it. The following are the entries:
- POINTERS.
- HAWKEYE (A. Harrington, Leamington, Ont.), dog (Budd Lansdown—Pope's Trixy), May 4.
- BEPPY'S BOY (A. J. Davis, Dresden, Ont.), dog (Beppo III.—Duchess Graphic), May 5.
- RIDGEVIEW COMET (T. G. Davey, London), dog (Lad of Kent—Ridgeview Lass).
- RECTOR (Thos. Johnson), dog (Ightfield Upton—Patsy Banc).
- PAUL FRANCKE (Thos. Johnson), dog (Ightfield Upton—Genievier).
- DICK (Paul F. Bagley, Detroit), dog (Duke of Hessen—Abess of Kent), July.
- MIAMI (Adams & McMurray, Winnipeg, Man.), bitch (King of Kent—Tempest Queen), June 3.
- WARWICK NELLY (Dr. Totten, Forest, Ont.), bitch (Canadian Dick—Woodstock Fanny), May.

ENGLISH SETTERS.

- SILVER SPRAY (Geo. Kime, Big Point, Ont.), bitch (Druid, Jr.—Lady Patch), April 5.
- FOREST REX (Forest Kennels, Chatham and Toronto), dog (Bronko B.—Maudy), May 9.
- FOREST KETTY (Forest Kennels, Chatham and Toronto), bitch (Count Noble Boy—Belle Bucklelew), June 2.
- FOREST TRIP (Forest Kennels, Chatham and Toronto), bitch (Druid, Jr.—Breeze K.), February.
- SPECULATOR II. (Dr. Totten, Forest, Ont.), dog (Toledo Blade—Cambriana), May 1.
- LUNA (W. B. Wells, Chatham), bitch (Cincinnati—Daphne), May 10.
- DIDO III. (W. B. Wells), bitch (Cincinnati—Daphne), May 10.
- POLLUC (W. B. Wells), dog (Cincinnati—Daphne), May 10.
- MARS (W. B. Wells), dog (Cincinnati—Daphne), May 10.
- CYNTHIA (W. B. Wells), bitch (Toledo Blade—Cambriana), May 1.
- CASTOR (W. B. Wells), dog (Toledo Blade—Cambriana), May 1.
- NELLIE BREEZE (F. E. Fisher, Washinaw Kennels, Ypsilanti, Mich.), bitch (Breeze Gladstone—Albert's Nelly), May 14.
- ALBERT GLADSTONE (F. E. Fisher), dog (Breeze Gladstone—Albert's Nelly), May 14.
- WASHINAW GROUSE (F. E. Fisher), dog (Breeze Gladstone—Albert's Nelly), May 14.
- BRIGHTON DODD (T. G. Davey, London, Ont.), dog (King Lee—Siss).

- BLACK PRINCE (Thos. Johnson, Winnipeg, Man.), dog (Manitoba Toss—Manitoba Patti), May.
- BLACK BOY (Thos. Johnson), dog (Manitoba Toss—Manitoba Bess), May.
- BLACKFOOT (Thos. Johnson), dog (Manitoba Toss—Pitti Sing), May.
- DOC (Richard Bangham, Windsor, Ont.), dog (Bangham's London—Nell), July.
- GEORGE (Geo. A. Goodwin, Windsor, Ont.), dog (Bangham's London—Nell), May.
- J. E. D. (Dr. Totten, Forest, Ont.), dog (Cincinnati—Winning Ways), April 16.
- MONK OF FURNESS STING (Eddy & Armstrong, Detroit), dog (Monk of Furness—Sue of Hatchie), June 13.
- JOE (F. M. Smith, Woodstock), dog.
- LADY DRUID (Jas. Kime, Chatham), bitch (Druid, Jr.—Breeze K.), February.
- LADY LUCE (Jas. Kime, Chatham), bitch (Druid, Jr.—Lady Patch), April 5.

IRISH SETTER.

- FINGALIN (Arthur D. Welton, Detroit), dog (Finglas—Ruby Glenmore), June 4.

KENNEL BREVITIES.

THERE will be a coursing meeting at Goodlands, Kan., commencing Oct. 3, with two stakes, All-Age and Puppy. Goodlands is 200 miles east of Denver, Col. Dr. Van Hummel will run the noted bench dogs Van's Peter and Viola at the coursing meetings this fall in the All-Age stakes. Mr. H. W. Smith, of Worcester, Mass., the wire hair fox-terrier exhibitor, won all before him at the New York horse show last week. His Sky High and Sue won the New York Tandem Club prize. Sky High next day won the prize for best carriage horse, 15.2 hands. Later in the day with Sky High and Sue he beat A. H. Moore's two, Magnum and Congress, in the tandem class. Friday he took second to Mr. Mitchell Harrison's Ulrica in 27 entries of carriage horses. His best victory was afterward in the all round sporting tandem class, when his leader, Sans Reproche, proved to be the only one to negotiate the jumps, drivers up. Mr. Smith is a capital whip and drives his own turnouts very cleverly. The Hempstead Farm Kennels won the farm wagon prize, with a very gay equipage, and "Squire" Mortimer's face was wreathed with smiles. Mr. Mortimer was assistant secretary at the horse show. The Woodlawn Stock Farm, Mr. Mitchell Harrison and A. H. Moore also won several prizes in the different competitions, so it may be said our kennel owners are well represented in equine circles as well. Mr. C. S. Hanks is going in for Irish and Scottish terriers and will import some. His Grouse II. was bred to Ripon Stormer two weeks since. His "Russian" Zvodka has five pups by Servanates. Hempstead Farm Kennels' Zmekia visited Mr. Hanks's Groubian May 7. Mr. Hanks will on the 15th start building extensive kennels, putting 200 men at work that day. There is a "Jack the Dog Poisoner" at Mount Hope, in the annexed district, and a number of valuable dogs have met untimely deaths. O'Neill's, the photographer, bulldog is one of them. The dog poisoner is also rampant in Toledo, O., and valuable rewards are offered for conviction of that miscreant. There will probably be a dog show in Kansas City this fall. Mr. Court Rice, secretary of the O. E. M. C., it is said, will judge mastiffs at the World's Fair show in September, and probably Mr. Pybus-Sellon, also an Englishman, will judge bulldogs in place of Mr. John E. Thayer. The Columbus, O., dog show will be held in September. At the exposition in Minneapolis next fall the newly organized kennel club will hold a dog show. Ch. Royal Prince II., the English setter, is owned in that city. Mr. A. Clinton Wilmerding had some fun with a mad dog the other day. The dog was really rabid. The American Spaniel Club president got his gun, the dog chewed the end of it, ran away, got among some horses, and in trying to bite the business end of one of them was sent up twenty feet. On returning to earth Mr. Wilmerding weighted him down with a couple of bullets, which ended his rabid

career. Mr. Wilmerding has had an experience. Mr. H. George's well-known bulldog Bombardier is missing. He strayed from the Hotel Vendome, this city. He gained temporary fame through Mrs. Cleveland, when she saw him at Lakewood, N. J., remarking "He is the ugliest dog I ever laid eyes on." The Spaniel Club trophies for the World's Fair show are on exhibition at Shiebler & Co.'s, silversmiths, on Broadway. They attract a good deal of attention. The Central Field Trials will not be held this year. The Philadelphia K. C. field trials will be confined to members this year. Location not decided upon yet. Lexington, N. C., would suit them well. Mr. H. H. Hunnewell, Jr., is importing a brace of brown poodles—Diamant and Vivette. They are now on the ocean. Mr. H. W. Smith, it is reported, has purchased Cribbage, the best wire-haired fox-terrier in England. Mr. Reick arrived safely on the New York last Saturday, bringing Young Bute, Duke of Fairmont, two brood bitches, one in whelp to Duke of Maplecroft, and three pups by Earl of Rosebery out of a Keeper bitch. Also a dog pup by champion Novar.

ANSWERS TO CORRESPONDENTS.

W. N. L. Jersey City.—We should say that the bulldog has not deteriorated in pluck, though probably modern associations have made him, to some extent, indifferant. As for pluck he is quite on a par with the bull-terrier. To quote a price on a bulldog with dead game qualities and not a show dog is something we could not do. It is simply a question as to the value his dead game qualities are to the owner or prospective buyer. Price would probably range anywhere from \$25 to \$75.

Yachting.

FIXTURES.

- JUNE.
- 17. Buffalo, Ladies' Day.
- 17. Commonwealth, Cup, Boston.
- 17. Massachusetts, An. Open, off Nahant.

- 30-July 13. Phila., Club Cruise.

Brooklyn Y. C. Annual Regatta, June 12.

BATH BEACH—NEW YORK BAY.

The annual regatta of the Brooklyn Y. C. on June 12 brought out a good fleet of thirty-four yachts, the largest being Com. Sutton's new flagship Loyal. The wind was from N. W. to N. and very light. No less than ten courses were laid out for the various yachts, which made some confusion and uncertainty as to which went over the proper courses. The following times are official, but subject to correction:

CLASS A—MAINSAIL.				
Start.	Finish.	Elapsed.	Corrected.	
Norman.....	11 23 38	1 31 40	2 08 02	...

The pictures of Thrush, Exile and Harbinger, published last week, were from photos by Mr. N. L. Stebbins, as also the picture of Navaho in this issue.

Larchmont Spring Regatta, June 10.

LARCHMONT—LONG ISLAND SOUND.

The annual spring regatta of the Larchmont Y. C. was sailed on Saturday with twenty starters, nearly all of them noted boats in their respective classes, but, unfortunately, there were not enough entries in any one class to make a race. Under these circumstances the patience of the regatta committee and the good nature of owners was called on to make up special classes and secure a little competition. Shamrock was ready, but her mate, the new Dagmar, nee Titania, though sailing about, did not enter, and so Shamrock went up a class at an assumed length of 8ft., her true length being but 7ft. Besides the regular class prize, however, the regatta committee offered a special for the three under the true allowances. Wasp, 46ft. L.W.I., had no competitor in her class, Eurybia, 33ft., had none in hers, and the new Herreshoff Bonnie Doone was also booked for a sailor; so the committee classed the three together for a special prize under the regular allowances offered by Com. Colt. Emerald was expected, but was not present. Troquois had a very large crew aboard, her whole bulwark being lined with heads.

The wind was light in the morning, freshening a little from south-west toward noon, the start for the schooners being made at 11:50. Troquois and Azalea were first over, the former followed by Ramona, Azalea being on the leeward end of the line. The reach across to Hempstead was made at a fair pace and spinnakers were then set to starboard; on the first leg Lasca gained a little on Troquois and Azalea made a couple of minutes on Viator, but after the mark was turned the wind fell very light and for the next hour the fleet merely drifted with the tide.

Spinnakers were shifted to port and balloon sails set, but they helped little, and all the time a hot sun was blazing down on the decks. Wasp, Eurybia, Fenella, Ramona and Dauntless held out in the middle of the Sound, but Lasca, Troquois and Shamrock hugged the Long Island shore, with Azalea and Viator astern of them and a little further out.

When Wasp was two or three miles from the outer mark, Captain's Island, a moderate breeze sprang up, increasing from that time until it was blowing quite fresh off Hempstead Harbor on the return. The five large schooners kept on down the Sound for the Stamford mark, Lasca now in the lead. She turned at 3:04:03, with Troquois at 3:06:40, Ramona 3:10:27, Dauntless 3:10:37, Shamrock not timed. No times were taken at Captain's Island, but Wasp was closely followed by Viator, with Azalea just astern, then Eurybia and the little Bonnie Doon, the latter coming along very fast.

On the wind, Wasp carrying a clubtopsail, soon left the schooners. Viator gained a good deal on Azalea as they stood across, but when close in under the shore by Matinickock the latter picked up and was very close to Viator. Here Dagmar, with her grotesque new bow and extreme rig, fell in with Viator for a short time. In the short tacks Azalea had long since passed Eurybia, although the larger boat carried a working topsail and the 30-footer can only set three lower sails, being rigged with a pole mast. Once around the mark Viator set a balloon jibtopsail and hurried home with a fresh breeze over the beam. Azalea chasing her closely but unsuccessfully and losing by just a minute. Of the two, Viator's sails set the better and were handled more smartly, but the race all day was close enough to be exciting. Troquois also had an advantage over Lasca in a large crew and better handling, and saved her time after a good race. Dauntless and Ramona had not wind enough to lend excitement to their duel. Bonnie Doon did some very fast sailing, beating Wasp nearly 10m. more than her allowance, although the 46 footer carried a big clubtopsail all day. The official times were:

CLASS A—SCHOONERS OVER 90FT.				
Start.	Finish.	Elapsed.	Corrected.	
Dauntless.....	11 56 45	5 34 12	5 37 27	5 37 27

Siren.....	11 02 10	2 49 00	3 49 00	3 44 30
The regatta committee included Messrs. W. W. Hollingsworth, 1				
Pearson Lloyd and Stephen E. Haas.				
First class, first prize, Weona. Also one point for the Middle-				
cup; second prize, Mascotte. Second class, first prize, Yvette, al-				
th the cup awarded for the fastest time over the course; second prize				
Schemer. Third class, first prize, Weona, also one point for the M				
Daniel trophy; second prize, Siren.				

Brooklyn, E. D. Schuetzen Corps.

The annual summer festival and prize shoot of the Brooklyn, E. D. Corps, Capt. Chas. Heinbockel, was held in the Glendale Schuetzen Park, Long Island, on June 7 and 8.

The festival in itself was a success, but the prize shooting annex was a failure in more ways than one. Only eleven men recorded their scores for the fifteen prizes offered by the corps. Here is a new shooting park with one of the best appointed shooting houses and the finest range of its size in or about New York. A cash programme of fifteen prizes of sufficient magnitude to draw together all the rifle shooters of the vicinity. But with all these favorable conditions only eleven men qualified on the programme. What is the cause of this condition of affairs? The detection of crooked shooting at the close of the shoot of the festival in the interest of rifle shooting among the best element in the fraternity. While we sympathize with the Brooklyn, E. D. Corps over its discovery of wrong doing in its membership, we look upon its detection as having the most beneficial effect upon the rifle shooting interests in general. Many of our large shooting societies are tainted with the same disease, but unfortunately it is very seldom that the disease can be detected and eradicated.

As remarked, the festival in itself was a success. Delegations from all the principal shooting societies in Brooklyn visited the park on the second day. The kingship was decided by shooting at the wooden eagle, the honor of which fell to E. Welton, one of the prominent members. The evening programmes were carried out in the usual style, and this was followed by feasting, dancing and social intercourse.

The competition for the three medals, open to the public, was fairly well contested, and at the close of the shoot were distributed as follows: First to Ignatz Martin, second to L. Graue, third to Fred Ross.

Prize target, 3 shots, possible 75, 15 prizes: G. W. Plaisted 70, F. C. Ross 69, R. Hamany 69, Geb. Krauss 68, J. Young 66, Ignatz Martin 65, Wm. Lloyd 65, Wm. Vorback 58, L. Graue 58, A. Mahnken 58, Wm. Horney 52.

Crooked Work on the Range.

During the annual festival of the Brooklyn (E. D.) Schuetzen Corps, at the Glendale Park, L. I., last Thursday, June 8, an incident occurred that was of a most unpleasant nature. A shooter attempted to have a ticket recorded that he had not shot. In other words, with the aid of a pliable warner and his punch a winning score of 71 points was made to order. By good luck the attention of some of the competing riflemen had been called to this ambitious seeker for shooting honors and he had to the accommodating warner, and a close watch was kept upon the pair until the close of the shoot. When the attempt was made to have the ticket recorded by the secretary it was challenged. With the aid of the warner an attempt was made to carry the recording of the ticket through, and it would have been successful but for the active and persistent work of Geb. Krauss, the vice-president of the Zettler Rifle Club, who was one of the witnesses of the entire transaction. Mr. Krauss's cross questioning of the shooter was the equal of Ben Butler's in his best form, and after he had done with his witness the shooter felt constrained to tear up the ticket of his own accord. The representative of FOREST AND STREAM was also a witness of the whole matter and at the time felt much compassion for the shooter, who was young in years and shooting experience. Later in the evening, however, after the young man had had time to canvas the incident in his own mind, he confided to a friend, within the hearing of a reliable witness, that he would get square with Krauss for his action in the matter. This young man has begun his shooting career very unfortunately and should mend his ways. He and such as he should be looked after by all honest shooters.

New York City Schuetzen Corps.

The twentieth annual prize shoot and festival of the New York City Schuetzen Corps, Capt. Chris Rehm, was held in Washington Park on Tuesday, June 6. This old corps is in very much the same condition as an old ship whose career has been successful in its day, but whose timber now shows signs of decay. The dry dock, new timbers and the overhauling of what this old craft wants to give it a new lease of life. When we look at the programme of the twentieth annual festival and then to those of ten years or more ago, we are brought to a realizing sense of how great a change has been going on in this corps. New blood and a greater ambition for good scores, which applies to this organization, is the main thing which has changed in the other shooting societies in and about New York. The scores on the ring-target are appended, three shots per ticket, two best to count, 15 prizes: Otto Wehlein 148, R. Busse 140, Fred Ross 140, C. G. Zettler 134, Geo. Schlicht 134, L. Vogel 129, A. Ranz 124, J. Packman 124, J. Dickerscheid 121, H. Radloff 112, W. Steinkopf 111, V. Dittmar 110, A. Hildebrandt 108, C. Dreite 106, L. Schultze 105.

Man-target, three shots per ticket, possible 60, two best tickets to count, 10 prizes: Fred Ross 111, R. Busse 111, Geo. Schlicht 105, C. G. Zettler 101, H. Radloff 99, J. Packman 99, Otto Wehlein 96, L. Vogel 90, J. Dickerscheid 88, C. Rothweiler 68.

Bullseye target, most red flags: R. Busse 9, Fred Ross 4, C. G. Zettler 3, A. Stolzberger 2, A. Ranz 2, C. Rothweiler 2, Otto Wehlein 1, H. Munz 1, E. Hotz 1, A. J. Christian 1.

Lutwiz Club Prize Shoot.

The Lutwiz Rifle Club, of Jersey City Heights, N. J., held its summer festival and prize shoot at Floral Park, on the 11th inst. The weather conditions being favorable for outdoor sports, there was a large attendance of riflemen. Delegations of shooters from New York and New Jersey helped to swell the crowd. Capt. Gus Zimmerman, of the New York City Lutwiz Co. No. 12, was present also. Capt. E. Fisher, of the Miller Club, Hoboken; R. Busser, of the Zettler Club, David Miller of the Miller Club, and many others. The scores on the prize target are appended, 3 shot scores, possible 54, 3 best tickets to count, 12 prizes: R. Busse 151, D. Miller 151, J. Tobler 150, Geo. Schlicht 150, Gus Zimmerman 149, E. Fisher 148, Gus Ringler 147, L. Vogel 144, A. Gregor 144, John Dietz 144, F. Zapp 144, G. Plaisted 143. Most flags, one prize, John Dietz 6; first flag, A. Ringler; last, R. Busse.

Greenville Rifle Club.

The Saturday afternoon outing of the Greenville Rifle Club in Armbruster's Park on Saturday, June 10, was well patronized by the club members and invited guests. Fred. Ross and Colin Boag made the fine scores of 232 and 221 respectively. The scores of the members are appended:

Fred C. Ross, 32-40 Schalk, 23 25 22 24 25 22 21 22 20 232
Colin Boag, 25-10 (R. F.) Bal., 22 29 23 24 20 20 23 23 221
M. Dorrier, 35-55 Patched Rem., 22 10 20 25 25 25 24 21 23-216
C. H. Chavart, 32-40 Win. Lub., 23 17 16 24 21 21 18 23 20-206
G. W. Plaisted, 32-40 Schalk, 22 21 18 21 21 23 22 21 15-204
F. Hecking, 38-55 Bal. Lub., 17 20 11 14 24 24 23 22 19-196
G. Purkess, 25-10 R. F. Bal., 25 17 19 18 22 14 10 23 20 16-193
Wm. H. Robbins, 35-55 Win. Lub., 24 21 22 21 22 18 10 14 13 17-191
John Hill, 35-10 R. F. Bal., 24 11 18 21 16 25 10 23 2 18-168

Turtle Bay Rifle Club.

The weekly handicap shoot of the Turtle Bay Rifle Club came off at the headquarters of the club, 146 East Forty-second street, on Thursday night. The race for first place was very close between Jantzer, Ochs and Walter. The scores are appended, 10-shot scores, 3 scores to count:

G. E. Jantzer, 247 241 243-731 J. Krampert, 239 237 234-710
J. Ochs, Jr., 242 238 247-727 H. Lingelbach, 237 230-689
H. Walter, 240 245 239-724 A. Frank, 229 228 232-689
C. H. Plate, 237 235 238-710

Excelsior Rifle Club.

JERSEY CITY, N. J., June 10.—Below please find scores of yesterday's practice shoot of the Excelsior Rifle Club at Greenville Park: J. P. Hansen 211, John Speicher 203, C. Ward 193, Wm. Weber 195. No scores were made in the gallery last Tuesday evening.

Harlem Rifle Club.

The appended scores were made at the weekly shoot of the Harlem Rifle Club, on Friday night, the 9th inst., 10 shots, possible 250, distance 75ft.: Boyken 246, Busby 211, Weeks 240, Cochran 239.

A NEW-SUBSCRIBER OFFER.

A bona fide new subscriber sending us \$5 will receive for that sum the FOREST AND STREAM one year (price \$4) and a set of Zimmerman's famous "Ducking Scenes" (advertised on another page, price \$5) — a \$9 value for \$5.

This offer is to new subscribers only. It does not apply to renewals. For \$3 a bona fide new subscriber for six months will receive the FOREST AND STREAM during that time and a copy of Dr. Van Fleet's handsome work, "Bird Portraits for the Young" (the price of which is \$3).

RIFLE NOTES.

IGNATZ MARTEN, the Brooklyn real estate man with shooting proclivities, is open to shoot a rifle match with any resident of Brooklyn, for fun or lucre. Who is in?

The shooting of Colin Boag with his .35-10 rim-fire Ballard and U. M. C. cartridges on the Greenville (N. J.) range last Saturday caused some of the large-bore cranks to grumble.

The Columbia Schuetzen Corps, Capt. A. Fisher, of Brooklyn, will hold its tenth annual festival and prize shoot in Wissel's Cypress Hills Park on Monday, the 19th inst. The prize list contains 15 cash prizes from \$35 to \$2. A medal target will also be open for competition.

The Hild Rifle Club, Capt. Frederick A. Huth, will hold its second annual festival and prize shoot at Cosmopolitan Park, 169th street, on the 18th inst. Eight prizes from \$15 to \$1 will be divided among the winners.

A delegation of New York riflemen is expected at the shoot of the Hartford Club, at Hartford, Conn., on Saturday ("Bunker Hill Day"), the 17th inst.

The New York Schuetzen Corps, Capt. Hy. Offerman, will hold its annual festival and bullseye shoot in the Union Hill Park on Wednesday, the 21st inst. There is a long list of prizes for the best center shot on the 4in. center, also a liberal list of premiums for the most red flags.

The Hoboken Schuetzen Corps, Capt. Geo. R. Fredericks, will hold its annual festival and prize shoot in the Union Hill Schuetzen Park on Tuesday, June 30.

International Columbus Prize Shoot.

CHICAGO, Ill., June 6.—Editor Forest and Stream: The I. C. P. S., arranged by the Chicago Sharpshooters' Association, opened on June 4 and will be continued through June, July and August. The shooting days will be each Sunday and Monday during these three months, and at the end of the third month (August) enough consecutive days will be added to enable every shooter present to finish his scores, but the first Sunday in September shall be the closing day of the contest, when also the distribution of prizes will commence. As a memorial of the discovery of America by Columbus will be awarded on the bullseye targets to every participant, and which can be claimed, by him when shooting his first bullseye. Besides these medals a series of cash prizes is set aside for the most number of bullseyes scored out of 100 shots on these targets. Rifles of and below .40cal. (104mm.) and such that shoot more than 20 balls to the pound are only allowed.

Intended participation must be made known to the secretary two weeks in advance. This must particularly be observed by larger bodies of shooters, as the number of targets is limited and a non-observance of this might result in an overcrowding at the targets. Shooters from all parts of the world are allowed to take part. The scores will be published from week to week in the FOREST AND STREAM. The following shooters took part on the opening day (West Pullman): The ranges are at Sharpshooters' Park near Chicago (West Pullman). The following shooters took part on the opening day (West Pullman): The ranges are at Sharpshooters' Park near Chicago (West Pullman). The following shooters took part on the opening day (West Pullman): The ranges are at Sharpshooters' Park near Chicago (West Pullman).

Bullseye target, 600ft., 4in. bull in 2in. circular black: J. H. Theiler 20, D. A. Young 19, Chris Theiler 9, E. Witzler 9, B. Witzler 9, F. O. Young 61, F. H. Theiler 58, T. B. Clark 50.

King target, 253in. ring target, 10 shots, F. Toggengruber 205, F. O. Young 196, T. B. Clark 185, W. Hagen 171.

Standard target, 8in. black center, divided in 10 circular rings, 5 shots: F. Toggengruber 40, J. H. Theiler 34.

Man target, 10 targets, presents the upper part of a man's body and is divided into 40 perpendicular lines. The space between the two center lines counts 20, and the others decline from these to the right and left down to 1. Five shots constitute a score: F. Toggengruber 89, F. O. Young 69, F. H. Theiler 53, F. C. Breylinger 73.

People's target, 253in. ring: F. Toggengruber 68, F. O. Young 68, F. H. Theiler 68.

Next Sunday, the 11th, other delegations will shoot.

49 LASALLE STREET, Chicago. A. BOESE, Sec'y.

Trap-Shooting.

Communications for publication relating to business should be addressed to the Forest and Stream Pub. Co. If addressed to an individual they will be subject to delay in that individual's absence.

All ties divided unless otherwise reported.

FIXTURES.

If you want your shoot to be announced here, send in notice like the following:

June 20-22.—South Dakota State Sportsmen's Association tournament, at Vermillion, S. D.

June 21-22.—Interstate Manufacturers' and Dealers' Association second annual tournament, Wapnonock Park, Altoona, Pa.

June 23-27.—Baltimore Gun Club tournament, Tolchester Beach, Md.

June 27-28.—Oregon State Sportsmen's Association tournament, at Salem, Oregon.

June 27-28.—Connecticut Trap-Shooters' League annual tournament, New London, Conn.

June 28-29.—Michigan State League's auxiliary shoot, Mendon, Mich.

June 28-29.—Summer tournament of the Peekskill Gun Club, Peekskill, N. Y.

June 28-29.—Schuykill County Association tournament, at Mahanoy City, Pa.

F. W. Cooper, Manager.

DRIVERS AND TWISTERS.

The open to the world tournament of the Peekskill Gun Club, to be held on June 28 and 29, promises to be a successful affair. The shooting will be at blue-locks targets, and expert traps, shooting to begin at 8 A. M. Ties will be divided. The Eagle Hotel will be the shooters' headquarters and Boniface Gorgon promises to treat the boys well.

On the first day there will be six 10-target events, \$1 entry; two 15-target events, \$1.50 entry, and two 20-target events, \$2 entry. Second day, five 10-target events, \$1 entry; two 15-target events, \$1.50 entry; one 20-target event, \$2 entry; one 30-target event, \$3.50 entry; one 25-target event, \$2.50 entry. The prizes for teams of any three men, 15 targets per man, \$4 entry per team; twelve or more entries 5 money, under twelve entries 4 money. Targets, 2 cents each, deducted from the purses.

The known trap and known angle system of target shooting is rapidly going out of favor, and before long all events at tournaments will be shot from unknown angles. And the habit of making entries on the basis of 10 cents a target and running six out of ten events at 10 targets each is another method that is losing friends. After the price targets are deducted the pots are hardly worth the winning. And there are too many chances for ties in these little sweeps. The tournament of the future will probably be with all events at 15 to 20 targets and the entry fees from \$3 to \$5 for each event. With entries like these a man can see a pot after winning it.

The match between teams of eight men each from the Newark (N. J.) and Clifton (Staten Island) gun clubs, will be an interesting affair. It will take place on the grounds near Wm. Nunley's Atlantic hotel, South Beach. The conditions will be 10 live birds per man, gun below the elbow until bird is on the wing, 25yds. rise, 5 ground traps, use of both barrels allowed. The bird must be on the wing when the second as well as the first barrel is fired. These rules can be classed as "back numbers," but the Newarkers are willing to try them for the sake of the novelty.

Winston-Salem, N. C., a thriving town of about 18,000 population has no gun club and no trap-shooters. A good field for missionary work! The town has plenty of sportsmen who are fond of field sports, but for some unknown reason trap-shooting has never secured a hold there. It is in such places as this, that the two big associations should hold their tournaments, instead of going to large cities where every man, woman and child is familiar with the sport.

Wapnonock Park on the Allegheny Mountains, near Altoona, Pa., will catch a big crowd of sightseers as well as shooters next Wednesday and Thursday, when the attraction will be the shoot of the Altoona Gun Club, assisted by the Interstate Manufacturers' and Dealers' Association. Each one of the dozen subscribers to the Association will have a tent on the ground, and this will impart a picturesque to the scene.

The June shoot of the New Jersey Trap-Shooters' League will be held on Saturday, on the newly acquired grounds of the Passaic City Rod and Gun Club. There will be a fine programme of open events, beginning at 8:30 A. M. and continuing until dark. The team race for teams of 5 men each at 25 targets per man will be started promptly at 2 P. M.

The annual tournament of the Connecticut State League, to be held at New London, on June 27, 28 and 29, will attract a big attendance. The New London Gun Club grounds, near the Keystone target factory, are second to none in the country in regard to appointment and location, and give a perfect foreground.

The annual tournament of the South Dakota State Sportsmen's Association, held at Vermillion, on Wednesday, Tuesday, Wednesday and Thursday of next week, and as there are no other important shoots to be held West on the same dates it should receive liberal patronage, as the programme deserves.

The members of the Newark (N. J.) Gun Club should turn out in force in future at the club shoots to be held on the second Thursday of each month. The new system of classifying the members according to points, gives every man a good chance for the prizes. There will be several trophies to shoot for during the year.

Isn't it about time for the New Jersey State Sportsmen's Association to let itself be heard from? Last year and the year before President Heritage stated that the Association would hold fall tournaments, but nothing more was heard of it.

The Knoxville Gun Club are out with the statement that in May, 1894, they will hold their thirteenth grand tournament and will again add \$1,000 in solid cash to the purses. Think of this, ye expert and amateur, and save up your old pennies for a trip to Knoxville in 1894.

The Essex Gun Club, of Newark, N. J., holds its semi-annual reunion shoot on Al. Heritage's Marion grounds to-day, beginning at 10 A. M. The shooting is only for members or those introduced by a member.

Jack Halstead, of Peekskill, was in town last week booming up the Peekskill shoot. He called at our office along with "Tee Kay" Keller, but unfortunately we were out. Much obliged for the picture.

Still the cry is "birds are scarce and high priced." Where are all the enterprising Americans with capital to invest? Let some one establish a "pigeon farm" and they can coin money.

An open to all sweep at 20 live birds, \$20 entry, will be shot at Paterson the latter part of this month. Thos. W. Morley will be the prize money.

The Harrisburg Shooting Association are booming the arrangements for the Pennsylvania State shoot to be held under their auspices in August.

The New Jersey State shoot at Passaic on Saturday will attract teams from eight or more clubs, and there will be big fields of entries in the open sweeps.

Send for a pad of our handy score sheets; ruled for twenty-six scores of twenty-five shots each. They can't be beat.

Open sweepstakes at live birds at Rochester on Saturday.

C. H. TOWNSEND.

THE ILLINOIS STATE TOURNAMENT AND WORLD'S FAIR SHOOT.

(The Live Birds Reported by Mr. Hough, the Targets by Mr. Waters.)

JOHN WATSON'S FRENCH.

CHICAGO, Ill., June 6.—At 5 A. M. of Monday, June 6, which is to-day, there was a great cackling and commotion among the fowls which for some time have inhabited the barns near the fence of John Watson's Park at Burnside. There was hurrying to and fro and much feathered grating and agony. John Watson, accompanied by several members of his family, had arrived betimes and made a determined onslaught upon the barnyard population. Armed with a large ax, sharp on both sides, John entered the hen fold and smote right and left with determined zeal until chickens' heads lay knee-deep all over the premises.

"If my memory serves me right, and the programme for 1893 doesn't lie, I said he to himself in grim soliloquy, 'this is the beginning of the Peckish Fair and now we've got to make preparations. I don't want none of them Turks or Circassians coming here making a kick because there ain't plenty of delicatessen for lunch. Excuse my French, but we've all got to shake out a kink or two this week. We don't get a World's Fair shoot every summer, and for one, I'm going to talk French to the visitors, because more of 'em understand that language. We're going to have a cold chop 'till morning, and warm chicken this morn', that's what we've got to have at Watson's Park.' And with this he touched off a few more Leghorn heads.

The fruits of this early morning raid were apparent to-day when a goodly number of shooters sat down at the long table in the flag-decorated new dining hall which John Watson had built specially for the occasion. There was warm chicken and hot coffee, and a great many other things grateful to a hungry man's heart, and there were plenty of turkey reports to get away with. The same, it was not necessary, however, for John Watson to speak French, for nearly all the representatives of Ireland, Germany, Omaha and Milwaukee understood United States well enough to get along, and the Turks, Circassians, etc., were not on hand. They are expected later in the week, and it is hoped they will come, as not only Mr. Watson but a great many others have been spending a great deal of time over on the Midway Plaisance, getting acquainted with foreign tongues.

Beside the new dining hall for the shooters, which adds another to the little village of buildings now at the park, John Watson had made several other improvements about the grounds. He had rigged up an extra set of traps just outside the gates, where the L. C. Smith cup contest was shot, and had left the covered battery at the old stand, facing south. Back of the live bird score he had made a little raised gallery for the spectators, and a deal of time over on the Midway Plaisance, getting acquainted with foreign tongues. It did not keep the crowd out, however. For the secretary and official score suitable and well arranged apartments of a similar nature were provided, which enabled them to work without confusion. All that could be done in a simple way for the convenience of the management and of the shooters was done, but no elaborate preparations had been made and it was well there had not, for no great crowd will be on hand. This is and will be just a good, square, honest, old-fashioned, old-fashioned tournament, the kind Chicago always gives, and with the usual Chicago accompaniments of a good time, hard shooting and a square deal all around. The attendance, so far as can be predicted to-day, will be just about the average attendance of other years, not much more and not much less. The shoot may last one week, or two, perhaps three. No one can tell, until time shall have shown what may be the effect of announcing a considerable open shoot at Chicago at this date. But the shoot will not be very large.

CAUSES OF LIGHT ATTENDANCE.

We have all easily fallen into the belief that the World's Fair year must necessarily be a great one for all sorts of sporting events, especially at Chicago. Really this belief is not grounded upon the best of reasons, and it is very probable that quite the contrary of it will be found more near the truth. It costs money to attend a shoot, and it costs yet more money to see the fair. The average shooter is not a millionaire, and as he can attend shoots any year, and can only attend the World's Fair this year, he is likely to discriminate in favor of the Fair, and go to that instead of the shoot. Indeed, many of the visiting shooters now present announce that they intend to take in the Fair while here, and say that they will shorten their time of shooting on that account. Once within the gates of the big show, it will be strange if the little show exercises the same fascination for them as of old. They will forsake the traps earlier, rather than stay at them longer. In this way the Fair may be seen to be an injury rather than a help to a sporting event like the shoot. In addition, many of the visiting shooters in mind that a financial panic is threatened for the year of the country. To-day rumors came down that serious ruins were taking place on Chicago banks. Three banks were reported suspended, and others had pressed. This kept many shooters uneasy.

The only thing which could have made this tournament a great and conspicuous success—and this could certainly have been done in spite of the presence of the Fair—would have been a great purse of money. It is money that draws the shooters, and if you have up enough of it you can draw them from all over the world. Had the World's Fair Trap-Shooters' Association gone on, and had it offered \$30,000, \$20,000, or \$10,000 of prizes, we should have to-day a cosmopolitan gathering of shooters indeed, and not merely an assemblage of familiar faces—for such, though many shooters are here from many sections of the country, the meeting of to-day really is. The shooters are shooting in some of the best little traps in the world, and the game is compared to those of other years, but it is a poor one compared with what it should have been.

THE DODO RULES.

The celebrated Illinois dodo rules prevailed, by which 10 and 12½ games stood at the same score. The dodo rules show up in great shape at a World's Fair shoot. They are great rules. Look in the report of the convention and see how nicely they work.

THE CHICAGO HARD BIRD REMAINS.

Above all jealousies and fault findings, above all envy, contumel and backbiting, as well as above all criticism and comparison, there remains serene and untroubled, amid the wreck of matter and crash of words, one central figure which nothing can muss up. The Chicago hard bird remains, justly famous and utterly unimpeachable.

THE MEN OF ALL NATIONS COME TO THE WORLD'S FAIR SHOOT.

It alone, out of all Chicago and all America, is fit and ready to start in a World's Fair shoot. The J. Watson World's Fair pigeon out-classes the World's Fair shoot, even in these listless days of June. One by one the shooters fall down upon themselves in trying to compass the destruction of this stalwart fowl. It is said that John Watson is afraid of these birds himself and never goes near the barns alone. When he wants to get out a lot of birds for a shoot he has to take a deputy sheriff along with him, and even then the birds often chase him out of the coops. They are a tough lot, utterly fearless and unprincipled. This you may discover when you go to hunting for 10 straights in the Board of Trade badge shoot.

I had an idea that something more striking, although nothing more touching, could be devised than the conventional portrait of a shooter arrayed in a pleased expression and a Sunday necktie, and so laid the question before Billy Wells, whom I take to be without doubt the greatest artist on sporting topics there is in the country. Mr. Wells is possessed of a facile pencil and a wild, exuberant, untamed imagination. The result of these two combined is shown in the great piece of black and white which appears on these pages, in the execution probably as artistic a work as ever appeared in any sportsman's journal, and all the more valuable on account of its absolute novelty. Old methods will do for the other papers, not for *FOREST AND STREAM*. Mr. Wells's apotheosis of the Chicago hard bird will go on record as the *ne plus ultra* of description, and will be remembered and laughed over long after all written comment is forgotten. All alien, foreign folk not so happy as to have seen the fastest pigeon grounds in America may now have a perfect opportunity for certifying themselves as to the personal appearance and general character of the good, but tough Chicago bird. John Watson had sleigh bells tied on his score ropes. They asked him why he had sleigh bells on, and he said he had to have them to be in it all right, because all the birds had their skates on. That's why there were sleigh bells on the ropes in

"I do not wish to make a motion this time, Mr. President," said he in substance, "and I do not wish to be thought as criticising or opposing the celebrated Illinois State rules. I will not introduce a motion to repeal these rules. I would rather have them stand right where they are, for reasons that are good, and I might or might not support a motion looking to their alteration in the matter of handicap. You yourself may remember, Mr. President, that it was my vote in the board of managers which decided that the Illinois rules should govern at this World's Fair tournament. I want all the world to see the Illinois rules, for I firmly believe there is nothing like them. Still, I beg to call the attention of this association to an awkward complication into which these same rules have gotten us. We have announced in our programme that we were to shoot under the Illinois rules, yet in the L. C. Smith cup we did not so shoot, as we should have done in all State events, whether or not any announcement had been made. I understand that a protest was made against 10 and 12-gauge guns standing at the same score, and that thereupon you, Mr. President, conferred with two members of the board of managers and decided to make the 10-bores go back 2yds. Now, what I want to say is that no meeting of the board of managers can change these rules, no matter how regular that meeting. This was an irregular one certainly, for no notification was sent out, and I, one of the board, never heard of it until this evening. Why this association can change these rules, we of the committee could not. Yet where we are commanded to shoot all guns at the same score, we did not do it, but disobeyed the conditions of this contest. I do not hesitate to say to you, sir, that we have had no L. C. Smith cup race here to-day. The action of the secretary in paying out moneys on that event needs ratification before it can relieve him of personal responsibility, and the meritorious win of Mr. Robbins must be confirmed by vote of this assembly or it is not worth a snap of your finger. As it stands now, any 10-gauge man who was put back 2yds., or 1in., in that shoot has the per-

changed. I rather like them. I am pointing out the complications."

Col. Felton—"It's all nonsense about these rules anyhow. The Illinois rules nor any other rules can't change the original conditions under which this cup was offered. Both the Smith cup and the Board of Trade badge had certain conditions attached. Mr. Roche, donor of the diamond badge, left it entirely to myself as to changing the conditions. It was by my consent that the number of birds was changed from 15 to 10 in this shoot."

Mr. Hough—"Did you personally ever change the conditions of the Board of Trade badge shoot in the matter of handicap? Have those conditions ever been altered to put all guns at the same score?"

Col. Felton—"I made such change in the conditions tacitly when I went into that badge shoot myself to-day. I accepted the conditions."

Mr. Hough—"But you did not change them?"

Col. Felton—"Only tacitly."

Mr. Hough—"You did not do this as Mr. Roche's representative? You did not have the former conditions with you? You did not say anything about it to anybody, did you?"

Col. Felton—"No, I just did it tacitly."

Mr. Hough—"Well, now, Col. Felton, I want to say to you what you know just as well as I do, that if this is the state of affairs in our rules and our conditions, then we have not only one but two of our events on our hands to-night, absolutely void, and all because of that wise rule removing all handicap. I wish to state to the gentlemen of this convention, and know that they will agree with me, that under these rules as they now stand the winning of either your L. C. Smith cup or your Board of Trade badge is irregular and worthless, and legally not worth a pinch of snuff. I will not move to change these rules. They will change themselves after awhile. But I would like to ask what we are going to do about this."

Mr. Rowe—"I think all this is unnecessary. If the gentlemen present will look at Rule 3 of the target rules they will find it to read as

THEY MEET THE CHICAGO HARD BIRD.

he merry month of June, if you want to know about the sleigh bells.

THE BALL OPENS.

Shooting began in the great Board of Trade shoot, the test event of this annual tournament, at a seemingly hour in the morning, and before evening the entry had tied that of last year, 84. This event will be finished to-morrow, and the scores given in full under that day's shooting. The entry is held open until to-morrow.

The weather to-day was clear but oppressively warm, with little wind. The late rains had left the grounds soaked full of water. The shooters had to confine themselves to the board platforms, fortunately ample in extent. The ground was so soft that Jack Parker, manager for the American Manufacturers' Association, was unable to put up his tent, as were also others who purposed doing so.

The Annual Convention.

The nineteenth annual convention assembled at the Sherman House, at 9 P. M., this evening. The president, Mr. R. B. Organ, dispensed with the usual feature of the retiring president's address. Roll call and the minutes were the first business. The Alpine and Dixon gun clubs were admitted as new members. Out of the membership of twenty-nine clubs there were thirteen represented by their delegates, as follows: Audubon Gun Club, Cumberland Gun Club, Chicago Shooting Club, Duck Island Shooting and Fishing Club, Douglas Shooting Club, Evanston Gun Club, Eureka Gun Club, Garfield Gun Club, Lake County Club, Pullman Gun Club, Prairie Gun Club, Forrester Gun Club, Grand Calumet Heights Club.

THE DODO RULES SHOWN ABSURD.

The order of new business was now called up, and under this Mr. Hough took up the question of the Illinois rules for target shooting.

feet right to protest the event and we could not say a word of reason against his claim. I do not propose to make any protest, but will later move to ratify this win and to ratify the action of Mr. Shepard. What I want now is to ask where we stand. Again I repeat, I do not move to change Rule 7, the celebrated one-score clause. I want that to remain on our records as a monument of what men can do when they get together and try real hard."

This brought out general excited and unparliamentary discussion. Dr. Rowe looked grieved. Col. Felton thought all this was absurd and out of order. Mr. Eich arose and stated that he was on the committee which framed the rules, and that the target rules were not changed at all, so that the 2yds. handicap still remained. Dr. Rowe also spoke to this effect.

"I beg your pardon about this," said the first speaker, "but the point I want to make then is that your rules are contradictory and absurd. Now, here is Rule 6, of the live bird rules, and it reads in all its wisdom, as follows:

"No gun of larger caliber than 10-gauge shall be permitted in the contests of this association, and all guns shall stand at 30yds."

"That abolishes all handicap. Now, Rule 1, of the target rules, reads as follows:

"The rule for live bird contests, as to judges and referee, and their general duties—loads, loading, holding of guns, handicaps, handicaps of guns, misfires, springing of traps, rising of birds, missing of birds, penalties and all other appropriate provisions, shall be followed in all contests at inanimate flying targets."

"Now, as these target rules were not changed, the handicap in them remains as it was, that is to say, the same as the handicap in the live bird rules, which is no handicap at all. Therefore, a ground of protest lies for any 10-gauge men who were handicapped in this L. C. Smith cup shoot. You can't evade this. It is only one of the workings of your beautiful new rules. Understand, I don't want to see these rules

follows: "The standard score shall be 18yds. from the traps in single target contests, and 15yds. at double target contests."

Mr. Hough—"I fail to see, Mr. President, what that has to do with this question. The standard distance has nothing to do with the handicap, and the question of handicap reverts back to the live bird rules, where you have no handicap. The best way you can fix it, you've got not only an absurdity but a discrepancy in your rules as to handicap."

Further talk ensued. Mr. Abner Price rose to a point of order, there being no motion before the house. Mr. Hough then at once moved that the convention pass a vote of ratification confirming Mr. Robbins in his winning of the L. C. Smith cup, and protecting the secretary, Mr. Shepard, in his act of disbursing moneys in that event. This was seconded.

Mr. Eich supported this motion, saying, "We had better settle this right here and not have any trouble later on. We don't want any protests filed after a while."

Col. Felton still persisted in his weak and indefensible position, and moved to table this motion. The chair therefore cut off debate and put Col. Felton's motion to table. It was lost. Mr. Hough's motion was then put and was carried, with but one dissenting vote, that of Dr. Rowe, who said "No," in a loud, solemn tone of voice, all by himself, and then looked sorry that he had said it, when he found how loud his voice sounded all by itself.

Thus the dodo rules were left standing on the books. So long as they do stand there a similar ratification vote will be necessary from year to year, or until a change in the conditions of these two main trophies is formally and regularly made. As the Board of Trade badge shoot is not concluded to-day, and as the convention rises to-night, there can be no such vote of ratification for the winner of the diamond badge, and he must hold it throughout the year subject to the technical question of regularity in the win. Of course this question will

THEY GO HOME SATISFIED.

THE L. C. SMITH CUP,
Emblematic of the individual State championship at inanimate targets, the winner of the cup this year to receive 60 per cent., and the club of which he is a member 40 per cent. of entries at next year's

Jacksonville Gun Club team won first and the trophy with 35; South Chicago, second, 37; Genesee Sporting Association third, 36; Audubon Club, of Chicago fourth, 35. There were no ties.			
Douglas Gun Club shot its first 3 men down and had 30 straight, apparently a certainty to win. Their fourth man, Mr. Church, went to pieces, getting only two out of his 10. This score of 2 was tied by Mr. Robbins, of the Prairie Gun Club, winner of the Smith cup. Yet another man, Mr. Koehler, of the Lake Co. Club, went out with 3. The Chicago June birds are not necessarily a cinch.			

THE WORLD'S FAIR SHOOT.

At the close of the above State contest, the announcement was at once made that the shooting was now open to the world, and the World's Fair tournament began in its live bird features. The entry for the first open sweep, 30 birds, \$30, rapidly ran up to the neighborhood of 30. As it was now nearly 4 P. M., this event runs over into the following day. The entry includes most of the cracks of the West, and the win will be a valuable and worthy one.

The different events were well filled, each averaging about 50 contestants. Extra No. 4, 15 bluebirds, \$3: Parmelee 15, Adams 12, Hale 9, Redwing 15, Bingham 12, Marshall 13, R. C. White 11, Funk 5, Elliott 15, Partington 12, O'Brien 13, Bollenstein 13, Bennett 15, Jacksnipe 11, Minard 11, Wolverson 12, Rex 15, Heikes 15, H. Kleinman 7, Wood 14, Rigby 12, Merrill 11, Keefe 10, Knowles 13, Brown 8, Walpert 12, Easton 14, Read 12, Budd 14, Holt 11, Lansden 9, Kennedy 11, White 15, Fahnestock 13, A. W. Reeves 11, E. J. Reeves 8, Smith 12, Church 9, Forthingham 13, Tucker 10, Ackerman 11, Eich 13, Grimm 14, Parker 11, L. Willard 10, Wooster 10, Drake 9, Young 11.

Extra No. 5, 10 bluebirds, unknown traps, known angles: Hale 6, Forthingham 8, Tucker 8, Ackerman 5, Kennedy 8, Grimm 8, A. W. Adams 6, Bennett 6, L. C. Willard 6, Bingham 7, Rigby 7, Geo. Gleiman 8, Holt 8, Redwing 10, Parmelee 7, Heikes 8, Funk 6, Merrill 6, Reak 7, Lansden 5, Elliott 8, Hastings 3, O'Brien 6, Rex 8, Millard 6, Wolverson 7, Keefe 7, Partington 7, Budd 9, Park 7, J. H. Hale 12, Kleinman 18, A. W. Adams 17, Lein 16, Read 22, Holt 16, Brelsford 18, Kleinman 18, B. B. Patterson 15, Wolverson 20, Marshall 22, L. C. Willard 21, Church 14, Robson 15, Eich 20, Bennett 23, Lemm 20, B. White 23, Merrill 19, Rex 25, Pumphrey 22, O'Brien 23, Partington 24, Jacksnipe 18, Palmer 16, Hicks 20, Wood 21, Minard 22.

Extra No. 8, 15 bluebirds, \$3: Tucker 12, Rigby 11, Kleinman 9, A. W. Adams 13, Marshall 13, Holt 12, Brelsford 13, Heikes 13, Grimm 12, Edwards 12, Keefe 8, Park 7, Bingham 13, Eich 12, Kleinman 18, A. W. Adams 17, Lein 16, Read 22, Holt 16, Brelsford 18, Kleinman 18, B. B. Patterson 15, Wolverson 20, Marshall 22, L. C. Willard 21, Church 14, Robson 15, Eich 20, Bennett 23, Lemm 20, B. White 23, Merrill 19, Rex 25, Pumphrey 22, O'Brien 23, Partington 24, Jacksnipe 18, Palmer 16, Hicks 20, Wood 21, Minard 22.

Thursday, Fourth Day, June 8.

Weather still admirable, with a good breeze in the afternoon. Shooting continued in the great 30-bird sweep, the live bird event of the World's Fair open shoot, which attained an entry of 29. This event was rather full of surprises. Only one man went straight, J. A. Rubie, shooting under one of his aliases as "White." At the 15 hole Rubie went to Jack Parker, who was straight at 15, and made a whispered straight he was to give the other \$50. He also whispered to Elliott, who was straight at 15, but it is not known that he made an arrangement. Both Parker and Elliott fell out during their last 5. Rubie paid Jack Parker \$50, which still left him a big winner out of the first money, \$334, unless Mr. Elliott had a mechanic's lien on another \$50 or Illinois rules change with him that if either continued on out with 20 straight he was to give the other \$50. To gain entries the clause was waived, and the shooters made it go as you please. This clause is really a good one. Nothing can be more awkward or unsportsmanlike than the popular position, with gun glued to the shoulder, which the money-making system of taking no chances has brought into vogue. The score:

J. A. Rubie ("White") won first alone, nominally \$234. Ties on 17 took \$35 each. Ties on 18 took \$24 each. The 14 men tied on 17 shot except Solomon and Reckro, who drew pro rata \$1.45 each. At the sixth the bird G. M. Hershey missed and A. C. Patterson, the only other left in, killed his bird and won fourth alone, taking \$50.20.

In the next live bird event the entry was thirty-five, so large that it was after 7 o'clock in the evening when the last gun was fired. The birds were then not quite so hard, but even the last squad had only one straight, Mr. Bingham, who makes straight this week whenever he can like it. The score:

Contest at 7 live birds; \$7.50, birds included; 3 moneys:

M. J. Eich.—No, I didn't win the diamond badge again this year. What do you take me for? I don't want the earth, and I'm no perpetual star.

J. A. Ruble.—Yes, my gun is a hard kicker, but it has to work hard to even get a tie out of me.

Eddie Bingham.—Yes, I load my own cartridges, but I don't think that affected my score in the diamond badge shoot. Most people have excuses to offer when anything happens, but I have no excuses for my shooting at all.

G. W. Revroat.—When the referee says I have broken twenty-five bluecocks straight in a twenty-five-bird event, I have no kick coming. **Dick Merrill of Milwaukee.**—When there is a shoot on like this you don't catch me up town trying to see the Infanta of Spain.

W. C. Scott of England.—I have noticed that the winner of the L. C. Smith cup used U. M. C. shells, a Montgomery Ward & Co. load and a Scott hammerless gun.

A. V. Drake.—I am using my new gun, made by the Hunter Arms Co., and it suits me first-rate. I only want them all.

An Amateur.—What, that man draw a bead on a target; he couldn't draw a bead on a glass of soda water. **Jesse Humphrey.**—Under a good swift system of management twice as many targets could be shot here and twice as much money made. You ought to have seen the Columbus shoot.

F. A. Place.—I missed four live birds straight, but no one can make me believe that I drop birds for Place (joke).

John Kleinman.—You may call a 10-bore a gas retort or a cannon or anything else you like, but when shooting a 10-bore at the traps handicapped himself. Still, when the Kleinmauss used to shoot ducks for market, they all used 10-bore. But that's different.

Easton.—No, these shoots are not strictly for bodily recreation. They are contests of skill. Dropping for place ought to be abolished. For when it is done the one that drops isn't the one that's hurt. I wouldn't drop for place unless I got a chance. **W. H. Den.**—No, it is a mistake to think an amateur is a concessionaire. He is simply an humble individual who puts himself down as one who loves his fellow man.

Mudspine.—It's funny how a man wins 'n' praises himself, 'n' when he loses he blames his gun.

Capt. E. O. Hard of Cincinnati.—No, I am not shooting any at the traps here. I am up here to see the Fair, and only came over to the traps here to see the boys and the shooting.

F. E. Coppervell.—Yes, I can see a mighty small piece of a broken target, but I'm blamed if I can see a load of shot flying through the air as some fellows here can.

George Watson.—My moustache is not so large now as it will be next June, when the roses bloom again.

A. Hove, President of the Tolleston Club.—In one of our late damage suits, brought by a trespasser our watchman had thrashed and put off, an Indiana jury gave a verdict of over \$10,000 against us. The judge set it aside as excessive, cut it down to \$1,200, and was not minimal to our appeal. We will never pay these fellows one cent, and you may depend everyone of these cases goes to the Supreme Court before we stop. As to the Indiana State suit to recover our meandered lands, I do not see how it can affect us. The bulk of our land we hold through possession of the U. S. patents. When the land has reverted to the Government it will be time for Indiana to go after it. The Tolleston Club will maintain its rights.

The World's Fair.—Am I in it with a shoot? Well, I should say yes. Is a shoot in it with me? Well, I expect not. **The Convention.**—Under a spreading chestnut tree (To be continued in our next convention).

N. Rowe.—I must admit that there do appear to be discrepancies in certain parts of the Illinois rules. **The Dodo Rules.**—Get on to us! **The Shooters.**—We are on to you.

909 Security Building, Chicago. E. HOUGH, B. WATKINS.

NEBRASKA STATE.

OMAHA, May 28.—*Editor Forest and Stream:* The seventeenth annual tournament and convention of the Nebraska State Sportsmen's Association, held here May 25 to 28 inclusive, was the best and most enjoyed meeting the association has ever had. We were blessed with fine weather and a good attendance of visitors. The number of entries in the different matches were neither too large nor too few—just enough to give all the amount of shooting necessary to appease their shooting appetites.

In the convention held Wednesday, May 24, clubs were represented from Omaha, Hastings, Wood County, Lincoln, Stanton, Kearney, Arapahoe, Tekamah, Columbus and Central City.

After the usual routine of business a vote was taken on the place of holding the next convention and tournament, resulting in the unanimous selection of Columbus, Neb. The following officers were elected for the ensuing year: Geo. Schroeder, of Columbus, Neb., President; D. B. Gray, Syracuse, Neb., Vice President; W. H. Den, Columbus, Secretary; Dr. J. H. Arnold, Columbus, Treasurer; and T. L. Ackerman, third member of the executive committee. A vote of thanks was extended the retiring officers for their efforts during the past year.

The following gentlemen attended the tournament: C. W. Budd, Des Moines; W. H. Harrison and Reynard, Grand Island; J. E. Stouffer, Kearney; G. A. Schroeder, Wood County; Geo. Loomis, Lincoln; Dunlap, Ia.; Al Connor and Roth, Central City; Geo. Lyons and Geo. Wheelock, Sioux City; J. W. Den, Arapahoe; F. and Milo Miller, York; J. G. Brown, Henderson, Ia.; Jake Cahill, Florida, Ia.; Mr. Hershey, Kansas City, Mo.; Mr. W. Carson, Ia.; W. H. Evans, Red Oak, Ia.; E. Clyde, Lincoln, Geo. Rogers and Lathlaw of Lincoln, J. L. Ackerman and W. H. Brown, Stanton, Neb.; E. D. Trotter, Kingsley, Ia.; Dan Bray and old man Linderman, Syracuse, Neb.; Geo. Nichols, Sutton, Neb.; C. A. Bardwell and Baird, Tekamah, Neb.; E. H. Smith, Kearney; Wm. Mallieau, Hastings; G. L. and W. E. Campbell, No. Bnd, Neb.; Frank Forney, Vauvursey, Ia.; Wm. Douglas Clarke, Nebraska; Uncle Ben of Brownville, Neb., and several others whose residence and front names the secretary failed to obtain. The resident shooters taking a hand were H. E. Gray, H. S. Hughes, Frank Fogg, G. W. Loomis, J. C. Read, H. D. Reed, F. Sanford, Frank Parmelee, J. Gwin, J. Hardin, M. C. Peters, J. H. Dumont, Jim Smard, Frank Cross, J. P. McFarlane, Wm. Hoagland, J. J. Dickey, W. E. Nason, W. E. Brewer, G. F. Brucker, Fred Blake, J. B. Smith, H. B. Kennedy and Judge J. H. Fields. The most interesting contest of the meeting was the C. E. Mares medal contest, emblematic of the State championship. There were 25 entries, Parmelee rightfully winning on 20 straight kills. Scores follow:

Match at 10 live birds, \$1.50 entrance, 3 moneys:
Brown.....0.02011220-7
Mack.....0.02011221-8
Loomis.....0.02011222-9
Hughes.....0.02011223-10

Unknown Gun Club.

The regular monthly club shoot was held at Dexter Park, L. I., on Thursday June 8. Nearly all of the old club veterans were on hand, and shot at seven birds each, under modified Long Island rules, H. and T. traps. J. Flynn and J. Akhurst were the only straight scores with seven and divided the first money. Three scored six each and divided the second money, and the five shot off; J. Bohling being the winner with four straight. The scores:

A. Crooke.....	1213101111-8	W. Lair.....	2131021222-7

Sweep No. 1, 5 birds: Dr. Wynn 4, A. Crooke 2, J. A. Stuart 4, J. Brixey 5, W. Lair 4, Dr. Van Ord 4.
Sweep No. 2, 5 birds: Dr. Wynn 4, A. Crooke 4, W. Lair 3, Dr. Van Ord 3, C. W. Wingert 3.
Sweep No. 3, 5 birds: Dr. Wynn 5, A. Crooke 4, J. A. Stuart 2, J. Brixey 3, W. Lair 4, Dr. Van Ord 4, C. W. Wingert 5.

Answers to Correspondents.

No notice taken of anonymous communications.

T. O. H.—How can No. 8 shot be loaded for a full-choked gun to make a large pattern? Ans. Load with two pink-edge wads over the powder and one pink-edge wad over the shot. This will cause the shot to scatter, giving a considerably larger killing circle at certain ranges.

C. H. W., Amsterdam, N. Y.—We have near here a large reservoir covering about 1,000 acres. It is well stocked with pickerel, and I want to put in some other fish that will be a good food fish and will live with the pickerel. Had been thinking of German carp. Will they take the hook? Will they hold their own with pickerel? The water is creek water, clear, but not spring water; bottom muddy. What would you recommend for us to put in? Ans. Carp would undoubtedly flourish in the water you mention, but the advisability of stocking with them is an open question. They are not an easy fish to catch, and once introduced it is next to impossible to get rid of them on account of their habit of burrowing in the mud. Their flesh is not considered palatable by many. On the whole, we think bass or perch would prove much more satisfactory for your purpose. If you try bass you should procure fish at least a year old, as younger fish might not be able to hold their own against the pickerel.

H. R. W., St. Louis.—Please explain the difference, if any, between the standard American target for rifle practice, 30yds. range, and the Massachusetts target, and oblige. The above refers to the possible of each target particularly. Ans. The black in both targets measures 8 in. in diameter, and thus corresponds exactly in size with the Creedmoor bullseye, but the targets have no other important point of similarity. The possible for 10 shots on the Massachusetts target is 120; that on the standard 100, the inner ring in the first place counting 12 and in the second 10. As the 10-ring on the standard target measures only 3.36 in. in diameter, while the 12-ring on the Massachusetts target measures 4 in., it is a much more difficult matter to secure the highest possible on the former than on the latter. The black in the Massachusetts target is only subdivided once, being included within the 11-circle. In the standard target it is subdivided twice and includes the 8, 9 and 10-circles.

Summer Homes.

The New Outing Book

TWO HUNDRED MILES ON THE DELAWARE RIVER, a canoe cruise from its headwaters to the falls at Trenton.

By J. WALLACE HOFF.
(Park Island Canoeing Association.)

Says the Trenton True American: "It is not only to canoeists that this charming sketch will afford pleasant reading, because there is woven into its professional details a description of the scenery along the Delaware, historical facts connected with its history and legends of the Indian tribe who received their name from the stream. The whole story is well told, and in charming language, and the typography is such as to commend it to the more fastidious reader."

Ask your book seller for it. Sent post paid on receipt of price, \$1.50, from the BRANDT PRESS, Box 628, Trenton, N. J.

TENTS AND CAMPING

Is the subject of a new book called

Gypsy Tents and How to Use Them.

It gives a vast amount of information about how to live out of doors. Besides tents, how to make and put them up, it tells of camp fires, camps, pack saddles, cooking utensils, bedding and clothing, and the joys and sorrows of camping. All outdoors need it. Fully illustrated. - Price \$1.25.

MEMBERSHIP SHARES

IN THE

Triton Fish and Game Club,

CANADA.

There has just been incorporated under the above title the finest fishing and gunning association in Canada. This preserve consists of 102,000 acres, having within its borders over fifty lakes and a score of rivers and mountain streams, all of which swarm with trout ranging from 6lbs. (*Salmo fontinalis* only.) The virgin wilderness teems with small game. Of the larger kinds the caribou abounds. Moose and black bear are fairly plentiful, as also beaver, otter and other fur-bearing animals. The Triton Club is situated 100 miles north of Quebec, on the line of the Quebec & Lake St. John Railway, and is reached in twenty-four hours easy journey (by rail) from New York City. (See prospectus.) A limited number of shares is offered to gentlemen of unexceptionable references. As a summer resort for both gentlemen and ladies the Triton Club offers great attractions, in addition to the best fishing and shooting to be had on this continent, at a very low cost. The shares are \$250 each, and are an absolutely safe investment. Intending purchasers should carefully examine Sec. 4 of constitution, also pages 12 and 24 of by-laws about membership certificates, agents, membership cards, route and mode of payments. For Prospectus, By-Laws, Maps, etc., and full information address

Messrs. TOWNSEND & HOWARD,

AND THIS PAPER.

FOR SALE.

Camp Ground,

SARANAC LAKE,

Adirondack Mountains.

Point of land just north of Sweeney Carry and Hotel Wawbeek, well wooded, high elevation, large water front, with a superb view of the country to the north, east and south, easy of access, and one of the finest camping spots in this whole country, containing about 45 acres. Address P. O. Box 1,960, Boston, Mass., for further particulars.

TO SPORTSMEN.

Two gentlemen owning one of the finest fishing and hunting preserves in the Adirondacks, would sell a one-half interest in the property to a party of two or four gentlemen. The lake, nearly a mile long, surrounded by virgin forest, is renowned for its fine trout and as a resort for deer. It can be reached in nine hours from Utica. A comfortable furnished house with six rooms, out-buildings, garden, artificial pond for fish fry. Five miles of road built. Eight different lakes can be visited from camp in from one to three hours' walk. References exchanged. Address

24 SPORTSMAN, Utica, N. Y.

TROUT LAKES FOR SALE.

I offer for sale a portion of my Adirondack preserve, from 1,000 to 2,000 acres of land, with four lakes. Three log cabins on the property, good road to two of the lakes, easy trail to the other two. This property is suitable for a club or for private resorts. One lake is stocked with salmon trout, the others with speckled trout, 30,000 planted last May, and shall plant as many more this year. Will sell any one lake with a portion of the land. Address

DR. J. DE V. MOORE, 157 Park avenue, Utica, N. Y.

Hunting Grounds For Sale.

We offer for sale one farm, 600 acres, situate in Warren county, North Carolina, six miles from Macon, same from Littleton. Quail, deer, wild turkey, ducks, geese and old hares on and near the farm. Fine grain, cotton, tobacco and fruit farm. Fair hunting and outposts. Hunting privilege on adjoining farms can be bought cheap. 14 hours from New York via S. A. L. Apply to owners. Price, \$6 per acre.

EGERTON BROS., Macon, N. C.

TO LOVERS OF FISHING.—WE NOW have on our list membership shares at reasonable figures in some of the best salmon, trout and black and sea bass fishing clubs of the country; also rights in two Canadian salmon rivers. The season just opened promises to be a remarkable one, and we invite correspondence. TOWNSEND & HOWARD, Room 919, Temple Court, New York City.

FOR SALE AT A REASONABLE PRICE.—A tract of about 5,000 acres of woodland containing a lake of fifty acres, suitable for bass. A celebrated trout stream runs two miles through the property; also good quail and partridge shooting. Four hours from New York. For particulars, address P. O. Box 432, Warwick, Orange Co., N. Y.

ALBEMARLE AND PAMPLICO CRUISING AND Hunting Association.—Bear, Deer, Wild Turkey, Quail, Swan, Geese, Brant, Duck, Curlew, Snipe. Finest fishing: Bluefish, Striped Bass, Weakfish, Drum, etc. Membership limited to 20. One more subscriber wanted. H. A. Weeks, 74 Murray st., N. Y.

Hotels for Sportsmen.

Bromfield House, Boston.

EUROPEAN PLAN
MESSENGER, Proprietor.

Neversink Valley
HOUSE,

A BLANK DAY.

BUT IT WAS NOT ON THE

RAILROAD.

The sportsman of the North often has a blank day. Indeed, no Northern shooter knows much about shooting until he has shot in the South, where the superb natural conditions have left the game in undiminished plenty in the covers.

Don't Go After Bear

to the Rockies. Go to the wide river bottoms of Mississippi or Louisiana and you will get one.

Don't Go After Turkeys

to the Great West, but to the Great South, in Mississippi and Louisiana, where the unbounded woodlands hold abundance of these noble birds.

Don't Go After Ducks

in the North, and work hard for days for a dozen ducks. Go South, to Louisiana and Texas, and learn what wildfowl shooting is.

The Quail, Woodcock and Snipe shooting of the South is such as the Northern hunter never dreamed of. A genial climate, a pleasant people, a six months open season, and birds until you want no more.

The Illinois Central Road runs direct to all this country, and is the only road that does.

A. H. HANSON,

Gen. Pass. Agent, Illinois Central R. R., Chicago.

Routes for Sportsmen.

When planning your annual tour remember that this company controls over 4,100 miles of railway equipped in the most approved modern style, passing through a magnificent country noted for its unsurpassed facilities for sport.

A FEW OF THE PRINCIPAL RESORTS.

ANDROSOGGIN LAKE (via Bryant's Pond or Bethel).—Excellent trout fishing and game, large and small, of every description.

THE WHITE MOUNTAINS (via Gorham, N. H.).—For trout and varieties of game.

THE SALMON RESORTS of Quebec, New Brunswick and Nova Scotia (reached via Quebec).

LAKE ST. JOHN REGION (via Quebec).—For ouananiche, trout, caribou, bear, moose, beaver, otter, etc.

THE RIVER ST. LAWRENCE (in the neighborhood of the line for 400 miles).—For muscalonge, pike, bass, whitefish, pickerel, perch.

THE THOUSAND ISLANDS (via Gananoque or Kingston).—For pickerel, black bass, muscalonge, pike.

MUSKOKA LAKE.—The best place on the continent for fishing, shooting and camping. All varieties of fish and game.

PARRY SOUND AND GEORGIAN BAY (reached via Penetang, Midland, Collingwood, etc.) for black bass, pickerel, deer, partridge, bear, otter, etc.

AKES ONTARIO, ERIE, HURON AND MICHIGAN (via stations at all principal ports).

LAKE SUPERIOR (via Collingwood, Wiarton, Sarnia in connection with steamship lines).

The charges for hotels, guides and camping at many of the fishing waters named above are extremely low. Full particulars of same are published in a pamphlet descriptive of the "Fishing and Hunting Resorts of the Grand Trunk Railway," which will be forwarded free on application to the company's principal agents, or to the General Passenger Agent at Montreal.

LIVE BIRDS AND ARTIFICIAL TARGETS.

ONE of the chief prizes competed for at the annual tournament in New York State is the Dean Richmond trophy, a handsome piece of silver valued at \$1,150. This was presented to the Association years ago, when there were no artificial birds to shoot at, and the original conditions of live bird shooting still govern the competition. Of late years the tournament managers have found difficulty in procuring birds for tournament purposes, and in addition to this trouble, it is generally conceded that live bird shooting in sweltering summer weather is not a high grade of competition. In the Rochester meeting last week a proposition was broached to alter the rules of the Dean Richmond competition by substituting artificial targets for live birds. The proposition was based upon the contention that the shooting of live birds at the trap is a sport which involves cruelty. The proposal provoked opposition and was tabled for consideration a year hence.

It is easily enough demonstrated that the trap-shooting of pigeons is a cruel practice, provided the argument is advanced from the standpoint of one who believes that all shooting of game is cruel. But he who attempts to show that it is cruel to kill pigeons at the trap while it is not cruel to kill quail in the field, has a task in dialectics which it would require more than average skill to accomplish. The cruelty of pigeon shooting is one of those topics about which men may argue for hours and days and part again each more set in his belief than before. There is little likelihood that prolonged discussion would have converted either side at Rochester the other day.

Quite aside from any consideration of the question of cruelty or no cruelty, there is some reason for believing that the Dean Richmond competition would command more interest and prove a greater success if it were converted into a match shot under modern conditions. The sport of trap-shooting in this country owes its development to the substitution of artificial targets for live birds. The clays have brought the sport within the means of the multitude, within the opportunities of the public as to expenditure of time and money. Nor is there any gain-saying that the sport of shooting artificial targets has been taken up as a pastime by many scores of shooters who would have found no pleasure in live-bird shooting at the trap. The typical modern trap-shooter, the man who shoots for the fun there is in it, is not a live bird shooter, but an artificial target shooter. The success of the average tournament, like that just held at Rochester, depends on the artificial target shooters. They are the host. Nine of every ten trap-shooters in New York State to-day are target shooters. Does any one imagine that if the donor of the Dean Richmond trophy had presented it to the Association this year, designing it for the real good of the organization, it would have been provided for any other than artificial target competition? Apart, then, from the "cruelty" consideration and as a business expedient, might it not be worth while trying the experiment, for one year at least, of a Dean Richmond competition at the artificial targets?

TRUSTEES OF PUBLIC RESERVATIONS.

THE whole country has been roused to righteous wrath by the reports of the desecration wrought at Gettysburg by a vandalistic railroad company. It is to the lasting disgrace of the people of this country that measures have not been taken long since to keep sacred, as it should be kept sacred, this blood-consecrated field. But vandal-devastated Gettysburg is only one of scores and hundreds of localities, which, because of their historic associations or their natural beauty, should have been set apart to be preserved forever as public possessions for use and enjoyment and inspiration and uplifting. For the most part opportunities for acquiring such sites have now passed by, but there is yet abundant reward awaiting public-spirited action.

Already, it is true, something has been done. The National Government has set apart national parks; State authorities have made similar provisions, although as a rule action has been delayed, as with the Adirondacks of New York, until individuals and clubs have made sure of the most desirable tracts; and town and municipal authorities have, in repeated instances, shown public spirit in the same field. But the fact remains that as a people we are culpably indifferent on this subject, and have permitted golden opportunities to pass unheeded. There are evidences of changing sentiment, not the least encouraging among them being a Massachusetts institution, recently established, known as the Trustees of Public Reservations. The province of the Trustees is to hold and preserve sites of historic interest and spots of beautiful scenery. The Board was established in 1891 and grew out of the public-spirited suggestions of members of the Appalachian Mountain Club, of Boston. The history of the movement is worthy of careful study, for the example set by Massachusetts is one which may well be followed by every State which possesses sites worthy of preservation for the people.

In May, 1890, on call of the club, a meeting was held in Boston, to consider a plan for the preservation of fine natural scenes and historical sites. The scheme proposed and afterward adopted was this:

1. The establishment of a Board of Trustees.
2. The Trustees to be empowered to acquire by gift from individuals or bodies by subscribers, parcels of real estate possessing natural beauty or historical interest, and to hold the same, together with funds for the maintenance thereof, free of all taxes.
3. The Trustees to be required to open to the public, under suitable regulations, all such parcels of their real estate as lie within the limits of towns and cities which may provide police protection for the same.
4. The Trustees to be prohibited from conveying real estate once accepted by them, except to towns and cities for public uses.

A bill embodying this plan was submitted in the Legislature in the following session, and became a law, designating the members of the Board. No sooner was the organization of the Board made public than responses began to come in from individuals who tendered tracts of land, the first one coming from a lady of Stoneham, who proffered a wood of twenty acres in that town, and it was accepted. Numerous suggestions were made recommending that the trustees should acquire designated sites, but to these the Board replied:

This Board does not possess either the money or the authority to enable it to snatch real estate out of the hands of anybody. Like the trustees of a public art museum, this Board stands ready to undertake the care of such precious things as may be placed in its charge. It exists "to facilitate the preservation of beautiful and historical places in Massachusetts" by providing an efficient and permanent organization through which individuals and bodies of subscribers may accomplish their several desires.

It should not be assumed that the Massachusetts Trustees of Public Reservations have been content to serve merely as passive holders of the properties entrusted to their care. They have undertaken in various ways to stimulate public interest and sympathy to the end that the mountain tops of the interior, the cliffs and beaches of the seashore, and scenes of special beauty here and there, all of which are so rapidly passing into control of private owners, may be rescued or redeemed for the public. To this end they have enlisted the services of Mr. J. B. Harrison, well known for his efficient work in behalf of the Niagara Falls reservation and more recently of the New Hampshire forests. The results of Mr. Harrison's investigations have been embodied in a report, which is so full of suggestiveness that we shall refer to it at length hereafter.

The successful establishment of this unique Massachusetts institution clearly shows a practical way to the public preservation of desirable localities in every part of the land. There should be a board of trustees of public

reservation in every State of the Union. Its establishment would mean no strike on the Treasury, no increase in appropriation bills. It would cost the State absolutely nothing; it would render the State a service of inestimable value.

TWENTY YEARS OF LEAD KEELS.

THE success of the extreme fin-keel as opposed to the semi-fin type is as yet problematical in the larger classes, and while there is much in favor of the former, it is still a question whether Pilgrim or the new Paine boat will repeat the successes of Wenonah and El Chico. From what has been seen, however, of the extreme ballast fin, it is most probable that a new and very fast type of sailing yacht has been developed, in which the principle of low ballast has been carried to a point never dreamed of at the time of its first inception.

The twenty years between 1873 and 1893 is a most interesting epoch in yachting, as it has witnessed the development of the lead keel from the condition of an almost immaterial adjunct, timidly introduced as an experiment, to that of the controlling factor of yacht designing.

Both the simple lead keel and the bulb or ballast fin are not inventions but growths, the crude idea of each recurring again and again as we go backward in yachting history, tested with more or less discouraging results by one after another, until the right man at last brings success out of failure.

It was in 1873, after numerous preliminary trials with iron or lead outside the keel in small quantities, that the famous 20-tonner Vanessa was built by Hatcher with a lead keel of sufficient size to test the value of the then new principle. The success of Vanessa as a racer finally decided the question, and from that date onward the lead keel increased in size and importance until, in the last yachts built under the tonnage rule, the breadth of the keel itself had become abnormally great in proportion to the narrow beam of the hull, while the weight of lead was as much as double that of the entire hull, rig and equipment.

Just at the time when this development had reached its limit a number of changes took place; the old tonnage rule was abandoned, the international races of 1885-6-7 in American waters resulted in the defeat of the heavy displacement craft, and a general exchange of ideas between the two nations followed. The result was the moderate cutter of 1888 to 1890, Dragon, Vreda, Yarana and Minerva on the one side and the American 40-footers on the other.

The rapid changes in the direction of less displacement with a maximum of power and lateral resistance tended of themselves in the direction of the fin-keel, and the various stages of reduced deadwood in existing craft, and of a wide, shoal hull with a lead fin equivalent to a fixed centerboard, made easy the final step to the concentration of all the weight on the end of the lever in the form of a metal plate fin with its leaden bulb or cigar.

In its original form the lead keel involved the disposal of a very great weight at the end of a short lever, as in Genesta, with some seventy tons carried on a maximum draft of about 13ft. In its most recent form the weight is greatly diminished while the lever is proportionately lengthened, the new Pilgrim carrying only twenty tons of lead, but on a draft of 22ft.

A change so radical and striking as this could hardly fail to exert a marked influence on every detail of yacht designing and construction, and even the most experienced yachtsmen are content to await the outcome of this season's races before attempting to predict the future of the fin-keel type and of yacht racing.

Our Boston correspondent sends us a gruesome story of the capture of moose for Maine's exhibit in the World's Fair. If the circumstances were as related it would appear that the only decent thing left for the agents to do would have been to buy the carcasses and say nothing about it. No credit can come to Maine by the exhibition of these spoils of a spring-time atrocity in her moose forests; the State might better go without any moose show at all.

Attention is called again to the fact that the two volumes begin with the first issues in January and July respectively. The issue of next week will be the last number of Vol. XXXIX. It will also mark the completion of twenty years since the establishment of this journal in 1872.

The Sportsman Tourist.

THE COUNTRY CLUB'S BULL'S HEAD BREAKFAST.

SAN FRANCISCO, May 6.—*Editor Forest and Stream:* This is the age of clubs, and when talking of them California comes to the front for its number and variety, social, sporting, athletic and yachting.

Among the leading social clubs the Pacific-Union probably stands at the head; it is an amalgamation of the Union and Pacific, comprising the wealthiest and most aristocratic of our Four Hundred. Next on the list comes the German and Bohemian, the latter with a membership of 800. It was originally what might be called of a literary character, comprised of newspaper men and writers for the press, and in keeping with its character was appropriately called the Bohemian. It numbered among its members the brightest and most intellectual men on the Coast, most of whom have "gone over the divide" and "joined the great majority," giving way to a succeeding generation of younger men with little ambition to keep up the intellectual character of the old time club; although it still numbers some clever literary men, the majority care more for the luxurious *dolce far niente* comforts that its present sumptuousness affords.

The Pacific-Union is composed mostly of rich young men, a large proportion of whom run rather to the popular sports of the day, more especially shooting, and to afford scope for this pastime the Country Club was organized, to which only members of the Pacific-Union are eligible. This club holds the lease of a tract of 74,000 acres of preserves a couple of hours' ride from the city, a noble domain composed of forest and field, having a coast range bordering on the Pacific Ocean for forty miles. It may be called the most grand in the way of scenery and adaptation for the purpose, of any tract of land in California, and that is saying a good deal for a country abounding in the richest soil, noblest forests and most beautiful scenery of any State in the Union.

The tract of land under lease to the Country Club was originally one of the old Spanish grants with which the Government of Mexico so liberally rewarded the services of its many generals and men of rank, who, tempted by the facilities afforded for cattle raising, migrated from the cities of old Mexico, and struck out to its then almost unknown northern possessions. These Spanish grants covered a great portion of the best lands of California for grazing, and here the old aristocrats came and began their cattle raising, and truly might it be said that they covered a thousand hills. He was a poor man indeed who did not own a herd of a hundred thousand head of cattle, and from 1,000 to 3,000 horses roaming over a hundred thousand acres of rich pasture land. Here the old Dons lived, with their "peons" and vaqueros, independent, and as free as air, for although nominally acknowledging allegiance to Mexico, they were too far away from the seat of government to come within the jurisdiction of tax gatherers. Occasionally, when in want of cavalry horses, the Government would make a requisition on the *hidalgos* for a supply, which, with the characteristic generosity of the Spanish race, was freely contributed. One old grandee on one occasion presented the Government with a band of 3,000 from his stock, and still had left a thousand or two for his own use.

Those were the days when the traveler was ever welcome to the hospitality of the owner of the acres, the cattle and the horses. When he rode up to the door of the habitation he was received with open arms, and whatever the house contained was his by courtesy. In the morning, in place of his weary steed, he found a fresh one, the best in the band, saddled and bridled for his use. This he exchanged again at the next ranch in like manner, with no thought of money in the "swap," as it would have been equivalent to an insult to offer to pay for a horse. Money there was none. Cattle hides and horses constituted the currency, except once a year when the ship of the Boston agency for purchasing hides arrived, and then the year's collection was sold and the pay received, some in barter and some in money. Then followed fandangoes and grand Spanish frolics, when whole families mounted horses and set out to visit the settlement of San Francisco or Monterey, a day's journey distant. There, with the recklessness of Spanish character, they bought trinkets and gay cloths, and the year's supply of tobacco for cigarettes, returning home loaded down with knick-knacks, but without a cent in their pockets. Those were the happy days of unknown California, when the grizzly roamed the forest, deer and elk by the thousands mingled with the cattle, and when it was not necessary to go a quarter of a mile to bag a backload of ducks and geese. Even when later San Francisco numbered 20,000 inhabitants canvasback ducks could be shot by the hundreds on the spot where the Government proposes to build the new post-office and have paid \$700,000 or \$800,000 for what was then a boghole of a lake or swamp—and by the same token there will be a happy time finding bottom for the foundation.

Things were in this primitive and happy condition when gold was discovered and the rush of people began. The old *hidalgos* looked on with astonishment to see the enterprising squatter taking possession of his land, killing his cattle and encroaching on his very doorstep. He saw that unless he sold soon he would have nothing left, and tempted by the sight of bright dollars and with no knowledge of business he sold acre after acre, or in most cases his entire ranch at a dollar an acre, and felt happy to obtain such a price. In this way these valuable grants were picked up by shrewd, far-seeing Americans, and especially by our wide-awake Irish immigrants.

Among the most desirable of these Spanish grants was the one now occupied under lease by the Country Club, purchased in early days by Judge Shafter and one or two other partners. It has continued concentrated in the ownership of the Shafter family and their descendants. Mr. Charles Webb Howard and Mr. John K. Orr, who married into the family, own the controlling interest. Lying as the land does—along the coast, the grass is kept fresh and green the year around by the sea fogs, and hence is in great demand for dairy farms; and 40,000 cows are feeding on the luxuriant grass of its valleys and cañons, furnishing milk and butter to San Francisco.

But to go back to the club, from which subject I have wandered. This association—composed of 100 members, embracing the swell young men of San Francisco, the

richest, the best shots, the best fishermen, all first-class gentlemen, the *crème de la crème* of the city—have the sole right to fish and shoot over this princely domain. The territory abounds in running trout streams, lakes, open glades, deep cañons so dense in foliage that the sun never reaches the ground; uplands of forests of gigantic oaks and pines, mountains, dells and every variety of vegetation, splendid cover for quail, marshes for snipe, deer at every turn of the roads winding through deep glens, and an occasional bear. In former times it was the terrible grizzly, now the brown (cinnamon) and the black. In fact the country is simply the sportsman's paradise, and it is no wonder that there is a large list of names awaiting membership, which it will require years to reach, as few die and none resign. The tenacity to life of its members is most astonishing. It is too good a thing to leave, and as for resigning, such a thing has never been heard of.

The land composing the preserve, as I have mentioned, lies along the ocean coast, for forty miles, affording splendid salt-water fishing, with occasional inlets where salmon run up in the season.

The club house is an unpretentious affair of one story, in fact a bungalow standing on elevated ground, with a sloping lawn in front, the porch covered with climbing flowers and rose bushes, shading the long piazza, opening from which are the rooms for forty-five members. There are horses in the stable, dogs in the kennel and guns in the gun house, in front of which are the traps for artificial target shooting. Sloping down for 1,000 yds. the ground is open, then contracts into a shady dell, through which the road winds and is lost in the forest, until it comes out on the ocean bluffs. The club has paid no attention to show, but has gone in most sensibly for comfort, and happy is the member who is free to spend days in the dreamy enjoyment of a grandfather chair on the porch, inhaling the delicious pure atmosphere. It is simply bliss.

And now I am coming to the gist of the whole business, and that is, to tell you of the grand feast, or barbecue, given by the club the other day to members and guests, to the number of nearly a hundred and fifty, who will long have the blessed memory of one of the most enjoyable occasions of an ordinary lifetime. I call it a barbecue, but that is only the Americanized definition of what is known here as a "bull's head breakfast," a Spanish dish called in that language a *fiesta cabeza del toro*. It sounds better in the Spanish, but tastes just as well in plain American, although we are indebted to the native Spanish for its introduction to American epicures.

You people East, who think you are sitting on the steps of epicurean paradise when you eat terrapin at \$3 per plate, should come to California and be introduced to a bull's head breakfast, cooked by a Spanish artist. It would be a revelation to you, and I should feel sorry for your friends who would have to listen ever after to your extolling description of the dish. Let me describe it. A hole is dug in the earth and the bottom usually lined with stones, then a hot fire heats them; and when the fire burns down the live coals are removed and damp sacks laid over, on which the head of the animal is laid, then covered with other damp sacks, then earth and straw—buried, in fact—and the heads allowed to bake and steam until thoroughly cooked—say eighteen hours. Then the pit is opened and the heads conveyed, smoking hot, to a side table, where the skillful carver first removes the skin and proceeds to carve. First the head is opened, and the tongue and the morsel at the roots constitute the tidbit. The cheeks are then carved, and so on until all is gone. Then another head; and so on, for it runneth not in the memory of man that one head was ever known to be sufficient to satisfy the sublime appetite that follows the first taste of this epicurean dish. As a necessary and important adjunct to the dish is the great Spanish national dish of frijoles (beans), cooked as only the Spanish can cook them, in comparison with which a Bostonian would turn green with envy. Then follows the crowning glory, called *huevas con chilo colorado*, which reduced to plain American means hard boiled eggs floating in a red hot sauce, of which the Mexican little red peppers are the enlivening element. This is a dressing for the gods as well as for the bull's head.

Another favorite Spanish dish is *tomates*. It consists of cornmeal, olives cut up, red peppers chopped fine and minced chicken, all inclosed in cornhusk tied up securely and roasted or boiled, I am not sure which, but I think boiled.

On the occasion in question, in which the subscriber by virtue of the courtesy of the club participated, a large circus tent was pitched on the lawn, in which the tables were set for 150 guests and members. At a given signal the cooks, dressed in true Spanish costume of maroon-colored velvet trousers, slashed at the seam and buttoned with silver-bell buttons, embroidered jackets à la matador and wide-brimmed sombreros, began to uncover the pit from whence the first installment of heads was borne to the big tent, and the work of carving began. It was hoped that good digestion waited on the appetites thereat, for never in the course of a long and varied life have I seen such bestowal of meat and drink.

The man next me sent his plate three times for *cabeza del toro* (bull's head) and three big plates of frijoles did he empty, three *tomates*, and "washed all down" with one entire bottle of claret. I feared I should have a case of "bust" on my hands, and said to him—he was a stranger: "My friend, you seem to have a healthy appetite and to enjoy the viands." He replied, "Well, I was rather hungry earlier; but I took a snack up at the club house which took off the edge, and I am sorry, too, for this is bulky." I looked to see if the pun was meant or an accident, but he was apparently perfectly innocent of any intent; and so I refrained from laughing, for it is as much as one's conscience permits him to do to laugh when called upon, and it is only a waste of the risibles to notice an accidental pun. An hour later I saw my friend stretched out on the grass, dozing, with his hand clasped caressingly over his stomach as if to preserve its contents intact as long as possible.

Twelve bull's heads had disappeared under the waistbands of the company. When I say "bulls" I do not mean "steers," which are reckoned not as good.

A chap commenting on the skill of the cooking and bountifulness of the supply, said: "On the last occasion of this kind, the manager undertook to dispense with a Spanish cook; and a nice mess he made of it. The heads were served up half-cooked, and all I got was three teeth and an ear, while my neighbor got a tuft of hair and one eye."

After the feast the shooters adjourned to the shooting ground, and for the next three hours matches were in order of the day, the band meantime discoursing music on the lawn. The gorged and non-shooting members gathered on the piazza and dozed and smoked, and bet on the matches; and some went to visit the dogs, some talked horses and fishing. Then the four-in-hand team drove up to the door; and the rather difficult problem of getting 150 people stowed away, with satchels, was admirably accomplished, and the long procession of team strung out on the road to the station where a special train awaited us. Thence we sped to Saucelito, and by special boat were landed in town, still full of bull's head, frijole *tomates* and gratitude to the members of the Country Club for one of the most enjoyable days of our long life spent lives. Three cheers were proposed, but we were too full for utterance, and they died away in a gentle murmur. It was a case of the boys and the frogs; lots of fun for us guests, but a labor of love for the executive members of the club; for if any one thinks it is child's play to plan and execute such a junket, let him try it. Your correspondent has had experience, and knows how it is himself; but in this instance no effort was apparent it all went off charmingly, and was a grand success without a hitch.

Your correspondent as a guest is indebted for a most enjoyable day, reviving as it did, the good old days when a good outing was of frequent occurrence, and we gave our minds to it. To Mr. John K. Orr, that crack sportsman and genial gentleman, I tender "much thanks" for his kind attentions and invitation to his shooting box on the club reserve, which, as one of the owners of the noble domain, he maintains, and the day will ever remain as one of the green spots in memory, and as after the intervening twenty-four hours good digestion has somewhat restored nature to its normal and vocal condition, I am now able to give the three cheers for the Country Club that were due at an earlier stage.

It is unnecessary to state that such a feast has a tendency to induce one's renewing his acquaintance with his forefathers and foremothers. In my own case the grand mothers did not occupy as much of my dreams as did the Spanish race. Suggestive of the dishes, a procession of *hidalgos* in doublets and broad sombreros pranced past their lively mustangs with bull's heads instead of the own proper noddles. Beautiful *senoritas* in short dresses embroidered stockings, yellow high-heel shoes, big counters, and lace mantillas, kneeled before me with platters loaded with *tomates* and "*huevas con chilo colorado*," beseeching me to partake. Through the whole night I protested. Bull's heads pranced up and down before me. *Tomates* danced fandangoes on my chest until broad daylight, when on awaking I was glad to find that it was all a dream and that in my much filled up condition I had not to eat all those bull's heads, all those *tomates* and *huevas* over again, not even to oblige a bev of kneeling *senoritas*. And so ends my tale of a bull's head breakfast à la Española. It is a bulky scheme and feed epicures would wait for if they ever tried the dish. Come to the land where every manner of good thing abounds, not the least of which is a bull's head breakfast à la Country Club.

PODGERS.

A NIGHT ADVENTURE ON THE LEVEE.

THE "Laconia Circle" levee is, as yet, of insufficient size. While their neighbors beyond the broad river work the crops and recline in their hammocks with a sense of security against inundation, the Circle folks have vigilantly watched their little levee night and day, in order to detect in its birth any sign of weakness, that such may be remedied ere it is too late.

One week since the water stood, in places, against the very top of the levee. The nights were dark and rainy—the levee (dividing broad fields on one side from a dense forest rising out of a sea of water on the other) was scene of loneliness, save when a riding guard passed quietly by or a pair of walking guards trudged on wit sentry-like tread, holding a whispered conversation. 'Squire Blackburn, a knight of valor in high-water time as in times of peace, was on duty as a volunteer riding guard. An experience which he relates is too good to keep. Says the 'Squire: "As I passed a very large snapping turtle, I was seized with a desire to capture him, but resisted the temptation when I remembered that a shot fired at such a time and place might cause much alarm. But this temptation grew too great when, an hour or later, I passed the same turtle on the same spot. I placed the muzzle of my .22 Winchester almost against his head and pulled. He showed, by one or two unusual movements, signs of slight discomfort, then became calm once more. I fired again. A few more sluggish movements and a start toward the water. A third bullet was started in through the back of his skull. He hesitated, as if to say, 'I'm getting tired of this foolishness.'"

"The night grew darker, but I could still see him outlined on the ground near the levee slope. I hated to give up my prize, yet did not want to reinforce his mental weight with any more bullets, so bethought me of another plan. Leaning over toward him, I was on the point of giving the old fellow a gentle pat on the head with the muzzle of my gun, when—Clap!!—and he had it fast between his ponderous jaws."

"At this moment my mule gave a snort and looked out into the bushes across the levee, bringing her earthly around until they were nearly in contact."

"Some one is trying to slip in to cut the levee!" thought I. With this I quickly endeavored to withdraw my gun from the turtle's custody, but found this more of a task than I had anticipated. To be candid, it began to daw upon me (and so did the cold shivers) that my gun was fast confined between the vise-like jaws of a reptile, an I a levee guard on duty! To cap the climax of my discomfort, a miscreant was approaching on levee cutting bent. My feelings at this moment cannot be fully described. Suppose the levee should be cut! I had no means of preventing it. Suppose again, that I should say, 'Yes, I saw them when they cut it, but a big turtle had my gun.' What a fool they'd set me down for. These are some of the harassing thoughts that chased each other through my mind, as I tugged at the gun. But tugged in vain. When gun moved, turtle moved—an turtle tenaciously held on.

"Seeing that it was no use, I clambered to the top of the levee, tramped back and forth, coughed, made myself conspicuous generally, and shortly remarked to the mule well above a whisper, 'You old crazy fool, I don't believe

you saw a soul! then resumed my tug-of-war with the turtle. Oh, but he was a whopper!

"Now came other misgivings. What if another guard should approach and find me in a half-bent posture, pulling on something which in the dark might be mistaken for a shovel handle. Without a word, he might shoot me down for a levee cutter. I again left the weapon in the care of the turtle and strode up and down the levee—a subdued man—completely baffled and disarmed by a snapping turtle!

"How long this state of affairs continued I cannot say. It seemed like an age. At last, in a fit of desperation, I resolved upon a last attempt.

"Noiselessly approaching his turtleship, I suddenly grasped the rifle and wrenched it with almost superhuman violence. With a sound like a pistol shot his mouth shut down on the space vacated by the rifle barrel, and I was again a guard with a gun (but a gun without a sight).

"I guess I've seen enough of you, old fellow," said I as I rode off, content that another aspiring sportsman should secure the prize for which I had made such a noble fight."

PECCARIES.

ONE morning in Mosquitia a wrinkled crone, white as to wool, and scaly, dark brown as to skin, gave me a cordial welcome by three words of shockingly profane English, taught to her as a proper and friendly salutation, no doubt, by some joke-loving reprobate. With a gesture she invited me to rest in one of the three or four hammocks of roughly twisted strands of bark that swung across the one room of the watala.

Then she sharply spoke a few words to the group of naked urchins, who stared curiously through the door behind her. The children scurried away. The old woman filled an iron pot with water and set it on the ends of the three iron pins which, driven into the earthen floor, were all the range this mansion boasted. They securely held the vessel six inches or so above the bed of glowing embers. She put the ends of a few sticks of pitchy pine on the coals, and a bright blaze at once flamed up, then resumed her task of cleaning a lot of fish, much like perch in appearance. As she scaled and disemboweled them she threw them into the pot. When that was rather more than half full of the fish she peeled three or four plantanos and laid them on the fish, then covered all with a leaf, which she snugly tucked in around the edges. Just then a couple of boys came in bearing a net full of oranges fresh from the trees and rich with most refreshing juice. They were followed by a lad who bore a cocoanut from which he had shaved a chip by one dextrous blow with his machete, through husk and shell and almost through the jelly-like white meat within. The point of the machete reamed out a circular bit of the kernel, and out the milk gushed. The milk disposed of, the lad split the nut and gave half to the younger children and the other half to a pet that had followed them into the hut. The like of that pet I had never before seen in a house, and what I had learned of the character of that kind led me to promptly lift my feet into the hammock and out of his reach.

He was some fifteen inches in height and may have been three feet in length. He was a "pepper and salt" in color, and exceedingly inquisitive and familiar in disposition. He nosed about my hammock and snapped his white tusks with a sharp sound that was suggestive to me of ragged gashes in bleeding legs; but to the children the sound and my care to keep my feet well out of the way were manifestly suggestive of fun.

After he had neatly scooped out the last vestige of meat from his half of the cocoanut and robbed the baby of what was left of her half, he laid himself flat on the dirt floor, almost under my hammock. I ventured to tickle his porcine majesty with a stick. He grunted softly and stretched his legs. I scratched more vigorously, and he showed his satisfaction more plainly. Then I dared to put my feet out of the hammock, and at last stood beside the prostrate peccary. He opened his little eyes, looked at me a brief moment, accepted me for a friend, and shut his eyes again in ecstatic enjoyment of a scratching that was more skillful and thorough than his owners had ever given to any created thing—except themselves.

From that time that peccary was my too constant friend and companion, my ready defender and my perhaps too ardent champion. Whenever and wherever I moved about that watala or the village, he was with me. If I knocked an orange or a mango from a tree, he was alert to pick it up for me—and to eat it for himself. If a common hog came near, or failed to move out of our way promptly, there would be a swift rush, a shriek of porcine agony or fear, and a vanishing hog. Then the peppery little pepper-and-salt rascal would trot along ahead of me, with abundant content and vanity.

What he would have done to any dog that might have been caught in our path I do not know. What I do know is that no dog in that village was so lost to all sense of prudence as to test the question. Whenever that pig and I came under a dog's notice, that dog went away. He usually stretched his legs nimbly; often he yelped as he fled.

Once a dog, a stranger in the village, hopped over the hewn cedar plank that was set up on edge across the door to keep pigs out and the babies in. He explored with becoming diffidence, being a stranger, yet willing to make acquaintance with human or with any scrap of food. *Sus americanus* happened to be busy just then and failed to notice the stranger before he was well away from the door. There was a rush and one snap of those tusks. The dog flew for the door. As he rose to clear the plank, the guardian of the household threw upward his nose, and a keen tusk cut a gash 2 or 3 in. long in the hindquarter of the victim. He tore howling in anguish down the hill and into the bush; my sweet pet returned to his bone, gleefully snapping his tusks like castanets.

Yet the sound is not quite like that of castanets. Nor is it like any other sound that I have ever heard. To try to describe it is like trying to describe the flavor of a fruit, a mango, for example, to one who has never tasted such a thing. One can say only it tastes like a — mango. Of one fact I feel quite sure. I am in no danger of mistaking the sound of the snap of a peccary's tusks for any other noise. Nor is there any risk that it will fail to send a shock tingling along my nerves, for I have learned to

feel more than a wholesome respect for the devilish ferocity of the untamed hog. I have listened to many a tale of their utterly unreasoning savageness and have seen an instance or two; so I never shoot at a peccary before I have made sure that a line of safe retreat is open to me.

One afternoon I sat on a rock in the tropical forest. As far as I knew no other human being was within twenty-five miles of my resting place. Yet I did not feel that I was quite alone, for I had seen a footprint in the trail a few minutes before I reached my rocky perch. It was much like the impression which a man's clinched fist might make if pressed, fingers down, into the loam. The imprint was not yet filled by the water that was trickling down the hillside.

"So I have company, have I," said I to myself. "Wonder how long he's been sneaking along my trail. I guess I'll push on toward a camping place!"

I pushed along. Thin rain was falling and would be heavier toward nightfall. Darkness would come early. Every stick in the woods was wet and a good camp-fire would be most comforting that night, since I must spend it in the forest with such neighbors.

Nevertheless, I sat down on that rock to rest. The sound of a peccary's champing jaws came from a hollow before me. I could not see the animal, but could hear his grunts of satisfaction. He had reason for contentment, for a band of capuchin, or white-faced monkeys, were busy with the fruit of a sapote tree and threw down now and then such as they bit into and tossed aside for other fruits not one bit better.

The complacent grunt changed to a sharp note of interrogation. I thought for a moment that he had got wind of me, but he would have gone off like a shot if he had smelled me out.

A beast of ashen hue showing through his brown, trotted into sight in a glade a few rods from me. He was considerably larger than his cousin, the collared peccary, from which he differed in other ways also; but still he was a lank, sharp-cornered, prying and long-headed rascal.

As he went he swung his keen nose from side to side, sniffing at the ground eagerly. He was far too intent in his pursuit to notice any slight sound, so I cautiously followed him.

He grunted fiercely and charged on something that I could not see. He violently shook his head from side to side, and I could see and hear something slap against his ribs. It was a tamagá—one of the two venomous serpents known in Honduras—and he was savagely tearing it to shreds. He held it down with his fore feet, and with an upward thrust of his jaws stripped the skin from half its body.

Before he could eat his prey another waree came running up. The captor of the snake squealed and ran away. His fellow followed, snatching at the trailing reptile, and was lucky enough to catch hold of it, and tear it in two. Then both pigs stopped to eat the pieces they had.

They were beneath a liana that hung like a bridge across the wide ravine, upheld by long and slender branches that were themselves thick and strong vines clinging to the trees overhead.

As I stood watching the two peccaries I could plainly see the liana, as thick as a man's waist; but of a spotted form which crept along the bridge—I saw nothing before she dropped on one of the pigs. One of the jaguar's thick and tremendously powerful paws must have struck the head of the victim and broken his neck. There was a single faint squeak from him, and from his companion a loud and vicious squeal, instantly followed by a mad charge at the great cat. But she had jumped back to her safe perch, fully 5 ft. from the ground, and carried her prey with her. It must have weighed near a hundred pounds.

The peccary on the ground kept up the furious squealing which was the war cry of his kind. In a minute there was the quick patter of hoofs on the damp leaves that carpeted the ground, and half a score of warees were barking, squealing and climbing upon one another in fierce efforts to reach the tigress. She lay along the big liana, her forearms across the dead peccary, which bent over the vine. She seemed to actually grin in derision of the frantic beasts below. They momentarily grew wilder in their rage, if that was possible, as they vainly tried to reach their enemy.

Only a few minutes had passed since the victim of the jaguar started on the trail of the serpent; but evening was coming on, and I felt that I should be going. It would be a pity, though, to leave those warees there to waste the night, and perhaps a day or two in watching the tigress, only to be grievously disappointed at last. For their enemy was safely beyond even the most vigorous leaps. She had food enough to last for days, and whenever she should tire of sleeping on the liana she could quietly walk away above their reach, over that natural suspension bridge.

To set matters right between the parties to the quarrel—possibly in part because it was not really agreeable to carry on a long and lonely tramp through the forest, the conviction that a tiger was slinking along through the thickets beside me, and was likely to at any moment become obtrusively familiar—I drew a bead on that jaguar's head, and hit her in the throat.

The blood spouted from the torn jugular, and sprayed the pigs below. The dead waree fell to the ground, and his fellows rushed in blind fury upon him. The jaguar clung for an instant to her perch as though paralyzed, then with an awful scream sprang high into the air. She struck the ground a score of feet away from the crowd of vicious brutes that were struggling to reach her refuge.

They were upon her before she could spring again. They gashed her mottled skin with ripping thrusts of gleaming tusks. They charged on her again and again. They trampled each other in the struggle for place in the foremost rank—if ranks were where all was a whirl of mad rage. They were blind to every danger and insensible to every hurt.

A blow from the giant cat's paw flung a boar through the air and slammed him against a tree. His back was broken, yet he strove to drag his useless legs behind him to the fray. A stroke from the foe drove the ribs of another into his lungs. He staggered back to the fight, blood gushing from his nostrils with every gasping breath.

Such battle could last but a few moments. The drain through that wound in her jugular was too great for even

such tremendous vitality as that jaguar had. The peccaries that could move were soon working their will on their vanquished enemy. They ripped strips of skin from her body. They tore away great pieces of her flesh. With jaws dripping blood they champed the shreds. They dragged her bones here and there, and vainly strove to pull them apart. They returned to the spot where the tigress died and rooted the blood-soaked soil in hope of finding there something more on which to dull the still keen edge of their hate.

E. W. P.

The Owl's Antics.

TWO MEDICINE LODGE CREEK, June 12.—*Editor Forest and Stream:* You may remember that I once told you about the queer antics of an owl that I witnessed some years ago on the Marias. Last night both my wife and I saw the same thing again.

It was just sundown when two large prairie owls came flying slowly along, one about 100 yds. in front of and above the other. The lower owl would occasionally drop in its flight a distance of about 100 ft., falling at an angle of about 40°, and while doing this the tips of its wings seemed to be touching each other below its breast, and it made a clapping sound like a small stick held against a carriage wheel, when in very rapid motion. Once the bird hooted while sailing along. I suspect that this was the male bird and that this is their mating time. J. W. S.

[We believe these birds to be the short-eared owl (*Asio accipitrinus*), and it is altogether probable that this performance was a part of the owl courtship. No doubt the clapping sound referred to was made with the bill.]

INSTANCES OF VITALITY.

BEATRICE, Neb., June 11.—*Editor Forest and Stream:* In reading my FOREST AND STREAM of June 1 I notice an article headed "Strange Vitality in Birds and Animals," and the correspondent wants other instances cited. I will quote from my journal of eight months' hunting among the Bad Lands for his benefit, if you care to publish it:

"July 23.—Out of meat at the ranch to-day. Struck west and north to head of Little Powder River. Saw eight antelope and got a shot at about 800 yds. Knocked a doe down. Went to load her in the wagon, when she jumped up and started off. Fired five shots (from a .45-70 Winchester) and ran out of ammunition. Harry drove up with the Springfield, .50 cal. The doe stopped near a large boulder, and I crawled within ten paces and shot her three times with the six-shooter (a .45 Colts belt revolver). She ran three-quarters of a mile and lay down by a spring. I crawled up behind the sage brush and shot five times with the Springfield (old model .50 cal. Government gun). On skinning her, we found that ten shots out of the fourteen had struck her." (None less than .45 cal.) I don't know which ones belong to the separate calibers.

Again I quote the journal written on the same day: "Both hindlegs were broken, one in three places, one front leg shot off about the knee. One ball passed through the head just in front of the eyes, making a hole about 2 in. square through both nasal passages. Two balls through the muscles of the neck and four through the body in different directions, a total of ten separate shots which hit her before she fell."

This is copied from a log book kept while I was in the hills, written up every day, and containing exact data for every day from May 27 to Dec. 21, 1890, and is open to the curious; and I and Harry Cave, of this city (who was with me), will swear to its being correct in every particular.

The next instance is a blacktail buck on Mt. Zahn, between the Black Hills and Big Horn Mountains. The first shot was at about 600 yds. Two balls struck him, one at the base of the horn, which broke the bone but did not enter the brain; the other struck above the root of the tail about 2 in. and ranged along the vertebrae until over the lungs, when it ranged down through the lungs and cut two of the large veins of the heart, and stopped on the inside of the left foreleg just above the knee. He ran about 300 yds. and fell dead. This was Nov. 9.

On Dec. 6 Isaac Ward and myself killed a whitetail doe on Mason Creek in the Black Hills. Ike shot first and knocked her down, but she jumped up and ran down the creek. I cut across a bend and knocked her down with another shot, but she started again, when I shot her twice with the six-shooter and got her. She ran about three-quarters of a mile and lived about half an hour, though all the shots were through the lungs and in the region of the heart.

I have had lots of experience with deer and antelope; and there are only two shots that I know of that kill the instant they strike, or at least so paralyze the animals as to make them perfectly helpless, and so far as I am able to distinguish, dead. These are through either the brain or spinal cord. A shot through the heart is a sure killer, but not always instantly, as is one in the brain or spine. The contrary has been my experience with birds, and I have in nearly every instance noticed that a bird shot through the head lives longer than one shot through the heart, though it is paralyzed in everything except muscular action. A Bob White quail, if shot through the head, will spin around like a peg top, with the head for a pivot, in almost every instance.

I have killed quite a number of antelope and deer with a single ball through the heart or spine, but do not consider a heart shot necessarily instantly fatal, as a spine or brain shot is invariably. I do not try to explain it, merely state what I know from experience to be a fact.

I always use a .45-70 Winchester gun and nothing but U. M. C. .45-70 ammunition for big game, and consider it the most effective combination extant for big game, for carrying power and penetration. I can state positively that at an angle of 45° this size Winchester, using U. M. C. cartridges, will throw a ball three miles from the gun, measured distance. There is an item for "pattern and penetration" sportsmen to figure on. Also a .22 cal. Flobert rifle will shoot a .22 short ball a mile, measured distance. I have measured both and know whereof I speak.

EL COMANCHE.

MAINE'S MOOSE FOR THE FAIR.

THE Maine papers have just chronicled a curious moose hunt that has proved successful. A cow moose and her calf were wanted to complete the Maine exhibit at the Columbian Exposition. State Taxidermist Gifford had early last winter been able to get, from his own selection and others, fine specimens of all the fauna of the Pine Tree State, except a cow moose and a calf. Accordingly the Legislature was asked to legalize the killing of one cow and her calf in close season. This was done, but the killing was to be done under the superintendence of Mr. Gifford. He started, with his three guides, about March 1 from Hotel Hesselton, in Skowhegan, northward into the game preserve of the Megantic Fish and Game Association. After two or three days' travel northward by teams, they went into the woods after fresh moose tracks in the 2 or 3 ft. of snow that then covered the ground. These tracks they soon discovered; the trail of three grown animals, but no calves. Concluding from the size of the track that one of them must be a cow, Mr. Gifford and his men started in hot pursuit. In two days the bulls were overtaken, but it was close time on them, and besides, they were not wanted. They were passed or allowed to turn out on one side, and the pursuit kept up for the female. She was followed over into Canada, where Mr. Gifford had no right to take her, and besides, it was concluded that she must be barren by the speed she made, and she was given up. The hunters then turned back upon Maine soil.

The next day they were rewarded by new tracks and soon they came full upon a cow moose lying down. She got up and immediately charged upon the hunters with a bellow and a peculiar zig-zag motion. Mr. Gifford was much surprised at this action of the cow. Heretofore, in his experience, the first object of the moose hunted had been that of getting away. The cow was shot as she charged head on, and immediately it was found that she was about to give birth to a calf, this accounting for her strange conduct and bellowing. She was ripped open as quickly as possible and, according to published account, a live calf, with eyes wide open, was set at liberty from his mother. It was about as big as a 40-pound dog and only 23 in. high. It lived some 10 minutes only, waiting the meantime for sustenance. But there was nothing at hand with which to have fed the little creature, thus singularly ushered into the world, and the hunters were not sorry when it was dead. It was wrapped in the skin of its mother and toted on an improvised hand sled from the woods by the hunters. Its skin, handsomely mounted, will help out the Maine exhibit at the World's Fair, together with that of its mother and the mounted hide of an enormous bull moose. The mother weighed some 900 lbs., while the weight of the calf was not over one-twenty-fifth of her own. It is said that a female deer will often give birth to twin fawns of nearly one-quarter of the mother's weight, while most other animals produce larger offspring relatively than does the moose.

SPECIAL.

CHICAGO AND THE WEST.

[From a Staff Correspondent.]

New Illinois Laws.

CHICAGO, June 17.—The wise body of men known as the Illinois Legislature adjourned yesterday. Of the many game bills before the House only two are known to have become laws. The Mongolian pheasant is protected for five years from July 1. This was Senator Coppinger's bill. The quail date is set later thirty days. Quail can now be killed in November and December instead of October and November. This is a loss, as December means more snow, more potting and more trapping. This law probably also carries the chicken date from Sept. 15 to Sept. 1, another distinct loss to the sportsmen, if this be true. All in all, the sportsmen were sufficiently knocked out this year.

Good Mr. Altgeld.

Gov. John P. Altgeld, who openly says that the fish and game laws ought to be abolished, and that all prosecutions under them are persecutions, has developed another phase of his thoughtful and highly humane character. He proclaims that when the cowboy road race from Chadron, Neb., to the Fair has reached the confines of Illinois he will arrest all the riders. This may or may not be well. I only mention it to show what a good, kind, thoughtful man Mr. Altgeld is. We are in great luck to have him for governor, though I fear we are going to lose him next trip.

National Convention.

The committee to devise ways and means for a national convention of sportsmen met this week. They discussed ways and means to devise a national convention.

Found Some Contraband.

The other day I was buying a money order in the U. S. Express Co. office, and happened to hear one of the clerks ask another if he didn't want some squirrels.

"Yes. Why?" said the other.

"Two boxes on ice, refused," was the reply.

I questioned them, telling them who I was, and they not being reserved in the matter, told what they knew and made no demur to the proposition to send for the game warden. Warden Bortree at my request called and looked up the case. He found one box from Warrington, Mo., sent Terrill Bros., South Water street, Chicago, no consignor named, box marked "100 lbs. of frogs." The box was full of young squirrels. Another box was reported destroyed by the company, it also having been refused by consignee. Two other boxes were found, marked "Game," sent from New Madrid, Mo., to A. McMullen, also of South Water street. These also were refused. The two packages contained a dozen young squirrels on ice. The express company at first did not want Warden Bortree to search but at length consented. In speaking with me the man at the window to the left of the money order window was very harsh in his opinions about sportsmen. He thought they were all frauds. If he had thought they were all gentlemen it might have saved his company \$50. Warden Bortree said he would not push for the limit, but would let the company off on \$50, just to jog their memory about sportsmen and the laws. Squirrels can be killed in Illinois after June 1, but not sold, and the law providing for the sale of outside game names Oct. 1 as the open dates under specifications. Warden Bortree thinks

he has a case and thinks that too much leniency would be misplaced under the circumstances. The consignors can not be reached. An express company which freely handles boxes marked "Game" can be reached very easily. Let her roll.

Wiped the Earth with Them Again.

A few members of the Chicago Fly-Casting Club met for the second medal contest last Wednesday at Union Park, west side. Mr. Elmer E. Wilkinson, according to all accounts, wiped the earth up with the entire outfit again. He cast over 80 ft. with the fly, I am told, and about half a mile with bait (Query: What has bait-casting to do in a fly-casting club?). Perhaps there may be a disposition to go behind the returns in the following card from the secretary, received this morning by the members: "A special meeting of the Chicago Fly-Casting Club has been called for Tuesday, June 20, 8 P. M., at Grand Pacific, to investigate the awards of the Judges at the last weekly contest." E. HOUGH.

A Wyoming Tragedy.

BEATRICE, Neb., June 11.—*Editor Forest and Stream:* The Newcastle, Wyo., *News* Journal reports the death of Henry Mason, one of the best known and oldest settlers of Wyoming, who was killed by a bear last week.

"Last Friday morning Mason left the house, telling his wife that he was going to a mining camp a short distance away to work that day and would be back in the evening. Evening came and he did not return as was expected. After passing an anxious night in waiting for his return his wife started out to look for him as soon as daylight came. Within a short distance from the house she came upon the track of her husband and that of a bear, which he seemed to be following. She followed the track for about three miles when she came upon the mangled remains of her husband.

"It seems, from investigation, that Mason, after leaving the house, saw where the bear had been eating at the body of a dead horse during the night and decided to follow him. After following the track up the cañon nearly three miles he came upon the bear, and as he was lying down got within a few yards of him before seeing him. He fired one shot into the bear and attempted to throw another cartridge into the barrel. It being a defective cartridge, it stuck, and he was without means of defense against the bear, which now attacked him. His only safety lay in escape and this he attempted to do by climbing a tree. He appears to have tried to take his gun with him, but the bear tore it from his grasp, as the very plainly seen marks of the bear's teeth on the stock of the gun show. The bear then attempted to seize him, but he was so far up the tree as to be nearly out of danger. A severely lacerated heel, however, and plain signs of having clung to the tree show that the bear caught hold of him by the foot, but was not successful in pulling him down.

"Everything goes to show that he remained in the tree until the bear had disappeared and was, as he thought, gone, when he came down the tree and started for home. After going about 75 yds. he stopped to bind up his wounded foot, and perhaps other wounds, when the bear again attacked and killed him, mangling him in a terrible manner, thirty-two different bites of the animal being found upon his body. A party went in search of the bear and killed him after firing eight shots into his body.

"The victim of the tragedy is well known to a number of Beatrice people who have been at Newcastle, and among them Colonel O. H. Phillips, late mayor of this city. Colonel Phillips wrote to L. T. Griggs, clerk of the courts at Newcastle, asking him to get the dimensions of the bear if possible, as there was some question regarding the size of the animal among Beatrice hunters and sportsmen. Mr. Griggs replied:

"Upon the receipt of your letter I went and measured the bear that killed Henry Mason, and here are the figures that I know are correct: Length from tip of tail to nose, 7 ft. 6 in.; height, 4 ft. 6 in.; around body, 5 ft. 8 in.; weight, 1,000 lbs.; around head, 3 ft.; tusks, 1 1/2 in.; paw, 6 x 1 1/2 in.; claws, 4 in. long. You can swear to this as I know it is all right."

Spring in the Yellowstone Park.

WE are permitted to take from a private letter, written from the Yellowstone Park, June 6, the following notes: "On June 1, I tried to make a tour of the Park. I reached the Geyser Basins all right, but between Norris and the Cañon there was from 1 to 6 ft. of snow, and when I got about three miles from the Cañon I gave it up. That road is now open, and in a day or two it will be open to the lake. The snow is deeper than ever known at this time of the year, but there does not seem to be much frost in the ground, and the roads dry as soon as they are bare. During my short trip I saw no game, but there was plenty of sign. There were buffalo tracks near the Fountain Hotel, apparently they were on their way from Nez Percé Creek to their summer range in the southwest. I did see some badgers, porcupines and other small animals.

"Travel has already begun very briskly, and there are plenty of barons, counts and dukes in the array. Four out of five names on the register of the hotel are foreigners.

"The weather is getting quite warm, and the snow is going fast."

A Game Importing Society.

BARTLETT, N. H.—In my native country of Sweden can be found the capercaillie and black game, which I am certain would thrive in the United States, especially in our mountainous districts. And I am also certain that if our American sportsmen knew what sport it is to hunt those birds they would lose no time in introducing them in our fields of sport. I would like to see a society formed for the purpose of importing and introducing new and useful game in the United States. Perhaps such a society exists, but I never heard of it. JAGARE.

Reynard Caught.

AND in a manner most extraordinary. Stamford T. Moore, of Lawrence county, Ohio, came suddenly upon a fox, which perhaps was napping. The fox sprang, and in its haste to escape got stuck between two branches of a fallen tree. It seems the pelvic formation of the animal was unusually developed, as he could get no further than the hips, so Mr. Moore captured the fox—a full-grown one. N. D. ELTING.

A Hunter's P-R-D-S.

LAST fall I enjoyed the most successful and pleasant hunting and fishing trip that has fallen to my lot during many seasons of woods, mountains and plains cruising. I am confident that I found the best big game country on this continent, and, while not at liberty to publish to the hunting fraternity at large its exact location, I am unselfish enough to be willing to give full particulars to a few gentlemen who may be contemplating outings during the season of 1893, and who are sportsmen of that quality that can hold its hand in the midst of noble game when enough has been killed to satisfy a reasonable man.

In this favored region are elk galore, and the novice may be sure of securing a head grand enough to grace any hall in the land. There are many bear, black, brown and silvertip, while the higher ranges will furnish their tributes of mule deer and mountain sheep to those who wish to test their lungs and limbs by high climbs among the pinacles.

On the lower ground antelope are plentiful, and in many places the lay of the land is such that they are not particularly difficult to approach. The lover of the shotgun can have good sport with the wild geese, ducks and cranes that abound about the lakes and streams in the valleys, and with the sage fowl, ruffed grouse and blue grouse which are found on their various ranges in numbers sufficient to afford good shooting. For him who wields the dainty fly-rod there is joy by the wagonload, for the mountain trout are big, husky and plenty. I caught them up to 3 lbs. in weight, and was perfectly satisfied, while my guide cursed the luck because I did not catch any "big ones."

I can furnish proper parties the addresses of guides who are sober and reliable men, and who have excellent outfits at moderate prices. FOREST AND STREAM is at liberty to forward communications to me, and I will try and give a few sportsmen information that will insure them good sport and a trip that it will not require the pocket of a millionaire to reach. CHAINBEARER.

The .22.

CAMBRIDGEPORT, Mass.—While taking a walk in the Adirondacks one day last fall I saw a hawk sitting on a fencepost about 300 ft. away. Resting my rifle, a .22 Remington, on a fence rail I fired, and the hawk pitched forward into the grass. Putting in a fresh cartridge I ran to the place, and while looking for the hawk it rose and flew unsteadily in an almost direct line from me. Covering it I fired again when it was about 250 ft. away, and was very much surprised to see it fall with a broken wing. On examination I found that the first shot had wounded it slightly in the neck. Doesn't that speak pretty well for the accuracy of the small bore? The cartridge used was a .22 long. W. H. L., Jr.

A Vision of Bear.

LIVINGSTONE MANOR, N. Y., June 18.—As some of our city guests were taking in some fresh air this morning they were terribly startled by the appearance of a large black bear in the fields near by. Bruin seemed to be out on a Sunday stroll and to have no fear of dogs or guns, and taking a good look at the surroundings, walked up to the field near the house, and after giving us a good look at his fine stately proportions, very deliberately walked off, not even bidding us good-bye. I presume he is a strict observer of the Sabbath and did not like the idea of any altercation on the day of rest. WM. P. ROSE.

"If your Caravels"—SEE THE ADVT.

The Improved "Perfect."

The improvements in the "Perfect" Pocket Oilier have met with the general approval of the trade. Although this oilier originally was a particularly good one, being very tight and handy, the improvements have insured its tightness without in any way interfering with its usefulness. In oiling your machine with the "Perfect" it is an easy matter to get only the exact amount of oil needed. There is no danger of an over supply, which causes dust and dirt to collect, thereby doing much injury to the machine.—Adv.

Sea and River Fishing.

"Game Laws in Brief." June, 1893, revised. Game and Fish laws of all the States, Territories and Provinces. Correct, reliable, handsomely illustrated. Published by the "Forest and Stream." Sold by all dealers. Price 25 cents.

GREENWOOD LAKE.

THE fishing at Greenwood Lake has been unusually good since the opening of the season. Large catches of bass and other fish have been made and there have been only two poor days since May 30. The largest bass so far taken was caught by a boy from an old dock in front of the Valley House. It weighed 6 lbs. Nathan Davey, the well known guide, took 50 lbs. of bass in front of this house in one day's fishing.

H. S. Robbins, of 82 Worth street, New York, who is stopping at the Windermere, caught 15 bass, none weighing less than a pound, between the hours of 9 and 11 in the morning. Mr. Geo. J. Seabury, who is the author of a standard work on the black bass, fished six days and averaged 20 bass each day. He sent 100 lbs. of bass in to New York besides bass eaten at the hotel table, perch, pickerel, etc.

Messrs. Cockshaw and Durfee, who are stopping at the Brandon, caught 60 bass, from 1 lb. up, in two days. There is a good trout brook controlled by this hotel in the interests of its guests.

They have a joke on a gentleman stopping at the Waterstone Cottage, that will probably not lose its point for some time to come. He had returned from a successful fishing trip with a good catch, including some fine bass, which he transferred as he thought from his boat to the live box in the float in front of the hotel. However, just about the time he made the last transfer of the king bass of the lot, he discovered the live box sitting on the float beside him, and it dawned upon him that he had dropped all his fish into the open waters of the lake instead. His friends say that it was simply a philanthropic little scheme of his for restocking the lake, but personally he refuses to discuss the subject.

J. C. Jacobson, of New York, who is stopping at the

Lakeside, caught 9 bass in one day that weighed 22lbs. One of these, if I am not mistaken, was a 6-pounder. A day or two after he caught 9 that weighed 18lbs. The Liliputians, with their manager, Mr. Rosenfeld, are stopping at this house. Mr. Rosenfeld has made several good catches, but Lottie Collins's admirer, Mr. Adolph Zink, threatens his laurels. The latter is a great fisherman for his inches, and is going to get "that big one" yet.

Little Fritz Ebhardt is quite a hunter. He has a neat little double barrel shotgun of .44 caliber, that only weighs 3lbs., and he handles it as if he knows how to use it. Last Friday morning he killed two snakes with it, and won the admiration of the lady members of the company.

In a few minutes' fishing last Saturday the writer caught 3 bass and 2 pickerel. They were caught trolling with a No. 4 Buel spoon bait. Taken on the whole this promises to be an unusually good season at Greenwood, and larger catches than any mentioned will probably be taken as the summer advances.

OUR BOSTON NEWS BUDGET.

BOSTON, June 19.—Boston anglers are making ready and departing. Mr. D. H. Blanchard, with his daughter, is about leaving for his salmon river, the northeast branch of the St. Marguerite. Mr. Richard O. Harding, a number of years and so faithfully secretary of the Massachusetts Fish and Game Protective Association, will spend a couple of weeks' vacation with Mr. Blanchard, probably early in the trip, but he may be hindered till well into July. Mr. Blanchard will be at his river for a couple of months at least. Mr. E. Rollins Morse, of Boston, will also be a guest of Mr. Blanchard. Mr. Walter M. Brackett, the salmon artist, with Mrs. Brackett, is now at his salmon preserve, just below that of Mr. Blanchard. He will remain for the entire season. Mr. E. C. Fitch, president of the Waltham Watch Co., will fish his salmon preserve, on the Upsalquitch, this season. Mr. Archibald Mitchell, of Norwich, Conn., has gone to the Restigouche. Mr. John Fottler, Jr., one of the best known anglers and sportsmen of Boston, has gone to his salmon river, or the one he owns in company with Mr. I. W. Adams, of the Boston Net & Twine Co. The river is the St. Johns, at Gaspé. Mr. Fottler will doubtless remain for a couple of months or more. He takes his family with him.

One of the happiest trout parties of the season was to leave Troy and Keene, N. H., on Tuesday for Rangleley. From that noted trout town they were to make their way to Kennebecago, there to catch trout with the fly for a couple of weeks. The names of the party are Mr. C. W. Whitney, of the dry goods trade at Troy; Mr. Whitcomb, the box manufacturer at Troy; State Fish Commissioner Kimball, of Keene, and Charlie Stone, the hardware dealer at Keene. Merchants and manufacturers like those in the above party are greatly benefitted by their annual fishing outing, and they most heartily enjoy it. Mr. Whitney is also a lover of hunting. Every season he takes a number of foxes, and he is one of the most enthusiastic at the sport. Living where he can reach the neighborhood of good fox hunting in a short time with a good team, he often takes in a reynard or two of a frosty morning in winter.

Mr. James Kinsley, of Waverley avenue, Newton, with Mrs. Kinsley and Master Percy Kinsley, will spend the summer at Andover, Me., stopping at Cushman's. Mr. Kinsley is a great lover of brook fishing, and Master Percy, only seven years of age, is as much of an enthusiast as his father. His record of trout was a good one last year, and it is likely to be better this year.

CONNECTICUT BLACK BASS.

HARTFORD, June 5.—*Editor Forest and Stream:* Probably Connecticut can furnish as many valuable streams, ponds and lakes, according to its area, as almost any State in the Union. We have just won a victory for the black bass interests, which, I think, has been as lively a struggle as any one bill of like nature has caused in some time.

I started the ball rolling by drawing a bill which provided for a close season during May and June, against taking at any time except with hook and line, and provided a fine of \$10 for every fish found in any person's possession during close season or taken except with hook and line. This fine was amended by adding the words "not exceeding," but we did not think it worth while to oppose it, since the gentleman who proposed it was in favor of the general provisions of the bill and a much respected member of the House. Private waters were excepted in a separate section, so that if a defendant can prove he took them from his pond he is not liable.

All our game and fish laws that are general throughout the State make an exception of the owners or occupant under lease; therefore, it was thought proper to make this conform with the others. Then, the farmers own most of the land where game and fish exist, or are riparian owners; and if they will use the sportsman as one gentleman should another, we will be glad to do the same.

Also, the intention of the bill was to prevent spearing and taking by similar device the fish on their beds when they were spawning. Our old law was lamentably weak, as it simply forbid "taking from the waters of the State." That meant a poacher must be caught in the act, which was next to impossible; therefore, it meant very little.

The Committee on Fisheries changed the order of things a trifle and reported it to the House as a substitute bill and unanimously recommended its passage; but it was immediately jumped on by several representatives, who, by the way, have since become conspicuous for their efforts to defend the pound fisherman, and presumably these gentlemen learned that Mr. A. C. Collins appeared before the Committee on Fisheries in its favor while they kept away, and so thought it a nice opportunity to "sit on him." But Mr. Collins has too many friends in this State to be "sat on" so easily, and the result was the Senate rejected the amendment and the House concurred. Do not pine. We are grateful for the courtesy of the committee, especially their House chairman, Dr. McKnight, of East Hartford, as also that of many others, both in the Legislature and outside.

But the struggle will bear its fruit; we have made up our minds what we get we must fight for, and will be prepared. We have some trout interests to be looked after and I hope some gentlemen of more influence and greater powers than myself will start it. We have some beautiful streams, the most conspicuous being the Farmington River. With the construction of a few suitable fishways,

which the statutes amply provide for, and a generous stocking, the Fish Commissioners could transform this picturesque stream into a paradise for trout fishing. Mr. E. E. Warren, game and fish warden of Litchfield county, has watched it and its tributary streams faithfully, and if the Fish Commissioners would do their share there would be no better resort. There is a large appropriation for trout in the Legislature now, and if passed we expect our Fish Commissioners to do something toward building up the fishing in waters where the public can get the benefit of a public expense. If they do not look more closely to public interests there will be a lively time next session to know where these fish go.

Allow me to thank you for your very valuable contributions, both through your paper and by letter, regarding bass, and we feel assured it helped greatly. We are sorry FOREST AND STREAM cannot catch bass in Connecticut, but can assure him there are many who can. I hope this will meet the approval of all true sportsmen.

CHARLES W. HALL.

A NEW HAMPSHIRE CURIOSITY.

MANCHESTER, N. H., June 13.—*Editor Forest and Stream:* As a result of the cold and wet spring, the brook trout season in this section was late in opening, and on account of the exceedingly cold, icy winter the catches are small, much below the average of former seasons. Some brooks, where in previous years the fisherman has been bountifully rewarded, nothing responds to his allurements. Others yield from 4 to 20, and I have a few times heard of from 60 to 100 being taken in a day. Mr. Frank S. Sutcliffe, principal of the Lincoln Grammar School, and a companion, brought in the largest string thus far reported, 160. They got them "over there." When the crop in prospect from the new State hatchery, now being established in this city, is deposited in our near-by streams, I expect to hear of more satisfactorily weighted creels returning from the trout and mosquito lairs of southern New Hampshire.

Col. Arthur S. Clarke, Maj. Harry B. Cilley, Mr. Wm. R. Forsaith, Mr. Benj. F. Clark and Henry S. Clark returned the first of the week from the northern part of Maine, where they spent two weeks fishing. They report very good success. Their largest trout weighed 5lbs. Two, three and four pound fish were plenty.

A movement has been in progress for some time among the sportsmen of the southern part of the State, petitions circulated and presented to the Governor, also hearings and discussions have taken place, looking to the appointment of a new man, both young and enthusiastic lover of the practical use of rod and gun, in place of Elliott B. Hodge, Chairman of the Fish and Game Commission and Supt. of the Plymouth and Sunapee Lake Hatching Stations for many years. The matter will probably come before the Governor and Council at their meeting this week.

While fishing last Friday afternoon in a neighboring town, I met with an experience that, while unpleasant in some respects, ended happily and proved to me, as nothing but personal experience could, the existence of a healthy, full grown country boy who, probably born and reared in the immediate neighborhood of what is reputed to be one of the largest and best trout streams of this section, did not know of its existence. In company with a friend I went to this brook, with the idea that I knew its course. Two roads cross the brook a mile or more apart, and he drove me to the crossing of the further road and drove back and hitched the team at the crossing of the road nearest home, with the understanding that we were to fish and meet on the brook. Unconscious of the fact that the brook had any branches, I took the side away from the sun and worked away through brush, mud, flies and mosquitoes—enough of either to have exasperated a much better man than your correspondent, till I had taken a half dozen pretty trout and begun to be aware that my friend Fisher (by name and occupation), should be in the vicinity, as I thought I had been far enough to have reached the other road crossing, and began to suspect that something was wrong in our calculations and connections. Averse to taking back tracks, and oblivious to having passed a junction of the stream I was on with the one Mr. Fisher began on at his road, I hurriedly worked along, till anxiety for my whereabouts overcame my desire for more fish, when I bunched up my pole for a walking stick and changed my occupation to that of a pedestrian, still following the brook, now coursing over a steep grade of rocky country and through an old growth of timber, until it was entirely lost in a large surface of spring holes and rocks. Looking for the sun, then near the horizon, I shaped a course which I judged would lead in the direction of the team, and after a tedious tramp of half an hour espied a farmhouse on a hill in the distance, toward which I turned my steps. In that house, on that hill, lives the curiosity. He does not live on a road, but on a lane that I suppose leads to a road if followed far enough in the right direction. I found the "wonder" out of doors, and to my question as to the direction it was necessary to take to find the brook I had started to fish, naming it to him, he answered, I have no doubt truthfully, that he did not know. I have struck hard luck in my previous hunting and fishing experiences, but that answer topped them all, and was for the moment a keen disappointment to me as well as a surprise. I pitied the fellow for the sport he was losing, and also inwardly cursed him for his blooming stupidity, but neither helped me out of my dilemma. Blindly I started down the lane on which his house was, till my path ended in a field a mile or more away, in which was a house which I soon found was one of New Hampshire's numerous deserted homesteads. From there I saw another house, and again I found there had been another desertion, but a highway was at last in sight, which with joy I followed to the fourth house in my search for information. There I was delighted to find a man who could put me on the right track. The place where the team was left proved to be about one and one-half miles away, which distance I was not long in covering, there to find Mr. Fisher shouting and waiting in the gloaming with fear and trembling.

Our trip of fifteen miles home, with the nineteen trout we captured, was a dark but quick one. While on our way out we passed a partridge and a brood of a dozen young, not more than a day or two old. The old bird would not fly, but staid by her young, within a few feet of us, a subject of our unqualified admiration, and I hope she may never fare any worse than then, as a result of her affection and pluck.

PAYSON.

"FOREST AND STREAM" FISHING POSTALS

Send us a postal card report of your own luck, your partner's luck, your neighbor's luck, your father-in-law's luck. And—her luck.

CLAYTON, N. Y., June 10.—Although the weather here has not been the most favorable for fishing the past weeks, good average catches have been daily brought in, and the prospect of a first-class season are good. I inclose the scores, which are fairly representative of two anglers, for the past ten days: Mr. C. C. Dorr, of Boston, Mass. (guide, Sam Denny), June 1st 18 black bass, 2d 27, 3d 88, 4th 12, 5th 7, 6th 23, 7th 5, 8th 14, 9th 25, 10th 29. Mr. W. Bunker, New York (guide, Steve Legare), June 1st 31 black bass, 2d 20, 3d 18, 4th 17, 5th 18, 6th 16, 7th 38, 8th 28, 9th 33, 10th 43. Thirty out of the 38 bass caught by Mr. Dorr, on 3d inst., weighed 49lbs. Mr. Bunker's catch of 7th inst. included 8 weighing 20lbs., and of 8th inst., 30 weighing 40lbs. This score also shows 8 bass as follows: One 4lb., two 3½lbs. each, two 3½lbs. each, and three 3lbs. each. Mr. Dorr's catch is from his own rod, while Mr. Bunker's also includes those taken by Mrs. Bunker.

F.

HADLEY, Mass., June 12.—We have a lovely home here and a most excellent table—the best I have found yet, as far as I've got. Mount Holyoke is only two miles off. On Friday I went trout fishing in Sunderland and caught two small ones. The man who directed us where to go, went out Sunday A. M. to Hart's Brook and caught 25 trout, 11 of which weighed 8lbs. It looks as if he turned the crank the wrong way for us. Come up here and climb the mountain (by elevator) and fish Hart's Brook, and see the boys.

C.

ADIRONDACKS.—Northwood, N. Y., June 14.—To residents it seems as though trout in West Canada Creek are growing more numerous each year. Three years ago our most expert fishermen experienced difficulty in getting a meal of fish. This spring nearly all could catch trout enough for a good meal without difficulty. This spring a man here, besides doing his farm work well, caught from \$10 to \$20 worth of trout per week, which he sold to his neighbors who did not care to fish. A pot-fisher? Perhaps. He enjoyed the scenery; he took as much pleasure in landing a trout as any one, but he sold his fish. To be a sportsman must one give his fish and game away when there are many ready to buy it? What difference does it make to a fish whether he is sold or given away? He is dead and certainly cannot increase the game supply.

RAYMOND S. SPEARS.

DINGMAN'S FERRY (Port Jervis), Pa., June 14.—Trout fishing during the week has been good. One of our guests, Mr. W. D. Chalfin, of New York, took 39 trout on Dingman Creek, near Stokes Meadows, weighing 11lbs., in about five hours' fishing. Our streams are now in splendid condition, good prospects for coming week.

P. F. F.

GREENWOOD LAKE, New York, June 17.—The largest of the season, Saturday, 17th inst., caught by Leon Hazen, son of the proprietor. Fishing off shore with angle worm—weight 6½lbs. Bass fishing average 12 per day, average weight 1½lbs. Prospects good.

WINDERMERE.

CLAYTON, Thousand Islands, N. Y., June 17.—Black bass fishing here first-rate. Fish numerous and average good size. Mr. John Bush, of Buffalo, N. Y., landed 84 black bass on 15th inst.

J. G. FRASER.

HENDERSON HARBOR, N. Y., June 16.—Mr. R. Heimsek, Mr. Frank Harrison and W. P. Sinnock, of New Jersey, have just left our place for home; having fished ten days with remarkable success with the bass, saving only large fish, putting back all spawners and small ones; nothing less than 1½lbs. kept, and their record was over 400.

E. TYLER.

BLACK BROOK (Rogers), N. Y., June 16.—Trout fishing in brooks here is first-class now. The brooks have not been fished as much for the past few years and the trout caught now are larger and more of them.

W. W. PIERCE.

THREE LAKES, Wis., June 11.—In two days' fishing Dr. Portee, Mr. Muchman and Mr. Mason caught 278 bass. Largest, 1½lbs. Average, 2½lbs. Fishing is good, eighteen mascalonge caught by parties stopping at my place last week.

F. R. FRENCH.

SHELDRAKE (Hurleyville), N. Y., June 17.—Some very nice black bass have been caught in Sheldrake Lake, weighing from 2 to 4½lbs. and forty pickerel, weighing from 1 to 3lbs. by E. Misner and John Matthews.

E. MISNER.

STEVENSVILLE (Liberty Falls), N. Y., June 19.—Frank E. Quimby, of New Jersey, caught one pickerel of 4lbs. 10oz. and one 4lbs. 6oz. Stevensville Lake is full of pickerel weighing from ½lb. to 3½lbs. and there are a good many caught which weigh more than 3lbs. Prospects for next week are very good.

H. M. STODDARD.

LAKE RIDGE, Huntsville, O.—Bass are biting in the Indian Lake, Lewiston Reservoir, some 4 and 4½lbs. bass having been caught the last week. Fishing good.

L. H. B.

The Silk-Worm Gut Market.

REDDITCH, June 7.—As the manager of our factory at Murcia has just completed his purchase from the worm breeders, your readers will be interested to know the result of the gut crop for this year. The quantity of silk-worm gut produced is not more than half what was made last year, as the price offered for silk rose from 120 reals per arroba to 220 reals. There is an average production of thick gut, so that for the present prices remain as usual; but if the price for silk is maintained, as seems probable, the prices of gut must advance next year 40 or 60 per cent.

S. ALLCOCK & Co.

The Mountain Trout.

CHARLESTOWN, N. H., June 18.—*Editor Forest and Stream:* Your compositors have re-revised my ballad of "The Mountain Trout" in an unexpected manner. They have rechristened the familiar "poke-stalk" of the meadows and called it "Polk-stalk," after the ex-President, and "yon stone" which I imagined as rippling the waters, is presented to the angler as "your stone!"

"Alas! what hidden perils swi-

The man who meddles with cold type."

VON W.

WITH THE "AL FOSTER"

To the Fishing Banks.

NE of the hottest mornings of a record-breaking simoon that swept over New York city and the country in general last summer, found my wife and myself embarking on the fine iron fishing steamer Al Foster, "pride of the sea and river," as the advertisements have it, bound for the Banks. The day was following on the heels of a night so fiery hot that neither of us had been able to sleep, barring a few cat naps caught just before day-

break, and we had debated long and with as much energy as the weather would permit whether it would not be wise to give up our long planned trip, but at last, simply on the strength of our previous resolution, the day was won for the Banks.

The Al Foster lay at the end of a long wharf, Pier 7, North River; that reaches out Jerseyward, where the waters of the Hudson mingle with the salt tide of the Upper Bay. As we hurried down the long, roofed vista, we could hear her whistle tooting persuasively to us and others similarly minded to move our pegs a little faster, and not wishing to be left we increased our speed and soon were aboard.

Once on the boat, and ensconced in good seats on the second deck, we found that we had made a grave mistake in imagining that there was any danger of our being left behind and any great necessity for hurrying. A fishing steamer never leaves any one behind, provided he is in sight, more precious to it is the one late sinner than the ninety and nine punctual passengers who are safe aboard. We learned this fact as we watched the late arrivals hurry down the wharf, and saw Captain Al Foster (for whom the boat is named) lean far out over the hurricane deck rail and beckon to the tardy and perspiring, and encourage them by word of mouth to greater exertion. As long as one was in sight he held the boat. Finally, however, the last sinner was gathered into the fold, the lines cast off, and the boat's nose pointed oceanward.

It is important to secure a good position on a fishing boat when one first comes aboard, for it is not customary to change afterwards, and such an attempt would seriously infringe on the rules of etiquette that here obtain, as it would be sure to interfere with some one else's elbow room, and reduce his pre-empted space. We had been fortunate in getting seats in the extreme bow next the flagstaff, and, facing aft, were protected on both flanks and the rear by the railing from too close contact with our fellow passengers, while we had a good opportunity to observe them, which, incidentally, was one of the objects of our trip.

We had brought along sketch books for amusement, and as soon as we were well off my wife produced hers, secure in the conviction that no one could look over her shoulder from behind (unless by climbing the flagpole) and began shyly to sketch a group that took her fancy, measuring with her pencil and looking up and down in a way that artists have.

COMPLICATIONS.

Three dudes in boiled shirts and decidedly out of touch with Captain Foster's family of fishermen, persisted in getting in the way and causing her no little annoyance, but they didn't get their pictures taken—there is abundant material of that kind in the pages of *Puck* and *Life*, and we had no need for it.

Beyond the dudes was an interesting assemblage of men, women and children, for the second deck is the family stronghold on the Al Foster. There was a fine-looking German and his two grown daughters, next them a group of an old lady, a husband and wife, the latter with her baby, and several unattached young people of either sex. Then came three or four masculine friends who preferred the shade of the awning-protected second deck to either the upper sun-searched deck or the main deck where there was scarcely elbow room. Then there were several more women with babies, men with small boys, and small boys alone, half a dozen couples, and a sprinkling

of lone individuals who made up for their lack of friends by their friendship to their art. This deck was neutral territory for the rod fishermen and the hand-liners. The main deck was by common consent the rallying point of the latter, while the upper deck was given up exclusively to rods. This division of the forces was dictated by expediency. The hand-liners would no doubt have preferred fishing from the upper deck, but the rod men

knew that this would cause a greater tangling of lines than ever, and effectually tabooed them from that sacred spot. It might be well to add that women were not to be found on either the upper or main decks. These were reserved for past masters of the craft who fished with untiring assiduity as though their lives depended on it,

CAPT. AL FOSTER.

and had no time for the frivolities of conversation. They only stopped fishing when compelled to by the moving of the boat to different grounds, or to unravel a tangle.

This was the atmosphere of the picture: family parties, men with their wives, sweethearts and babies on the middle deck, and men enjoying sweet communion with their art alone on the other decks. One point differentiated these excursionists from other excursionists, and that was the subtle sense of good fellowship that pervaded the assemblage. The knowledge of a common bond of union seemed to knit the various sorts and conditions of men into one family. It would have gratified the heart of a philanthropist to see so many good-humored and orderly people together, each mindful of the other's comfort and careful not to infringe on his rights with a discriminating appreciation of what were his rights that was altogether unusual. Of course there were exceptions to this rule, as must be the case with every rule, but the atmosphere of friendly fellowship was very noticeable.

While we were talking and sketching the Al Foster had slipped down the Upper Bay, through the Narrows, and was now off Sandy Hook. The old fishermen began

CAUGHT WITH A CAMERA.

to grow uneasy. Numerous green and parti-colored baskets were opened, lines taken out, together with sinkers, hooks, etc., and rods jointed. The typical salt-water fisherman's basket is a tool chest and work basket combined. It contains scissors, needle and thread, files, knives, wire, awls and many other handy little tools. The fishermen pride themselves on the completeness of their outfits, and next to fishing love tinkering with their tackle. Each man had secured a half dozen or so "bunches" of clams from the bait dealer on the main deck, and these had been plentifully sprinkled with salt—"to make them tough," it was explained. The fishermen now began dissecting these, throwing away the eyes and soft parts, and only keeping the firm yellow flesh, which is both palatable to the fish, and moreover will not easily be stripped from the hook.

Half an hour later the boat was off Long Branch, and Captain Foster, who had been in and out of the pilot house at frequent intervals all the morning, gave the signal to slow up. The order to reverse followed and finally the anchor was dropped. But long before the anchor was down half a hundred lines were overboard in the white spume that rushed forward from the screws, and already several fish were pulled in. The lowering of the anchor was attended by a maneuvering of ropes in our immediate proximity, and this had delayed our efforts to get our lines overboard. Moreover, the artist was not familiar with the operation of baiting the hooks of the hand line she held, and had to have assistance. At last, however, both lines safely reached the water without a tangle, and soon after each gave violent twitches in the effort to fix the hook in an unseen but plainly felt denizen of the briny deep. All around the sound of battle could be heard. From the upper deck the rod men with adroit cast and accompaniment of whizzing reel sailing through the air, sometimes to a distance of 200ft. To their solo parts several hundred brother anglers responded with a chorus of swishing lines and plunking sinkers. The lines were continually becoming entangled, as might have been expected. But there were very few hard words and as a rule the most aggravated snarls were untangled quickly and with good humor.

Soon after the fishing began one hand-liner on the second deck hooked a fine fluke, or flatfish, as large as a dude's straw hat, and hauled it nearly to his deck. His line, however, had become entangled with a fisherman's on the lower deck and the fish hung in mid air a few seconds. Then it gracefully flopped off, struck the gang rail and disappeared in the sea after swimming around half a minute in plain sight near the surface. Under these aggravating circumstances most men would have indulged in profanity, but our friend the fisherman never opened his lips. He philosophically rebaited his hooks and tried again. The only expressions of disappointment to be heard were made by sympathizers who saw the accident from the different decks.

After half an hour's fishing at this spot the anchor was raised and we steamed further down the coast. Neither my wife nor I had caught a fish, though we had had numerous bites and had our hooks frequently stripped. At this spot the fish were mostly small blackfish, and we could not get the knack of hooking them.

After running perhaps a mile the anchor was again lowered and the batteries of the three decks put in action. Numerous exclamations called our attention to the fact

TYPICAL FISHERMEN.

that larger fish had been found, and we saw them coming up over the side with scarcely a pause. One could look down the side of the boat and see a fish in air all the time and frequently half a dozen. They were blackfish and bass, nice fellows, running up to 4 or 5 lbs., "flukes" and "ling," sea robins and skates. These last two fish were very unpopular among Capt. Foster's family, and were promptly returned to the sea after being put *hors de combat*. At this anchorage the kind fates took pity on the two neophytes in the art of sea-fishing, and several fish were brought up to their corner of the second deck in quick order. This fishing was, however, seriously interfered with by a little Dutchman on the deck below who persisted in trying to manage two lines at the same time, which was an art entirely beyond his ability.

His two lines were constantly becoming entangled with his neighbor's lines, the anchor chain or with each other. He threw out recklessly and hopefully, but apparently without looking, and if any other line was near enough, he caught it. It is needless to add that this man caught nothing else. At last one of his lines which had become fouled with the anchor chain several times gave out and he departed with his remaining line to the opposite side of the boat, after which we had better luck.

While the boat was moving to its third anchorage we ate lunch, which we had brought along with us. It was flavored with ginger-ale secured from one of the waiters who moved backward and forward assiduously attending to the thirst of the fishermen. The "handsome waiter" was in demand, for the day even on the water was hot, and beer and "soft drinks" from the bar below flowed freely down many a thirsty gullet.

At the next anchorage the fish bit well, too, and the decks were soon covered with flopping victims to the clam appetite.

Captain Forster circulated freely among the fishermen, and was in and out of the pilot house like a Jack-in-the-box. His thin, expressive face showed constant change of emotion, according as the fish bit well or not, and he took the keenest interest in his passengers' success. No doubt his financial interest in the boat makes him work hard to make each trip a success; but aside from that I can imagine him doing just as nicely for the profit of those who depend upon his skill for finding the fish. Captain Foster is fifty years old and has followed the seas since the early age of seven. He is a successful navigator, never having met with shipwreck or serious accident, and he loves the sea and sea-fishing with that intensity that makes the master in any line of life.

About half past two the sky became overcast, and the

anchor was hauled up for the last time and the Al Foster's bow pointed homeward. Fishing being over for the day it was now in order to compare scores. We found that our nearest neighbors had caught a string of a dozen good fish, probably netting as many pounds in weight. We ourselves had caught but six. The fishermen on the upper deck had averaged better and catches of 20 to 30 were noted. No one need go home from the banks empty-handed unless he is an unusually poor fisherman or has unusually hard luck.

In fact, the number and fine quality of the fish caught at a time when they are biting well is a matter of wonder. On such occasions the decks are strewn with fish and it is often no easy task for the lucky fishermen to get their catches home unaided. Some of them dispose of their surplus at figures that more than cover the slight expense of the trip. Despite all the fike nets, and purse nets and enemies by which they are encompassed, and despite the refuse of the great city which is cast into the neighboring waters of the ocean, these fish are still to be caught in sufficient numbers to satisfy most people, and it is not hard to believe stories which are told of prodigious catches taken on the boats a few decades ago.

On a good day one will see twenty or thirty steamers on the Banks, from the small harbor tugs up to the large excursion boats, all crowded and all taking something from the harvest field of the ocean.

Among the regular excursion boats, whose time sched-

ON THE FISHING BANKS—OFF NEW YORK HARBOR.

ules are published in the daily newspapers, may be mentioned the Schuyler, the Al Foster, Havana and Angler. Of these the Al Foster is the newest and most modern boat; but there are many individual preferences among the fishermen, and each boat has its constituency, and that there is great rivalry among them is needless to mention.

It was half-past 6 when the Al Foster landed her passengers at Pier 7. The day was closing on a scene of universal discomfort and suffering. The people in the street cars and on the street all looked so fagged out and exhausted with the heat and burden of the day that it was hard to realize for the nonce our personal comfort.

One poor sunstruck horse lay in the street and was the cause of a blockade of the ferry street car lines. The sun, though almost on the horizon, still shone pitilessly, and the air was close and stifling.

Yet despite all these adverse circumstances, we could recall the fresh breeze that fanned and tanned our cheeks while at sea, the sweetness and saltiness of the air, and withal the pleasant coolness of the day. New York has many attractions for those inclined, and chief among these is a trip to the Fishing Banks.

J. B. BURNHAM.

Trout Run Small.

NEW YORK, June 16.—Having just returned from my fishing trip at the Adirondack Preserve Association, Essex county, I also confirm the report as to our fishing, as related by your correspondent, "Special," in your valued paper of June 15, headed "Boston Rods in Maine Waters," i. e., that the trout this season are running small, and presume the same fact applies, "that artificial stocking is needed to keep up the supply." While we have been in the habit of taking fish running from 2 to 2½ and 3½ lbs., this season none were taken weighing over 2½ lbs., and the bulk of fish taken would run from ½ lb. to 1 lb. Fish of this size were quite plenty.

A NEW-SUBSCRIBER-OFFER.

A bona fide new subscriber sending us \$5 will receive for that sum the FOREST AND STREAM one year (price \$4) and a set of Zimmerman's famous "Ducking Scenes" (advertised on another page, price \$5)—a \$9 value for \$5.

This offer is to new subscribers only. It does not apply to renewals. For \$3 a bona fide new subscriber for six months will receive the FOREST AND STREAM during that time and a copy of Dr. Van Fleet's handsome work, "Bird Portraits of the Young" (the price of which is \$3).

ANGLING NOTES.

Fishways.

THE Troy Times of May 23 said: "As the water recedes it is seen that the fish dam constructed in the Hudson River at Mechanicville several years ago is almost totally wrecked and must be rebuilt. The dam cost \$5,000." I went to Mechanicville on the 23d and examined the fishway, for that is what is meant by "fish dam," and found that the structure was as solid as when built and entirely uninjured in spite of the fact that last winter thicker ice formed in the upper Hudson than has been known in twenty years before, and this ice went down the river past the fishway, leaving it intact. The fishway at Thomson's Mills, above Mechanicville, did not escape, for during the spring freshets about 12 ft. of its upper end was carried away. This, however, was no fault of the fishway or its builder, for the high water, the highest since 1869, took out part of the bulkhead of the Thomson & Dix mill and the fishway, or part of it, went with it. Mr. John A. Dix has told me that his company will repair the fishway and put it in perfect order when the mill is repaired. The writer in the Times unintentionally hit the exact truth when he called the Mechanicville fishway a "fish dam," for I found it filled with drift—brush, edgings and bits of wood, so that little water discharged at the lower opening or mouth, and it was wholly impassable for any kind of fish. Now is the time that the

salmon would use this fishway to pass to the upper river if they could get through it. A few hours' work would put this fishway in order and thereafter it would be a simple matter to keep it clear if there was some one to look after it. Mr. Dix will take it upon himself to keep the fishway at his mills in order. The cost of the Mechanicville fishway is incorrectly given in the Times. That and the one above it cost \$5,000, or \$3,500 for each one. By appointment I met Mr. Robert C. Lowry, of New York city, at Mechanicville, but the water was not in the best condition for fly-fishing, as it was rather high and somewhat thick, and further, the wind was blowing up stream at a rate that made fly-casting in the teeth of it far from easy work. On the previous Saturday, May 20, a salmon of 30 lbs. was taken in a shad net at Castleton, just below Albany, and released and swam away, apparently uninjured. On the same day a salmon of 19 lbs. was taken on a trolling spoon in the river below Albany by a man fishing for other fish. At Mechanicville I talked with people who have seen a great many salmon in the river, and everything indicates that the fish are plentiful in the water and only need the opportunity to get up stream to spawn above the mills and factories to multiply, until with the aid of artificial propagation, the Hudson becomes a veritable salmon river, affording good fishing. I am satisfied that the salmon taken last year below Mechanicville were not taken with the fly, and that the first salmon is yet to be taken in this stream by fair casting with the fly.

World's Fair.

I have a letter from Mr. J. J. Armistead, proprietor of the Solway Fishery, Dumfries, Scotland, telling me that he will arrive on the Alaska, due the 18th, on his way to Chicago to attend the World's Fair. Last year Mr. Armistead celebrated the twenty-fifth anniversary of the establishment of his hatchery at Dumfries, it being the oldest concern of the kind in Great Britain, and Mr. Armistead one of the three best and most successful fishculturists. I also have a letter from Mr. Wm. Senior, angling editor of the Field, London, written just as he was about to sail for home on the 27th, saying that he was returning without doing many of the things he hoped to do during his visit to this country and the World's Fair, his time being all too short. At the Congress of the Press Women of the World, held in Chicago, a paper was read by a local newspaper woman with the title "Woman as an Authority on Trout." The author of the paper was not present, but she is known to some of the angling papers, and particularly a newspaper in the Rangleye Lakes region, as "Fly-Rod," and her name is Miss Cornelia T. Crosby and her residence is in the Pine Tree State. A newspaper man was ungallant enough to say, "Good old Izaak Walton would have turned over in his grave and groaned, had he not long ago moldered into dust, when

the announcement was made that a paper would be read on the subject of 'Woman as an Authority on Trout.'" Nothing of the sort! Izaak Walton was made of finer clay than the man who wrote that paragraph, and he would have rejoiced, as all good anglers do, that women take sufficient interest in fishing to become authorities on the subject. If the male biped man should get too "cocky," the ladies, God bless them! should remind his self-satisfied highness that a woman holds the record for the largest tarpon with rod and reel, and that on two occasions last year the women beat the men, at the record, in salmon fishing with the fly in Great Britain.

A. N. CHENEY.

Wisconsin Trout Waters.

WAUTOMA, Wis.—Editor Forest and Stream: The article in FOREST AND STREAM of May 25 is misleading. Princeton is fourteen or fifteen miles from White River. Berlin is the place to go to, and from thence to Wautoma, Wis. White River runs through the village of Wautoma. Trout have been caught right along in it since April 15, principally with the minnow, but now they take the fly, too.

Several parties have been here already. Dr. French and party made as nice a catch of extra fine trout in the streams adjacent to Wautoma as I ever saw. Eight miles from here, on Willow Creek, I got on a 5-pound rainbow trout, and having tired him out (of course) lost him just as I was trying to land him. He straightened the hook (which was too small) right out and dropped off.

R. W. H.

Fishculture.

THE AMERICAN FISHERIES SOCIETY.

CHICAGO, June 16.—It may or may not have been a mistake for the American Fisheries Society to set their annual meeting for Chicago during the World's Fair time. As a matter of personal pleasure to those of the members who found time before or after the meeting to visit the attractions of the Exposition, it was well that the session fell as it did, but for those whose time was short the near presence of the Fair, whose hum and bustle, indeed, was on the ear at every moment of the meeting, made only an aggravation. The Fair overshadows all competition in interest, not only for the individual but for any body of men. It does not help society and organization meetings, but kills them. The Fisheries Society is accustomed to attracting local attention. Here it made not a ripple, and each member, aside from his personal realization of that fact, seemed on his own account most anxious to get out into the Fair.

The meeting, taken by itself, and without this qualification, was one of interest and profit, the more so from the presence of foreigners interested in kindred work, and the more so also from the lessons of the Fair itself, instanced through its proper officers.

The sessions were held morning and afternoon, Thursday and Friday, in the large reception room of the Michigan State building, one of the finest in the stately row of State edifices which curves across the upper end of the great transient city, whose fame now is in the ears and eyes of the world. Passing a good stairway and its crown in a wide ante-room adorned in a manner suitable to the State, one enters a spacious ball room, carpeted, however, and home-like, albeit furnished with a grand pipe organ and a suggestive piano. Glass lines two sides of this room, all swinging out upon wide galleries. Below the galleries passed bands of all nations, appealing or challenging, and from the vast crowds there came up broken murmurs. Members wandered to the windows. Some fell comfortably asleep. The majority sat upright, thoughtful and attentive. They all wanted to go out. This then was a pleasant place, but not a good place to hold a semi-scientific meeting.

Those Present.

President Herschel Whitaker, of Detroit, was in the chair, Secretary E. P. Doyle, of New York, at the desk. Mr. Whitaker writes shorthand, and kept track of much of the work *verbatim* for the sake of publication, thus assisting Mr. Doyle, a very able and pleasant secretary. The personnel of the society, as may not be borne in mind by all the readers of FOREST AND STREAM, is made up of members of the Fish Commissions of different States of the United States, of Canada, of the United States Fish Commission, of prominent practical fishculturists or fish dealers, of noted angling authorities and of scientific men whose work has been connected notably with the problems of fishculture. Of these there were present to-day Messrs. A. Booth, of Chicago, a well known fish dealer; N. K. Fairbank, president of the Illinois Commission; L. D. Huntington, president of the N. Y. Commission; W. H. Bowman, Robert Hamilton, Charles Wyeth and A. S. Joline, also of New York, also Superintendent Fred Mather of New York; W. C. Butler, D. Decker and Charles L. Hine of New Jersey; W. L. Powell, L. Shreuber, H. C. Demuth and Geo. Freas of Pennsylvania, also Col. John Gay, in charge of the Pennsylvania fish exhibit at the Fair; W. F. Page of the Missouri Commission; Dr. Tarleton H. Bean and W. De C. Ravanel of the U. S. Commission, now at the Fair, also F. N. Clark for the U. S. Commission at Michigan Station; Hoyt Post and H. W. Davis of Michigan Commission, besides President Whitaker; Jas. Nevins, superintendent of the Wisconsin Commission; W. David Tomlin and R. Ormsby Sweeney of Minnesota Commission; J. E. Gunckel of Ohio; Prof. Jacob Reighard of the U. of M., Ann Arbor, Mich.; W. L. May of the Nebraska Commission; Capt. Jos. W. Collins, Chief of Fisheries, the World's Fair; Dr. J. A. Henshall, in charge of the angling exhibit, World's Fair; H. H. Cary of Georgia Commission; Judge Asa French and Chas. F. Chamberlayne of Massachusetts; E. W. Gould, of Maine Commission; Dr. W. M. Hudson, of Connecticut Commission. Foreign countries were represented by Messrs. C. Ravn, Royal Commissioner of Sweden; C. Westergaard, Royal Commissioner of Norway; Nicolas Borodine, Commissioner for the Czar of Russia.

Papers of Interest.

During the day several papers of interest were read. Dr. Henshall read for the author a valuable paper on the Sunapee trout (saibling), prepared by Prof. J. D. Quackenbos, of New York. Mr. Fred Mather read a paper on lobsters. Mr. W. David Tomlin, of Duluth, Minn., presented a paper on the "Specialist in Fishculture." Mr. Westergaard, Royal Commissioner of Norway, presented a paper on "The Fisheries of Norway." Prof. Reighard, of Michigan University, submitted two papers, one on the "Handling of Adhesive Eggs," and the second on the "Quantitative Analysis of Whitefish Food." The former paper was read at the afternoon session.

Mr. W. F. Page, of Missouri, read a paper on the "Breeding of Yearling Trout." Mr. Page, speaking of the work at Neosho hatchery, Missouri, favored the raising and planting of yearling trout. The expense in rearing either trout or carp was usually made greater than necessary. On a diet of shorts—mush and liver, gradually increasing the proportion of the mush, they had found they could feed 1,000 trout at a cost of one cent a day. The loss could be kept as low as 6 per

cent. A loss of 40 per cent. was inexcusable. An average of six seasons at Neosho showed a loss of 15 per cent. A loss of about 10 per cent. was a fair figure. Yearlings had an advantage over fry when planted, in that they did not need food so soon, and could get out and hustle for themselves better.

Mr. Mather did not fully agree with Mr. Page, and read from Mr. Ramon E. Wilson, of the California Commission, which said that raising yearlings might do for the U. S. Commission, but cost too much for California.

Mr. F. N. Clark, of Northville, Mich., said it was as easy to raise trout as it was to manufacture sugar, but that you had to protect your fry one way or another. Planting fry unprotected was largely feeding them to other fish. He was neither an absolute fry man, nor an absolute yearling man, but was not against the yearling, and was strongly for protecting fry. He wished never to see a trout put in a grayling stream.

Mr. Mather thought the transportation of yearlings cost more than that of fry, but both Mr. Page and Mr. Clark thought the cost was about equal. Mr. Hoyt Post, of Michigan, was for fry, and President Whitaker showed that the planting of fry in Michigan must certainly be called a success, and that at a minimum of cost. A general discussion was held on the question whether or not fry scatter out into a stream when planted or hang about the one spot, to become the prey of fish, snakes and crawfish. It seemed believed by several that the fry did not at once disperse through a stream, but to an outsider it looked a good deal as though there didn't anybody know.

Dr. Wm. M. Hudson, of Connecticut, began the reading of his paper, "A Historical Review of the Work of the Connecticut Commission," but finding some pages of his MS. misplaced, held over the reading till the following day.

Mr. Post, of Michigan, read a review of the work of the Michigan Commission, recounting how, with a meager appropriation and imperfect appliances at the start, the first State hatchery thought it did well to plant a million and a half of whitefish, while now, after passing through many fluctuations, but always advancing in the main, the commission could now point to a number of modern and well equipped hatcheries, an appropriation for 1893 of \$27,000, and for 1893 and 1894 of \$35,000, with a plant of whitefish running over 100 millions each year, and of trout between two and three millions. Mr. Post spoke of the old craze for planting foreign fishes, and of early wasteful experiments in that line. He said, however, that the European brown trout were doing well in Michigan. He said that the Michigan Commission was always for strict protective measures, though a legislative lobby often knocked them out. The Legislature did not oppose propagation so much as it did protection.

Notes of the Day.

The address of President Whitaker in the morning was one of the best features of the day.

Mr. W. De C. Raveland, of Washington, D. C., now on duty with the U. S. Commission at Chicago, was elected to membership.

Capt. J. W. Collins, Chief of Fisheries, read Mr. Westergaard's paper on the fisheries of Norway, that gentleman not speaking English fluently.

Adjourned at 5:30 to meet Friday at 9:30 A. M., under invitation of Capt. Collins to lunch during the hour of intermission Friday.

Friday's Doings.

The annual election of officers, held Friday, resulted as follows: President, Mr. H. C. Ford, of Philadelphia; Vice-President, Mr. Fred Mather, of New York; Treasurer, Mr. R. Ormsby Sweeney, of Duluth, Minn.; Recording Secretary, Mr. E. P. Doyle, of New York (re-elected, subject to ability to serve); Corresponding Secretary, Dr. J. A. Henshall, now of Chicago. Executive Committee, Messrs J. E. Gunkel, of Toledo, O.; A. B. French, of Hartford, Conn.; Herschel Whitaker, of Detroit, Mich.; Dr. H. H. Cary, of La Salle, Ga.; L. D. Huntington, of New York; Jas. Nevins, Madison, Wis.; W. L. May, of Fremont, Neb.

Dr. Bashford Dean, of Columbia College, was elected a member of the society.

Further Papers.

The paper of Nicholas Borodine, Commissioner of Russia, "A Review of Pisciculture in America and Europe," was read, also Prof. Reighard's second paper. Mr. E. W. Gould, of Maine, submitted a paper on the "Nationalization of Fisheries." Mr. W. F. Page, of Missouri, handed up a second paper, on the "Sale of Domestic Fishes." This was read by title only, time now growing short.

Capt. Collins spoke without MS., his remarks being taken stenographically for publication. His theme had to do with the installation of the Fisheries exhibits. He called attention to the national showings made by different countries, instancing Russia, Norway, Brazil and other lands, as showing many things of great interest in fishing gear and fish products. Such things as these, in connection with the State and Government aquaria, made up one of the most valuable and most popularly appreciated objects of the entire Fair, to say nothing of the models of hatcheries of other lands and the actual hatchery shown running by the U. S. Fish Commission. All in all, while not perfect, by the U. S. Fisheries Department filled the bill very well, and would be found pleasantly profitable for the inspection of the fish dealer, the angler, the old person or the child, the student or the mere sightseer.

Dr. J. A. Henshall, in charge of the angling exhibit at the Fair, also spoke without notes. He described the attractions of the Anglers' Pavilion, spoke of its ancient and modern attractions, not forgetting the big tarpon of the FOREST AND STREAM exhibit, nor the Kentucky reels shown at the same space. He said the finest collection of practical rods ever made in the world by one firm was to be seen in the pavilion, and that many other interesting features, such as the first split-bamboo rod ever made (that made by old Sam Phillip) were to be seen at every hand, to say nothing of the pretty girls tying flies. [Applause.] Dr. Henshall's remarks were cut too short by the announcement that ex-President Harrison was below and might soon want to look into the room, if any of the gentlemen cared to meet him. Capt. Collins was appointed chairman of a committee to go and catch ex-President Harrison. A colored girl poked her head through the door. In the confusion between the ex-President and the colored girl, Dr. Henshall sat down.

At this juncture, it being now nearly 5 P. M., attention was called to the fact that Mr. Page's paper on the sale of domestic fishes, which had been read only by title, contained a resolution to the effect that the society favor such State laws as would make legal at any season the sale of domestic or artificially raised fish. Several protests at once were heard to this, President Whitaker among others.

"This can be taken up next year," said the president. Mr. Page—I want to say there will be no more papers from me next year. I have been at expense of time and trouble to prepare papers for this body, and yet I am not given time to read this paper, though others are given time to discuss anything they like.

The Chair—That often happens, and unavoidably. I have had it happen to me. There is often lack of time to do more than read by title.

Mr. Page—It has happened twice to me.

The Chair—Shall we act on Mr. Page's resolution?

Mr. Page—No, I will not let that resolution go to a vote without time for a full discussion.

Capt. Collins (entering)—We wish to report that ex-President Harrison will be in the building in a few minutes.

On vote the meeting now adjourned for the year.

Notes of the Day.

Votes of thanks were passed for Capt. Collins for his entertainment of the society at lunch, and for Dr. T. H. Bean's invitation to visit the U. S. Commission exhibit in the Government Building after adjournment for the day. A vote of thanks was also extended to President Whitaker for his kindness in the additional labor of keeping the stenographic notes.

The society did well to let Mr. Page's resolution on sale of domestic fish lie over, and they will do better to kill it outright next year. This is the old Gilbert measure, originally of Massachusetts and now gone to Missouri. To allow the sale at any season of domestic trout for instance, would mean that all the laws protecting wild trout were to be made practically inoperative. This measure might help a few dealers and breeders, but would hurt many anglers. It would help commerce, for a short time only, but would hurt sport forever. Mr. Page would do well to strike this resolution from his paper with his own hand. It is eminently vicious at heart, if not upon its face. Its passage by the American Fisheries Society would mean the just antagonism of the entire sporting press of the country—an event which at least would be of no benefit to the society. The measure itself would be of no benefit to the people. E. HUGH.

"FOREST AND STREAM" AT THE FAIR.

June 16.—The omens continue good for the FOREST AND STREAM exhibit. This morning there wandered into the Anglers' Pavilion a stray dog, a rough-coated but soft-bodied and gentlemanly-looking terrier, used to being somebody's pet and friend and in search of a home and mother. Dogs are not allowed in the Fair, and how this little fellow got there is a mystery. Anyhow, he came through the door, looked up at the FOREST AND STREAM sign, of which he had evidently heard, took one confirmatory glance around the premises, heaved a sigh of relief and at once crawled under the table and made himself at home. The lady attendant of FOREST AND STREAM fed him part of her lunch, and that settled it. The terrier became part of the exhibit. During the day he made two or three short trips away but came back, and at evening was still there. By afternoon he was becoming useful enough to follow to the door in a cold sort of way any one whom he thought to be not just the right sort of person. I do not know whether this waif is still at his adopted home, but if he is he shall have a home. Does any one know about this dog? He has once been owned by a lover of a dog, and deserves good treatment. He knows how to read and he knows where to go when he is in trouble. Unless some one can claim him he shall be the FOREST AND STREAM dog hereafter, and he will bring good luck, if the paper needs any more.

The Camera Tax.

So far as I know, the FOREST AND STREAM criticism of the unjust camera license at the Fair was the first journalistic protest at this imposition. I called this tax an un-American thing, and I so believe it, and I think it ought to be done away with. Other papers followed suit with hearty objections. Not long after the FOREST AND STREAM protest an order was passed by Director-General Davis admitting all newspaper cameras free. This only half settled the question, and even so there were continual clashing, arrests and rearrests, and a lot of disgusting foolishness between the director of the Fair and this man Arnold, the concessioner for this most unheard-of piece of popular robbery. The public does not let the matter rest, and most of the daily papers here have roasted Arnold severely, though justly. The daily Tribune of late date had the following from Mr. Frank P. Eldredge:

"We all realize that the Fair is a gigantic undertaking and that it could not be managed to please every one, but it seems to the writer as if in some respects the letting of concessions was carried entirely too far. I called at the headquarters of the photographers at the World's Fair grounds a few days ago and told them I was willing to pay \$10 a day if they required it for the privilege of using a 5x7 camera, but of course was refused the privilege. Upon asking why it was that everything over a 4x5 was barred the reply was that it would ruin their business. This evidently referred to the selling of photographs taken by them. In my opinion this is not true, as no amateur photographer who was refused the right to use a camera of decent proportions would feel like buying an 'official' photograph; I, for one, certainly would not. It would not be difficult to devise a way of letting amateur photographers have certain privileges without its interfering with people who have a concession, in the least. I am acquainted with a great many amateur photographers who have felt severely the loss of not being able to use their cameras at the Fair."

Mr. Eldredge is right in his position, and the matter should be kept in agitation. At the beginning of the season FOREST AND STREAM sent in a fine 5x7 instrument for illustration use during the Fair, but it might as well be worthless, for Arnold would not admit it when presented. This was before Gen. Davis's order. Since then, newspaper men have been stopped in their work, and arrested by the guards at Arnold's order. Among those subjected to indignities was the representative of *Black and White*, an English art publication which wanted to illustrate with views of the Fair. Thus the Fair is continually hurt, aside from the injustice to those who want pictures for their own private use. Later on I shall go against Mr. Arnold's arresting game a little bit myself, because I want to get in with that 5x7. This week the editor of FOREST AND STREAM speaks with very faint praise of the picture of the paper's rustic sign. This was taken with a fall-down 4x5 camera, the best at hand to pass the absurd scrutiny of this most useless spider on the wall. If the Fair knows its business, it will recall this "concession" and concede a little to popular wish and to absolute justice.

A Sad Visit.

Adjoining the FOREST AND STREAM space in the Anglers' Pavilion of the Fisheries is the space of the *American Angler*. About two weeks ago the editor of that paper, Mr. Wm. C. Harris, came on to Chicago with his wife, intending to have a pleasant visit at the Fair. What was planned in joy has come out in grief. On the day of her arrival Mrs. Harris slipped and fell while about to enter a carriage, sustaining injuries which ran into spinal meningitis. For about two weeks she failed slowly, and on Thursday night, June 15, her death ensued. Mr. Harris closes up his installation for the time, and in company with his attendant, Mr. Henry, at once goes back to New York with his wife's remains. Certainly his has been a painfully sad visit here, and sympathy for him is spontaneous and unreserved.

"Forest and Stream" Friends.

The FOREST AND STREAM visitors' register grows apace. Aside from this, many leave cards, among these of late being Messrs. H. G. Nicholls, of Mitchell, S. D.; L. W.

Robinson and J. S. Dresser, of Southbridge, Mass.; Brad. W. Davis, of Olympia, Wash.; N. A. Osgood and Mr. T. H. Jennings, of Battle Creek, Mich.; Mrs. Jerome Burnett, now at Chicago. Mr. Nicholls is a young Western man much given to the sport of coursing. Mr. Robinson is a nephew of Mr. Rowland E. Robinson, of Ferrisburgh, Vt., creator of Antoine and Sam, author of the "Danvis Folks," and also author of books more inquired for at the FOREST AND STREAM corner than almost any other. Mr. Davis is in the office of the Secretary of State out his way. Mr. Osgood is the inventor of the Osgood folding boat. Mrs. Burnett, clad in deep mourning for the husband whose death is but recent, said: "Mr. Burnett used to write for the FOREST AND STREAM, and he loved the paper so that it seems a comfort to me to stop here and say a word to it." There are worse friends than an honest newspaper, and there are no better friends than this paper has all over this wide land. It brings them nearer to have them come forward in person, and at least hail in passing, even though the paper be not able to take them all by the hand.

The Boone and Crockett Banquet.

June 16.—The hunter's cabin and the wooded island at the Fair never looked better than it did at the banquet which marked its formal opening yesterday, June 15. It has been practically open ever since the spring, but it was not formally opened until yesterday, about 7:30. The members were waiting until the leaves came out and shut the cabin off a little better from the outside world. The following were present: Messrs. T. Roosevelt, New York; N. Wadsworth, Genesee, N. Y.; W. Chanler, New York; W. Whipple, Norristown, Pa.; W. I. Buchanan, Chicago; R. Williams, Lexington; John Pitcher, Chicago; M. Hanna, Cleveland; W. Philipps, Washington; Chas. Deering, Chicago; O. Wistar, Philadelphia; D. H. Burnham, Chicago; M. Harris, Milwaukee; F. Edwards, Washington; H. Allen, St. Petersburg; Frank Millet, Chicago. E. HUGH.

909 SECURITY BUILDING, Chicago, May 6.

"If your Caravels"—SEE THE ADVT.

Northern Fishing Waters.

The Rome, Watertown & Ogdensburg R. R. Co. issue a handsome book of summer tours, which illustrates and describes the famous St. Lawrence fishing waters, as well as the adjacent Adirondack territory. Fishermen and others interested should send for it to Thos. Butterfield, G. P. A., Syracuse, N. Y.—Adv.

Feb. 19.—United States Field Trials Club's Spring Trials, Grand Junction, Tenn. P. T. Madison, Sec'y, Indianapolis, Ind.

Where is the Cocker as a Working Spaniel?

Editor Forest and Stream:

I think it is about time that the kids and would-be breeders found another name for all the nondescript mongrels they breed. Every measly wretch of a dog that at all resembles a spaniel is called one of "Uncle Dick's" kind, and then they work off that musty, worm-eaten old chestnut about the judging at Philadelphia. How many times must I say that of all things I hate a leggy cocker, but I do insist on some leg and that it is straight.

To Mr. Cox I would say that I am glad to know that one spaniel man is not ashamed of his name. Yes, I admit "an ounce, etc." I've tried field spaniels and found them wanting. If you trace the pedigree of your Ben you will probably find lots of cocker blood. Now what's the use of 40lbs. if 25lbs. will do the work, and what more can one expect of a dog than to work all day and every day in the season? My dogs do it and they don't chase rabbits either, for that's an unpardonable crime in my kennel. I keep a little tinker shop and I also vend guns; some of my dogs are always at the shop; I let them go with any responsible person, and they can learn half of the shooters in the State more than they ever knew about ruffed grouse and woodcock.

I fail to see what right Mr. Cox has to say "cockers of my type," and how does he know what my type is? I have not exhibited since the craze for the long and low and the baby type set in. My type is just what the standard calls for, no more, no less; just a cocker, active, graceful and well built. It is degrading to a sporting dog to breed only for fancy and exhibition purposes, and subject him to fancy and arbitrary laws not essential to his claims to good breeding and fitness for his legitimate work; it ought not to be impossible or even difficult to define the amount of leg permissible in a cocker. The Beagle Club drew the line sharp at 15in.; 14in. is enough for a good working cocker.

I claim that my cockers under 14in., 29in. long, 26in. chest and 20lbs. weight, are better proportioned than Ben, and they can work just as long as Ben or any dog living. That square muzzle is a poor argument. A mastiff has as square a muzzle as any breed I know of, but I never knew that they had a good nose, and I have owned and bred a few good ones. I am willing to have a setter head on a spaniel, but the type of Royal IV., not the Tennessee type.

Field trials are all right, but I have yet to hear how they can be held or what system of scoring will be used. No man living can follow my dogs, and no one can even see their best work.

I wonder what "Solus" is trying to prove about the cockers he saw go into a briar swamp for a few minutes. Why, the worst duffer of a cocker in America will do that much, but to work for half an hour in a swamp don't make them workers by a long shot. My dogs would have gone around the briar patch and have worked the birds to my gun, but to rush pell-mell through the swamp and get covered with "prickles, burrs, etc.," proves nothing, only this, that the

dogs were not broken. "Solus's" modern cocker of to-day is not the modern cocker of 1888. In those days I was kicking about the long and low crocodile cocker. Where is he now? Echo answers, "Gone, never to return," and now I kick against the big-headed, crooked-legged baby cocker, and he will soon follow the long and low.

I am not asking any one to yield to my ideas; let them do as they please; it's the dog I care for. Let us see about that list of men. Willey is a real good fellow, but I asked him what he bred such dogs for, and he said, "Just to sell." That's the whole story. To breed fancy dogs for fancy judges to award prizes just to sell to girls and dudes that never saw a woodcock, only on toast, and do not know a ruffed grouse from a great auk. Mason, I know him also—the best judge of fancy in America, but not in condition to follow my dogs, and I doubt if he ever killed a cock or grouse in this country. Wilmerding I've known for 14 years. He used to shoot some, too much business now; gets out about four times a year. I could walk him down in half a day. He is not so very modern in his ideas this year. Kirk, a friend of mine before they had a spaniel club; he shoots some, but not over baby cockers. Bell and Laidlaw never shoot. Oldham—he ought to do some shooting, as I hear he is on a fine game preserve.

I claim that I am consistent, for I have at all times stuck to the working cocker. "Solus" adds insult to injury when he says I have "only been able to breed weeds." I can name a whole lot of champions I have bred, and I also claim that in Hornell Velda I have bred the best cocker ever seen in America; in fact the only one that the critics could not find fault with; and I have now between thirty-five and forty that for type, cocker character and sortiness, can beat the same number from any kennel in the world. I am not rich, but I have friends who will back my dogs for any amount. I will match a pair of working cockers, 14in. at shoulder, 26 and 27lbs. weight, against any modern prize winners in America for any reasonable stake or plate, for a three days' hunt, work over the same ground, birds bagged to count. For every inch the modern dogs are under 13in., I will allow one bird each day, and for every pound they are under 22lbs. I will allow one bird.

I don't ask "Solus" or the club to change its ideas for me, although they are changing quite fast, but all should remember that it was I who made the first kick against the weedy, snipy cocker of fifteen years ago.

About Detroit and Elmira that was just a matter of cash. If the boys had done as much figuring on how they would get past St. Peter as they did on the shows, they could have ordered wings 16ft. long, for you know it will take a big pair of wings to make respectable angels of the gang.

"Spaniel" is all right; he knows something about a working cocker, but I can train a pup to retrieve from water quicker by going in myself first, where it is shallow, and the pup will follow. We imported Miss Obo II. and sold her, as we thought she was too much of the field spaniel type, and that we would never be able to keep her at the limit, 28lbs.—a starved-to-weight cocker is a nuisance.

J. OTIS FELLOWS.

HORNELLSVILLE, N. Y., May 14.

Editor Forest and Stream:

That Mr. Morris, whose letter appeared in your issue of June 1, has owned two kennels of cockers in this country will, I think, be news to one and all. It has always been the theory of the advocates of the ancient cocker that the modern cocker would go round a fallen tree rather than jump over it, and further, that in a close swamp, where the wild grape and blackberry abound, they would be useless. The test I gave in my last letter was complete in every sense, and convinced more than one of those present that the majority were right. In the country where I am at present located the birds are found where the berry or grape is in most profusion and where the size of the dog does not count so much as perfect control, good scenting powers and endurance. That one strain of sportsmen would prefer a large dog and cleared land I can well understand; where you are watching to see the bird on the ground and on the ground to give it its quietus the danger of shooting your dog in the dense undergrowth is of course increased. But to the sportsman who is in all particulars a sportsman that argument will not do.

I have worked cockers as much as any man in America, tried all kinds from the old style to the new, and will always maintain that the cocker we want is a dog of from 20 to 25lbs., with plenty of bone and substance, flat coat, good feet and a nicely formed head.

In field spaniels I want the long, but not too long, and the low, but not too low. Mr. Foster's Judex is about the style I prefer, and I feel confident that if we can only make up our minds to have our dogs handled and brought up as a sporting dog should be, the Spaniel Club will soon convince the most skeptical that the spaniel has not lost any of his old cunning or usefulness. Mr. Wilmerding's old friend, Black Prince (who, I hope, will long be spared to his master), has always been my model as to what a field spaniel can be taught if properly handled, and it is a great pity that when he was in his prime his owner did not import a really good bitch to be served by him, as I think from that cross much good would have resulted. Mr. Morris tries to throw ridicule on the proposed spaniel trials. It is pleasant to think that Mr. Morris in spaniels has shot his bolt, and that the more he attempts to decry the Spaniel Club and the spaniel they favor the more they go up in popular estimation. A man who writes of a poodle as a better spaniel than those now shown is a man whose opinions we take at their true worth. What we want is a beginning in spaniel trials. The first time will not count for very much, but when the lovers of spaniels with their dogs met together in the field, no matter whether it is pigeon or woodcock, suggestions for the next trials, improvements, etc., will surely follow, and thus out of little much good must come.

SOLUS.

JUNE 9.

Editor Forest and Stream:

It seems to me that there is a deal of talk going about working and show cockers. Interested in the breed to a small extent, I object to hearing the beauties of the day maligned, and desire to call Mr. E. H. Morris down from his self-erected pinnacle.

In FOREST AND STREAM of June 1, he states without qualification, "Breeders have never thought of getting a standard, and judges that shall distinguish between the pet dog and the working cocker."

There is a standard that any man can understand, and a pretty good one at that, and it seems to me that in at least two shows the working cockers were placed over the toys, with a jolly row on paper in consequence. It seems to me that not so long ago Mr. Bell disputed this same statement, that the dog show winners were not hunters, and offered to wager good money that his dogs could hunt game as well as "mugs."

It seems to me that now is the time for Mr. Morris to whirl in and show us the proper type of cocker. Perhaps he meant to do so at the Pet Dog show, but as the only cocker of his breeding was sixth in a class of ten, it seems to me that we must wait longer.

"Talk is cheap, but it takes money to buy land."

IT SEEMS TO ME.

Too Poor to Own a Dog.

Editor Forest and Stream:

In your paper appears one signed "Strawberry Bank" who claims to be too poor to own a dog. That is not the way it is in central Montana. Out here the poorer a man is the more dogs he owns; and are not dogs property now under the law?

JUDITH BASIN.

Our Bulldog Pictures.

Editor Forest and Stream:

It is quite a surprise to find another person so rash as to record by public letter his ignorance of bulldogs after you administered such a dose of wholesome advice to Mr. Tisdell, of Ithaca.

The foot note added to Mr. Hampton's letter, published in your last issue, seems to call upon me for at least a few words of explanation to defend the character of the bulldog, and rebuke Mr. Hampton for his unjust and improper attack upon the respectable standing of my many friends who own, raise and love their bulldogs. Mr. Hampton ventures the guess that only a taste for "monstrosities" will develop this fancy or affection. If Mr. H. had said, a fondness for "grotesque oddities," he might have guessed half the truth, as we must confess the peculiarities of the breed are charming.

If we love our dogs because of a "fashion," truly the Bulldog Club must be congratulated for its success in advancing the breed to public favor. (It is not possible to do this with every breed.)

To illustrate his idea that the dog is an "index to the character of its owner," Mr. Hampton falls into a grave mistake by publishing a list of his friends Mr. A., Mr. B., Mr. C. and Mr. D. It would be wiser to suppose that the vile characters of Mr. Hampton's friends had reflected on their dogs and degenerated the poor brutes. At any rate we cannot call the dogs possessed by Mr. A., B., C. and D., in evidence to prove anything against the bulldogs, as there is a serious doubt if these dogs are pure bulldogs; and please note, Mr. H. takes special care that he discovers to us no means by which we may prove that he does not know a bulldog when he sees one. Farmers as a rule do not keep bulldogs, and if Mr. Hampton will give us the names of his rustic friends I will take the pains to look up the matter and establish the notion that rests in my imagination that A., B., C. and D. have no dogs of the breed.

Against Mr. Hampton's array, this list of his bulldog men, let me place in contrast the list of my friends. A full list of the members of the Bulldog Club of America:

E. K. Austin, New York city, N. Y.; W. J. Comstock, Providence, R. I.; R. L. Crawford, Jr., New York city; Chas. D. Cogle, Baltimore, Md.; W. B. Dinsmore, Jr., Cambridge, Mass.; Frank F. Doie, New Haven, Conn.; Duncan Elliott, New York city; A. B. Graves, New Haven, Conn.; W. F. Hobbie, Plainfield, N. J.; David L. Haight, New York city; A. J. Hatch, New Haven, Conn.; Col. A. B. Hilton, Saratoga, N. Y.; H. D. Kendall, Lowell, Mass.; C. P. Lawshe, Trenton, N. J.; John H. Matthews, New York city; E. D. Morgan, New York city; Wm. Mariner, Milwaukee, Wis.; Francis L. Morrell, New York city; W. C. McArthur, Burlington, Ia.; Geo. E. McHie, Chicago, Ill.; Troner L. Park, New York city; Jas. E. Quan, Chicago, Ill.; Willard E. Koby, New York city; D. M. Richardson, Lowell, Mass.; Mason Jones Renshaw, New York city; R. C. Rueschaw, Chicago, Ill.; E. C. Schuyler, New York city; Chas. A. J. Smith, Boston, Mass.; F. W. Sackett, Cape Vincent; Miss Agnes T. Thewlis, Peoria, Ill.; Thos. H. Terry, New York city; J. H. Winslow, Philadelphia, Pa.; Thos. H. Webb, Peoria, Ill.; Robert D. Winthrop, New York city; E. A. Woodward, Chicago, Ill.; Henry R. Astor Carey, Newport, R. I.; Johns H. Congdon, Providence, R. I.; W. E. Gray, Baltimore, Md. Honorary members: James Mortimer, Hempstead, L. I.; Dr. N. Rowe, Chicago, Ill.

My list outnumbered the other ten to one, and as for quality—well, I feel sorry that Mr. H. does not include so many gentlemen. My list gives the representative men in bulldog circles.

"What is the bulldog good for any way?" (I quote Mr. Hampton, of Indiana.) Perhaps he may be useful in keeping thieves and poachers from off his owner's premises. Mr. Hampton seems to have had experience and knows where the "no hunting" signs must be regarded with respect. I trust he discovered the cause before he got over the fence; but I congratulate Messrs. A., B., C. and D. that they own such sensible dogs that look up intruders sharply.

Do bulldogs bite? Why, yes, so do collies, St. Bernards, setters, pointers, pugs, etc., etc. I don't know that the proclivity for nipping now and then is confined to any special breeds, but I do stoutly hold that bulldogs are no worse than others, and in some instances much better. Mr. Hampton tries to prove his case by citing a few cases. I will challenge for every ignoble deed that Mr. L. can prove against us, I will give a dozen authenticated cases where the nobility, loyalty and affection, yea, gentleness of the bulldog is established beyond question, and fifty examples of vicious brutes of other breeds.

It seems egotistical folly for Mr. Hampton to air a contrary opinion when the world has sung the praises of the bulldog for ages, until his very name is a symbol of loyalty, patience, forbearance and nobility.

"A relic of a barbarous age" (again quoting Mr. H.). If the gentleman is not content to let "bygones be bygones," and asks us to judge each breed by the uses they are put to, let me inquire, what the refined, elegant and tender-hearted people do with their dogs to-day.

Greyhounds were formerly and are now used to chase, kill and murder poor little hares and rabbits, that are trapped, confined and loosed to a temporary freedom under the very noses of their destroyers. The refined, elegant and tender-hearted men watch with exquisite enjoyment the contest of speed until the poor little captives lose their breath and weary their legs and drop victims to the snap of the jaws of death. Does Mr. H. object to greyhounds? Again, the "sportsman" although his store-room is well filled with victuals, puts his gun over his shoulder, calls his setters, pointers or deerhounds (as the case may be) to come to his help, that he may better indulge his damnable passion to spill blood and destroy life. "It is fun for the boys but death to the frogs." The setter, pointer, spaniel or deerhound is actually used to-day for a more barbarous purpose than ever bulldog was put to. The rat pit and bull ring are models of decency as compared with the slaughter, wicked, cruel, useless slaughter of the average "sportsman."

If Mr. Hampton wishes further to know why bulldogs should be permitted to exist, I will say, for the same reason as allows life and respect to the St. Bernard, the collie, poodle, pug, all the many terriers and hounds, and every other breed that breathes under the sun. Let those that know our dogs and know us speak with understanding and speak loudly, and put to shame those that utter ill and false things against us.

It is rarely that I am tempted to quarrel, but the cause is a just one, and my indignation is roused to resentment.

JOHN H. MATTHEWS.

NEW YORK CITY, N. Y.

Editor Forest and Stream:

I had sincerely hoped that the light you imparted, in your able article replying to the letter of Mr. S. R. Tisdell, re bulldog pictures, was not only sufficient to put that gentleman right, but also to keep off any other "old subscriber," who was tempted to write of things he knew not, yet it seems that Mr. O. H. Hampton evidently is in a bad vicinity, both for bulldogs and neighbors, for his letter in your issue of 11th implies that Williamsburg, Ind., is not only full of them, but that although the dogs are briefly mentioned, their owners, Messrs. A., B., C. and D., are the ones attacked. Mr. Tisdell's letter, as I understand it, was against your publishing half-tones of thoroughbred English bulldogs, and implying that he would discontinue his subscription unless you promise not to do so again, as it shocked his sensitive nerves, and the anticipation of an illustration of a "pit" in the near future, was filling his system with insomnia. Mr. Hampton makes the bulldog simply a "runner up," to work in his

evidently pet original idea, that a man should be known by the dog he keeps. This is a new one, sure (my, my, what an educational age this is), but wouldn't Mr. H. have a hard time explaining the character of a man who keeps several different breeds? We will allow him that gentlemen do not keep bulldogs for their good looks or their intelligence, although we might argue that a little, should space permit, but when he mentions affectionate dispositions, let me state, with nine years' experience, that a thoroughbred English bulldog has not one drop of treacherous blood in him, and should not be even mentioned in that line with some other breeds, and especially collies. He says, "Give the tough his choice between a bulldog or a collie; which will he take?" Answer, a collie, for a thoroughbred bulldog would not be worth his keep to him.

I fear that Mr. Hampton, like many others, knowing no better, calls every tramp mongrel who has to fight for his daily bone, a bulldog. The Bulldog Club of America was formed for the purpose of educating all such to the fact that those bulldogs (?) were not bulldogs. As you know, we have progressed finely in three years, but it seems that Williamsport has been overlooked. Be patient, Mr. H., give us just a little more time and we will get out your way. When you go to the World's Fair, look up E. A. Woodward, of Chicago, get him to show you a few of his "relics of a barbarous age," and also ask him to allow his baby boy to illustrate how King Lud can be teased and exasperated by him without showing the least sign of temper, to say nothing of treachery. Then have Lud put into a room, and after the house is quiet, you do the "burglar act," but before you do just leave an order for an ambulance to be at the door a few minutes before Lud gets through with you, for you will need it badly. I must say I rather like your idea "that a dog is somewhat of an index to the character of his owner," and as you have no doubt given it much thought, time and attention, would you kindly inform us of the different characters that go with the different breeds? Don't neglect to especially mention the characters of owners of Mexican hairless and Schipperkes; and, if not too diabolical, the character of one of our large owners who dares to own pointers, collies, Irish terriers, fox-terriers, bulldogs and dachshunds all at one time. I ask this with fear and trembling, for he must be beyond redemption, and I really hesitate, for it seems that I should not deliberately place you in a position to ruin this man by giving him a character that must be the vilest of the vile.

CHAS. D. CUGLE.

Spaniel Trials.

Editor Forest and Stream:

I think that the *modus operandi* of the proposed spaniel trials outlined in "Dog Chat" in issue of June 8, savors rather of the burlesque. My experience with spaniels leads me to believe that if the broom-grass-in-the-field procedure is adopted there will be little test of a spaniel's capabilities. Will not any hunting spaniel naturally make for the cover in view? When he gets there, as far as I can make out, the plan is to release the basketed pigeon, and when shot, order the dog to retrieve. This will be a slight test of retrieving, as the pigeon will probably drop in the open. That's all right as far as it goes, but how about nose and bird sense and endurance? I don't think that field trials should be made drawing-room affairs to save the judges' legs. A sportsman should not mind a whole day's tramp. I remember last fall attending the New England field trials, and if any one can show me worse hunting spots than some of the covers and swamps Messrs. Wallace and Coster literally waded through I don't want to have anything to do with them. The dogs were followed all the same in these trials, and I don't see why the spaniels should be treated to any billiard table performances. The spaniel is supposed to be a dog that can go into any cover, and what he cannot go over he goes under.

In reading the accounts of beagle trials I notice that most of the work is done in cover, and often thick cover, and that game is not at all plentiful as a rule. Still the judges seem to follow all right and arrive at a pretty correct estimation of the dogs' merits. Why cannot the spaniel men do the same? Surely there are localities in New England, New York and New Jersey, where some game may confidently be looked for, that would be convenient to most of the spaniel men.

Spaniel trials, if they are to be such in reality and not in name only, should not be dependent on the convenience of a few members who don't want to go to much trouble to carry them out. Field trials for setters and pointers and beagles were not instituted on these lines. The good that would accrue to the breeds for which the trials were instituted was the incentive and not personal convenience. I don't think this pigeon-in-a-basket idea will show under what control a spaniel is to any extent; walking across fields between covers will show that. What attraction will a pigeon in a basket have for a spaniel? About as much as a nest of china eggs. If the intention of the Spaniel Club is merely to get a few members together and have a good time, why they can probably get it out of a basket as well as any other way; but if they mean the proposed trials to be a test of sporting dogs by sportsmen, then let the affair be conducted on sportsman's lines, even if the judges do get some mud on their boots and we find but two birds. The "seeking" will show the training and capabilities of a spaniel, even if game is not flushed as often as one would like. At any rate, such work would be natural and attain a better end eventually than a whole dove cote in wickerwork with a string to it. Trials that will be but a farce at the best will bring ridicule on one of the handiest sporting dogs living; but if carried out in a natural way the verdict of sportsmen, whatever the result in the way of finding game may be, will be—they did their best, and no man can do more.

AU NATUREL.

The Wissahickon Catalogue.

PHILADELPHIA, June 19.—**Editor Forest and Stream:** Exclusiveness in information is only a success when combined with correctness. In the report of the Wissahickon show your representative says, "The arrangement of the catalogue had, it is said, been left to Mr. Watson, and after the first catalogue was issued it was found that a number of dogs entered were not in it at all," etc. The inference is that I made a muddle of work I was responsible for, whereas the real facts are that I simply assisted the printer into knocking into some semblance to correctness the copy sent him by Dr. Sauvour's assistants. The first of the catalogue copy was given the printer at 11 o'clock on Saturday morning, and the last batch on Monday morning. The proofs of three or four batches had to be marked with class number all the way down the margin and then sorted into catalogue order. The printer and I had to accept as correct the copy sent, but where positive of error I made alterations. The omissions and errors complained of were in "copy," and in place of the catalogue being one to find fault with it was a most creditable piece of work considering the circumstances, and that entries by late Canadian registered letters were telegraphed to the printer as late as 8 o'clock on Monday night. In fact but for the printer's foreman having had the experience of two years with the Keystone Club's catalogue, I don't know when there would have been a catalogue at Wissahickon.

There were about eight dogs omitted from the catalogue, four of the Swiss Mountain Kennels missed by the amanuensis in copying the entries, and the others were not sent to the printer until late on Monday night and delivered on Tuesday morning, when more than half the catalogues had been struck off.

JAS. WATSON.

[Our information came from the superintendent of the show, and we think the above letter simply proves all we said.]

United States Field Trials Derby—A Entries.

The following entries have been received from Secretary P. T. Madison. They include 34 pointers, 51 English setters, 4 Irish setters. All whelped in 1892.

POINTERS.

ALICE LESLIE—E. M. Beale's liver and white bitch (King of Kent—Belle Randolph).
RHET—W. J. Wilson's liver and white bitch (Dan—Martha).
FAYETTE ALEXANDER—J. H. Alexander's liver and white bitch (King of Kent—Lionie Bijou).
PRIDE OF AVONDALE—T. W. Clelland's liver and white bitch (Rush of Lad—Graphic's Pride).
STRIDEAWAY—Geo. E. Gray's liver and white dog (King of Kent—Pearl's Dot).
ROSE—Horace F. Wood's liver and white bitch (Ossian—Forest Queen II.).
VENTURE—F. R. Hitchcock's lemon and white bitch (Rip-Rap—Lapford Pearl).
GYPSY QUEEN—H. P. Heispeger's black and white ticked bitch (Bertrando—Rosaline Wilkes).
WRECKER—Charlotteville Field Trial Kennels' black and white dog (Rip-Rap—Croxie Wise).
SELAH—Charlotteville Field Trial Kennels' liver, white and ticked bitch (Rip-Rap—Dexter's Dolly).
TWINKLE—Glen Rock Kennels' liver, white and ticked dog (Duke of Kent II.—Bessie Kapas).
QUEEN OF OSSIAN—A. B. Reeves's liver, white and ticked bitch (Ossian—Hops II.).
FRED OF IDSTONE—Idstone Kennels' liver and white dog (Shotmaster—Pearl of Idstone).
THE FRIAR OF IDSTONE—Idstone Kennels' liver and white dog (Shotmaster—Pearl of Idstone).
LITTLE NED—W. N. Kerr's liver and white dog (Ridge-wood Dazzle—Kate Claxton).
LULA K.—G. R. House's (agt.) liver and white bitch (Ossian—Pearl's Pride).
QUEEN—Geo. Catlett's black and white bitch (Ossian—Pearl's Pride).
BEPPLO'S GENUS—Dr. J. R. Daniels' liver and white dog (Beppo III.—Lord Graphic's Gun).
LEHMAN—The Jackson & Denmark Kennels' liver and white dog (Gordon—Fanny B.).
LONDON—T. G. Davey's liver and white dog (Lord Graphic—Lassie Faust).
CONSTERNATION—B. M. Stephenson's liver and white dog (Tribulation—Julia Louise).
PLUTE—Castleman Kennels' lemon and white dog (Fritz—Tilley).
NELLIE S.—Castleton Kennels' lemon and white bitch (Fritz—Tilley).
KENT'S PET—J. F. Shepley's liver and white bitch (King of Kent—Keeswick II.).

ENGLISH SETTERS.

PRAY WIN—Sunset Kennels' black, white and tan bitch (Mince Lucifer—Lady Glad).
COLUMBIA—C. P. Hartmetz's liver and white bitch (Gath's Mark—Queen Blade).
LADY GAIETY—C. P. Mingst's black and white bitch (Gath's Mark—Queen Blade).
DRUID'S DICK—W. S. Brody's black, white and tan dog (Ben Hill—Mattie Berwin).
JOYCE—W. S. Brody's black, white and tan bitch (Gath's Mark—Ruby's Girl).
HOOSIER BOY—J. H. and J. A. Hunter's black, white and tan dog (Antonio—Daisy Hunter).
DAISY HUNTER II.—J. H. and J. A. Hunter's orange and white bitch (Antonio—Daisy Hunter).
QUEEN OF THE FIELD—J. H. and J. A. Hunter's orange and white bitch (Antonio—Daisy Hunter).
ROD'S MOLLY—J. A. Peabody's black, white and tan bitch (Roderigo—Lilly Boxer).
BESS OF AVONDALE—T. W. Clelland's orange and white bitch (Gath's Hope—Gladstone's Girl).
GOLDEN ROD—Arthur Duane's liver, white and tan dog (Sim Ray—Flash).
MISSIE—Arthur Duane's black, white and tan bitch (Sim Ray—Flash).
OPEL—Geo. E. Gray's black, white and tan bitch (Count Gladstone—Diamond).
LILLIAN B.—Geo. E. Gray's liver and white bitch (Gath's Hope—Gladstone's Girl).
DAKOTA BELLE—Sam'l Graub's liver and white bitch (Gath's Hope—Trap, Jr.).
ANTONIO'S GEM—G. G. Barstow's liver and white bitch (Antonio—Nellie Hope).
SOLITAIRE—F. R. Hitchcock's black, white and tan dog (Roi d'Or—Tory Diamond).
GATH'S POINT—O. P. Weisgerber's black, white and tan dog (Gath's Mark—Paxie Maid).
HOPE'S QUEEN—J. E. Isgrigg's liver and white bitch (Gath's Hope—Queen Noble).
KENWOOD—Charles Proctor's black, white and tan dog (Cinch—Stevens Ruby).
HOPE'S GLIDE—G. T. Kerr's black and white dog (Gath's Hope—Lady Lil).
INDIANA BELLE—G. T. Kerr's black, white and tan bitch (Gath's Hope—Lula Hill).
JEFF BROWN—Porter & McGee's black and white dog (Darby T.—Lucetia).
HOPE'S PRIDE—W. A. Hinesley's black, white and tan dog (Gath's Hope—Lula Hill).
LOTTIE H.—W. A. Hinesley's chestnut, white and tan bitch (Gath's Hope—Lula Hill).
MARK—Fred. Snyder's liver and white dog (Race Noble—Fanny S.).
CALLIE WHITE—Manchester Kennel Co.'s black and white bitch (Gath's Mark—Georgia Belle).
MARK'S QUEEN—Manchester Kennel Co.'s liver and white bitch (Gath's Mark—Georgia Belle).
FLYING JIB—B. W. Butterfield's black and white dog (Max Noble—Day's Belton).
RODRIGO—John T. Mayfield's black, white and tan dog (Antonio—Nelly Hope).
NELLY H.—W. A. Hinesley's liver and white bitch (Antonio—Nelly Hope).
SAN ANTONIO—John A. Gude (agt.) black, white and tan dog (Antonio—Nelly Hope).
REVENGE—J. M. Freeman's black, white and tan dog (Antonio—Nelly Hope).
FANNY RICE—Jackson & Denmark Kennels' black, white and tan bitch (Gladstone's Boy—Manitoba Peggy).
EARL PALMER—Jackson & Denmark Kennels' dog (Frank Whitley—Dulcinea).
MCLEOD—Dr. J. A. McLeod's black, white and tan dog (Ell's Lad—Nannie B.).
DOM M.—Dr. J. A. McLeod's black, white and tan dog (Ell's Lad—Nannie B.).
ROCK RODRIGO—Ed. J. Brown's black, white and tan dog (Roderigo—Queen London).
CANADIAN BELLE—T. G. Davey's orange and white bitch (Lark—Leda).
MONK OF FURNESS LILL—T. G. Davey's blue belton bitch (Monk of Furness—Sue of Hatchie).
BOWDRE—Avent & Thayer Kennels' black, white and tan dog (Roderigo—Novelist).
CIGARETTE—Avent & Thayer Kennels' black, white and tan bitch (Roderigo—Norah II.).
HESTER BRYNE—Avent & Thayer Kennels' black, white and tan bitch (Roderigo—Norah II.).
TOPSY'S ROD—Avent & Thayer's black, white and tan dog (Roderigo—Topsy Avent).

PRAIRIE LAD—A. J. Gleason's black, white and tan dog (Jean Val Jean—Yazel).

PRAIRIE LASS—A. J. Gleason's black, white and tan bitch (Chance—Hattie).

TENNESSEE NUN—B. M. Stephenson's black, white and tan bitch (Jean Val Jean—Miss Dido II.).

LADY K.—St. Louis Kennel Co.'s black and white bitch (Rock—Madge).

PRINCE—A. C. Waddell's black, white and tan dog (Royal Prince II.—Jane H.).

FAUST—Scotts Wood Kennels' black, white and tan dog (Pembroke's Grouse—Kate).

HOPE'S HILL—Chas. Ham's black, white and tan dog (Gath's Hope—Lula Hill).

IRISH SETTERS.

DICK FINGLAS—Gus Leisey's red dog (Finglas—Ruby Glenmore).

PATSY'S ELCHO—Perry & Hamilton's red dog (Claremont Patsy—Nino).

PATSY'S RANGER—Perry & Hamilton's red dog (Claremont Patsy—Nino).

MINO'S ROSE—Perry & Hamilton's red bitch (Claremont Patsy—Nino).

Flaps from the Beaver's Tail.

TORONTO, Canada.—Refuge, the new St. Bernard dog imported by the Bowmanville Kennels, was bred by Mr. Norris-Elye, President of the St. Bernard Club, and is a litter brother to the famed Refugee, Lenore III. and Recluse II. He is said to have a magnificent head, massive frame and enormous bone.

Mr. A. D. Stewart, feeling that in justice to the shows forming the Canadian fall circuit he could not act as superintendent of the Canadian exhibit at Chicago, has handed in his resignation to the Minister of Agriculture at Ottawa. This is unfortunate, as a successor cannot now step in and pick up the threads Mr. Stewart has dropped and acquaint himself with the numerous details of the preliminary work. Mr. Stewart certainly cannot be blamed for acting as he has done, from a sense of justice, and his resignation indeed was no surprise to me. There seems no end to the complications entailed by this unfortunate fiasco called the World's Fair dog show.

Mr. Stewart leaves New York for Genoa on June 28, and hopes to return by way of Liverpool, arriving about Sept. 1, in time to take in the fall shows.

Mr. E. Hughes, of Brandon, Man., has bought from Mr. C. Huidekoper, of Meadville, Pa., a bitch puppy by Roderigo ex Lee Gladstone, which will be entered for the Manitoba trials, to be run Sept. 12 next.

I hear the Ottawa list is out, but a copy has not yet reached me. Mr. Keyes has resigned the chairmanship of the dog show committee.

The Dandie Dinmont bitch Kirsty, imported by Mr. Wanless, of Sarnia, and which was placed second at Toronto, has been sold to Mr. Jno. A. Noble, of Noval, Ont. Mr. Noble already owns a good young dog from this bitch by Roger, first at Detroit, and intends breeding Kirsty to the best dog he can find.

Collies are having quite a little run of popularity here now. I hear of another kennel in Ontario, the inmates of which are being dispersed to make room for a string of this breed. A prize-winning dog to head the stud is now being negotiated for in England. The name of the kennel I am not yet at liberty to divulge.

Spracklin, "Junior," tells me he will give more of his time in future to training, and will not be able to attend the fall circuit. He hopes to be on hand, however, for the winter shows.

Mr. J. G. Mitchener, a very active member of the Toronto show committee, and who is also a member of the C. K. C. executive, has been laid by for nearly four weeks with malarial fever, being confined to bed for two weeks after the late Toronto show, when he was taken sick. I saw him out yesterday for the first time, the fever has left its sting in a slight lameness, but he is now rapidly recuperating.

H. B. DONOVAN.

New Jersey Kennel League.

A MEETING of the executive committee was held at Newark June 13. Present, Messrs. E. R. Christopher, W. O. Kuebler, H. Hanchett, E. H. Morris, A. A. Eiselle, Dr. L. A. Sattler, Frank Link and Dr. W. F. Seidler. Mr. Christopher was elected chairman of the executive committee and Dr. W. F. Seidler secretary. By resolution the chairman appointed Mr. Kuebler and Dr. Seidler a committee on rules for guidance of the committee. The following new members were elected: R. A. Fielder, Dr. G. A. Van Wagoner, Dr. Fred. Thum, Mr. Fred. Seitz, Mr. Otto H. Heinz, Mr. J. B. Lozier. The treasurer was instructed to send a letter to all members in arrears, giving until July 15 for payment of initiation fee and dues. The chairman then appointed a committee to gain information with regard to prospect for a bench show. The chairman appointed the entire executive on guarantee, with Mr. Kuebler as chairman.

Messrs. Browie and Link were appointed to arrange for building for show. Mr. E. H. Morris appointed committee of one on dates, benching and superintendent; Messrs. Christopher and Kuebler on premium list and catalogue. A report was then made by Mr. Frank Link, for the legislative committee, in regard to an ordinance being arranged by the Common Council of Newark providing for fees for the keeping of dogs, a pound, etc.

The following resolution was proposed by Mr. Morris and unanimously adopted, which will be presented to the chairman of the Newark Common Council: "The N. J. K. L., the recognized kennel club of the State, in session at Newark June 13, 1893, make protest against the passage of the ordinance now under the consideration of the Common Council. First—That the Legislature has made provision for the taxing of dogs, and consequently such tax will be unconstitutional. Second—That such ordinance has proved in other cities and States to be against the encouragement of well bred dogs, and does not aid in the destruction of the curs, which should be the aim of such an ordinance. Third—That the New Jersey Kennel League, being the recognized State kennel club, with headquarters at Newark, due weight should be given to its suggestions and opinions, and in view of these reasons we beg the Common Council will grant us a hearing, before the passage of the ordinance, at such date as may be expedient." The meeting then adjourned until June 23.

The Dog Protective Association, of Grand Rapids, Mich., have issued in neat pamphlet form their constitution and by-laws. The object of this association is the detection, apprehension, conviction and punishing of persons stealing, poisoning, killing or otherwise injuring the dog or dogs of the members of this association. While we commend the action of the gentlemen who are members of this association and feel that their example is worthy of imitation in other districts, we think they might go a step further and include the protection of all and any dogs in their bailiwick, as we suppose love for the *genus canis* alone actuates their motives.

DOG CHAT.

Down Hempstead Way.

It looks very much as if Mr. Mortimer's visit to England last summer will bear good fruit in a collie way. At the right time of year there are some good litters coming Hempstead way. At present there are at the Hempstead Farm Kennels a promising litter of seven collies by Woodmansterne Trefoil, that did so well in the spring circuit, out of Green Mountain Lass, a very large bitch, a granddaughter of Bendigo and Scotilla. These were whelped May 20, and are sable and white, beautifully marked and one can scarcely tell 't'other from which, and of course they are booked for the challenge class. Another bitch with an inbred contempt for modern appliances, reverted to the "nature method," made her nest under the cow barn and was there delivered of six handsomely marked sable and white pups by Conrad II. This bitch is by Bendigo out of Katrina. Minnie Sefton, by Mr. Pierpoint Morgan's newly imported crack, Sefton Hero, out of Dorothy, unfortunately missed to Bendigo, but Woodmansterne Deborah is in whelp to Woodmansterne Trefoil, and Ormskirck Julia, another importation, shows every evidence of her visit to Conrad II. Old Meadowbrook Meg, a very sweet bitch by the way, that unfortunately has never been seen in public, is also in whelp to Trefoil. This is a bitch that "Scotch" Baillie brought out for Mr. Terry and was bred by Mr. Robert Chapman, of Glenboig, Scotland. She is by Tramp out of Enery, by Charmagne out of Hasty, by Carlyle out of Glen; Tramp II., through Tramp and Moss running back to old Marcus. This kennel prides itself on being particularly strong in the blood of old Charmagne, and with ordinary luck the kennel should repeat the triumph of earlier days on the collie benches.

The pointers Ightfield Dickon and Prawn, that ran last fall under Cameron's care, have been shipped back to Mr. Haywood Lonsdale, but before they went Mr. Mortimer threw an anchor to windward by breeding Hempstead Peggy, one of the Duke of Hessen—Woolton Game family, to Prawn, and this nick should prove useful in the trials of '94.

Central Field Trials.

It is a pity that the Central Field Trial Club did not come sooner to some definite decision as to whether they would hold field trials on their grounds this year. Several field trial men held entries back from the Eastern trials intending to run at Lexington. In this way the Eastern trials have suffered, as these dogs would have been entered there. We may as well remark here that if the Eastern Field Trials Club wishes to regain its popularity and stop the downward slide, it must consider the pointer men. The idea among pointer men is that the English setter there is the star around which the pointers and other breeds of setters must revolve. A well-known field trial handler and owner, one of the very earliest at the game, remarked to us last week that while the Eastern Field Trial judges might once in a while throw a sop to the pointer element by conceding some of the money to one dog, the balance of the pointer element did not receive proper recognition. This may be so or not, all we have to judge by is the result. In the Eastern Trials Derby there are eight pointers, in the United States Trials there are twenty-four. Moral: Put a pointer man, or a man who is known to favor the pointer in the field, as one of the judges. There is yet time for some of the field trial men who intended, if the Central Club did not hold trials, to get the use of the Central grounds, to do so. Entries could close Aug. 1 as well as any other time. Owners scarcely know yet what dogs they have that will do, and the entry cannot be very much affected either way. The Philadelphia Club should at any rate secure these grounds for their week. They will find a good hotel, with good meals, and they can hardly find better grounds.

St. Augustine.

Mr. C. J. Bousfield, recognizing the merit of FOREST AND STREAM as a medium through which he can best reach both St. Bernard breeders and the general public, places his new importation St. Augustine at stud in our business columns. Although we have not yet seen this dog, those upon whose opinion we can rely say that he is a most attractive and typical specimen, with a grand head and beautiful expression, and a true smooth in every sense. He is a large dog, with good action, who requires plenty of room to move himself, and the cramped condition of the ring at the St. Bernard Club show is thought to have been the cause of his defeat by Triton. He stands near 34in. at shoulder, with a skull measurement of 27in. How he will fare with our American crack Alton, Jr., remains to be seen, but his friends are very sanguine of a favorable result. St. Augustine will stand at Bay City, Mich., and for the information of those who wish to avail themselves of the services of such a typical dog, we may say that bitches sent from such points as Boston, New York and Philadelphia, say on a Monday, would be in the Bay City Kennels by Wednesday, and those from Buffalo, Pittsburg, Cincinnati or Chicago would arrive the next day (Tuesday).

Taxing Dogs.

Some of the Newark, N. J., people, aided by certain dailies, are trying to work up a mad dog scare similar to that of several years ago, so that a dog warden be appointed at a fat salary, aided by several assistants. Politics have entered into the subject, of course, and the Democrats in the Common Council last Friday passed the ordinance which entails a tax of \$3 on dogs and \$5 on females; this goes to pay for a dog warden at \$1,200 per annum. The license fee must be paid on or before August 1, and on that date will probably commence the impounding and killing of untaxed canines. The New Jersey Kennel League has protested the ordinance, but probably can do little more now than contest the constitutionality of the law in the courts. Dr. Mulcahey, of Newark, thinks he can knock the tax into a cocked hat. He intends to pay the tax on his dog and sue the city for the amount, his contention being that the tax is unconstitutional, and one of the points he claims is that a citizen cannot be taxed on any article that is of less value than the tax. For instance a pet dog of some family may be taxed \$5, when the animal may not be intrinsically worth more than \$1. This will raise some interesting points, and the next thing the city will have to do will be to appoint a dog appraiser.

Pacific Field Trials.

It looks as if Salinas, Monterey county, Cal., will be the next venue of the Pacific Coast Field Trial Club's trials. The gun club in that place has taken the matter in hand, and several members have secured 8,000 acres of suitable grounds. A committee of the field trial club was to start June 12 to investigate the property, but the result is not yet known.

Minneapolis Kennel Club.

The officers of the Minneapolis Kennel Club organized May 23, are: President, S. J. Carpenter; Vice-President, F. E. Eastman; Secretary, H. T. Van Dusen; Treasurer, A. N. Brackett; Superintendent, H. E. McCullough; Veterinary, H. E. Rowell; Directors, M. P. Whiting, Fred Pride and O. B. Clark. We have not been informed of the date of the exposition, in connection with which their show will be held.

but if it comes after or during the Canadian circuit, a good exhibit will no doubt be forthcoming.

Death of Lady Gladwyn.

Col. J. Ruppert, Jr., has not experienced an over-abundance of good fortune with his kennel of St. Bernards so far. The loss of Scottish Prince was a severe one and now he excites the sympathy of his fellow members of the fancy over the death of Lady Gladwyn, one of the best rough bitches we had in this country. Lady Gladwyn was whelped Feb. 26, 1889, and by Prince Regent out of Lady St. Gothard. Through her breeding and her excellent form and intense quality and good type, she should have proved of great value as a brood bitch, and that her death comes just as she was at her best is to be deplored. Lady Gladwyn was imported in 1892 by Col. Ruppert, Jr., from Mr. George Booth's kennels at Hull, England, a brother of Mr. Ed. Booth, Col. Ruppert's kennel manager. Gladwyn's career on the bench in this country is too recent to particularize; suffice to say she has won at nearly every appearance. It is to be hoped that the kennel has reserved some of the puppies out of a recent litter from this bitch.

Later particulars of Lady Gladwyn's death have been ascertained. This bitch was the greatest pet of the kennel and Mr. Booth is almost heart broken over her loss. She died from gastric colic in a few hours after being taken ill and before any aid could be had. Several surgeons were appealed to, but in vain, and Dr. Sherwood, the vet for the kennel, was attending other patients and did not arrive until just after her death. Dr. Sherwood gave the following certificate of death: "I have to-day made an examination of the body of the St. Bernard bitch Gladwyn and find that death was due to colic. I consider that Mr. Booth's treatment of the case was excellent and nothing more could have been done in the way of medicines.—THOMAS G. SHERWOOD, M. R. C. V. S." Mr. Booth's family have raised Lady Gladwyn, her mother and her grandfather. Lady Gladwyn whelped last Friday a litter of nine pups, all of which were doing well till she was taken sick on Sunday at noon. Seven are now alive on a foster mother. Their new bitch, Royal Duchess, arrived on Saturday last per steamer Lydian Monarch, of the Wilson Line. She is strong in head properties, good markings and stands 30in. at shoulder, with good bone, body and action. She is also from the Hull Kennel.

U. S. Field Trials.

Field trial men will be pleased to see the efforts of the United States Field Trial Club so well backed up. Giving two trials in a season is a formidable venture, and probably only such a go-ahead club as the United States could do it. We trust that their other stakes and the Trials B in February next will receive as good support as their Derby.

Fox-Terrier Cribbage.

In regard to the rumor about the celebrated wire-hair fox-terrier Cribbage, being purchased by Mr. H. W. Smith, of Worcester, Mass. (another of FOREST AND STREAM's many exclusives, by the way), we may say with authority that Mr. Smith has been given a refusal price on the dog and has cabled his English correspondent to close with Mr. Clear, Cribbage's owner. Cribbage is without doubt the best wire-hair in England, and by many thought to be the best fox-terrier in the world, as he has been placed over Vice Regal and D'Orsay several times for the cup for the best terrier in the show.

Any one who wishes to buy a dog need only turn to our kennel special columns this week and he will find "a little of something of every thing." J. L. Sebolt offers Gordon setter pups; W. H. Pierce, well-bred English setters; Standard Stock Farm, pointer bitch, cocker dog and foxhound pups; Albany Pointer Kennels, young stock; R. S. Inch, English setter pups; W. H. Child, young great Dane; C. S. McChesney, pair pointer bitches; B. Z. Brewer, English setter pups; Wachovia Kennels, St. Bernard pups; J. Leicht, trained pointers; Oakview Kennels, well-bred beagle pups; F. M. Thomas, trained pointer; Dr. C. E. Stanley, English setter dog; E. B. Underhill, Jr., greyhound pups. We also draw attention to E. B. Bishop's advertisement of Irish setter pups out of Coleraine and champion Winnie II. Spratts Co. also publish a list of their well-known dog medicines. In the stud Bay City Kennels puts the smooth-coated St. Augustine, winner of the 100 guinea challenge cup last Crystal Palace show, and the rough-coated St. Bernard Lord Dante, first and special, Detroit; first, Indianapolis, 1893. We also draw attention to the new advertisement of New York St. Bernard Kennels, who in an already good list of stud dogs include the celebrated and newly-imported Young Bute, who stands at a fee of \$75. Wants: J. Leicht, dogs to train; Tasmoo Kennels, small dogs to board.

Another cocker kennel is in process of formation at Philadelphia. Dr. Thomas B. Earley and Mr. J. L. Budel have claimed the name of Clover Kennels. Their initiation into the trials and tribulations of the fancy commenced with Stella Brush, a purchase from Woodstock, Canada, whelping on the train and the consequent loss of all her pups by Woodland Duke. They have two more bitches due in a week and naturally hope for better luck next time. These gentlemen write "We wish to add our testimonial to the many virtues of FOREST AND STREAM."

A Mr. G. Hathaway, of Nutley, N. J., is the owner of a three-legged dog which has developed a reputation as a snake killer. He never passes a snake by on the other side. Recently he killed a black snake 5ft. 6in. long after half an hour's struggle. The absence of the fourth leg is probably the reason for his own immunity.

There seems to be an epidemic of big litters just now. A correspondent from Troy, N. Y., sends us word of a foxhound litter of large dimensions. The first one of the litter was born about 5 P. M. on Saturday, June 3, the fifteenth came on Sunday about 10 A. M. and was still-born. Two more were born alive by 4 o'clock in the afternoon, and at last accounts the sixteen were doing well with the aid of a foster mother. The bitch, Lill, was purchased recently by four Troy sportsmen, known as the "Governor's party," from the Cook Kennels, of Detroit, and is by Workman. Besides being the first litter this dog has sired, it is also the mother's maiden effort.

We are indebted to the Retnor Kennels for some excellent photographs of their new dog Bedgbury Lion, and also a capital picture of their little Prince Charlie Snob, that took first prize at the Pet Dog show. A small picture of Bedgbury Lion's head is just about the best thing of its kind we ever saw, and shows the points of this dog's grand frontispiece to perfection. A capital picture of Mischief, or rather Dimple, who was smothered in her box on the way to the Troy show in 1890, is also included in the envelope.

Mr. Washington sends us a picture of his Irish setter Kildare Beverly, which, though it might be a little sharper in detail, is a good likeness of the dog, and further enriches our gallery of celebrities.

The Blue Grass Kennel Club, Lexington, Ky., write: The premium list of coming show is now in the hands of the printer and will be ready for distribution June 26. Copies will be mailed promptly upon application to the secretary, Roger D. Williams, Lexington. The show will be held under the rules of the American Kennel Club, and a

wins will count in advancing dogs to champion and challenge classes.

Mr. Huber, the well-known pointer breeder of San Francisco, is building new kennels. It will interest Eastern pointer men to know that his Sally Brass II. is said to be in whelp to his English field trial winning pointer Glenbeigh, that Mr. Mortimer brought over for him last summer.

We regret to hear that Mr. Freeman Lloyd is suffering from inflammation of the eyes and is almost blind. We sincerely trust that the ailment is only temporary and that he will soon be able to "see a thing or two" again in his usual form. "Thames Tattler," as this gentleman is best known over here, has for some time past been kennel editor of the *Sporting Mirror*, published in London. In his column or two of "The Din of Dogdom" he gives us all the principal news of the English kennel world in his usually chatty manner.

Dr. Foote derives a good deal of amusement in "touching the button" on the numerous and varied inmates of his kennel and often succeeds in catching some quaint and interesting situations. One result he left at our office the other day. It represents three "wires," puppies by Brittle—Brittle Button, Brittle Brush and Brittle Broom, on the *qui vive* at the door of their barrel kennel; they look very long-headed and wise in their generation.

A notable event in coursing circles is the whelping of Mr. J. H. Watson's Drytime, June 11. The result of the union with his Royal Crest, three bitch pups, is rather disappointing.

World's Fair Show Judges.

CHICAGO, June 21.—Special to *Forest and Stream*: The *Tribune* this morning prints the following, which I send without having time for a visit to Mr. Thacher to verify the correctness of the list:

"John Boyd Thacher yesterday nominated fifteen judges for the Kennel exhibit. The list of judges, while it was not approved yesterday by the Board of Control because Director General Davis had not indorsed it, will be passed to-day with his signature, and consequently these will constitute the jury to award medals and diplomas:

For St. Bernard and Newfoundland, Miss A. H. Whitney, Lancaster, Mass. Mastiffs, E. Court Rice, England. Great Danes and Dachshunds, G. Muss-Arnolt, Tuckahoe, N. Y. Deerhounds, greyhounds, Russian wolfhounds and foxhounds, R. D. Williams, Lexington, Ky. Beagles and Bassets, Pottinger Dorsey, Newmarket, Md. Pointers, Dr. Wesley Mills, Montreal, Canada. English setters and Chesapeake Bay dogs, John Davidson, Monroe, Mich. Irish setters, Dr. William Jarvis, Claremont, N. H. Gordon setters, Dr. L. Henry Twadell, Philadelphia, Pa. Spaniels (sporting), A. C. Wilmerding, New York city. Collies, H. Jarrett, Philadelphia, Pa. Fox-terriers and bull-terriers, T. S. Bellin, Albany, N. Y. Other terriers, poodles, bloodhounds, harriers and schipperkes, James Mortimer, Long Island. Pugs, toy spaniels and Italian greyhounds, Dr. M. H. Cryer, Philadelphia, Pa. Bulldogs, John E. Thayer, Lancaster, Mass."

E. HOUGH.

Upon receipt of above this (Wednesday) morning we wired Chief Thacher for verification, who in reply confirms the list as correct, subject to approval by the Commission.

We are pleased to see Mr. Davidson on the World's Fair list of judges, but the appointment of Dr. Mills for pointers is something "no fellah can understand," and will surely raise a protest.

English Entries for Northwestern Trials.

Editor Forest and Stream:

In a chatty letter I received from Mr. Wm. Brailsford he informs me that the grouse trials for this year have been dropped. That he has sent out to Mr. Pierre Lorillard three setters, one, a young black dog, own brother to my Manitoba Toss, and one by the noted English field trial winner Fred ex Ross, she by Ross ex Pitti Sing. Fred's progeny are now the fashionable field trial strain in England and are eagerly sought for, Mr. Lonsdale paying \$500 for a winning puppy. Mr. Brailsford says he is a very clever puppy, as are all Fred's get. Mr. Lonsdale enters Ightfield Dog Whip in the Northwestern Field Trials Club's Derby and asks for more entry forms, so that this spirited sportsmen will be again represented in our field trials. Entries are already flowing in and I fully expect that our Derby purse will exceed \$500. Mr. B. Waters writes that his journalistic duties compel him to decline to act as one of the judges for this year. Major Taylor, Mr. John Davidson and Dr. Rowe are among those that have the club's preference, but it is very hard to get good judges in consequence, principally, of kicking competitors, but this club will adopt rules this year that will protect their judges in the direction mentioned.

THOS. JOHNSON

Hon. Sec.-Treas. Northwestern F. T. C.

WINNIPEG, Man., June 8.

KENNEL NOTES.

Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.

NAMES CLAIMED.

Prepared Blanks sent free on application.

Pardo, Romeo, Signa and Mona. By Eberhart Pug Kennels, Cincinnati, O., for silver fawn pug dogs, whelped May 7, 1893, by imported John Bull (champion Loris—May Queen) out of Peggy Pryde (Eberhart's Cashier—Flossie II.).

Loris, Kodak, Starlight, Little Lady, Italia and Dorothy. By Eberhart Pug Kennels, Cincinnati, O., for silver fawn pugs, two dogs and four bitches, whelped May 8, 1893, by Happy Toby (Spokane—Nellie T.) out of Midget Nellie (Lord Clover—Sister).

Manola and Monica. By Eberhart Pug Kennels, Cincinnati, O., for silver fawn pug bitches, whelped Feb. 3, 1893, by John Bull (champion Loris—May Queen) out of Lady Verve (Joe II.—Pudgie).

Ferona and Violette. By Eberhart Pug Kennels, Cincinnati, O., for silver fawn pug bitches, whelped March 27, 1893, by Spokane (champion Kash—Lady Thora) out of Lady Venus (Spokane—Lalla Rookh).

The Doctor. By Eberhart Pug Kennels, Cincinnati, O., for stone fawn pug dog, whelped March 29, 1893, by Patsy Bolivar (Eberhart's Cashier—Flossie II.) out of Mabel E. (champion Kash—Lady Thurman).

Eberhart's Stunner, Square Deal, The King, The Trump, Twister and Abner's Son. By Eberhart Pug Kennels, Cincinnati, O., for silver fawn pug dogs, whelped June 1, 1893, by Happy Toby (Spokane—Nellie T.) out of Lady Alma (Eberhart's Cashier—Mabel E.).

BRED.

Prepared Blanks sent free on application.

Miss Kate—Black Duke. Jos. Spracklin's (Woodstock) cocker bitch Miss Kate to Luckwell & Douglas's Black Duke (Obo II.—Woodland Queen), April 7.

Harte's Bessie—Red Duke. W. Harte's Irish setter bitch Harte's Bessie (Careless—Jennie Lorraine) to Red Duke (Beau Brummel—champion Winnie II.), March 6.

Carrie H.—Paul Bo. W. H. Dye's (Indianapolis, Ind.) English setter bitch Carrie H. (Ben Hill—Blonde) to R. Merrill's Paul Bo (Paul Gladstone—Boltonian girl), May 22.

Low—Victor Gladstone. E. A. Carrier's (Westchester, Conn.) English setter bitch Low (Breeze—Bessie Dale) to his Victor Gladstone (Paul Gladstone—Victor Llewellyn), May 8.

Axel King Don. T. E. Roberts's pointer bitch (Voltaire—Renie) to Bronx Valley Kennels' Axel King Don (King Don—Meteor's Del), May 15.

Judy—Patsy Bolivar. E. L. Prout's (Cincinnati, O.) pug bitch Judy to Eberhart Pug Kennels' Patsy Bolivar (Eberhart's Cashier—Flossie II.), June 4.

Suzie—Eberhart's Cashier. Mrs. Morgan's (Cincinnati, O.) pug bitch Suzie to Eberhart Pug Kennels' Eberhart's Cashier (champion Kash—Lady Thora), June 4.

Emblem—Dandy. E. E. Kelley's (Portland, Me.) pointer bitch Emblem to G. M. Phinney's Dandy, April 20.

Goldie—Eberhart's Cashier. Bellevue Kennels' (Bellevue, Ky.) pug bitch Goldie (John Bull—Lady Thelma) to Eberhart Pug Kennels' Eberhart's Cashier (champion Kash—Lady Thora), May 19.

Willie—Sir Douglas. C. S. Brantley's (Crinceton, Ind.) pug bitch, Nellie to Eberhart Pug Kennels' Sir Douglas (Douglas II.—Lady Verve), May 18.

Dimple—Happy Toby. Eberhart Pug Kennels' (Cincinnati, O.) pug bitch Dimple (champion Peurice—Mint) to their Happy Toby (Spokane—Nellie T.), May 18.

Maak's Juno—Kent Elgin. T. T. Ashford's (Birmingham, Ala.) pointer bitch Maak's Juno (Rev. Morgan—Fleet) to his Kent Elgin (King of Kent—Vera Bang), April 11.

Luck of Ruby—Kent Elgin. T. T. Hillman's (Birmingham, Ala.) pointer bitch Luck of Ruby (Brown Stout—Jaundy D.) to T. T. Ashford's King Elgin (King of Kent—Vera Bang), April 10.

Lassie Jean—Kent Elgin. T. W. Jewell's (Montgomery, Ala.) pointer bitch Lassie Jean (Pommy Sec—Fan N.) to T. T. Ashford's Kent Elgin (King of Kent—Vera Bang), May 2.

Castle Pride—White Wonder. H. F. Church's (Taunton, Mass.) bull-terrier bitch Castle Pride to H. A. Harris's White Wonder, May 26.

Count's Nell—White Wonder. H. A. Harris's (North Wilmington, Mass.) bull-terrier bitch Count's Nell (champion Count—Bertha) to his White Wonder, May 7.

Rose—White Wonder. J. G. Lipsett's (Boston, Mass.) bull-terrier bitch Rose to H. A. Harris's White Wonder, April 21.

Swadie. H. M. Howes's (Boston, Mass.) bull-terrier bitch Chatham Queen (champion Jubilee—My Queen) to H. A. Harris's White Wonder (Gully the Great—Kid), April 10.

Richmond Jessamine—Ruby Patsy. H. A. Harris's (North Wilmington, Mass.) fox-terrier bitch Richmond Jessamine (Spinner—Lady Scarborough) to his Ruby Patsy (Ruby Potter—Maize), April 16.

WHELPS.

Prepared Blanks sent free on application.

Harte's Bessie. W. Harte's Irish setter bitch Harte's Bessie, May 11, six (three dogs), by his Red Duke.

Fan N. Banks & de Russy's (New York city) pointer bitch champion Fan N. (Fauster—Corsicana Toby), May 10, ten (three dogs), by W. H. Hyland's champion Pommy Sec (champion Graphic—Lady Vinnie).

Susie. Eberhart Pug Kennels' (Cincinnati, O.) Boston terrier bitch Susie, May 26, three (two dogs), by —; two dogs dead.

Lady Alma. Eberhart Pug Kennels' (Cincinnati, O.) pug bitch Lady Alma (Eberhart's Cashier—Mabel E.), June 1, six dogs, by their Happy Toby (Spokane—Nellie T.).

Burlington Diadem. H. W. Lacy's (New York city) fox-terrier bitch Burlington Diadem (Suffolk Coronet—Bacchante), May 16, one dog, by Hillside Kennels' Ruby Mixer (Ruby Mixture—Richmond Olive Bud).

Mabel. I. O. Converse's (Fitchburg, Mass.) pointer bitch Mabel (Dick Swiveller—Tollie Doe), May 30, twelve (seven dogs), by his Bar Harbor Sam (Duke of Vernon—Boski).

SALES.

Prepared Blanks sent free on application.

Harte's Sally. Red Irish setter bitch, by Chief of Tara out of Shamrock, by W. Harte, St. Louis, Mo., to L. A. Schoenberg, St. Peter's, Mo.

Cardinal Beauport—Jarbeau whelps. Mastiffs, whelped Feb. 7, 1893, by J. J. Lyman, Port Huron, Mich., a dog to W. McDonald, Chicago, Ill.; a dog to C. B. Davey, Mt. Forest, Ill.; a dog and bitch to J. Carrigan, New York city; dog to H. C. Frost, Buffalo, N. Y., and a dog to S. Harrison, Chicago, Ill.

Lad of Beppo. Pointer dog, by Ridgeview Dazzle out of Daisy Wooster, by S. S. Banks, Bridgeport, Conn., to Rinada Pointer Kennels, Massapequa, L. I.

Autocrat. Pointer dog, by Ridgeview Dazzle out of Kate Claxton, by S. S. Banks, Bridgeport, Conn., to Rinada Pointer Kennels, Massapequa, L. I.

Chancellor. Pointer dog, by Lad of Kent out of Ridgeview Lass, by J. L. Anthony, Plainfield, N. J., to Rinada Pointer Kennels, Massapequa, L. I.

The Doctor. Stone fawn pug dog, whelped March 23, 1893, by Patsy Bolivar out of Mabel E., by Eberhart Pug Kennels, Cincinnati, O., to J. S. Franz, Tampa, Fla.

Sir Douglas. Fawn-pug dog, whelped October, 1891, by Douglas II. out of Queen of Naas, by Bellevue Kennels, Newport, Ky., to Eberhart Pug Kennels, Cincinnati, O.

Snap. Black and tan terrier dog, whelped Feb. 19, 1893, by Tiny out of Daisy, by Eberhart Pug Kennels, Cincinnati, O., to Mrs. Dr. Amick, same place.

Grover. Stone fawn pug dog, by Eberhart Pug Kennels, Cincinnati, O., to Robt. Burns, same place.

Genevieve. Pointer bitch, by King of Kent out of Westminster Nan, by Rinada Pointer Kennels, Massapequa, L. I., to H. H. Starkey, Brooklyn, N. Y.

Roland. Pointer dog, by Ridgeview Dazzle out of Dauntless, by Rinada Pointer Kennels, Massapequa, L. I., to G. D. Seib, Brooklyn, N. Y.

Donaldson. Pointer dog, by Ridgeview Donald out of Miss Arkoss, by Rinada Pointer Kennels, Massapequa Kennels, L. I., to H. Hawkes, Brooklyn, N. Y.

Wildwood. Pointer dog, by Lap out of Lapford Pearl, by Rinada Pointer Kennels, Massapequa, L. I., to D. H. Turnbull, Owego, N. Y.

Ridgeview Panic. Pointer dog, by Tribulation out of Bloome II., by Rinada Pointer Kennels, Massapequa, L. I., to P. P. Lewis, Tarrytown, N. Y.

Ridgeview Donald. Pointer dog, by Beppo III. out of Lady Norrish II., by Rinada Pointer Kennels, Massapequa, L. I., to P. P. Lewis, Tarrytown, N. Y.

Chesterfield. Pointer dog, by Ridgeview Dazzle out of Dauntless, by Rinada Pointer Kennels, Massapequa, L. I., to C. Heitemeyer, Hoboken, N. J.

DEATHS.

Earl of Hessen. Pointer dog, by Lap out of Lapford Pearl, owned by Rinada Pointer Kennels, Massapequa, L. I.

Duchess of Nassau. Pointer bitch, by Nasso of Kippen out of Juno II., owned by Rinada Pointer Kennels, Massapequa, L. I.

Westminster Nan. Pointer bitch, by Westminster Cato out of Nancy, owned by Rinada Pointer Kennels, Massapequa, L. I.

ANSWERS TO CORRESPONDENTS.

There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will also receive careful attention.

J. B. H., New York.—I have a dog by Paul Gladstone ex Jean; Jean by Fred W. ex Zona. Will you please inform me if I have a pure Lewellyn setter dog. If not will you please point out the defects of pedigree. Ans. Your dog is pure Lewellyn setter running back in every instance to the Duke—Rhabe Cross.

A. F. C., Welland, Ont.—Please give me the pedigree of English setter bitch Lulu. Ans. By Paris III. out of Genevieve, by champion London out of Dawn; London by Paris out of Humphidge's Lill; Paris III., by Paris II. (3701 Vol. II.) out of Lady Princess (2659 Vol. III.).

H. D. W., Milford, N. Y.—I have a foxhound bitch, 10 months old, that had damper last winter. She appeared to get over it, but had it quite hard. About three weeks ago she commenced to go sideways and more with her hindparts than her fore; she will brace with one side and go around in a circle and fall down. She seems to be in good health other ways, though she sways her head back and forth. The eyes seem bright. I have been giving her spirits of nitre and I have put spirits of turpentine on her spinal column, but it does not help her. Her limbs seem warm. She has just commenced to be in season, would it harm her to breed her now. Ans. Give a sharp purgative and afterward the following mixture:

℞ Pot. bromid. 3 iss
Liq. arsenicalis. 3 i
Aq. ad. 3 vi
Mix. Give one tablespoonful twice a day.

E. L. G., Mamaronock, N. Y.—I have a Newfoundland dog which is very sick with what I think is distemper. He is a dog seven years old. His eyes and nose run with matter. His eyes seem to have wasted away entirely. Will you kindly tell me in your next issue what disease it is? Ans. Distemper.

What Shall We Drink?

This is a question of the utmost importance in the hot weather. An absolutely pure and non-alcoholic beverage that is grateful to the taste, full of snap, sparkle and effervescence, and a blood purifier as well, is Hire's root beer. There are many substitutes and imitations on the market which should be carefully avoided.—*Adv.*

Minneapolis and St. Paul

Are reached most directly from either Chicago or St. Louis by the Burlington Route. Daily vestibuled trains with Pullman sleepers, chair cars (seats free) and Burlington Route dining cars.—*Adv.*

Yachting.

THERE may be good reasons for the rule of the New York Y. C. prohibiting the entry of a chartered yacht or one not owned in the club in any of its races, but there have been many occasions where the rigid enforcement of the rule stood in the way of a race which every one was anxious to see. An instance of this was seen in the case of Iroquois last week, and others will be recalled in the Golet cup and Vineyard Haven races of 1891, when Beatrice was not allowed to enter, and at Vineyard Haven in 1889, when Alice and Papoose were barred, being owned outside the club. A very easy remedy would be an amendment to the rule by which the commodore or flag officers would be allowed to invite an outside or chartered yacht to start in a club race. In such a case as that of Iroquois it would seem that the rule might be changed so as to admit a free entry on the same footing as a yacht entered by an owner.

WITH occasional exceptions, as when the representative of the FOREST AND STREAM was left ashore through the season of 1888 as a punishment for holding and expressing independent opinions about the new deed of gift, and the famous marooning of the reporters at Northport on the cruise of 1891, the New York Y. C. has extended its hospitality very freely to the newspapers. This year, however, an important change has been made; the usual invitations to the press were not sent out, and those who asked to be taken were relegated to the club steamer Taurus, the ladies' boat, which never goes outside the Hook in bad weather, and leaves in season to reach the city before dark, missing half the race. As it happened, the race was of a sort which called for only a brief report, but had it been otherwise, with a good breeze and a sea on the bar, there would have been nobody present to report it.

THE annual regattas thus far have been unusually dull, partly through light June weather, but mainly through the indifference of owners, as evidenced by the beggarly entry lists in spite of special labor and inducements generally on the part of the regatta committees. This week there is little going on, but the racing commences again next Monday, with the Eastern Y. C. off Marblehead, and will continue until after the annual holiday on July 4. The sound races may turn out rather better than those on the Bay, but there is little indication of anything but a dull season in those classes which usually make the racing, the 80 and 90ft. schooners and the cutters and sloops from 40 to 70ft. At the same time there is a great deal of general racing among the smaller clubs, and the races of the four 85ft. cutters, which begin early in August, promise a brilliant ending for the season, the whole terminating with the contest for the America's Cup.

FROM a variety of causes, among which may be noted the rapid overdevelopment of the normal cutter in the 40 and 46ft. class, and the introduction of the fin-keel which followed; the first class racing, of yachts which confine themselves to no one locality, but race in all the important events of New York and the East, has for some time been at the lowest ebb and with no prospect of improvement. The causes and remedies for this condition are hard to find, but, pending a radical cure which shall revive racing, there is good reason for the belief that a racing class similar to the 40-footer of 1889-91 would find favor with many. The last few seasons have proved that the modern racing yacht is a mere toy, and an expensive one at that, to be thrown aside after one season, sold for a song and replaced by a new craft. This being the case, and we believe that it can hardly be contradicted, the question arises what size of yacht is most fitted to suit such a condition.

THE three clubs which have united in establishing a new cup for the Eastern 41-footers have acted wisely in deciding on a maximum waterline for the class, 21ft., which shall not be exceeded under penalty of disqualification. This placing of the responsibility on the owner, on whom it properly should rest, is a step in advance, and in line with the new rules of the British Y. R. A. The conditions of modern racing demand the location of the waterline by some one person connected with the boat, and the removal from the measurer of all responsibility other than for a correct measurement of the owner's marks. While some difficulties present themselves in connection with this plan, they are less than those constantly met with under the old system; and with a fair and rigid observance of the rule they will largely disappear. The day has gone by when owner or designer might build or ballast a yacht in open defiance of class limits, relying on the enactment of a special exemption clause by a too-complaisant club.

THE 46-footer has been proved to be too expensive in construction and running for other than a few very wealthy yachtsmen; there are many who could and would afford such a craft as Wasp or Gloriana if their racing life extended over several seasons, but who are unwilling or unable to sacrifice a yacht every fall to replace her with a more costly one of the same class in the spring. The 30 or 35-footer, on the other hand, has the advantage of comparatively moderate cost and of a greater proportionate sale value than the 46-footer, but at the same time even the 35-footer is too small for regular passages back and forth around Cape Cod, and for keeping up with the great annual cruise in which so much of the racing is done.

THE 40-footer, however, has thoroughly proved her value as a racing craft of reasonable accommodation, ample size and power for the seagoing which is demanded in American racing, and of a fairly reasonable cost of construction and running. Taken altogether, the 40ft. class was the most serviceable and instructive one yet known in this country, and its displacement by the 46ft. craze has proved a mistake. It is quite probable that a general effort of the clubs to restore the class for next season might lead to some good racing, at any rate the attempt is worth trying, and if it is done we would favor going a step further and creating a special class by sailing instead of waterline length, say of not to exceed 62 or 54ft. sailing length.

OUR reason for this is that we believe, apart from the mere novelty, which is always an attraction, a better craft could be produced, and at a more moderate cost, than the extreme forties of three years since; a yacht of slightly greater length and accommodation, with a smaller sail plan, but fully as fast.

AS to the objections, those once urged have entirely disappeared; "vested interests" could not complain, as the class is dead, without a yacht racing in it to-day; the narrow bugaboo no longer stands in the way; or at least it is to a certain extent a reality under existing rules and conditions in the shape of the fin-keel. We have not the

least fear, in view of the racing of late in several small classes, that an extremely long and narrow craft would be produced to sweep the courses, but even if such a dire contingency should follow-yachting and yachting racing would be no worse off than in the present state of stagnation.

SUCH a class would afford every opportunity for experiment, would fill all the needs of a live racing class for New York, Newport and Boston, and at the worst would make a season of good racing, while it is quite possible that a really good type might be produced.

OF course the presence of the fin-keel would be an important factor in determining the successful type in the class, but, if it be deemed desirable to do so, the clubs have it in their power to create the class under such limitations of minimum area of midship section as shall restrict the new boats to something approaching the normal types prior to 1891. There is no call for any speedy action in the matter, but we believe the idea to be well worth a careful consideration with a view to the desirability of concerted action early in the fall.

THE recent races abroad all tend to a few conclusions that are likely to be verified by the end of the season. It is evident that both Valkyrie and Britannia are successful by British standards, that the former is fully equal to her larger sister, and that her best points are those which will help her most in her races on this side; speed to windward and in moderate winds. Further than this, it would seem that in striving to overtop the class in size, the designer of Satanita had missed his mark, the boat's record thus far being one continual story of mishaps and alterations. Calluna, too, is thus far a disappointment, though it is not possible at this distance to say whether the fault is in the hull alone or in the handling, or whether the yacht herself may not be materially improved by less ballast and more sail. Though of less direct interest to Americans, it is important to note that the two new 40-raters, Lais and Vendetta, are far astern of last year's boats, Varuna, by no means as fast as Queen Mab, beating them regularly. The two Herreshoff fins, Meneen and Modvena, are racing several times a week and with very good luck, though it is quite possible that neither may equal the wonderful record of Wenonah and Wee Winn last year.

Navahoe.

ON Wednesday of last week the report of collision between Navahoe and a pilot boat in a fog reached New York, and it was confirmed on Thursday by the arrival of Navahoe at Boston in tow of a tug which had picked her up off Minot's Ledge. Meanwhile the pilot boat D. T. Leahy, No. 5, arrived at New York.

The details of the collision are known only from the stories of the two parties, that of Dennis Reardon appearing in the *Herald* of Sunday, while Mr. Carroll's side is told in a letter also to the *Herald*, the two statements being as follows: Capt. Reardon says: "I want the statements of those on board the Navahoe contradicted. It has been given out by Mr. Carroll that we ran into the Navahoe. That is untrue. The collision was the direct result of faulty seamanship on board the Navahoe. Here is the entry we made in our log book one hour after we came together: 'On Monday morning, June 12, at twenty minutes past two o'clock, we were in latitude 40° 39', longitude 69° 18', wind south-southwest, steering by the wind, sails good and full on the port track. The sails were single reefed and head of jib, the light sails furling. A thick fog set in a quarter past two o'clock A. M., and at twenty minutes past two o'clock we heard a vessel blowing one blast, bearing west by north. We put the helm hard up and answered with two blasts, the boat answering the helm immediately, but the vessel struck us on the port bow three minutes later. When the yacht struck the main sheet was slack and we fell off, and Francis S. Gillett, our boat keeper, was in charge of the deck.'"

"All the headstays except the forestay were carried away," continued the captain. "The stem and all the iron work in the stem were also carried away. We were then thirty miles east of Nantucket lightship, or 210 miles out on the Atlantic Ocean away from Sandy Hook. 'The shock threw me out of my bunk, and I hurried on deck in my underclothes. I stepped from my boat on to the deck of the Navahoe, as a line had been cast and the two vessels were lying side by side. Boyle then jumped on board and brusquely asked me how it had happened. I told him I didn't know, as was below when we came together. He asked for my name and the name of my vessel, which I gave him, but he refused his name and the name of his boat. 'I guess we'd better lay to together,' I said, 'and make an examination, for I think I'm sinking. If you are in trouble why we will be glad to help you.'"

"He looked at me for a minute and then said: 'D'ye see your boat?' 'Yes,' said I. 'Well, you get on board as quickly as you can, or I'll throw you overboard.' 'That's not right,' I said. 'I wouldn't treat a dog that way.' 'You heard what I said. Get on board at once or I'll throw you overboard.' I immediately jumped on board and my boat and the Navahoe separated from us and disappeared in the mist."

"Never in the history of pilot boats did one ever desert in the face of danger or sneak off when life was in peril. So we lay to until 7 o'clock, thinking that they might be worse off than they imagined and might need help. But when daylight appeared they were gone. We started for home and got here last night. I didn't intend to say anything about the actions of Mr. Carroll and his crew, but his conduct compels me to."

"Any nautical man can tell you that there is something wrong on board a vessel that has its ensign flying at 2 o'clock in the morning. Any seagoing man would have his opinion of the management of such a vessel."

"Here's another thing. Mr. Carroll has stated that when he heard our foghorn he 'starboarded' his wheel in order to give us a wide berth. The idiosyncy of this thing makes a nautical man laugh."

"There is no man of common sense who ever followed the sea but knows that a sailing vessel is on the port tack when it blows two blasts with its foghorn. This we did, as the law of the high seas requires."

"Mr. Carroll also is reported to have said that we were running before the wind and our sheets away off."

"When we were in collision our sheets were flat by the wind, with tackles on each boom. Nothing had been touched previous to the collision since 8 o'clock in the evening before."

"In his statement he says he 'starboarded' to give us a wide berth. A master of a vessel, a nautical man, knowing his business, would have blown his fog horn three blasts, running before the wind as he was doing. If he had wanted to have changed his course he should have 'ported' in place of 'starboarded,' which would have prevented the collision, knowing that we were blowing two blasts, which signified that we were on the port tack by the wind."

Mr. Carroll writes as follows: NAVAHOE, EAST BOSTON, June 18, 1893.

To the Editor of the *Herald*: In to-day's issue of the *Herald* I see a statement made by Pilot Reardon, whose schooner was in collision with Navahoe on Monday morning, June 12, on the southern edge of the Georges, in which he charges me with brutal conduct, and attributes the collision to the unseamlike way in which the Navahoe was handled.

When the collision took place I was in my berth, and the pilot states that he was in his. Consequently he must depend on his information from the officer of the deck at the time of the accident, as I do. In his case the boatkeeper of the schooner was in charge. My mate, John Hansen, was in charge of the yacht. The boatkeeper of the schooner states that he was on the port tack and blew two blasts of the horn. My mate reports that he was on the starboard bow if headed N. by W. I fail to see, as the yacht was headed E.S.E. by the compass course (magnetic), but whose fault the collision was and who is to blame can only be determined by the courts.

Pilot Reardon states in his log that he was thirty-six miles east of Nantucket Lightship. Our patent log, furnished by Messrs. John Bliss & Co., showed that the yacht had gone fifty-eight miles since ten minutes to 10 P. M., when we had the lightship distant about half a mile, since which time the yacht had been making a nearly true easterly course. When I left the deck the wind was forward the beam, and not a sheet had been touched from that time until the accident occurred.

When I reached the deck after the collision the two vessels were side by side, clumping heavily. A man was running about our deck, tell-

ing some one to go below and get his watch and unlash the boats. This man, I found afterward, was the pilot. There was no one at the schooner's wheel, and the shock of the two vessels banging together was tremendous.

My sailing master, Charles Barr, was at the Navahoe's wheel, and I heard him tell the pilot to leave our deck, to take charge of his own vessel and get some one at her wheel. The pilot said something about having a chance for his life, at which I heard Barr say if he did not get on board his boat and work her clear of the yacht he would pitch him on her. The man came to me and told me the name of his boat and himself. I do not recall his asking the yacht's name.

Personally, I do not pretend to be a professional seaman and I do not propose to enter the lists with the New York pilots. The officers of my yacht I consider to be as good seamen as can be got, but I should like to know what can be the opinion among seamen of the captain of a ship who, after a collision, is the first man to board the other vessel, leaving his own with no one at the wheel and making no effort to get her clear from her dangerous position, but who runs about talking about a chance for his life before he has found out whether it was in any danger or not?

With the wreck aloft I did not know what would fall next, and there was danger of the mast coming down every time she bumped, as it was badly sprung. I had no intention of deserting the pilot boat, but wished to get my boat clear of the dangerous position and do the talking afterward.

Whatever may be the shortcomings of yachtsmen they are always most particular in observing the setting and lowering of colors at the proper times, and the good pilot should have thought twice before he branded the yacht's crew as such duffers that they left their ensign flying after sunset, without good cause. The fact of the matter was that the signal halyards got fouled during the afternoon and the ensign could not be lowered at sunset. A topman was sent aloft, but the vessel was so lively in the strong breeze and jump of the sea that I thought it dangerous for him to go out to the end of the long gall under such conditions.

I can only say that I feel sure that everything was done by the officer in charge of Navahoe to prevent a collision that a good seaman could do. The officers of both vessels tell opposite stories, and I see nothing in the pilot's report to make me doubt the report of my mate, John Hansen.

Truly yours, ROYAL PHILIPS CARROLL.

Navahoe went at once to the Atlantic Works, East Boston, where her plating on the starboard bow has been replaced, a new mast made and stepped, and also a new topmast, so that she is now about ready to resume her voyage to-day. Mrs. Carroll has decided to go on the yacht.

The 21ft. Trophy.

AS the result of considerable work during the winter, the following rules have been drawn up by a joint committee of the Hull, Massachusetts and Corinthian clubs, to govern the racing for the new \$500 inter-club challenge cup, the design for which is already completed:

This deed of gift made—1893 between the Corinthian, Hull and Massachusetts yacht clubs, donors of the inter-club championship cup for 21-footers, of the first part, and John B. Brown, George A. Stewart, Henry Taggard, Jacob F. Brown, Harrison Gray Otis, Arthur Binney, Arthur J. Clark, Stephen P. Perrin and Percy Hodges, trustees, of the second part, witnesseth:

That the said party of the first part, for and in consideration of the premises and the performance of the conditions and agreements hereinafter set forth, the party of the second part, has granted, bargained, sold, assigned, transferred and set over, and by these presents does grant, bargain, sell, assign, transfer and set over, unto the said party of the second part, its successors and assigns, the said cup, in trust nevertheless for the uses and purposes hereinafter made.

And the party of the second part hereby accepts the said cup, subject to said trust, terms and conditions, and hereby agrees to and that the said party of the first part, that it will faithfully see that the conditions are fully observed and complied with.

The cup shall be known as the inter-club championship cup for 21-footers, and is presented in 1893 by the Corinthian, Hull and Massachusetts yacht clubs, for yachts not over 21ft. load water line.

The cup shall be a perpetual championship cup, never becoming the property of any individual, and as for the promotion of friendly contests and the building of any type of boat 21ft. load water line or under. The name of the winning yacht and owner of the same, also name of club with date of race, to be inscribed on the cup each year.

The cup shall be held in trust by a board of trustees, subject to the rules and regulations which they may adopt. The committee, consisting of Messrs. John B. Faine, Geo. A. Stewart and Henry Taggard, representing the Corinthian Y. C.; Jacob F. Brown, Harrison Gray Otis and Arthur Binney, representing the Hull Y. C., and Arthur J. Clark, Stephen P. Perrin and Percy Hodges, representing the Massachusetts Y. C., shall be the first board of trustees.

Vacancies in the board of trustees shall be filled by the club in whose representation a vacancy may exist. At all meetings of the trustees the committee representing each club shall vote as a unit, and no business shall be transacted unless each of the three clubs is represented.

The rules and regulations which may exist may be changed at any meeting of the trustees at their discretion, but no change in the rules and conditions shall be made except by unanimous vote of the trustees.

The trustees shall draft a set of sailing rules and regulations under which all races for the cup shall be sailed.

The races for the cup shall be open to yachts not over 21ft. load water line, on any regularly organized yacht club; but the trustees shall have the privilege of rejecting any entry at their discretion.

The race shall take place annually off Nahant, Mass., between the first and eighth days of Sept., inclusive, unless postponed by the judges. Each club shall be represented by but one yacht in the races, and a yacht shall represent but one club.

The race shall be best two out of three. In case of the winner of each race being a different yacht, there shall be a sail-off between these three.

The club whose representative yacht wins, the championship series may hold the cup until the next season's races, upon giving a satisfactory bond to the board of trustees.

The trustees shall appoint annually a board of judges consisting of three, one member of each of the aforesaid clubs, who shall have charge of all the races, and all expenses incurred pertaining to the cup and races for the same shall be shared equally by the three clubs.

The following measurement rule has been drawn up by the committee: The waterline length shall be taken as 21ft., and in no race shall a yacht exceed the waterline length. If, after a race, a yacht, on being measured, is found to exceed 21ft. on the waterline, she shall be ruled out, and race and from further participation in the races of that season.

The conditions are in brief that no yacht is to be allowed "to enter the races until her certificate of measurement has been filed with the trustees or judges; the judges reserve the right to remeasure at their pleasure; the courses are to be laid out by the judges, and are not to exceed ten nautical miles; whidward and leeward are to alternate with triangular courses; each yacht may carry five men; ballast cannot be shifted during a race.

A very important change has been made in the matter of the right of way. The rule made by the committee reads: "When two yachts, both close hauled on the same tack, are converging by reason of the leeward yacht holding a better wind and neither can claim the rights then of a yacht being overtaken, the yacht to windward shall keep clear."

Beverly Y. C. First Sweepstakes.

MONMOUTH BEACH—BUZZARD'S BAY.

Saturday—June 17.

THE 195th race, first sweepstakes, was sailed at Monument Beach on June 17 in a strong northeast blow. Two or three of the new boats, with very long, low overhangs and weighted centerboards, made their first appearance in the first class. The first class was made up of Anonyma second, but both stood too far to windward and had to bear away to get to leeward of Mashnee, this costing Gynnote the race, while Anonyma went so far ashore that she stuck fast. In third class the Nobska went through the water very fast but did not hold as good a wind as the older boats. The times were:

SECOND CLASS.			
	Length.	Elapsed.	Corrected.
Mist, G. H. Lyman,.....	23.10	1 51 08	1 37 35
Gynnote, W. E. C. Eustis,.....	23.10	1 51 37	1 38 04
Defiance, H. E. Perry,.....	22.11	1 56 42	1 42 04
Come On, W. Phinny,.....	23.06	1 58 14	1 44 17
Mollie, S. P. Hill,.....	23.10	1 59 06	1 45 33
Agavam, J. G. Young, Jr,.....	23.08	2 07 57	1 47 52
Anonyma,.....	22.08	2 08 00	Withdrew.
Ulula, S. E. Winslip,.....	22.08	2 08 00	Broke boom.

THIRD CLASS.

Nobska, A. A. Beebe,.....	19.09	1 40 07	1 24 45
Doris, John Parkinson,.....	19.08	1 41 05	1 25 38
Puzzle, Wm. Anonyma,.....	19.09	1 41 19	1 25 54
Gilt Edge, L. W. Whitmore,.....	19.07	1 45 41	1 30 7
Daisy, Howard Dabney,.....	19.02	1 45 41	Withdrew.
Dawdle, R. S. Hardy,.....	16.03	1 45 41	Withdrew.

Dawdle is a fourth class boat, but having no competitor started with third class. Prizes: Mist and Defiance firsts, Gynnote and Doris seconds, Defiance and Puzzle thirds. Judges, N. H. Emmons, F. E. Cabot and W. Lloyd Jeffries.

New York Y. C. 48th Annual Regatta.

NEW YORK—NEW YORK HARBOR.

Thursday, June 15.

The forty-eighth annual regatta of the New York Y. C. was as flat and uninteresting as could well be imagined, there being few starters and little competition in any class, while the weather helped to spoil a race that even under the most favorable conditions would have amounted to little.

In the largest schooner class there were five starters, a very good fleet, but entirely out of place over the club's inside course in light weather. In the 90ft. class was the 90ft. Lasca, in good form and sailing much better in this, her second season, and the 82ft. Emerald, new sailing her second race. Iroquois was and was not in the class, being prohibited from an outside sweep of \$100 each. Being under charter, she is not eligible to entry in the club races, although she is owned by a member, and is now to all intents and purposes chartered to the club itself.

Clytie and Shamrock made up the 70ft schooner class, the former withdrawing early in the race. In the smallest schooner class there were five entries, including the new Loyal and Nears, and Monaghan, a small cruiser designed by Mr. Burgess. Monaghan and Azalea were late at the line and so handicapped that they gave up, the former early in the race and the latter after rounding the lights. The remaining three made a procession, with Viator well in the lead.

Wasp was under way in fine trim, but, being under charter, could not start; so the single-stick division was represented only by the old sloops Hildegarde and Eclipse, both recently rebuilt and thereby improved.

The official entry list was:

FIRST CLASS SCHOONERS—CRUISING TRIM.

Brunhilde, David H. King, Jr.	102.00
Coronet, John D. Wing.	125.00
Dauntless, Caldwell H. Colt.	116.07
Ramona, Henry F. Gilling.	111.11
Yampa, Chester W. Chapin.	110.00

THIRD CLASS SCHOONERS—RACING TRIM.

Emerald, L. Rogers Maxwell.	82.00
Lasca, John E. Brooks.	89.06
Iroquois, C. Oliver Iselin.	80.00

FOURTH CLASS SCHOONERS—CRUISING TRIM.

Clytie, Henry C. Ward.	78.03
Shamrock, William P.	70.06

FIFTH CLASS SCHOONERS—CRUISING TRIM.

Azalea, J. Clinch Smith.	59.00
Viator, W. Gould Brokaw.	62.00
Nears, Warren R. Fales.	Not meas.
Monaghan, A. T. Johnson.	45.00
Loyal, B. F. Sutton.	60.00

FOURTH CLASS SLOOPS—RACING TRIM.

Hildegarde, J. C. Bergen.	60.09
Eclipse (fifth class) L. J. Callanan.	51.00

* Allowed to sail for private sweepstakes.
The Bay was covered with a thick haze during the morning, but at 11 A. M. the fleet began to work down to the start off Buoy 11 from the anchorage off Bay Ridge, and when the first gun was fired at 11:50 the haze lifted and a moderate S.E. wind came up the Bay. At the line was the handsome new flagstaff, with Corn, Morgan and the regatta committee, S. Nicholson Kane, Chester Griswold and Irving Griswold on board, with a fleet of attendant steam yachts, the most conspicuous being the new auxiliary Intrepid.

The start was signalled by colored balls hoisted on the springstay of the flagship, the two sloops starting at 11:55 and the schooners at 12:05. The tide was running out at a great pace and helped the fleet over the line and away with the leaders all the way out to the turning mark, Sandy Hook Lightship. The start was timed:

Hildegarde	12 06 45	Dauntless	12 15 52
Lasca	12 11 39	Emerald	12 16 39
Coronet	12 11 40	Iroquois	12 17 10
Ramona	12 12 02	Brunhilde	12 17 48
Eclipse	12 12 00	Shamrock	12 18 38
Loyal	12 13 23	Clytie	12 19 04
Yampa	12 13 49	Yampa	12 20 00
Nears	12 14 32	Azalea	12 20 00
		Monaghan	12 20 00

In the beat down to the S.W. Spit Lasca, handled by Capt. Rhodes, soon took a commanding lead, which she held all day. The work to the Spit was not particularly exciting. The times at the turn were:

Hildegarde	1 11 30	Viator	1 18 30
Iroquois	1 16 30	Nears	1 30 00
Ramona	1 17 35	Coronet	1 32 45
Yampa	1 17 35	Coronet	1 32 45
Yampa	1 17 35	Coronet	1 32 45
Yampa	1 17 35	Coronet	1 32 45
Yampa	1 17 35	Coronet	1 32 45
Yampa	1 17 35	Coronet	1 32 45
Yampa	1 17 35	Coronet	1 32 45
Yampa	1 17 35	Coronet	1 32 45

Monaghan and Brunhilde turned back before the Spit was reached, and Clytie a little later.
It was now a procession to the Lightship, all on a close reach, Lasca in the lead. There was a little heave to the sea, and with a clear sky and bright sunlight the big schooners made a pretty picture, though there was not wind enough to move Coronet and Dauntless into a semblance of life. All fetched the mark and luffed round except Coronet. She had to make an extra leg. The times were:

Lasca	2 14 10	Dauntless	2 36 00
Iroquois	2 20 11	Ramona	2 36 30
Hildegarde	2 25 06	Shamrock	2 37 00
Emerald	2 28 11	Nears	2 37 00
Yampa	2 30 00	Loyal	2 38 00
Viator	2 35 10		2 40 00
Eclipse	2 35 10		2 40 00
Eclipse	2 35 10		2 40 00
Eclipse	2 35 10		2 40 00
Eclipse	2 35 10		2 40 00

With balloon jibtopsails and staysails to starboard the yachts ran for the Hook with a falling wind, but a good flood tide under them. The times at the finish were:

Lasca	4 17 15	Dauntless	5 05 52
Iroquois	4 30 11	Shamrock	5 17 56
Emerald	4 32 05	Coronet	5 24 23
Yampa	4 46 00	Nears	5 48 19
Ramona	4 56 43	Loyal	5 57 29
Hildegarde	5 04 19	Eclipse	6 07 57

The official times were:

Start.	Finish.	Elapsed.	Corrected.
Coronet	12 11 40	5 24 23	5 12 43
Dauntless	12 15 52	5 05 52	4 50 00
Ramona	12 12 02	4 56 43	4 44 41
Yampa	12 13 49	5 28 00	5 16 15
Brunhilde	12 17 48	withdrew.	Not m.

THIRD CLASS SCHOONERS—RACING TRIM.

Lasca	12 11 39	4 17 15	4 05 36
Emerald	12 16 39	4 32 05	4 15 26

FOURTH CLASS SCHOONERS—CRUISING TRIM.

Shamrock	12 18 38	5 17 56	4 59 18
Clytie	12 19 04	Did not finish.	4 54 54

FIFTH CLASS SCHOONERS—CRUISING TRIM.

Viator	12 13 40	5 22 09	5 08 13
Azalea	12 20 00	withdrew.	5 08 13
Nears	12 14 32	5 48 19	5 37 47
Monaghan	12 20 00	withdrew.	5 37 47
Loyal	12 13 43	5 57 29	5 44 06

SLOOPS—RACING TRIM.

Hildegarde	12 06 45	6 07 57	4 45 34
Eclipse	12 10 00	6 07 57	5 57 57

Corinthian Y. C. Annual Regatta.

SAN FRANCISCO—SAN FRANCISCO BAY.

Tuesday, May 30.

The Corinthian Y. C. of San Francisco held its annual regatta on Decoration Day in a strong breeze and sea, the times being:

Length.	Start.	Finish.	Elapsed.	Corrected.
Elia, F. Ames, sloop.	39.33	12 54 10	37 26	3 13 16
Linda, L. B. Chapman, sloop.	39.33	12 56 40	37 07	3 13 16
Petrel, R. L. Eames, sloop.	31.23	12 53 55	32 16	2 58 30
Thetis, F. R. Cook, sloop.	33.82	12 41 45	28 19	2 34 18
Dawn, F. Bartlett, sloop.	36.36	12 44 06	25 56	2 11 50
Freda, T. Lyons, sloop.	30.76	12 43 45	27 09	2 14 24
Truant, J. W. Peat, sloop.	35.35	12 40 20	3 09 40	2 29 20
Folly, G. Billings, sloop.	40.28	12 40 20	Did not finish.	2 22 00
Duke, F. A. Whitelaw, sloop.	33.53	12 43 10	Did not finish.	2 22 00
Volante, W. Stridger, sloop.	24.49	12 27 00	2 37 35	2 06 35
May, M. A. Newell, sloop.	24.90	12 26 30	2 37 45	2 01 15
Fawn, R. Peat, sloop.	26.81	12 31 10	2 26 45	1 52 35
Ceres, F. Thornton, sloop.	21.60	12 32 30	2 34 10	2 21 40
Cisne, H. L. Read, sloop.	21.41	12 30 00	Did not finish.	2 21 40
Folly, G. Billings, sloop.	20.14	12 17 00	2 57 12	2 43 13
Dart, F. R. Cook, sloop.	14.29	12 30 00	Did not finish.	2 40 31
Edna, C. J. Lancaster, sloop.	36.95	12 41 00	Did not finish.	2 40 31

The winners are: Elia first, Petrel second; Dawn first, Thetis second; Fawn first, May second; Ceres first, Cornelia second.

Elia was formerly owned by Fulton G. Berry and was built at San Quentin, Cal., by the State prisoners. Clara is an old New York boat, brought out here by Jabez Howes. Dawn was built by one of the crack builders, W. F. Stone, about nine years ago for an oyster boat, and was purchased two months ago by the present owner, who has

made extensive alterations in her, making her one of the finest boats in the fleet. Folly is one of the New York cutter models and has formerly shown remarkable speed when properly handled. Truant is a Cape Cod model and has heretofore been very fast, and is yet in smooth water and light winds. Duke was built by White, a well known Pacific coast builder. Dart was built by F. R. Cook, owner, and is somewhat after the Gloriana type. Elina, Ceres, Thetis, Cisne, Fawn, Volante, Cupid, May, all built by Wm. F. Stone. Linda was built by M. Turner, and has, since her launch, shown poor speed, except in heavy weather and head seas. In this last race the start was on a flood tide, turning to ebb at about forty minutes after starting. At turn of tide wind freshened and considerable sea. Smaller boats were very wet. All carried full sail except Ceres, who reefed, thereby handicapping the race in her favor.

The club now numbers 37 boats and 185 active and 4 honorary members, 9 launches and 19 rowing boats. On the ways now and shortly to be added to the fleet are three boats, one an auxiliary steam and sail schooner, 40ft. long, another a 36ft. cutter made from Eastern designs, another a 45ft. launch, all of the most modern design.

Corinthian Y. C. 69th Regatta.

MARBLEHEAD—MASSACHUSETTS BAY.

Saturday, June 17.

The Corinthian Y. C., of Marblehead, opened the season on June 17 with a handicap race for cruisers and a race for the four knockabout boats, Pinta, Nina, Jane and Frances, the first pair being just completed for the Eastern Y. C. by Emmons, of Swampscott, from designs by Waterhouse & Chesapeake. The day was unpleasant, rainy, with a strong N.E. wind and a very rough sea, but seven yachts started and sailed a fine race, the two new boats making a dead heat. The 30ft. cruiser class brought out Fancy, Mr. Burgess's last and best 30-footer; Rondina, his first 30-footer, and the other the little cutter Kelpie. The course was from judges' lines, leaving Black Buoys 3 and 1 on starboard, Cat Island on port, Halfway Rock and Bell Buoy on the outer breakers off Pig Rocks on starboard, Tinker's Island, Tom Moore's Rocks and Black Buoys 1 and 3 on port to judges' line. Distance, 10 miles.

The course for the smaller boats was No. 6, a beat to the Bowditch Ledge Beacon, leaving Eagle Bar Buoy on starboard, thence a reach to Gooseberry Ledge Buoy, and a run home around the end of Cat Island; 6½ miles.

Neither Kelpie nor Rondina were ready at the gun, and Fancy waited for a time, the small boats meanwhile starting, the twins with whole sail and the others with single reefs. Nina and Pinta sailed a close race, finishing exactly together, with Jane some distance astern in third place. Fancy finally started with topmast boused, one reef in mainsail, and No. 2 jib. Rondina was handicapped 2m. and Kelpie nearly 4m. Once away, Fancy quickly dropped the pair, beating them very badly, though the two made a very good race with each other. The full times were:

CLASS A—21FT. TO 35FT. W.L.

Elapsed.	Handicap.	Corrected.
Fancy, C. F. Lyman.	1 58 38	1 58 38
Kelpie, Wm. Bassett, Jr.	2 35 32	15 20 32
Rondina, D. O. Percival, Jr.	2 42 18	07 23 58

CLASS B—16FT. TO 21FT. W.L.

Elapsed.	Handicap.	Corrected.
Nina, E. Y. C.	1 30 42	1 30 42
Pinta, E. Y. C.	1 30 42	1 30 42
Jane, C. S. Parker.	1 35 53	1 35 53
Frances, G. H. Wickett.	1 36 58	1 36 58

Prizes: Fancy, first prize \$25; Kelpie, second, \$15. Nina and Pinta, first and second prizes, \$15 and \$10, between them, and Jane \$5 as third.

The judges were Geo. W. Mansfield and Dexter H. Follett, Jr.

Corinthian Y. C. Schooner Race.

NEW YORK—OFF SANDY HOOK.

Saturday, June 17.

WITH wind and sea in plenty and a fine open course, the special schooner race of the Corinthian Y. C. on Saturday was nevertheless a complete failure, partly from the disinclination of owners to enter, and partly from the blunders of those on the yachts which did start. The club had made special efforts to secure entries but only five yachts were at the Scotland Lightship, Yampa, Dauntless, Ramona and Coronet of the large class and Lasca of the smaller. As the latter had no opponent she did not start. There was a strong N.E. breeze, with rain and a good roll of sea, conditions which would have made a contest between Lasca, Emerald and Iroquois a sight worth seeing after the dreary flukes of the week. The regatta committee, Messrs. Eben Clark, Chas. Stewart Davidson, Geo. A. Cormack and W. C. Hall were present on the flagship Ituna, while on the steam yacht Sapphire was Fleet Captain Schuyler, for a forego and the prizes.

The course was described most carefully in the printed instructions, and the tug Scandinavian set the first mark, N.E. by E. 10 nautical miles, making a beat, and then steamed off at right angles for the second leg, five miles.

The start was from the gun, Yampa leading over the line and setting the pace, Dauntless, Ramona and Coronet following in order. The last was under working sails only, but the others carried working topsails after crossing. All went well for a time; the four crossed on the starboard tack and stood for the Long Island shore, making a fine sight. After they came about, with Yampa still well in the lead, she started off for the Scandinavian, now vanishing on her way to the outer mark. Seeing Yampa's course, both Dauntless and Coronet followed, the trio going wide of the first mark. Dauntless was the first to discover the mistake, turning and making for the correct mark, at 2:31:48. Yampa and Coronet turned about later on and made for the mark, but on reaching it turned from the wrong side and finally abandoned the race. Ramona turned the outer mark at 2:42 and the first mark on the return at 3:09:45, with Dauntless at 3:32:56. Spinners were set before a falling breeze, and the finish was made at 4:11:17, the full times being:

Start.	Finish.	Elapsed.	Corrected.
Ramona	12 15 00	4 11 17	3 56 17
Dauntless	12 15 00	4 35 15	4 20 15
Yampa	12 15 00	Did not finish.	4 20 15
Coronet	12 15 00	Did not finish.	4 20 15

Ramona wins a silver mug, with a Corinthian pewter to each amateur in the crew and \$100 divided among her captain and crew.

Plymouth Y. C., Second Pennant Regatta.

PLYMOUTH—MASSACHUSETTS BAY.

Saturday, June 17.

THE second of the series of five pennant regattas of the Plymouth Y. C. was sailed on Saturday over an inside course, three rounds of a three mile triangle, the wind being strong N.E. The times were:

The Cup Defenders.

THE Paine fin-keel is progressing very slowly, and is not yet in the water, though it is expected that she will be launched this week. Her spars, as well as those of Pilgrim, are now ready at Lawley's. Pilgrim reached New York in tow of a tug by way of the Delaware and Raritan canal on Thursday, and was docked on Friday morning in the larger dock of the Erie Basin. A heavy frame work of timbers, 16ft. above the bottom of the dock, was first built, leaving a space for the building of the fin. The yacht was then floated carefully in and adjusted accurately on the platform, after which bilge blocks were fitted and the dock pumped dry. The plates of the fin had been fitted and drilled to suit the builders' yard, and with the two castings for the bulb were sent on in advance. The work of placing and riveting these plates is being pushed as rapidly as possible, and it is hoped that the yacht will be afloat by Saturday, ready to tow to Boston for her spars. The bronze bottom yacht for the Morgan-Iselin syndicate was quietly launched on the evening of June 14, being named Vigilant. She is now fitting out and should be ready by June 30 for a trial. She has not yet been delivered, some changes being made in her sails after the preliminary trial trips.

Shackamaxon Y. C. Annual, June 12.

PHILADELPHIA, DELAWARE RIVER.

THE sixth annual regatta of the Shackamaxon Y. C. was sailed on June 12 in a light variable wind from the north. The steamer Lafayette with the regatta committee and a large contingent of members and friends accompanied the yachts.

The course was from the club house at the foot of Shackamaxon street wharf to the buoy at the upper end of Wheat Sheaf Bar and return, a distance of 20 miles. The starters in the second class were: Eddie T., Milton Thompson; Viola, Henry Crib; Pastime, J. H. Yeager; Nellie, J. McCormick; Sunbeam, Walter Boker; Igidious, David Sharp; Lizzie, W. T. Cravin; Fedora, John McCormick; Ellen, G. Anderson; Nana, C. Stanford.

The start was made at 10:45, the yachts rounded the upper Wheat Sheaf Bar as follows: Nana 1:08:00, Ellen 1:13:30, Lizzie 1:16:00, Igidious 1:16:00, Pastime 1:20, The finish was timed: Nana 3:04:00, Ellen 3:17:00, Lizzie 3:17:15, Pastime 3:30:00, Igidious 3:31:30.

In the first class there were ten starters: Emma E., Jacob Engle; Victor, Richard L. Binder; Edgar, James Slemmer; Rex, Henry Schurle; Emma A., Henry Anderson; Bella, Joseph Bradshaw; Anna, J. Brewer; Dora Beck; Robert Beck; Clara, Fred Anderson; Annie, Max Schledenski.

The start was made at 10:45, each boat starting from a buoy. The boats rounded the Wheat Sheaf Bar in the following order: Emma A. 1:04:00, Anna 1:04:30, Victor 1:08:00, Rex 1:07:00, J. H. Yeager, Edgar 1:18:00, Clara 1:19:30. The finish was timed: Anna 2:58:00, Emma A. 3:02:30, Rex 3:03:00, Annie 3:04:00, Clara 3:11:30, Edgar 3:18:00.

The third class started at 10:58: S. A. Mariner, Wm. Kirk; Maggie, J. Jones; Minnie, Charles Anderson; Emma, Geo. Fuerst. The yachts rounded the Wheat Sheaf Bar buoy in the following order: Emma 1:07:00, Maggie 1:07:15, S. A. Mariner 1:10:00, Minnie 1:12:00. The finish was timed: Maggie 3:01:30, Emma 3:02:00, Minnie 3:04:15, S. A. Mariner 3:04:45.

The first prize for each class was a gold watch, second prize a fine clock, third prize a silver pitcher.

White Bear Y. C., Opening Race.

ST. PAUL—WHITE BEAR LAKE.

Saturday, June 3.

THE White Bear Y. C. is preparing for a very active racing season, the following lengthy programme having been issued:

June 24—First class, Gotzian cup; second class, Kitten cup.
July 1—First class, forenoon championship; afternoon, commodore's cup; second class, forenoon

This old Long Island shooting club held its regular monthly shoot at Dexter Park on June 15. Six members shot at the birds, old Long Island rules, H and T traps, gun below the elbow, birds killed with the second barrel to count as a half bird. C. Doscher was the winner as C. M. Meyer was not a member long enough to enable him to take the medal. Scores:

C Doscher	1221212112	10	7 1/2	J Moeller	911111022	8	6 1/2
C M Meyer	1121211121	10	7 1/2	J Meyer	220112123	7	6 1/2

Connecticut League.

New London, Conn., June 14.—The fourth tournament of the Connecticut Trap Shooters' League was held at Willimantic on the grounds of the Willimantic Rod and Gun Club yesterday. The shooting commenced about 9 A. M. and continued without any cessation until 5:30 P. M., some six extra 10 bird events having been shot before and after the regular programme, making a total of 18 events. The Nutmeg shooters when they attend a tournament want to shoot all the time, and will not stop until their ammunition gives out or nightfall makes them think of home. There were about 35 shooters present from all parts of the State, and under the efficient management of Mr. H. L. Edgarton, the manager of the league and secretary of the home club, the events were run off promptly and satisfactorily. The weather was cloudy and at times it rained quite hard, but taking everything into consideration it was one of the best meetings held this season. Inclosed we hand you the scores. JAS. W. CLINTON.

enclosing ten two cent stamps. We pay expressage.

GENESEE FRUIT CO.,

NEW YORK and ROCHESTER, N. Y.

The Little Ships That Got There.

If your Caravels

are setting westward, don't forget your
astrolabe, nor your kedge-anchor,
nor your culverin, nor your June
issue of *Game Laws in Brief*. You
might better cast off without com-
pass and lead. You may securely
steer by its statutes in stress of storm,
and defy the doldrums by looking at
its pictures. Your gun or tackle sup-
ply dealer has it. 25 cts. We send it.

Our Complete Catalogue
MAILED FREE.

CORRESPONDENCE.
THE FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted. Anonymous communications will not be regarded. The editors are not responsible for the views of correspondents.

SUBSCRIPTIONS
Subscriptions may begin at any time. Terms: For single copy \$4 per year, \$2 for six months. Rates for clubs of annual subscribers:

Three Copies, \$10. Five Copies, \$16.
Remit by express money-order, registered letter, money-order, or draft, payable to the Forest and Stream Publishing Company. The paper may be obtained of newsdealers throughout the United States, Canada and Great Britain.
Foreign Subscription and Sales Agents—London: Davies & Co.; Brentano's; Sampson Low & Co. Paris: Brentano's. Foreign terms: \$5 per year, \$2.50 for six months.

ADVERTISEMENTS.
Inside pages, 30 cents per nonpareil line. Special rates for three, six and twelve months. Seven words to the line, twelve lines to one inch. Advertisements should be sent in by Saturday previous to issue in which they are to be inserted. Transient advertisements must invariably be accompanied by the money, or they will not be inserted. Reading notices \$1.00 per line. Only advertisements of an approved character inserted.
Address all communications:

MEMBERSHIP SHARES

IN THE

Triton Fish and Game Club,
CANADA.

There has just been incorporated under the above title the finest fishing and gunning association in Canada. This preserve consists of 102,000 acres, having within its borders over fifty lakes and a score of rivers and mountain streams, all of which swarm with trout ranging from 6lbs. (Salmo fontinalis only.) The virgin wilderness teems with small game. Of the larger kinds the caribou abounds. Moose and black bear are fairly plentiful, as also beaver, otter and other fur-bearing animals.

The Triton Club is situated 100 miles north of Quebec, on the line of the Quebec & Lake St. John Railway, and is reached in twenty-four hours easy journey (by rail) from New York City. (See prospectus.)

A limited number of shares is offered to gentlemen of unexceptionable references.

As a summer resort for both gentlemen and ladies the Triton Club offers great attractions, in addition to the best fishing and shooting to be had on this continent, at a very low cost.

The shares are \$250 each, and are an absolutely safe investment. Intending purchasers should carefully examine Sec. 4 of constitution, also pages 12 and 24 of by-laws about membership certificates, agents, membership cards, route and mode of payments, Prospectus, By-Laws, Maps, etc., and full information address

Messrs. TOWNSEND & HOWARD,

AND THIS PAPER.

FOR SALE.

Camp Ground,

SARANAC LAKE,
Adirondack Mountains.

Point of land just north of Sweeney Carry and Hotel Wawbeek, well wooded, high elevation, large water front, with a superb view of the country to the north, east and south, easy of access, and one of the finest camping spots in this whole country, containing about 45 acres. Address P. O. Box 1,980, Boston, Mass., for further particulars.

TROUT LAKES FOR SALE.

I offer for sale a portion of my Adirondack preserve, from 1,000 to 3,000 acres of land, with four lakes. Three log cabins on the property, good road to two of the lakes, easy trail to the other two. This property is suitable for a club or for private resorts. One lake is stocked with salmon trout, the others with speckled trout, 30,000 planted last May, and shall plant as many more this year. Will sell any one lake with a portion of the land. Address DR. J. DE V. MOORE, 157 Park avenue, Utica, N. Y.

Hunting Grounds For Sale.

We offer for sale one farm, 600 acres, situate in Warren county, North Carolina, six miles from Macon, same from Littleton. Quail, deer, wild turkey, ducks, geese and old hares on and near the farm. Fine grain, cotton, tobacco and fruit farm. Fair dwelling and outhouses. Hunting privilege on adjoining farms can be bought cheap. 14 hours from New York via S. A. L. Apply to owners. Price, \$6 per acre. EGERTON BROS., Macon, N. C.

TO LOVERS OF FISHING.—WE NOW have on our list membership shares at reasonable figures in some of the best salmon, trout and black and sea bass fishing clubs of the country; also rights in two Canadian salmon rivers. The season just opened promises to be a remarkable one, and we invite correspondence. TOWNSEND & HOWARD, Room 919, Temple Court, New York City. 26

340 ACRES IN BEAUTIFUL VALLEY OF THE Big Indian, Catskills. Depot five miles on best of stage road. Three streams; mile fishing; great possibilities; correspondence solicited from parties of good reference who will assist in organizing a club. Safe investment. Small capital required. Thorough investigation invited. C. T. C., Box 11, St. Remy, N. Y. 25

FOR SALE AT A REASONABLE PRICE.—A tract of about 5,000 acres of woodland containing a lake of fifty acres, suitable for bass. A celebrated trout stream runs two miles through the property; also good quail and partridge shooting. Four hours from New York. For particulars, address P. O. Box 432, Warwick, Orange Co., N. Y. 25

ALBEMARLE AND PAMPHLO CRUISING AND Hunting Association—Bear, Deer, Wild Turkey, Quail, Swan, Geese, Brant, Duck, Curlew, Snipe. Finest fishing; Bluefish, Striped Bass, Weakfish, Drum, etc. Membership limited to 20. One more subscriber wanted. H. A. Weeks, 74 Murray St., N.Y.

Do You Camp Out

And Do Your Own Cooking While Camping Out?

The pleasure of camping out is often spoiled by poor facilities for good cooking out doors. To remedy all this get
Buzzacott's Complete Outdoor Cooking Outfit,
tested and approved by the U. S. Government and issued to the entire U. S. Army for all camp and outdoor cooking.
Nearly 1,000 in use in the U. S. Army to-day and it has the official endorsement of every Regiment in the Army.
Made in any size for one or 100 men as required; cooks anything quick and well. No stove pipe, dirt, smoke or chopping of wood. Burns any fuel, grass or anything. No fixing or waiting to heat or cool, packs easily for carrying anywhere.
Especially invaluable for all hunting, fishing and sporting outfits, Armies, National Guards, etc.

A BLANK DAY.

BUT IT WAS NOT ON THE

RAILROAD.

The sportsman of the North often has a blank day. Indeed, no Northern shooter knows much about shooting until he has shot in the South, where the superb natural conditions have left the game in undiminished plenty in the covers.

Don't Go After Bear

to the Rockies. Go to the wide river bottoms of Mississippi or Louisiana and you will get one.

Don't Go After Turkeys

to the Great West, but to the Great South, in Mississippi and Louisiana, where the unbounded woodlands hold abundance of these noble birds.

Don't Go After Ducks

in the North, and work hard for days for a dozen ducks. Go South, to Louisiana and Texas, and learn what wildfowl shooting is.

The Quail, Woodcock and Snipe

shooting of the South is such as the Northern hunter never dreamed of. A genial climate, a pleasant people, a six months open season, and birds until you want no more.

The Illinois Central Road runs direct to all this country, and is the only road that does.

A. H. HANSON,

Gen. Pass. Agent, Illinois Central R. R., Chicago.

FOREST AND STREAM.

A WEEKLY JOURNAL OF THE ROD AND GUN.

TERMS, \$4 A YEAR. 10 CTS. A COPY.
SIX MONTHS, \$2.

NEW YORK, JUNE 29, 1893.

VOL. XL.—No. 26.
No. 318 BROADWAY, NEW YORK.

TWENTY YEARS.

1873—1893

TO CHARLES HALLOCK, summering in the grateful shade of Hadley elms, the FOREST AND STREAM on this June day sends greeting. The issue of this week marks the completion of the Fortieth Volume, the rounding out of twenty years of sturdy and virile growth. In the beginning the FOREST AND STREAM was Hallock's happy thought; the attainment of the new mile-stone is a fitting moment for giving recognition anew of the original enterprise to which the sportsmen of America owe their favorite journal.

The undertaking was fortunate in its parentage, for of all men of his day Hallock was the one most generously equipped to plan the new publication and successfully to launch it. All his life he had been an ardent sportsman; he was a past-master in the art of angling, a genuine lover of the woods and of wild life, a traveler of rich experience, and an explorer who had seen many an arduous campaign. He possessed an extensive knowledge of the sporting resorts of the country, and enjoyed a wide acquaintance with sportsmen, naturalists and public men. He was gifted with a literary style of alluring grace and charm. He brought to his chosen labor of love the prestige of successful authorship so worthily won with his "Fishing Tourist." He was fortified with long experience as a trained newspaper man. He had in high degree the journalistic sense and was endowed with a nose for news. Thus in every respect he was admirably fitted not only to project the undertaking but to accomplish the self-imposed task. The successful realization of the ideal was no insignificant achievement. Abundant reason for sincere gratification, indeed, is there in this, to have established, in an untried field, a special journal which has won the place FOREST AND STREAM holds in the periodical literature of the day. His, to-day, may be honest pride in the reflection that whatever has been the measure of FOREST AND STREAM's agency in the promotion of field sports in America and of the sportsman's interests, credit must first be given to that happy thought of twenty years ago, which prompted the establishment of the paper, and to the skill and wisdom and foresight which guided it in its early years. To Charles Hallock, then, in his Massachusetts home, a greeting to-day from FOREST AND STREAM, and from all the host of its readers and well-wishers and faithful supporters.

The special field, which the new journal was eventually to occupy as its own, was not so clearly defined in 1873 as it has become in the years that have intervened. Perhaps it could not then have been defined; the time may have been not yet ripe to cut loose once and for all from certain features which in those days were so characteristic of conventional sporting journals. And so in the first numbers we find columns devoted to the horse, to croquet and athletics and ornamental gardening; and in later years to baseball, cricket, archery, lawn tennis and chess. But the particular, unique, *sui generis* character of the FOREST AND STREAM was as clearly pronounced in the very beginning as it has been ever since and is to-day. The flavor of the woods was there, the spirit of the free open air and of the waters. This was the vital spark, the breath, the life, the soul. It was the quality of the forest and of the stream in very truth that assured for the newborn journal life and growth and upbuilding and strength and vigor, as Adirondack or Michigan or Colorado woods and mountains themselves give strength and vigor and life to humanity. And in this quality, this peculiar characteristic and pervading essence, is the secret of that sure hold which the paper has always had upon a constituency notable for its enthusiasm, constancy and fidelity. The new journal was given a cordial, hearty, unreserved welcome. In its plan and scope the field sportsman recognized what he had been seeking. The FOREST AND STREAM was hailed as "our paper." That designation and character it has maintained to this day.

The coöperation of readers, correspondents and contributors was spontaneous, and has ever since been constant and remarkable. We like to think that in respect of the close cordial relations existing between editors and readers the FOREST AND STREAM's constituency is peculiar in journalism. Certainly there is in all the

world no other journal which in like degree owes to its voluntary contributors so much of the interest and worth and vivacity and charm of its contents. What the FOREST AND STREAM has been for twenty years and what it is to-day is what its contributors have made it. From the first the columns of the several departments have been thrown open for all who would to enter and give their relations of shooting and fishing and camp-life and adventure; to record observations in natural history; to exchange inquiry, hint and information; to tell dog and fish and snake stories; to discuss ways and means, and rights and wrongs; to lecture, sermonize, argue, criticize, appeal, denounce, exhort; to express satisfaction, indignation, praise, reprobation; to tell a "Camp-Fire Flickering;" to offer opinion, fact, theory, notion, hypothesis, vagary;

CHARLES HALLOCK.
Founder of Forest and Stream.

to exhibit good sense or foolishness—all in an infinite variety which twenty years' custom cannot stale. The FOREST AND STREAM has been readable because it has printed a wonderful variety of material from a wonderful number of contributors who have had a wonderful fund of good things to write. It has always been accepted as the representative sportsmen's journal because it has always represented sportsmen. But ever above and beyond all else, it has won its way because it has been permeated with the inspiration of the wild woods, and has brought into home and office and counting room and workshop the breeziness and brightness and freshness of forest and stream.

From the outlook of 1873 it was not given to the most sanguine and optimistic sportsman to foresee with what tremendous bounds the varied branches of the craft were to advance in these twenty years. Almost equally as difficult do we of to-day find it, looking backward from the vantage of 1893, to realize how marvelous in their growth have been the interests of rod and gun. In these *fin de siècle* times we stand not long agog at anything. If passage in a flying machine should be advertised for to-morrow, the average citizen would drop his ticket into the box, take his seat and speed away through the air, reading his paper, unperturbed and nonchalant. We have accepted breechloaders and factory ammunition along with the electric light and the telephone quite as things of course; and we have actually forgotten how we used to thump home the charge from the muzzle. The muzzle-loading shotgun as a sportsman's weapon is now so antiquated that it is virtually regarded as prehistoric, and yet it is a fact that the period of change from the old arm to the new is practically covered by the twenty years of the life of this journal and the few preceding years of the *American Sportsman*, afterward as the *Rod and Gun* absorbed into the FOREST AND STREAM. In the first of our forty volumes may be found many a curious discussion of the relative merits of muzzle and breech loaders, and the most interesting trap reports of those days are the ones designed to set forth the qualities of the two arms. Those were primitive times indeed in shooting; and as for angling, if one would know how remote was the year 1873 from the present in certain branches of fishing lore now reckoned as rudimentary, let him turn back to the

pages where skeptical correspondents were given solemn editorial assurance that the black bass would take a fly

As with the gun, so with almost every appurtenance of sport on the land and on the waters. Barely to catalogue the thousand and one modifications and improvements and inventions in the implements of shooting and fishing and camp life and aquatic sports—which in variety and aggregation have made noteworthy the period—would fill columns. Sportsmen's supply manufacturers and dealers have increased in like ratio; and arms and ammunition, tackle and equipments have been simplified, perfected and cheapened.

More noteworthy yet has been the growth of the sports of field and stream in popularity. In these days of game and fish clubs galore, trap-shooting associations and game protective bodies we lose sight of the fact that at the time when the FOREST AND STREAM was projected the sportsman was relatively a rare bird in the land, for the most part flocking by himself because there were no others to flock with him. In these later and better times, this Golden (spoon bait) Age of angling, everybody goes fishing, and the first man on the stream finds that some one has been there before him; guns are as common as jack-knives, until the man who would make sure of his ducking point for the morning flight must preempt it the day before and stand guard all night.

The half has not been told, for space would not suffice for the telling, of the changes which have come in the twenty-years' lifetime of FOREST AND STREAM—of how one piece after another the game-haunted wildernesses have been converted into pleasure resorts or settlements; how from vast tracts of sporting country on sea coast and lake shore and wide rolling prairie and rugged mountain side, and from the coverts of farm and forest, the game has been annihilated or driven out; how species once so abundant that we were heedless of the cruel waste have now almost disappeared while sportsman and market hunter have been pointing at each other the finger of blame; how the opportunities of the individual gunner and angler have narrowed and are narrowing before the aggrandizements of preserve associations.

The half may not be told, though pleasing to tell, how the influence of the sportsman, in those days slight because only individual and personal, has come to be powerful because exerted in the name of perfected and potent organizations; how right public sentiment has grown in support of wiser conduct and better laws; how State systems of game and fish protection have been devised and put into practical and beneficent operation; how fishculture, from the groping, rudimentary, experimental stages recorded in 1873, has accomplished economic results of transcendent importance in stocking and restocking the waters.

The story of all this has been written from week to week. The FOREST AND STREAM has been a faithful chronicler of the times. To its files one must turn and beyond them need hardly go for contemporaneous records on all subjects properly within its scope, be the topic the effacement of the American buffalo, the rise and culmination and decline of long-range rifle-shooting, the development of artificial target shooting from the days of the gyro, the importation and fostering and condemnation of the English sparrow, the profitless introduction of the German carp, the successful stocking of rivers from the Atlantic westward to the Pacific with valuable food fishes, the birth and growth of canoeing, the establishment and development of field trials and bench shows, the progress in game and fish protection—in a word, the growth of sportsmanship.

Is there necessity of saying that during these years this journal has not been content merely to note current events and record them? In the development of the sports within its chosen field, in winning for them a wider popularity, in contending for a more adequate recognition of their inherent dignity, in maintaining and holding up for emulation a higher ideal of sportsman's conduct, the FOREST AND STREAM has done its full part. With unflagging zeal and courage and sanguine conviction of ultimate success, it has year in and year out given its influence and support and endeavor to the cause of right protection and preservation of fish and game; to the

suppression of wanton and wasteful destruction of living creatures; to the making of manly, high-minded sportsmanship.

If this review of the past yields one reflection which more than any other affords pride and satisfaction to editors and publishers, it is found in the fact that from the beginning the FOREST AND STREAM has been a clean paper; that during its twenty years of publication it has shown itself a sportsman's journal for the sportsman's home; that into that home it has ever had cordial, hearty, unquestioning welcome; and that never, not in one single instance, has it by lapse from good breeding betrayed or ill requited that welcome. Who shall say that the simple existence of such a journal is not in itself an influence potent to win respect and esteem for the recreations of rod and gun and for the fraternity of their followers?

The FOREST AND STREAM has grown with the expansion of its field. Its pages have doubled in number. Old departments have been enlarged and new ones added. Mechanical improvements, perfected facilities and the invention of half-tone engraving render it practicable to publish in 1898 such a paper as would have been impossible in 1873. It is not all that its editors would have it, nor all that they are ambitious to make it, nor yet all that they shall make it.

IN THE BEGINNING.

Editors Forest and Stream:

Thirteen years ago, when I surrendered to you, who had labored with me, *con amore*, almost from the beginning, the work which I had inaugurated nearly seven years before in FOREST AND STREAM, I felt full confidence that you would continue its publication on the same lines and with the same aims and purposes with which it was started; and I am free to say that every succeeding year has strengthened the assurance that I had not misplaced my trust. Bone of my bone, and wards of my own choosing, I could watch without jealousy your successful progress. Only once, for a brief period, pending the hazardous experiment of amalgamation with a rival journal, was the favoring tide of our vantage interrupted. The obstacle was eventually removed, except in name, and now, at the close of your second decade, I rejoice to find the essential features of the old FOREST AND STREAM still prominent, though emphasized by a maturer and sturdy growth, with rounded lines and constantly enlarging scope in accordance with the development of sport and the expanding ranks of the guild, stimulated always by the increasing facilities for reaching by rapid locomotion those remote regions which, in my earlier time, were accessible only by canoe and saddle. You have steadfastly kept your faith, and have never ceased to observe the initial injunction, "to inculcate in men and women a pure love for natural objects, and to stimulate a higher literature of manly sport." You have done honor to your founder and predecessor, and I dare say saved him much mental and pecuniary wear and tear, for to firmly establish such a potential periodical as FOREST AND STREAM is no pigmy achievement. Wherefore I give you "*Waidmann's Heil*." I congratulate you upon having so signally rounded the fulsome period of twenty years with pleasure and profit to all concerned.

It was no ordinary combination of circumstances which brought the FOREST AND STREAM into being. Mr. Grinnell, while yet curator of the Yale Museum, in 1873 recognized the auspicious conditions in sight and entered heartily into the enterprise, assisting me much by his scientific knowledge, which was fully abreast of the times, though his innate modesty, I trow, has continuously kept him from view. The public was dead ripe for an out-of-door organ. It was reaching out for it. Children cried for fresh air and exercise. Maidens were nurtured under hot-house restraint. Athletics for women were bad form. Boys grew up narrow in the chest. There were no field sports to speak of except the race track and the prize ring. Once in a while an instructive article on fishing and shooting would appear in the horse papers, and I always wished there were more of them, for they conveyed just such information as the guild of sportsmen wanted, but could not find, and I wondered why there was no class paper of that ilk. Occasionally an illustrated sketch of travel would appear in *Harper's Magazine*, but nothing on the technology of sport. Almost alone and unappreciated by the mass of readers, the inimitable Genio C. Scott vaunted the allurements of the angle in the *Spirit of the Times*. Isaac McLellan, already venerable, and William C. Prime sang of the woods and trout streams in the columns of the *Journal of Commerce*, and admiring readers began to watch for the sporadic appearance of the "big W." with keen avidity. In 1869 Scott published his fish book, and soon afterward Walter M. Brackett painted his famous quartette of salmon pictures, though their purchaser had to be found abroad. Holberton, too, found an occasional customer for his exquisite trout subjects among our own enthusiasts. There were two or three little fishing coteries on Long Island, but gun clubs had not materialized. In 1871 the Blooming Grove Park, with its 12,000 acres of wild land, was opened. It was the first systematic game preserve in America. *Turf, Field and Farm*, whose editors were directors in

the association, along with F. S. Giles and myself, devoted generous space to the subject of game and game preserves, awakening a lively interest and setting sportsmen thinking. In 1873 the "Fishing Tourist" appeared, designating many of the best known trout and salmon waters in the United States and Canada, and opening up the grayling streams of Michigan. These revelations evoked no end of inquiries for more light, especially as to routes, inns, guides and tackle.

At this juncture I resolved to print the information which I had not time to impart by letter, and FOREST AND STREAM was the outcome. I myself designed the vignette title, and the elder of the Beard brothers drew and engraved it. We had a hard time getting that central moose head at all right, for there was not a stuffed specimen or an authentic drawing to be had in those days—an indication of the abject state of both art and natural science at the time. The style of type, headlines, size of paper, width of columns and arrangement of matter remain practically unchanged since the day when the paper first saw the light, and I recognize the compliment. I entered the new field single-handed, and conducted the paper entirely at my individual expense so long as I could sell stock at half price to float it, Messrs. Rutherford Stuyvesant, A. Augustus Low and Geo. Bird Grinnell lending helping hands at intervals.

Barnet Phillips, who is now of the *New York Times*, was my lieutenant, and Capt. John M. Taylor, the son of an English nobleman, my kennel editor. From transatlantic sources he introduced our first ideas of dog shows and field trials and points in judging. Six other departments were well sustained in the *personnel* of the paper.

FOREST AND STREAM began well and took well from the start, but it was run at first on too expensive lines for a proprietor financially weak. My constituency were among the foremost statesmen, naturalists and public officials in the land, including foreign ministers and diplomats, government officials, and officers of the army and navy. Gov. Seymour, of New York, was my first subscriber, and showed his faith by planking down his cash for three years in advance. Capt. Beardslee, of the United States Navy, and Lieut. W. Hutchinson Poe, R. N., were among my earliest contributors, and the captain has kept his colors flying ever since. I had necessarily a large number of old acquaintances whom I had made in the course of twenty previous years of wandering over the continent, and it was gratifying and hopeful to observe with what ardor and *bonhomie* they rallied to the sylvan standard. Robin Hood's men were not more staunch. My foreign supporters were equally prominent and loyal. It would do my heart good to specify each one individually and the part he bore. Such volumes of rare information as came to light no one may realize who does not turn back to the earlier files. In 1876 the climax of importance was reached, when the Hunter's Camp and Sportsman's Exhibit won honorable mention, and a bronze medal at the Philadelphia Exposition, and since that time at least 130 sportsman's journals have sprung up to divide the labor and the honor of enlightening our youth on natural history and expatiating upon the charms of *al fresco* sports. Happy is FOREST AND STREAM in being the pioneer, as it is the peer of all of them. The grateful public will ever bless its instrumentality, and thank goodness that sportsmen are now accorded an honorable place everywhere in the community, and that the power for usefulness and good are fully recognized. It was not so once, believe me. Yours fraternally,

CHARLES HALLOCK,
(Founder of FOREST AND STREAM, 1873.)

FOREST AND STREAM.

We sing of the forests, lonely and dim,
In whose intricate depths no sunbeam may gleam;
The wild Adirondacks, the woodlands of Maine,
Whose glooms are sublime, whose grandeur supreme!
For ages they stretch'd in boundless expanse,
For ages they cast their foliage to earth;
They bloom'd in the spring, in the summers matured,
In the glory of autumn their banners wav'd forth.
The scarlet of maple, the oak's ruddy gold,
The yellow of beech, the elm's tender dyes,
Here close interwove their rainbow-like hues,
Receiving all tints that illumine the skies.
But, ah! there were glooms in their umbrage profound;
Where the great solemn hemlocks their canopies wove,
Where the pines and the spruces towered in air,
And spread o'er the hills a primeval grove.
In secluded, dim haunts the wild creatures rovd'd;
The gaunt, grizzly bears in caverns would hide,
The moose and the caribou gather'd in herds,
And the deer leapt the rocks with marvelous stride.
No pale-face hunters molested the game,
No echoes of rifles alarmed the red deer;
The Indian alone would ravage the wilds,
Assailing with primitive arrow and spear.
But, ah, the wide streams, majestic and grand!
No verse of the poet may sketch ye aright;
No brush of the artist, with palette and paint,
May depict on the canvas your loveliness bright!
Methinks in a fanciful mood I may stand
By the shore of some stream of ample expanse,
And enchanted gaze on the rippling tides,
The blue billows leaping in frolic dance.
In restless tumult, in slumberous rest,
There's ever for me a supreme delight;
For the woods and waters of Nature's realm
Are glorified ever with fadeless light. ISAAC McLELLAN.

"PODGERS'S" COMMENTARIES.

Pinolillo or Redbug.

I SEE a communication in the last issue of the FOREST AND STREAM from "Aztec," wherein I am challenged to make good my "defy," as he calls it, that my experience has not made me familiar with most varmints that creep or run. "Aztec" has not floored me in this case, as he thought to, for it so happens that I have met and made the acquaintance of the enterprising pinolillo in Georgia, Florida and Mexico. His description accords with my personal experience, and I can fully indorse his views as to their traits, and I have fared worse than he seems to have done, for I was laid up for three weeks on one occasion, and was refused admittance to a hotel on the plea that I was a case of small-pox. I can "see" Aztec on the pinolillo proposition; now, let him fetch on something new, for he has not "stumped" me yet, and he need not try me on another product of Mexico, the peccary or wild mule-footed hog, for I was treed on one occasion by a hundred of the pesky devils and spent a very "on-pleasant" night in an oak tree, while they camped under it awaiting my descent. I preferred the tree, on which occasion Mr. Pinolillo got in some beautiful work on me.

But I think I shall have to take a back seat on my claim to be familiar with almost all specimens of natural history, now that your correspondent "O. K. Chobee" comes to the front with his manatee, which quadruped has escaped my personal experience, and I resign the belt to him, with the grace of an office holder who resigns when he sees a positive prospect of being kicked out, and it now behooves some other gentleman to enter the list to compete for the prize, until which time "O. K. Chobee" properly holds the belt.

Some Bulldog Points.

I see your correspondent, S. R. Tisdell, sails into bulldogs rough-shod, from which I conclude that on some previous occasion that species of canine has sailed into him, hence a prejudice. I confess to a similar prejudice myself in a milder form. Mr. Tisdell apparently objects to the pictures you have published of some celebrities of that breed, on the ground that they are not handsome, which fact is indisputable, for the dog cannot claim to be a beauty unless, like the pugs, there is a point where ugliness when reached becomes beauty.

The bulldog may have merits, and such are claimed for him. He is a good retriever—of pigs, and is game in a fight; but he is inclined to be brutal, it cannot be denied, and as Mr. Tisdell says, is the favorite of a class that is not celebrated for the mildest form of virtues, although, as quoted in your defense, he frequently is better associated in his ownership by gentlemen. The sum total of it is that dog fancying is not a matter of commendable taste in all instances, according to the views of those who do not like that kind of a dog. But we can't all think alike, and while I fail, as Mr. Tisdell, to appreciate bulldogs, I don't find fault with those who fancy the ill-favored critter. As a compromise I have rather fancied bull-terriers, having made the acquaintance of some very respectable dogs of that breed, but I do draw the line at full bulls, arising probably from unappreciation, together with early recollections of their antipathy to small boys in quest of early apples in forbidden orchards, and some honorable scars resulting from too much confidence in propitiation by tempting bones thrown in advance—developing a strain of ingratitude in first munching the bones and subsequently myself. As a consumer of small boys and furnishing work for the maternal parent in the way of repairs to the seats of trousers, he may be commended by his owner, but that is a stern view of the case not indorsed by the average boy.

In your defense of the bulldog you have not, I see, ventured to quote him as a beauty, showing that editors do sometimes have consciences and a regard for the truth. Such instances should be duly noticed, and if they have not been hitherto it only shows how unappreciative is the public. But virtue is its own reward. As unremunerative as you may find it, however, do not get discouraged; all our virtues crop out when we die—a little late to do us much good, but better late than never. A good name is a very desirable thing, but there's not much money in it—at least such has been my experience.

A Delmonico Cook.

In a recent number of the FOREST AND STREAM you enter a mild protest against the very common comparison of any toothsome dish being referred to as "equal to a Delmonico feed," implying a degree of perfection to the cookery of that establishment that facts do not justify. I am inclined to indorse your protest to the common use of the comparison. It may have originated in early days, when good cooking was not as common as now, and when Delmonico had fewer rivals than at present, and I believe I had a somewhat exalted opinion of the skill of that establishment at one time myself. But that was before restaurant cooks used four-legged chickens for chicken salad; even the prestige of famousness cannot reconcile in my mind any improvement in substituting veal as a component and prevailing condiment in the make up of that popular dish, and how the epicures of the McAllister Four Hundred can daily and nightly continue to swallow the counterfeit without protest can only be accounted for by the fact that they have not all been familiar in their earlier days with the genuine article. New York restaurants have got the concoction of expensive dishes down to a fine point when veal goes as chicken, and one diminutive terrapin can be made to go around at a midnight after-theatre supper for half a dozen people, but they can and they do, and the consumers seem none the wiser. Would that we could make a dollar go as far as that solitary terrapin.

Speaking of Delmonico reminds me of a little circumstance dating "way back" to the early days of California, before we knew much of the country and its trout streams. A friend came to me one day and told me of a stream of which he had a vague description and suggested that we should set out in quest of it. I accepted the proposition and we "hitched up" and started out to find it. In those days there were no restraining fences and no notices to "keep off the grass." The whole country was open to drive where you pleased.

Driving down the San Mateo road about twenty miles we struck off at a described point over the hills, where wagonwheel had never left a track before. As we proceeded, the ground became rougher, and we had often to "unhitch" and lash the wheels as we lowered the vehicle

down stern foremost until finally we came to the bluff bank of what we supposed was our creek. It was steep, but at last finding a place that was less so, we got out and undertook to lead the horse down attached to the wagon. We got along pretty well by one leading the horse and the other holding the wagon; but presently we came to a steep pitch, and what with the wagon pushing old Joe, the horse, and his inability to hold it and himself too, the crisis came, and horse, wagon and our two selves were launched down the declivity with a rush, landing in the creek bottom up. The creek was not deep, but what it lacked in depth it made up in frigidty. It was cold, and we were soured under. The old horse, a sensible old fellow, lay on his side and made no effort or struggle, and we soon righted him and the wagon, and gathering up our floating traps scaled the opposite bank to find before us a cosy little cottage, built of a few rough boards, and thatched and interlaced with pine boughs. It was a little oasis in a beautiful grove. A man appeared who proved to be a Frenchman and the proprietor, who helped to unharness the horse and put him in an apology for a stable and then carried our traps into the house.

Our first inquiry was, whether there were fish in the stream, and being answered in the affirmative we at once rigged up our rods regardless of being soaking wet—we were in good condition for wading. Fish? Well I should say so. We came in at sundown, with our baskets as full as we were empty, and hungry as bears. The fish were dressed, and then came the question of supper. Did our host know how to cook fish? He thought so. My friend prided himself on his abilities as cook, and proposed cooking them, but I protested. I said, "this man is a Frenchman, and did you ever know one that could not cook?" While the man was cooking the fish indoors, we built a fire outside and managed to partially dry ourselves until called to supper, and to our surprise found a little table set out with a snowy table cover, napkins, and a bottle of claret—all in first-class restaurant style, and a big platter piled up with smoking hot trout. At the first taste of them I said, "By Jingo, Ned, we have struck a cook." How many trout we ate I never knew, and would be ashamed to tell, and when we wound up with a cup of superb black coffee, we lay back with a sigh of repletion and contentment. I said, "This man has missed his calling," and turning to him I remarked, "My friend, you ought to go to New York and hire out to Delmonico; have you ever heard of Delmonico?" There was a twinkle in the fellow's eyes as he replied: "Oh, yes, I hear of him—I chief cook for him ten years, and left ze place last year to come to California." Was I dumfounded? I rather think so, and that scamp of a Ned laughed until he fell off his stool and rolled on the dirt floor of the cabin until I kicked him into an upright position. It was a stunner, to find way off in the wilds, twenty miles from any human habitation, in this rude shanty, probably the best cook Delmonico ever had, judging from our experience; a man who at that time could have earned a salary of \$500 a month, cooking for a restaurant or hotel in town.

We stayed two days with Monsieur and ate trout until we could have built a monument with their back bones. And such fishing! a creek that probably had never been fished, for fishermen were rare in those early days in California, and the stream was unknown. You may rest assured we took pains never to allude to it, but our friends wondered where we found such splendid trout as we sent them with our compliments. Alas! that beautiful stream has been grabbed up and turned into a feeder to the Spring Valley Water Company's big reservoir; and my old-time friend Ned has long ago gone over the divide.

The memory of that big, handsome Frenchman tempers my prejudice against Delmonico's *poulet de veau* salads. I forgive the veal, in consideration of his having once had such a treasure of a cook in his employ. PODGERS.

Natural History.

SPITTING SNAKES.—I.

THE correspondence on "spitting" snakes which has appeared in *FOREST AND STREAM* during the past year has greatly interested me, for it is a subject that frequently came under my notice during my stay in South Africa, and one upon which I am still seeking evidence from my most trustworthy correspondents there. I may claim, therefore, the privilege of joining in the pros and cons and entering, even at this date, more fully into the subject than space permitted in my paper from Cape Colony exactly a year ago on "Some of the South African Reptiles at Home," which together with a statement of Prof. Cope, seems to have given rise to the controversy. It was a coincidence that Cope's description, which challenged such hostile criticism, should have appeared in the same issue as my paper (May 26) and that while his account of venom expelled was interpreted "spitting," a word which by the way he did not use—I actually did call the action "spitting." "They (rattlesnakes) throw their body into a coil, giving a sigmoid flexure of the anterior part of the body, on which the head is poised. They open the mouth ready for action. At this time drops of the poisonous saliva fall from the fangs, and by a violent expulsion of air from the lungs are thrown on the enemy." This description in a scientific publication for scientific readers deals with the general but not the invariable action, or we may say process of the snake in striking, the writer probably not thinking it necessary to add what most Americans who have observed at all know so well, namely, that the whole proceeding is instantaneous. Therefore one of the critics assumes that the *Crotalus* is said to wait all day with its mouth open; another takes for granted that "spitting" was implied, and a third proceeds to relate a number of interesting incidents not in any way to the point in question. Most of us in reading the lines quoted would go to our Webster's to ascertain the precise curve of the "sigmoid flexure," an anatomical term which well describes the most frequent attitude of a snake in readiness to strike, but which in popular language might be called the curve of the letter S; in other words the snake makes sure of having plenty of rope at its command, or enough of itself free from coils to be easily extended. Dr. Morris Gibbs in *FOREST AND STREAM* of July 21, explains clearly that if a snake is closely coiled, its head could not be easily thrust forward; but the actions of this usually sluggish reptile are on an emergency so rapid that the most attentive observer can

barely follow them. For ten years (while preparing my work on "Snakes") I most carefully watched them on the feeding days. Often I saw that a rattlesnake appeared to be oblivious of and totally indifferent to the food in the cage. It might be a rat or a guinea-pig moving about and running over it, till suddenly one saw the snake's head dashed forward, and only knew by the prey staggering that it had been struck. The open mouth, the erected fangs, the abundant saliva dribbling from them were undetected, imperceptible on account of the rapidity of the stroke; and yet we know that in that lightning-like dash the mouth was opened, the fangs brought down and folded back again, as the snake resumed its position as if nothing had happened.

The more I study and observe the Ophidia the more I become convinced that concerning their actions one can assert nothing positively. That is, that "they invariably coil before striking," or that they "always" do so and so. They do not invariably coil before striking. A snake may be crawling when a tempting meal comes within range. Does it stop to put itself into position while the animal passes on beyond reach? No; instantly it strikes. I have seen snakes strike while in all sorts of positions and attitudes, and even spring forward when occasion requires. There are on record numerous cases when a snake may be said to leap or spring upon its prey or upon a foe. And by pressure of the tail on the point of ground on which it rests it can spring further than the extent of its coils. Owen, in his "Anatomy of the Vertebrates," calls this a salutatory motion. P. H. Gosse affirms that the yellow boa of Jamaica rears itself up and covers an "incredible distance"—many feet—in such a spring. True, he was describing an active snake, *Chilobothros inornatus*, but even the sluggish vipers when angry extend themselves with a rapid spring, and upward, too, on occasion. "Except flying, there is no limit to their locomotion," says Huxley; nevertheless when springing from a tree or swinging from branch to branch it is very like flying; for instance, the jaculus or "flying serpent" of classic days. Catlin described a rattlesnake suddenly springing to his chest, and in Natal I heard of the dangerous *Mamba* (one of the cobra tribe) springing and wounding a gentleman in the leg while on horseback. Therefore, with all due deference to your correspondents who describe only the "sluggishness" of rattlesnakes, I think I may positively affirm that they can be active under provocation.

But I wander from the point in question, which is "spitting." The expression, from want of a better, is generally used, as "sucking" has been used when snakes rob cows of their milk. Both actions are muscular and performed by tongue, teeth and lips in conjunction, and are, therefore, as we understand spitting and sucking, both impossible in a snake. One of your correspondents on this point speaks of a snake being too sensible to waste its ammunition, *i. e.*, venom; but a snake can no more control the excitement or stimulus of its salivary apparatus than we ourselves can; and we all know how susceptible are our salivary glands to nervous excitement or agitation. Our mouth "waters" or is parched with sudden emotion, and as a serpent's poison gland is only a modification of the salivary glands, it is excited in the same manner. What is all that lubrication of food, which formerly gave rise to the idea that serpents "lick" their prey over before swallowing it, but the abundant saliva that falls over the otherwise unmanageable coat of fur or feathers, and assists the swallowing process. Mitchell, Fayer and all our best authorities on the Ophidia have observed and recorded the abundance of venom in a snake with a full gland, and that it is seen to ooze or dribble from the fang in a time of excitement. "When the poison gland is full and the snake angry you may see the venom exuding from the point of the fang, and by a forcible expiration the reptile can eject it." I observed this in the Indian viper *Echis carinata*, and also in the *Cerastes*. "Both of these if angry will strike at you with a sound which may be compared with a sneeze or a spit. * * * They may almost be said to 'spit' at you, though literally it is their mouth watering with poison and the sudden dash which causes it." I am quoting now from the chapter on "Dentition" in my work on "Snakes," because at that time I took careful notes of all I saw when attentively observing the Ophidia. This action has given rise to the idea of "spitting" snakes, or that an angry viper will "spout poison at you." "The force of ejection may be seen when a serpent striking violently misses its aim, and the stream has been seen to spurt five or six feet. A blow given in anger is always accompanied by a spurt of venom, even if the fangs fail to engage." These are, I think, Fayer's words, but I have seen the same in the cobras at the Reptilium, which, under provocation, even from the furthest corner of their cage, make a dash at you, and the escaping venom rests on the glass, where in due time it crystallizes.

One word regarding the quantity of venom spent at one stroke, as one of your correspondents doubts the possibility of a teaspoonful. Well, teaspoons vary greatly in size; but Dr. Weir Mitchell himself affirms that an angry *Crotalus* once "threw a teaspoonful and more athwart my forehead." (See his article on "The Poison of Serpents" in the *Century Magazine* for August, 1889). He also confirms my own observations that a snake can turn and strike in any posture.

When I was last in Philadelphia several of Dr. Mitchell's rattlesnakes were deposited in the Zoological Gardens there, and the keeper, Mr. Thompson, allowed me to see him procure venom (wanted for experimental purposes) from one of the largest of the snakes. The process was as described in the *Century* above quoted; only that instead of a saucer a China spoon of ordinary size was used. The venom from one snake filled this spoon. It was pale, almost colorless. One of the spoonfuls poured into a bottle he gave to me. When cold it solidified and was, and is still, of a bright amber color, but then became exceedingly brittle and broke up readily into crystals.

Next week I will relate my more recently acquired knowledge of the so-called "spitting snake" of South Africa, the one which is the primary cause of all these arguments. But my readers will kindly understand that while using the word "spitting," I agree with Dr. Morris Gibbs that snakes "could not spit if they would," as their anatomy does not permit the action.

PAINTON, Devonshire, May 26. CATHERINE C. HOPLEY.

More Restful than a Nap at Noon.

I AM a farmer, and am of course much in the open air, but I think I enjoy your paper as much if not more than as if I put in my time at a city desk. I always take up the *FOREST AND STREAM* during my nooning instead of enjoying a nap, as I think it rests me more. S. S. N.

"A Battle with Snakes."

Do I dream! Do I doubt!
Are things what they seem,
Or is visions about? —Truthful James.

THE once dignified and truthful New York *Tribune* in its issue of Sunday, June 18, gives its "numersome" readers a rattlesnake yarn that has settled the long vexed question as to whether hair can be straightened out by fright, for even the negroes here who have read the story are going about the streets with their hair standing up like bristles on the fretful razor-back, and many are going to sell out and go to Ireland. I inclose the clipping to paste in your hat for future reference. It was sent to the *Tribune* as a "special" from St. Augustine, and the Augustinians are anxious to know the fellows who fought the battle, for they want to employ them to do for Florida what St. Patrick did for Ireland. I have hunted through the Florida woods for years, and have seen but a single rattler, and many others say the same, yet these two magnetic heroes could attract and slaughter them by the thousand. "The hair on both men's heads stood up like bristles—there! I told you so!" "while their arms were blood-stained to the elbows, and within three hours hundreds, if not thousands, had been killed."

"They were badly bitten," but being protected by the gods, or a whisky bottle, they didn't mind a little thing like that, though a scratch by a rattler is almost certain death to an ordinary man. Now, will the brilliant author of the narrative tell us where he gets his whisky. I want to know, you know, so that I can take a drink to brighten my imagination when I write to *FOREST AND STREAM*. DIDYMS.

From the New York Tribune, June 18.

A BATTLE WITH SNAKES—HORRORS OF A NIGHT IN A SOUTHERN WILDERNESS.

St. AUGUSTINE, Fla., June 17 (Special).—Fishing and hunting are recognized as Florida's favorite pastimes. Daily parties leave for the interior for such sport. Among the many experiences which have been met with recently none excels the horrible ordeal which two men from the North went through a few days ago. The two left town on a fishing tour to go about 60 miles from here. All along the stream is a barren wilderness of scrubby undergrowth, boulders, rocks and stones. Being tired and sore-footed after their day's journey, the men made themselves comfortable on the surface of a moss-grown rock. After a hearty meal they both fell asleep. One was shortly afterward awakened by something choking him, and feeling found his strange collar to be cold and slimy. It was a very fine specimen of the snake species which was girdling his throat. The monster was soon dispatched, and the two men were about to lie down again, after ridding themselves of the intruder, when they found themselves literally surrounded by the reptiles. They were going to decamp for a more congenial climate, but when about to leave the rock, hissing and rattling became more audible, and it was but a few minutes later that they were as loud as ordinary-toned voices. The men, finding that they were surrounded, broke branches from the stubby undergrowth of pines and commenced lashing the writhing sea of darting, hissing snakes. Realizing that they had an all night job, they secured rocks and larger sticks and began killing the reptiles in earnest. The noise seemed to awaken the whole barren waste into a hissing and rattling forest.

Each man began the slaughter with redoubled vigor, vainly trying to fight their way to the stream, some hundred yards away down a hill. They would gain a few paces of the distance, only to be driven back again to the rock. The rattling and hissing became so loud that their voices became scarcely audible unless close together. The hair on both men's heads stood up like bristles, while their arms were sore from the congenial climate. The stench from the snake battlefield was almost unbearable and sickening. It was not within three hours after the first snake had been killed hundreds, if not thousands, had met a similar fate. Both men were badly bitten and their legs and arms began swelling rapidly. The hours wore slowly by and the slaughter continued. At last morning came and lifted the curtain of night from a most appalling scene.

Fifty feet from the large rock lay a heap of stunned, squirming and dead snakes, and as far as they could see the barren waste was a seething tide of reptiles that came toward the rock with maddening fury. With difficulty they managed to reach the river and soon arrived at a cabin where medical attendance was given. The hair on both men's heads had turned almost white during the night and it will be weeks before they can fully recover from the effects of this fearful encounter.

Hawk Migration.

BALDWINVILLE, Mass.—I note in your issue of June 15 a note on hawk migration by Karl V. S. Howland. We observed about the same heavy flight here. The advance flock passed through northern Massachusetts the latter part of March, and on March 28 the largest flock ever seen in this locality commenced to fly about 10 o'clock in the morning, and at 3 o'clock P. M. had not all got past. At one time we counted fourteen osprey fishing at once on a small pond not over sixteen acres large. In the week commencing March 27 the writer shot seven osprey from one blind, one of which measured 5ft. 8in. from tip to tip.

Can some brother sportsman tell me what caused such an extraordinary flight of ospreys? We generally see from six to ten every season, but never before have they passed here on their way north in such numbers. NIMS.

I see in your issue of June 15 an item on hawk migration. In those few lines it is recorded that thirty-seven hawks were shot in one day from three blinds. It is also stated that most of the slaughtered birds were broadwings and sharp-shinned. Now, as very few species of hawks are harmful to any great extent, it is hard to comprehend what object those gunners could have had in destroying those thirty-seven birds. It is true that the sharp-shinned hawk is destructive of numbers of wild and domesticated birds, but the broadwing is not guilty of the same crime.

Therefore I do not believe that those men on Orange Mountain took any notice of the economic value of the birds. In fact the ordinary sportsman does not know a sharp-shinned hawk from a peregrine falcon, or a marsh hawk from a hawk owl. Years ago it was the custom to offer bounties on the heads of hawks and owls, but now such a foolish and murderous law has almost entirely disappeared. Not longer ago than the last legislative session in this State an attempt was made to pass a bill giving a reward on the heads of hawks, etc. It was killed—laughed into ridicule—by one of the ablest men of the Granite State. A. W. F.

Bonaparte's Gull at the Fair.

ONE of the striking sights of the great Fair from April 15 up to May 5 was the abundance of black-headed gulls, which occupied the main lagoon between the Fair buildings in large numbers. Some persons supposed that these birds were there to feed upon the small lake herrings driven in by storms from off Lake Michigan, but Mr. Ridgway, of the U. S. National Museum, thinks they were merely feeding upon minnows and other small fish. It occurs to us that they were there to see the World's Fair. At any rate they were right into the midst of things on opening day. BART.

Game Bag and Gun.

"Game Laws in Brief." June, 1893, revised. Game and Fish laws of all the States, Territories and Provinces. Correct, reliable, handsomely illustrated. Published by the "Forest and Stream." Sold by all dealers. Price 25 cents.

KILLING A "CAT."

So many accounts of the shooting of big game are now published, that I almost hesitate to write as to the killing of anything so small as a wildcat; but reflecting that after all, those who have not killed a "cat" are in the majority, I shall address myself to them, and briefly describe the incidents of a little trip to Lake Harney, through which runs the St. Johns River, thirty miles south of Enterprise, Florida.

I had chartered the Erie, a small steamer of very light draft, and remained a day at Jacksonville to see to the purchase of stores, ammunition, etc., promising to pick up an old college chum en route up the river. Besides the captain and pilot, the cook, and Ritter, the engineer—the most profane man I ever listened to—I engaged a little darkey named Bob, a true Florida "nigger" and as bright as a button. He was to wait at table, wash dishes and make himself generally useful. Bob was not the type of servant one would expect to meet among the *haut ton* of New York; but he was as sharp as a steel trap and lots of fun, and when he heard we were "from de norf," devoted himself to us, heart and soul.

Bob was escorted aboard by his mother and by his sister, Lucretia Garfield Adkins, who led by the hand the latest addition to the family, Benjamin Harrison Adkins. The chance was too good to be lost. I promptly put together my camera and took all the juvenile Adkinses. After many injunctions to Bob to "behave herself" the mother departed with the youngster and the girl, much pleased at the chance of securing pictures of her offspring "fur nuffin."

Everything having been satisfactorily arranged, we started on time and in a few hours hove in sight of Palatka. My friend was seated upon the wharf, and when we made fast leaped lightly aboard. He was closely followed by a tall, "spare" man in a high hat and a linen duster, who looked about as little fitted for a sporting trip as one could well imagine. The stranger's trunk was shoved aboard and we pushed off. As soon as I could get my friend alone I inquired as to the identity of the person in the linen duster, who was already quite at home and was helping himself to a drink in the cabin. "Oh," said he, "that's Charlie Pewson." "And who is Charlie Pewson, may I ask?" "Why he is connected with a ticket agency in Boston; he always gives me passes when I travel." "Sam," said I, "I trust that you don't think for a moment that I am going to associate for a week with that unpleasant-looking individual in order to pay for your free passes?"

"Why certainly," said Sam, "Charlie is most entertaining; and besides he has a pass back for you, as far as Charleston." "Not me," I responded warmly, "I never accepted a favor from his kind yet that it did not cost me ten times as much as I originally saved; Mr. Pewson gets off at the next landing or our sporting trip ends here." I may as well mention that Mr. Pewson did get off and that my friend is still looking for a \$100 bill which he subsequently lent him. After this everything went on merrily enough and in due course of time we reached Enterprise, where we stopped to lay in a supply of fresh vegetables. My companion wanted to replenish our stock of ham and eggs, but I told him that abundance of food would make us lazy and that it would be much more sportsmanlike to live upon the proceeds of the chase. He suggested the possibility of lack of success in our role of Nimrods; but I spurned the idea. On the wharf at Enterprise was a little darkey with a front tooth missing. He was fishing, as all southern darkeys do when they have any spare time, and very frequently when they have not. Abe, for that was his name, became an object of deep interest to Bob, and the feeling almost approached veneration when he landed a fine black bass, which fish, by the way, is very plentiful in Lake Monroe. We learned that Abe was going to Lake Harney to work for a man up there; and to save the little chap a tiresome journey, we took him along with us. Abe being a "yaller nigger" was on this account somewhat disposed to lord it over Bob who was of the inkiest hue.

From Enterprise to Lake Jesup, a distance of twelve miles, the river runs through a flat and marshy country including Holden and Jesup prairies, sometime the home of myriads of English snipe. Upon this occasion, however, the snipe must have been away from home, for all we saw were a few alligators, which we uniformly missed. The next morning, our provisions having run short, we killed a couple of crowbills, known also as bluepeters and coots. Their flesh is as strong as poison and unspeakably tough; but we ate them all the same. Sam said he did not think the dinner was properly served, for you got your fish and game at the same time; he also feelingly alluded to the ham and eggs which we might have secured at Enterprise, but I turned the conversation.

Eighteen miles between higher banks, with clumps of palmettoes here and there, brought us to the entrance of picturesque Lake Harney. On one side was a prairie, the other being densely wooded. Among the trees at the further end of the lake a short distance from the river lived "old man Tanner," a "cracker" from Georgia, who had "fit in the wah." Nothing delighted the old man's heart so much as to take charge of a party of hunters, a fair way to secure sport and compensation at the same time. This alone could rouse him from his usual torpor and infuse energy enough into him to cause him to travel around on foot. At other times he bestrode a poor little mule, even when the beast was hauling a well loaded cart to or from the nearest settlement. In the afternoon we crossed the river in a boat, each taking a marsh to himself, since between ran a broad and muddy ditch. After a deal of hard work I managed to kick up half a dozen snipe (I had no dog), five of which I was lucky enough to bag. The birds were very fat and flew slowly; besides, I was up to the dodge always to shoot a snipe down wind, since he breathes it for an instant before starting off on his pin wheel career through the air.

The birds were so few where I was that all this took a deal of time, during which Sam was having a regular Fourth of July. Almost as fast as he could load he would

let go with both barrels; then perhaps, after a pause, would follow a single shot. Again and again I stood on the bank of the sluice "with longing for the farther shore"; but it was useless. Across that mass of mud and water no man could go without a boat. At length the firing ceased; his ammunition was exhausted. We signaled for the steamer to send for us. With a feeling of mortification I met my friend, my five little snipe in one pocket of my coat. "A flower sack would hardly hold his," I said to myself. "Well, Sam," asked I, "how many have you?" "Hem," said my friend, "you know I am not used to shooting snipe." "Of course," I admitted, "you could not be expected to kill all. Come, how many did you get?" "Well," said Sam, while a slight color suffused his countenance, "to tell you the truth, I did not get any." "Whew!" said I, "how often did you shoot?" "Between forty and fifty times," replied the poor fellow in a most crestfallen way. "And how about those single barrels?" I asked; "they usually mean a dead bird." "Oh, some of those snipe flew so fast that I did not get a chance to shoot a second time. Snipe are hard birds to kill, and no mistake."

Before returning to our steamer we pulled across Harney Bar a couple of times and landed three of four black

"BRIGHT AS A BUTTON."

bass, which, with my snipe, for a while prevented any further distasteful allusions to the extent of our larder.

The next morning my friend, having borrowed a dozen buckshot cartridges, started with old man Tanner after deer. Now deer are very plenty around Lake Harney. They lie in the heat of the day in clumps of scrub palmetto, or ponds, as they call them, from which they are dislodged by the hounds and shot as they run. They are not much larger than goats "a fine buck" weighing about 80 lbs. During the day I again killed enough snipe to keep the wolf from the door and had a rather novel and unpleasant experience. Upon the marsh where I was shooting was a large herd of semi-wild cattle, among them being a big black bull. The whole herd followed me around at a distance of about 100 yds., apparently through curiosity; all save the bull, which, evidently actuated by other motives, advanced upon me, bellowing from time to time, first at a walk then at a brisk trot. Patterning my gait after the bull's, I retreated to the river's edge (for I did not think I could stop the beast with snipe shot) and lustily yelled for the boat, which, having placed me upon the marsh, had crossed the narrow stream to the steamer. The bull still continuing to advance, I entered the river up to the waist, and in so doing trod upon a small alligator, which dealt me a smart blow on the leg with its tail. I was, indeed, between the devil and the deep sea, and upon the arrival of the boat clambered into it with unfeigned satisfaction.

I was reading in the cabin when my friend entered, accompanied by a most nauseating odor. According to him they had not seen a living thing all day. After a change of clothes all through the evening my companion shifted around uneasily, and finally asked me to load up a few more buckshot cartridges. I inquired as to the whereabouts of the lot furnished in the morning. "Well," said he, "I might as well tell you the truth; we started no less than eight deer to-day, and somehow missed them all. We saw a skunk, too." "Yes, Sam," I remarked, "and I think it proved a better marksman than you." At this a loud guffaw burst forth from the corner of the cabin, and Bob, who had entered unobserved, overcome with merriment, began to execute a sort of shuffle on the floor. "Bob," said I, "go out at once. I told you not to come in here without permission." Bob retired very slowly, all his ivories still visible, and upon reaching the deck broke into another breakdown, at the same time remarking to himself in a very audible tone, "Yah, he done hit him for shuh."

Somehow Sam did not seem to like all this and began telling me his plans for the morrow.

The following day Sam started off again for the deer, and I, after smoking a cigarette on deck, went into the cabin to load shells, prior to taking a little *pasear* among the snipe. I had a 6 lbs. canister of powder on the table, a couple of pounds of which were poured into a pan, and was working away without dreaming of evil, when I thought I smelt something burning. I kept on loading, however, until I was startled to see a little column of smoke curl up from my sleeve. A fragment of the cigarette had fallen upon it and the whole lower portion was smouldering. I left the cabin very promptly.

In the evening Sam returned very much disgusted.

They had not seen a deer all day, but had treed a wild kitten which, as my friend was taking aim, "old man Tanner" had promptly shot. "We don't pay him two dollars a day to do our shooting," said Sam, and I quite agreed with him. I might mention here that, being ever ready to try experiments, we had the kitten cooked for dinner a couple of days later. It tasted like veal and was really quite palatable. That night we hung the graceful little thing over the rail, and in the morning the tracks of a very large "cat" were plainly distinguishable in the sand below. The mother had been down to see after its offspring, doubtless guided by the scent.

Without waiting to put on my shooting brogans and leggings (the latter made of double thickness of pig skin and warranted proof against fangs of moccasin or rattlesnake) I yelled for old man Tanner, whistled for the three hounds, and grasping my gun hastened, in knickerbockers and the low shoes I wore around the boat, across the marsh toward the woods. The scent was hot and the dogs started at full speed. Behind me came old Tanner, his gun at full cock and the muzzle pointing at the small of my back. Mr. Tanner and I differed in opinion as to the method of carrying a gun, and I had more than once expressed my views most decidedly; but in moments of excitement my mandates were likely to pass unheeded. In the meantime the hounds had started the "cat" and were making things very lively in the hammock. Now, wildcats, when chased by hounds, always run in circles, hence by crossing the circles one can easily on foot keep pace with the dogs. In about fifteen minutes they had the animal treed; and when we came up, panting from our run, we could see its hindquarters projecting beyond the trunk of a palmetto. Tanner's gun instantly went up to his shoulder, but I almost knocked it out of his hands, explaining at the same time in very forcible language that that "cat" was mine. The animal skillfully kept the trunk of the tree between itself and me, but I finally managed to put a couple of buckshot through its hindquarters. Down it came and in rushed the dogs, speedily retiring, however, with their ears in shreds. We finished it with a club. It was very large and its skin grizzly from age.

After killing a number of snipe, a few ducks and a "gator" or two, but by no means denuding the country of game, we went down the river fully satisfied with our trip.

C. B. M.

A MAINE BEAR HUNT.

PASCAL M. EDMUNDS, of Andover, Me., while standing in his doorway the 20th of last month, discovered a large bear making slowly along his back field. He had no gun, so he sent his wife to the neighbors for assistance. Meantime he grabbed his nail hammer and filled his pocket with sizable rocks and started after the bear, who was making toward Roxbury Pond, and as Mr. Edmunds approached him he faced about and showed fight. Edmunds with a rock in each hand commenced pelting the bear—and just here let me say, many a Maine boy or man can sling a stone as well as old King David could when a boy, and can make a formidable fight with such weapons. Edmunds was no exception to this rule, but threw his missiles with such good effect that bruin wheeled and ran, with Edmunds in full pursuit, who soon had the bear cornered on a point of land making into Roxbury Pond. Here bruin came to bay and rose on his haunches, growled and exhibited a fine set of molars and teeth.

As if Providence favored the brave, Mrs. Edmunds with a relay of neighbors and a gun appeared at this moment. Mr. William Mitchell with his gun, Fred Merrill unarmed, and Lyman Merrill armed with a sucker pole, and as they gathered near the bear got down and ran into a thicket out of sight. Edmunds meantime laid out a plan of attack, for he had no thought of letting the game escape. He then placed Lyman Merrill in a little opening with his sucker pole to obstruct the escape of the bear in that direction, and Fred Merrill only counted as an innocent scare, or one dot of a surrounding. Then Edmunds and Mitchell started on the trail of the bear into the thicket, and on turning a sharp corner they came face to face with the beast only a few feet distant. Edmunds said, "Now's your time, shoot!" But Mitchell replied, "If I don't make a sure shot the bear will kill me. I want to make a dead shot when I fire." But the bear was a hustler and couldn't wait, and taking to his heels soon came face to face with Merrill and the sucker pole, who wielded that pole with such good effect that bruin went up a tree. Merrill kept punching him with the pole with annoying effect and soon succeeded in dislodging him, and following up his advantage belayed bruin most vigorously.

At this juncture Edmunds came up with his hammer in hand, and while Merrill punched the bear with that useful instrument, the sucker pole, Edmunds got in a tremendous blow with the nail hammer, which felled him to the earth.

Thus ended one of the most audacious and frisky bear hunts of the season. The bear weighed 360 lbs.

Moral—Courage and perseverance will accomplish wonders.

BETHEL, Maine.

J. G. RICH.

Tennessee Notes.

CHATTANOOGA, Tenn., June 22.—The *Atlanta Constitution* says: "A Georgia man who crossed a stream in his buggy a few days ago found, after he had crossed, that a 9-pound fish had jumped into his buggy. And the fishing season is young yet."

Within seven miles of Chattanooga, a busy city of 53,000 people, a farmer named Jordan, in the Sequatchie Valley, killed a bear last Saturday that was walking in his calf pasture.

River men have reported seeing four bears in the vicinity of the "Suck," on the Tennessee River, between Lookout Mountain and Walden's Ridge, within the past five weeks.

Deer are reported more numerous than usual on Walden's Ridge, feed is very plentiful and the chestnut crop, or "mast," this season will be immense. Quail are strong and lots of them. Fishing for black bass good all around. Prospects for fall sport are excellent. D. G. CHARLES.

A NEW-SUBSCRIBER OFFER.

A bona fide new subscriber sending us \$5 will receive for that sum the FOREST AND STREAM one year (price \$4) and a set of Zimmerman's famous "Ducking Scenes" (advertised on another page, price \$5)—a \$9 value for \$5.

This offer is to new subscribers only. It does not apply to renewals.

FOREST AND STREAM IN THE WORLD'S FAIR.

As Seen by Our Staff Correspondents.

The Camera War Continues.

June 21.—The city press of Chicago continues to pay attention to the World's Fair camera tax question, and many letters from outside of Chicago show the growing spirit of rebellion at the unwise arrangement now in force. Let me repeat: Here is a square mile of beauty in a thousand forms, the most attractive field for the photographer that ever lay under the sun. It belongs to the people, not to one man. To make note of this beauty you, as one of the people, are barred, except that you use imperfect means thereto. You pay \$2 tax for each day you take camera notes on these beautiful buildings, and you must use only a 4x5 camera, of necessity imperfect for your purpose. You shall not advertise this fair. You shall not spread its glories. You shall not perpetuate its beauties. Only one man on earth may do that, Mr. Arnold, of the board shanty near the south gate. As to how he may satisfy your wish, and make his notions of beauty your notions of beauty, read the following, again from the *Chicago Tribune*:

"An artist of considerable renown, connected with the Fair, said: 'The work we are getting here is certainly of an inferior quality.' For my part I consider it the most abject display of shortsightedness not to throw the gates open to amateur photographers and to societies, and, above all, to the artists of illustrated newspapers. Then we would soon find out whether the concessionaire's work is good or bad. I pronounce it bad. These amateurs would not interfere with the sale of pictures. On the other hand, being mostly rich people, they would buy a great many themselves and encourage others to buy. If they want the Fair advertised surely the newspaper picture takers ought to be welcomed by the officials and given every facility for doing their work instead of being compelled to struggle and fight for what they get."

Let it be added to the above that the pictures offered are not kept up to date. The concern is to sell, not to discover, views. Stock pictures, do you want them? Under the circumstances, who wants Mr. Arnold's pictures? And who does not want that which is right?

In the Fisheries.

The foreign powers have now completed their displays in the main Fisheries, and in the anglers' pavilion little more now remains to be put in. Brazil is just finishing one of the most interesting exhibits to be found in the entire galaxy of curiosities. Crude and primitive as her display is, it speaks well enough of the methods used. Never were boats so tipsy looking, so small, so rough, so crude, so upsetting, as some of these Brazilian dugouts. They nearly turn over on the floor if you look at them hard. It is easy to see that they are warm water boats, and used by men who would as soon be off as on the boat, just so they don't have to work too hard. The main object of interest Brazil shows here is the curious sailing raft, rudely pointed, rigged with seats and a big steering paddle, and supplied with water jars and all the necessities for a day on the water after fish, according to Brazilian notions. It is enough to make one's hair curl to think of going with such a craft on the stillest mill pond, let alone a typical river full of things that aren't particular what they eat.

Thos. Kane & Co.

Brazil can have her boats, but for my part I would rather go across the hall and tackle one of the slippery looking craft shown in the same building by Thos. Kane & Co., of Chicago. Mr. Carne tells me the house has five different exhibits in the Fair, and I presume it would make one hustle to find them all in one day. At any rate, I could not and must try later. In the pavilion just enough of their well known product is shown to whet the appetite for more.

Col. Gay's Trout.

Col. John Gay, in charge of the Pennsylvania exhibit of live fishes, lives just across the way from FOREST AND STREAM in the pavilion. He is aristocratic and has portières. Back of the portières there is a corner where you can go in and make coffee and fry fish, also a washstand and personal laundry supplies. Nearly all the young ladies employed as attendants in this building go in behind the elegant portières, and use Col. Gay's soap, when they slick up for lunch, and Col. Gay explains all about the fish to them. One of them told me she thought Col. Gay was a real nice man. When you pass the portières you are directly at the back of the aquaria, and can follow the little alley-way entirely across the exhibit. Lately, however, the quaker fish have been obscured on this side by a solution of putty and pipe clay, which the Colonel has spread on the back of each tank. "That breaks the light and protects the eyes of the fish," said he, "and at the same time gives you a much better view of the fish from the observing side. At first a great many of our fish went blind on account of the strong light."

Pennsylvania added to her display not long ago some magnificent trout, brook, rainbow and hybrid, some weighing as high as 4lbs. A full show of brown trout is also made. Additional fish were expected in from the hatchery this week. Pennsylvania corner is cool, hospitable, tasteful and attractive.

The Great Wisconsin Trout.

Adjoining the Pennsylvania State exhibit is that of Wisconsin, and here we have what I presume is the finest show of captive trout ever collected anywhere and at any time. At least, a great many say so to me. It is really a fascinating place, this Wisconsin exhibit, and it always has a crowd packed in front of the tanks so closely you have difficulty in getting a view of the fish. The State Commission of Wisconsin have cause to be proud of their work here. Mr. James Nevins, the superintendent of the State Hatchery, is in charge, with able assistants who care for the fish while he is absent with the State car after additional supplies.

Wisconsin shows 25 varieties of native fishes. There is one sturgeon weighing 75lbs., and a number of lake trout of 10lbs., each. There in one tank full of beautiful rainbow trout, some of which go as heavy as 6lbs., and all of which are large. The brook trout weigh up to 4 and 4½lbs. You can see fish here as big as the one that got away, and

VI.

can see reproduced the vividest and most magnified picture of your startled dreams relative to the monster which rose, struck, splashed and was gone. The big trout is here, and he eats liver now, or goes hungry. Bass there are also, weighing 5lbs., and big wall-eyes, and big spotted pickerel, and all other sorts of fish that bite and run. The State had three mascalonge caught, but they died before they could be gotten to the Fair.

The big case of rainbows in the Wisconsin space faces directly on the main aisle, and in the afternoon the rays of the sun fall full upon it. Last Monday the temperature of the water in a cooler part of the exhibit ran up to 66°. If it goes to 70° it may make trouble with the trout, but I truly hope nothing will go wrong with this excellent display. There are few things in the entire exposition which will afford the angler more genuine delight.

Some Reels.

As you pass down the aisle beyond the Natchang Silk Co.'s busily whirling braiding machines, which are now turning out mile after mile of all sorts of silk lines to delight the caster, you come first to the case of fine angling implements shown by a A. B. Shipley & Son, of Philadelphia, and next to the case of reels, exhibited by Julius Vom Hofe, of New York. In this latter there is nothing

DETAIL OF COLUMNS, FISHERIES BUILDING.

but reels, but certainly a plenty of these, of all sorts, from the size of a bushel basket down to the multiplying bass casting reel. There are also sectionals, showing to the anatomically inclined a complete view of the intestinal tract of a multiplying reel, something which a great many people don't know anything about and think they do.

Still beyond this and down the aisle is the show case of Meisselbach & Bros., of Newark, N. J., whose reels are of the open-work sort that the wind can blow through. This refreshes a reel on a warm day, and it also refreshes a line on almost any day.

A Glittering Generality.

Between the reels and next to the big rod case of the Horton Mfg. Co., whose steel rods now, by the way, repose against a background of white instead of oak, stands the admirable display made by Gardiner M. Skinner, maker of spoon hooks. You never knew until you saw these two cases, what a pretty effect could be made out of spoon hooks. As you look at the case you do not see the individual spoon at all, but only the glittering generality, banded in silver, gold, and flaming colors. The wish oppresses one to be a fish big enough to swallow the case bodily, for it looks quite good enough to eat. Samples of fish which have had a fancy for Mr. Skinner's food product are to be seen near the case, one a photograph, enlarged to life size, of a mascalonge taken in the St. Lawrence, whose weight was 31lbs., length, 4ft. 3in. "It is amusing," said Mr. Pond, who attends to the Bristol rods next door, "what funny things folks say about those spoon hooks. Some of them call them 'souvenir badges,' and one learned countryman thought they were 'flies.' They see the metal and the feathers and the glitter, but they can't always name the purpose."

The Little Finger Does It.

Passing Mr. Pond on the other side we strike two cases, very much alike in get-up and contents. These contain numbers of the Yawman & Erbe automatic reels. These reels are self-winding, and are so much better than an eight-day clock. You have to wind an eight-day clock every four days, and it takes both thumbs to do it, but you don't have to wind up an automatic reel at all, and when you are playing a fish the little finger does it. I never knew before that these reels grew to so large a size, or in such great variety of style and finish, but I am discovering a great many things in the sporting goods line, about which I thought I knew all there was to learn and didn't. That is the useful part of this exposition and of these exhibits. They teach the public at a glance, and by

the most convincing of all methods, that of the object lesson, of a progress in sporting manufacture of which the public would otherwise never dream. There is a great deal of thought and time and money being spent over the fellow with the fishing rod—just how much, the latter gentleman can best learn by reading FOREST AND STREAM.

The Remington Exhibit.

Mr. H. W. BRADLEY, of the Remington Arms Co., was looking at one of the new "Lee English" military rifles, one of the unique modern small bores, .330, when I met him, and was good enough to show me that arm and its American counterpart, the Navy Lee, .45, and to explain the use of this arm as a repeater or single-shot. The Lee rifle weighs about 10½lbs., and is unlike any gun, a stiff, unhandsome, tough-looking affair. Most people would think that to get elevation for long-range shooting, one must raise his hind sight; but who would believe that this same thing could be done by lowering the hind sight? Well, it can, if you put the hind sight below the barrel and not above it. The Lee rifle is so arranged that when you want to shoot a couple of thousand yards or so, you sight through a sight which can be thrown down under the barrel, at one side. This is all very well, while one is at revolutions in ideas. Another new notion in sights is the Lee split fore sight. You don't draw a bead, but line up through a crack. It is a good thing to know all these things.

The Remingtons also show a full line of sporting rifles, Nos. 1, 2, 3 and 4, some very handsome Heppburns. There are some navy revolvers, and some double Derringers, .41cal., and fourteen sorts of shotguns, from \$40 to \$100 in price, no duplicates shown. There are target rifles of all models, from the old Creedmoor down, and there is a baby carbine, .44, made for the Mexican trade. In all there are 118 guns, 18 revolvers and 14 Derringers shown. There are on two racks 48 different makes of guns, turned out at one time or another by the Remingtons, and some of these record ancient history in firearms, going back to other days, and taking in products turned out one time or another for Spain, Mexico, South America and China.

The Winchester Exhibit.

"It will cost us between \$15,000 and \$20,000 to make this exhibit, and we do it all for pure glory," said Col. Thos. E. Addis, general agent of the Winchester Repeating Arms Co., as he stood in the middle of the spacious Winchester corner of the Manufactures Building, directing the arrangement of the goods. "Yes, we do this for pure glory, and this is the most glory we have laid out, and the largest exhibit the company has made at any national or international exhibit. It has been my fortune to represent the company for twenty-eight years, and I have had charge of the London, Paris and other exhibits, but I intend to make this World's Fair display put those others in the shade, if we have luck, and I think we will. We have 170 guns in these cases, if we can find them all, and after a while we will be ready to keep house. When we put up the display at the works as a preliminary, we surprised even the workmen with the goods. We have over 2,000 men employed in that big building, whose picture you see there; but there was hardly one of them who knew we made so many different kinds of things."

Not long after the above conversation Col. Addis and his two assistants, Mr. M. D. Trecartin and Mr. W. P. Bonnell, with the help of divers others, had gotten the display in order, and it was indeed a surprise and a wonder to see how many different kinds of things there were. The three great cases arranged edge to edge about three sides of the ample space assigned this firm were ablaze with a pageantry of arms and munitions such as would never be dreamed of by one who had only seen an occasional Winchester .44 in a local storeroom. There are more sorts of Winchester rifles than I ever knew of, by a good many, nor did I ever know that weapons and their natural food could be worked out into a display whose appearance is artistically decorative. The blaze of the gold, the silver with nickel mountings, the glitter of plate glass and of polished brass, and the sheen of burnished steel contrasted here and there with the blue and the brown of duller finished metals and with the grain of rare woods in such a way as allowed no first thought except one as to the artistic impression conveyed. Especially happy was the idea of fitting the angles at the back corners of the space with plate glass, arranging against this as a background the many different styles of the Winchester rifle ammunition, from the .22 short up to the .50 express or the long single-shot rifle cartridge, about the size and length of a joint of stovepipe.

There are some sorts of Winchester's of which even the gun trade knows little, for instance the '93 Winchester repeating shotgun with the sliding or trombone action, or the Winchester with detachable barrel. You must not kick on a Winchester now because you can't pack it in a trunk, for you can, you see. The firm now makes a rifle, size from .22 up, which you can break down and take apart and pack away with a turn of the wrist. Pretty soon this gun will be on the market. If you read FOREST AND STREAM you will know how and what to ask for.

Winchester rifles, big and little, repeating and single-shot, are known in a general way through their many grades of improvements since those necessitous days back in the civil war when it was discovered that a body of men armed with the old guns could not stand against half their number armed with the "wound-up guns." But to see what rifles may and can be, you must go to the Fair and note all the care and pains and detail in manufacture, see the sectional views, examine the handsome and unique engraving, do everything but to look and see if it is loaded. Otherwise you think you know all about it, but you don't.

It seems that a small .22cal. cartridge, if planted, watered and properly watched, will in time grow into a big steel-pointed affair as long as your arm and capable of setting a smooth hole through a 4in. iron plate without denting its own point in the least. This I should not have believed if I had not seen it. Neither did I know that the Winchester people made bayonets, or that they could take their shotgun shells, and their gun grease, and their wads, and make pretty things out of them, nor did I know that their reloading tools for all sorts of ammunition ran into such infinite variety. In short, a World's Fair is useful, for everybody is ignorant and doesn't know it. Thus, I think, many will reflect who stand before this costly, but excellent and elegant display—not jumbled, but arranged of goods which have done so

much all over the world to advance the prowess and the reputation of American enterprise and resource. These, too, will all think, unless I miss my guess, that while the Winchester Co. knows how to make guns it also knows who to send out to display them. Col. Addis is quite safe to trust away from home, and I trust he may see many more World's Fairs in similar capacity.

The U. M. C. Exhibit.

Around the corner from the Winchester space is the installation of a firm known as widely, I suppose, as any of this or any other country, a name in the mouth of every shooter, from the match shooter to the country boy. No one calls it the Union Metallic Cartridge Co., however. It is "U. M. C." at the trap, on the cars, in the field, or anywhere else, whether we speak of the new green cases, or the smokeless cases, or the old straw-colored Club shells, or of any one of a hundred other products familiar in shooting lore. Here you can see them all, every one, more than you dreamed of, and in apple-pie order. Twenty-five feet of a double case, perpendicular and horizontal, again the glitter of brass and glass, and some nice red paint on some of the big rifled cannon ammunition, again the sheen of copper and of iron, with careful and thoughtful and pleasing arrangement to give it all a just display—and there you have the U. M. C. exhibit, necessarily plain, severe, simple and not elaborately decorative. No attendant was in charge when I was last at these cases, nor did one seem needed. The U. M. C. goods speak for themselves. E. HOUGH.

909 SECURITY BUILDING, Chicago.

The Maine Association's Work.

THE Maine Sportsmen's Fish and Game Association has made a movement in the right direction. This week Mr. B. F. Fowles of Boyd Lake, a member of the last Legislature, starts for Porus Island, which is situated in Pamadumcook Lake about midway between Mattawamkeag and Chesuncook Lake. The west branch of the Penobscot River is the outlet of Chesuncook Lake, and flows through or out of Pamadumcook Lake. This is one of the greatest fish and game sections of Maine, and the large amount of illegal hunting is notorious. Mr. Fowles has a thorough knowledge of the section, and the manner of hunting is familiar to him. He will first have to build a "post camp" on Porus Island. The Bangor & Aroostook Railroad will pass the foot of the lake and all this fine hunting grounds will be brought of easy access. It will be seen that this is no small undertaking. At this time of the year, he writes, the deer and moose are virtually at the mercy of the poacher. They frequent the water to avoid the flies and become an easy prey to such as hunt them in violation of the law. Mr. Fowles will be able to do much to stop the slaughter of big game by his influence with the hunters, and will not hesitate to apply the law if needed. The association has hired him for an indefinite time, and well demonstrate the question whether the laws can be enforced in that section or not. If Mr. Fowles wants assistance it will be sent him.—*Augusta Journal*, June 17.

Rhode Island Association.

THE Rhode Island Game Protective Association held its annual meeting at the office of A. L. Andrews. T. W. Penney, the organizer of the association, and its first president, was again elected to that office. It was voted to have the game laws printed and distributed in the State, and to appoint game wardens in those towns where the town councils have not chosen such officers. The association has the right to do this under its charter. As the excessively severe weather of the past winter killed many birds, the association intends to exert itself to protect the remainder. Every effort will be made to stop unlawful shooting, and to punish the market-hunters. The full list of officers elected is as follows: President, T. W. Penney, Johnston; Vice-Presidents, John T. Fiske, Jr., Pascoag; C. Fred. Crawford, Lincoln; Newton Dexter, Walter S. Ballou, Providence; Secretary, L. P. Langworthy, Providence; Treasurer, F. S. Rand, Providence; Managing Board, T. W. Penney, Newton Dexter, R. H. Wilson, P. J. Hulbert, William A. Campbell.

Massachusetts Grouse.

BALDWINVILLE, Mass., June 17. The grouse have wintered well and as we have had no rains for a month the chicks should be numerous and strong, which I guess they are, as attested by several lively broods almost within gunshot of the house. We are awaiting the opening of the bass season with as much patience as we can command. The trout fishing is about done for. NIMS.

Camp-Fire Flickerings.

"That Reminds Me."

Why the "Blue Racer" Died.

"LORDY-ME!" and "Lighthouse Charley" sank into the broken chair by the door, "Lordy-me! Lordy-me!" "What is the matter now, Mr. Baldwin?" inquired the storekeeper from the back room, recognizing the old man's voice.

"Matter 'nuff," says he. "It's a-gettin' so naow that what with ther patent this en ther patent thet, ther ordinary human bein' won't hev nuthin' ter dev but crawl inter some ground hog's hole en die. Folks 'll hev ther catin', sleepin', thinkin' en talkin' dun by turn cranks en cogges bimeby. Stepped inter Deacon Woodruffes this mornin' en asked him when he was a-goin' ter cradle thet rye er hisn. 'Mos' all dun!' sez he, ez kule ez er hop frog under a lily pad (en me a-doin' of his cradlin' er good thirty year en more) en pinted up ther lane; en danged ef ther warn't a bustin' big macheen affair, tu hosses a-pullin' of it, slashin', whirlin' en slingin' ther grain. When it got durned good en ready it passed aout them bundles er rye, all tied en fastened like a man 'd do. Fact!" The old man relapsed into gloomy silence. "No use er workin' agin turn-cranks en cogges," he began again reflectively; "en, Lordy-me! what kin er body expect, when the wizist, ol'est en knowinest er snakes is gettin' outdied by new-fangled tricks, no wonder ef menkin gits fuled."

"What's that about snakes, Mr. Baldwin? I hadn't heard anything new," the insinuating storekeeper paused in driving the busy red ants out of the sugar bar-

rel, for he knew the old man's weakness for reptiles. "Hum," grunted Lighthouse Charley, "fer folks alivin' right en taown, under ther telegraph wires en next door ter railroad, yer dew hear ez little ez er deaf hen. You 'member thet ole blue racer up ter Farms, don't yer? What, en you a Wheeler's Farms lad! Well, dawon back er my shack thet you boys call thet 'lighthouse,' in thet stretch er faller graound 'tween me en ther Howsertonick River, ther's a big heap er rocks. Never knew haow they cum ther, but ther thar anyhow, en some six er eight years ergo ther blue racer lef' Woodbridge taown en tuck up quarters en them rocks. Every one knowed him, by hearsay at least, en when I fust seed him I knowed right away who he were. He were ther hand-somest snake yer ever see. All over a dull leady blue en with jes' a collar er white round his throat. I don't believe he were mor'n five foot long, but he were a hummer. Harmless ez er kitten, but how he could fly. Why ef thet serpent hed been human he'd er been follerin' ther races sure. Seemed ter cum er sportin' blood natural. He used ter lie out by them rocks waitin' fer somethin' ter cum ty ter race with. Gin up racin' with me en ther boys after a little. They wuz allers so durned scared thet they couldn't give him no kind er tussle. Jes about twilight he'd git ready ter mosey out en beat sumbdy on ther road. Dogs, cats, ground hogs en minks, I've seen him leave 'em all behind en then crawl up in them rocks en larf like er good un. I give him a tussle with thet young buckskin colt er mine once, but he did us clean, en how pleased he wuz. Sociable like he seemed, tew, en used ter cum up ter the wood-house door sum days when I wuz savin' en try ter swing faster then ther saw. En the other snakes! Why I thought er black snake knowd er heap, but this chap beat him all holler. Seen him race a hoop snake one time, en goin' down hill; the hooper bent himself up en rolled so ez ter gain time, but ther racer warn't asleep en he jes stiffened out en went end over end till he fairly spun, en left thet wheelsnake back in ther dust. Crossin' ther crick one spell he got beat, I 'member, quite bad. I wuz a loadin' salt hay en see him cum down ther lane jes ez I wuz leavin' fur hum. Over by ther edge er ther crick lay er big water moccasin on er log en when he see ther blue racer he shook his tail, shivered en started ercross crick. Now yer know a snake can't stand ernother shakin' tail at him thet way, en the racer jes frothed en set out ter beat ther chap. Water wuz a new track fur him though, en the moccasin distanced him by a yard or so. Tell you thet snake felt small when he cum hum. He never cum out fur a week after thet, en when he did he wuz a curus sight. The cunnin' rascal put fur ther crick en I after him. The water snake wuz waitin sure 'nuff, en I yelled 'go' when they got inter line. It wuz close et fust, but my snake drawed away from the other bimeby en won by nigh a rod. When he cum back I seed him make fur the rocks, en bein' curus ter know what trainin' he'd been doin' I follered. That cussed sharp rascal; he'd bin er sleepin with his tail tween tu stones till he'd flattened the end out like an oar. Spect he'd bin er watchin' the boys paddle ther shad scow en caught the idea from thet. After thet he never hed no more fuss. Beat every-thing, cars, steamboat, en I believe he'd a beat er bow arrer, but he's gone now, poor feller, en ther's never er snake like him no more, never a snake," and then Lighthouse Charley mournfully twisted his red bandanna, till it resembled a fiery serpent.

"But how wuz it he went away? Where is he now?" asked Gregg, winking at Benhoin's hired man.

"Wal," renewed the venerable snake student, "thet's more'n I know. Might ez well ask whar Judge Miles is thet died las' week, er Doctor Heady. Lord only knows. But I wuz present when the racer giv up, en I felt like one er the fambly wuz gone. Yer see, knowin' him so well I got considerable set up 'bout thet snake en used ter tell folks now en then sum er his clever ways, en one spell las' month er peddler from York way wuz passin' en I told him what a wonderful critter I hed down in the rocks. 'Pooh!' sez he, 'ther's a snake up our way thet kin naterally warm the spirit out en any your Farms reptiles en enny kind er race.' He wuz so dang-sizzled brag 'bout his snake thet I got mad, and ended by bettin' a ten dollar note thet the blue snake would mow down anysquirm-in' thing thet squirmed, let him choose the race track. Mr. Peddler 'greed, en las' Thursday he cum in with er box under his arm. When he let loose his goer I couldn't see much ter brag on, 'peared ter be nothin' but er little gray swamp-snake, only he hed big floppin' things like ears up by his head, thet made him monstrous homely. 'Hi,' sez I, layin' out my ten, 'let her go.' The blue racer cum outen ther stun-pile, tuck one look at ther stranger en jes sniffed at the idee, en then they started, my snake lettin' ther other hev jes a start so's not to leave him tu fur behind. Down through the cornfield they went hummin', seemed to e'en a'most burn the rail fence when they wizzed under it, ther wuz goin' so hot. Over the hill they tore, en commin' down, the racer did his end over end trick, en ter my surprise the little chap jes flapped them big ears like wings and fairly flew like a swaller, gainin' on the big one every foot. I wuz scared en saw his leetle game then. 'It's a wing snake,' I yelled ter ther racer, 'take ter ther crick en you'll hev him!'

"He heard me en went fur the water like er shot. I could see ther spray fly when thet paddle tail er his'n struck. 'Hurra!' I whooped, 'they're cumin', en we win!' en I wuz reachin' fur the bill, when the worst you ever see took place. Thet low-down, deceivin' little squirmer from York turned them wings er his'n inter two big revolvin' paddles, en cum down the crick like thet side wheel boat from Derby. Pass the racer? Why, he left thet honest ole time sculler ez fur back ez ther Housatonic express 'd leave er pup dog. The peddler smiled like er angel en sez he, tuckin' my bill away, 'Whenever ther's any snake flesh around thet kin move er little, I'd like ter stir my twister up er bit,' en he boxed his wing snake up en lef'.

"Found ther ole racer out by ther rocks ther next day, stone dead. I never see sech a hopeless look ez wuz on his dead face, never. Sech a reel I-done-my-best, but-ver-rung-in-er-crooked-pack expression ez would make er oak log cry ter see. Yes, ther ole feller's gone, en he wuz a noble snake, er democrat ermongst sarpints, en he died of er broken heart."

There was stillness in the store as the ancient hermit reached over the counter for the bottle and the storekeeper gazed absently out on the village green and listened to the sober but truthful soliloquy of the clock.

H. PRESCOTT BEACH.

Sea and River Fishing.

"Game Laws in Brief." June, 1893, revised. Game and Fish laws of all the States, Territories and Provinces. Correct, reliable, handsomely illustrated. Published by the "Forest and Stream." Sold by all dealers. Price 25 cents.

THE BASS WE DID NOT GET.

"As the grape comes to the vine,
The fruit to the tree;
As the wind comes to the pine
And the tide to the sea,"

SO CAME the longing to me to go a-fishing, but I did not see just how I was to get away. Many times during May and the first week in June I had told Jack that I believed the fish were biting good in some of our favorite lakes, but he always said, "I wish you would keep still; you know I cannot go, and you drive me wild with your suggestions. Clear out and let me alone." I knew he wanted to go just as badly as I did, but he felt that business demanded his attention. His birthday came the second day of June, and I gave him an elegant rod for which he had often expressed admiration and a longing to be its owner; and that brought him to time, I think, for on the second morning after, when I returned to my room from breakfast, I found this on my desk: "Say, old man, don't you want to go down to Tom's to-day? We'll go down in the canvas boat and have him bring us back to-morrow night. Get ready and come right over town.—JACK."

I was ready in a very short time, but we did not go in the canvas boat after all; for just before we were ready to start, Tom, who is Jack's oldest brother, drove into town and said that we must get right in and go back with him. We did so, and greatly enjoyed the drive from Detroit to Tom's place on the shore of Lake Melissa. We were greeted with the pomp and splendor of early June on every side, and as we passed between Twin Lakes they looked like mirrors of finely burnished silver set in frames of living green, woven by the magic of the springtime. If we had gone in our canvas boat we would have crossed Detroit Lake, descended Pelican River to Muskrat Lake, crossed that and gone through the locks into Lake Sally, and rowing the length of this lake entered the river and made a short run into Lake Melissa and around the east shore for a mile to our destination—a most delightful trip, with excellent fishing all the way and with as beautiful scenery as can be found anywhere in northern Minnesota. We reached Tom's place at noon, and soon after dinner went out on the lake for black bass.

"Forth upon the Gitchie Gumees,
On the shining Big-Sea-Water,
With his fishing line of cedar,
Of the twisted bark of cedar."

Thus went Hiawatha a-fishing in his wonderful canoe, and with his fishing line "of cedar," to catch Mishe-Nahma "in the big-sea-water," while we went forth on plain, prosaic Lake Melissa (which name means a bee, I believe, in the original), with split-bamboo and light steel rods, modern reels and Natchaug silk lines, in a boat around which no scrap of romance could possibly be twined, so flat-bottomed, tub-like and unwieldy a craft it was; and we simply wanted to catch *Micropterus dolomieu*, of weight not over 6 lbs. nor under 5. The day was perfect for June, and deep blue sky, wood-lined shore and beautiful lake, combined with the companionship of the one friend whom you would choose from all the world for a friend and outing chum, made everything as nearly complete as possible from our point of view.

But the fish! Ah, those bass! Not one did we get that day. Every famous point and bay was visited in turn, and the only one who struck a bass was Tom, and he lost the fish just as Jack was getting ready to net it. It was a big one, at least 7 lbs., I judge, but this must be taken with proper caution, as from where I sat I did not get sight of the fish; I only saw the swirl in the water as it went off and judged from that.

Greatly disappointed, we went to supper, and then went forth again after pike-perch. Did we get them? Well, yes, rather. In an hour we had 23 fine pike-perch on the string and also had witnessed as fine a sunset as artist or poet could wish to see.

Through the twilight we strolled to Tom's place lugging our twenty-three pike-perch, which made a load. It was late when we went to bed, and as Jack stretched himself out by my side he said, "Well, old fellow, we've had a nice time even if we did not get a bass, but to-morrow we'll fetch them."

Tom's knock on the door aroused us in the morning, and as soon as we came down he said, "You fellows are not going back to-night at all. Here you stay until Friday night, then I'll take you home. This morning I'll put a boat on the wagon and take it and you over to Meadow Lake, you can fish there until noon, then, if the bass are not biting I'll come and get you and put you in any lake that you say."

Jack took Tom's side in the argument, so I gave in and to Meadow Lake we went. The wind had been blowing hard all the morning and soon increased to a gale. It was very hot and after an hour's trial we knew that there were no bass in that lake for us that day. We kept trying all the forenoon, however, and as we started for dinner could show a total catch of one pike and one catfish. We felt properly humiliated, for were we not famed fishermen, noted especially for the bass we had lured? I had to laugh at Jack's vivid description of a scene he witnessed one day when he came to the lake with two men who drank freely and finally became so muddled that they could fish no longer. As they were going to camp over the same track we were going, a red squirrel ran across the road and up a tree. One of the drunken fellows chanced to see it and bawled out, "Hi, there! see Charley! there's one of them blamed bass going overland."

After dinner Tom took us and the boat over to Lake Sally, but the wind was blowing so hard that we soon gave up all idea of fishing and put in the afternoon in drifting with the waves and exploring the east shore of the lake. Jack and I always enjoy ourselves under all circumstances, so we had a good time even though we did not fish. All the wealth of the Northland as represented by leaf and fern and flower was spread out for our pleasure, on this afternoon, when landing we strolled along the shore and ascended a wooded bluff.

After supper we went forth again, and Tom went along.

Several pike-perch were caught, one of which weighed 4½ lbs., and was caught and landed by Jack. This was the fish he tried to make me believe weighed 6 lbs. When we reached the house I went in to wash up, leaving Jack and Tom to take the fish from the stringer and bring the big one in to weigh it. They soon came in and announced 6 lbs. as the exact weight. I protested that it could not be; but there were the scales and the fish, and the scales would not lie. I looked closely at the fish and the scales; the fish did not seem to be stuffed, and the scales appeared all right. I looked at Jack and a slight twitch of the end of his moustache and a jerk of the shoulder, as he tried to restrain his laughter, gave the thing away. He had put a 1½ lb. bar of lead in the fish, and had done it so skillfully that only a knife thrust into the fish would show the lead. After the laugh over this had subsided we went to bed to dream of the bass we did not get.

In the morning we took our lunch, and put in the whole day fishing all the likely bass haunts in Lake Melissa, going clear to the foot of the lake, to the bridge over the outlet, but no bass did we strike. While at the outlet Tom broke both tips to his rod, and laying aside the wreckage went into the woods and returned with a pole that was a wonder for knots and crooks. We greeted him and his pole with shouts of derision, but he heeded us not. On our way back we dropped anchor now and then and fished for pike-perch. When we landed we had twenty-nine of these fish to carry home, and thus came to an end our outing after bass. We were not in it at all. The bass were and stayed in. The next day Tom brought us home two tanned and sunburned, unshaven and disreputable looking fellows, yet happy withal, and we immediately commenced planning to get away again as soon as possible. MYRON COOLEY.

DETROIT CITY, MICH.

BOSTON ANGLING RECORDS.

BOSTON, June 24.—More fishermen are returning from their spring trips than departing at the present time, and generally it is admitted that the fishing has been poor. The number of trout taken at the noted Maine resorts is not up to that of a year ago, and certainly the size runs smaller. All this is true in spite of the reports of "big catches" in the Maine papers, whose only object it is to draw sportsmen. They record only the successes, never mentioning the many sportsmen and tourists who scarcely see a trout during a long and very expensive trip.

Messrs. Samuel and N. S. Wax, of Temple Place, Boston, have been on a fishing trip to Lake Mooselucmaguntic. They had good luck, and are pleased with the region. A couple of railroad men, Mr. J. F. Jordan, freight agent of the Wabash, and Mr. W. S. Conell, New England agent of the Union Pacific, have just returned from the Rangeleys. They stopped at the Mountain View House some days. They took some small trout, but no large ones. Messrs. T. L. and C. H. Barber, of South Framingham, are about starting for a fishing trip to the Rangeley waters. A gentleman from the city of Rome, where he has been living for the past 27 years, called at Appleton & Bassett's the other day and purchased a couple of trout outfits, one for himself and one for his son. The son is 17 years of age, and yet this is his first visit to America. They will go to Bar Harbor for a short stay, and then they propose to try their new outfits in some of the waters of North Franklin county, Maine. Gen. G. H. Harmon, of New Haven, Conn., for many years a visitor to his beautiful camps, Lake Point Cottage, Rangeley Lake, has been spending a few weeks there, as usual in the spring. He is reported to have found fair fishing, but not that of years gone by.

Mr. D. H. Blanchard received a telegram Friday from his man at his salmon preserve, the northeast branch of the St. Marguerite, saying that several salmon had been seen in the river, and that one or two had been taken below his preserve. It is suggested that these salmon may have been taken by Mr. Walter M. Brackett, whose pools are just below Mr. Blanchard's preserve. The above is about the first news that Mr. Blanchard has had of salmon in his river this spring. He is expecting to get away early this week. His daughter will accompany him. Mr. Rollin Jones will also be his guest a part of the time, and not Mr. E. Rollins Morse, as I erroneously had it last week. Mr. Richard O. Harding, secretary of the Massachusetts Fish and Game Protective Association, is much pleased to be able to start with Mr. Blanchard, to spend a well-earned vacation of a couple of weeks, instead of being obliged to wait till later in the season, as he feared that he should be obliged to do. Mr. Blanchard is determined that "Dick" shall take a salmon this year. Mr. Harding is fortunate to be able to spend his vacation on a salmon river, the guest of a sportsman as whole-souled and true as Mr. Blanchard.

For the sportsmen who cannot get away for long and distant trips to the trout and salmon waters there is cod-fishing and mackerel fishing left, and some of the Boston sportsmen try to improve it. Mr. W. S. Hill, son-in-law of the late John P. Squire, and one of the most active men in that celebrated pork-packing firm, with his brother-in-law, Mr. Cook, another of the firm's active men, have just been trying codfishing. Time did not permit Mr. Hill to take a trip to Moosehead Lake with Mrs. Hill, as he is very fond of doing, hence the codfishing trip was planned. Accordingly Mr. and Mrs. Hill and Mr. and Mrs. Cook went by train, a week ago Friday, to Portsmouth, N. H. From that point they went out to the Isle of Shoals, some ten or twelve miles, by steamer. But oh, the weather was rough! *Mal de mer* stared them in the face, and the courage of the ladies was gone. The next morning the gentlemen went out in a tugboat for codfishing. The water was even more rough than the evening previous. The tug was all under water part of the time, then on the crest of a wave, in a manner that was not reassuring to the landmen. The spray flew in torrents and it was only rubber garments that prevented their being wet to the skin. Mr. Hill was not seriously sick, though occasionally feeling the premonitions. But he could not help comparing such fishing to trolling from a canoe on Moosehead Lake. They caught codfish. Mr. Hill says that the "fun is like pulling in any sort of a weight that might be hitched to one's line." The codfish looks a little surprised at being thus rudely raised by the mouth from twenty or thirty fathoms of water, but it never, apparently, enters his dolish head to make any fight for life. It is the verdict of Mr. Hill that "I would rather catch one ½ lb. trout with a fly than a 40 lbs. codfish." Sunday they embarked on the Portland steamer for home

and enjoyed a pleasant sail. But the ladies had had no fishing, and the gentlemen—well, they had fished and been churned till they were satisfied.

Mr. A. H. Proctor, well known in the leather trade as one of the house of Thomas E. Proctor, and his friend, Mr. A. F. Breed, also of the leather trade, have recently returned from a very enjoyable fishing excursion to The Birchens, on Mooselucmaguntic Lake. They got their share of fair-sized trout, but no very large ones.

A letter from the Upper Dam, Rangeley Lakes, says that there has recently been a full quota of fishermen at the noted resort. One day there were over 30 registered. Mr. and Mrs. W. B. French, of Boston, with Mr. and Mrs. J. S. Doane and Mr. E. K. Grant, were in the number. Mr. French is a brother of Mr. J. A. French, proprietor of the Upper Dam Camps. The party had excellent sport, with an abundance of trout of good size on the fly. Mr. Grant took the largest, weighing 4½ lbs.

In the sudden death of Mr. F. B. Daniels, of Boston, which took place a week ago, sportsmen lose a warm friend. Mr. Daniels was the senior partner of the firm of Daniels & Smith, in the clothing trade, where he was very favorably known. He was, during many years of his life, a prominent member of the Quosocoe Angling Association, the well known club house of which is at Indian Rock, Me. He was for some years president of the association I believe.

Mr. W. W. Sias, of the wholesale clothing firm of Minor, Beal & Co., and a brother of the most genial Charlie Sias, of the coffee firm of Chase, Sanborn & Co., is on a fishing trip to some well known brooks in New Hampshire. He has been a little "under the weather" of late, and has taken this trip for just the good that he knows it will do him. With his brother Charles and two or three other gentlemen, Mr. W. W. Sias has control of a couple of the best trout brooks in Connecticut. The brooks are in the town of Windham, and the gentlemen control some nine miles of fishing on them. They have nothing to advertise or for sale on these brooks, but it is learned from other sources that sportsmen who have been so fortunate as to get an invitation to fish there have got beautiful creels of trout in a little more than a day's time from Boston. Mr. Charlie Sias, though a great lover of the sport, has been somewhat hindered in his fishing this season by matters at the Columbian Exposition at Chicago. It may interest sportsmen to know, when they take a cup of coffee at that most interesting exhibition, and see in the bottom of the cup the name of "Chase, Sanborn & Co." that the idea of the name in the cup originated with Mr. Sias, the firm having the contract for furnishing all of the coffee served at the Fair. They may reflect over that cup that Charlie Sias is a trout and salmon fisherman, and that Mrs. Charlie is a lover of the sport as well as a devotee of the camera, and that both are patrons of the FOREST AND STREAM. SPECIAL.

THE ONONDAGAS AT THREE RIVERS.

The Anglers' Association at Onondaga held their first annual outing at Three Rivers yesterday. It was a jolly party of piscators and their friends, wives and best girls, that made their appearance at the Packet Dock at 8 o'clock and stepped on board the steamer William B. Kirk that had been furnished by the genial president of the association, Gen. Dwight H. Bruce. The sweet strains of Astrello's full orchestra kept the company in a happy mood as they were borne to the place where the waters meet. On board were all the latest fishing devices that human ingenuity has contrived. Enticing bait, sharp and sure-catch hooks at the end of fine line lines, fastened to nimble split-bamboo fishing rods, were plentiful enough to snatch above water all the finny population for a considerable area about Three Rivers Point. All that the Onondaga piscators wanted was an opportunity to get on the water and juggle with the fish and meet with sufficient success to capture one of the valuable prizes awaiting to be awarded. With this ambition and hope in view there was a hot scramble for the shore when the steamer Kirk struck land at the pleasant resort. No immigrants ever sought Castle Garden with more energy than did the fish deceivers of Onondaga. With proverbial hunger they made for shady places immediately, striving to get their luncheon out of sight and then affiliate with whatever fish that might feel disposed to make their acquaintance. Dinner out of the way, and the fun began.

The prize fishing began at 12:30 o'clock and lasted until 5:30 in the afternoon. Fully twenty-five people, with tackle in hand, rented boats and stood about the judges at the appointed hour. As the roll was called by Judge Geo. W. Wood, the resonant voices of contestants re-echoed across the river. When that had ceased and the conditions governing the contest had been announced, the prize fishing excursion grew warm. All piled into the boats, and, bracing themselves, put their hands to the oars awaiting the signal. Simultaneously with the bursting of a giant firecracker, the anglers were off and a score of boats darted in all directions, making away for the abodes of the fish. Whether the fish knew of the plans of the anglers or had not sharpened their appetites for the bait offered them is not known and never will be. At any rate, they would not bite. Some attribute their indifference to the location of the moon; some alleged a conspiracy among the finny tribe; while others were unanimous that they would not bite and could not be bribed to bite. Had it not been for the prizes in prospect and the love of angling, the contestants would have quit the business long before they did. As it was, they stuck to their fishing and firmly hung to their poles until 5 o'clock, when a bomb at the dock summoned them back. At the end of a half hour another bomb was exploded, and the contest was over and all had landed. It was an easy matter to land the fish, for in nearly every case they were few and far between.

The amusing part of the day came at this time when the fish was spread before the judges. Each one laughed at his friend's luck. As an exemplification of his skill, Charles Mowry, of the association, waved aloft on a stick two dried herrings, insisting that they should be counted, but Gen. Bruce, the referee, ruled him out, however, and the judges, Amos Padgham, Louis E. Morgan, Fred Devine and John Buss, began their work. H. F. Robbins, Charles H. Mowry and M. Weidman acted as scorers. It took but little time for the officers to finish their work. Fish of a certain variety and length scored a certain number of points, and when the results were reached it was found that H. E. Robbins had the most number of points and secured first prize. He scored 1244, and won a vase donated by S. P. Pierce, Sons & Co. W. K. Squire had

his choice between a special prize and second prize on his score of 85½. He took the second prize, a Quackenbush rifle donated by W. A. Abel & Co. I. U. Doust scored 74 and captured the third prize, a landing net donated by H. E. Robbins. The fourth prize was taken by W. H. Suckles, who scored 73 points and won one of Wood's best lance-wood rods, donated by that firm. A pair of walking boots donated by Frank C. Howlett formed the fifth prize, and was taken by John Buss, who scored 57½ points. M. Weidman scored 31½ points and will smoke a box of cigars donated by Justin Seubert as his sixth prize. W. Everson won two prizes and chose, as an earning of his 25 points, the seventh prize, a lot of trolling bait donated by the Enterprise Manufacturing Company. Mrs. Frank Diel earned 19½ points, took eighth prize, and got one-half barrel of flour donated by E. F. Hotelling, of Baldwinville. Mrs. H. E. Robbins scored 17 points and took a hammock donated by Harry Kennedy as ninth prize. C. H. Mowry earned 16½ points and will wear a pair of slippers donated by Brand, Bauer & Molyneux in which to think of the tenth prize he won. The eleventh prize was captured by F. C. Brower, who scored 8½ points and won a fishing hat donated by Stevens & Adams.

Of the special prizes George Sutter, the oarsman rowing the party making the greatest score, won a fine multiplying reel and silk line donated by John H. Mann & Co.

The largest small-mouth bass caught by a gentleman was captured by W. K. Squires. W. Everson caught the largest pike, while H. B. Robbins exhibited the largest bass caught with a fly.

Of those who fished Prof. C. H. McCormick made the best record, catching 4 black bass, 8 rock bass, 1 pickerel and 2 big chubs. He did not compete for a prize.

B. A. Molyneux caught the largest black bass of the gentlemen, and Mrs. Molyneux of the ladies.

Several prizes were left unawarded on account of the choice between two that many made. They will be competed for at some future contest that may take place this season.

On the journey home a special meeting of the Anglers was held in the cabin of the boat and President Bruce, in a neat little speech, presented Archimedes Russell with what he regarded as an appropriate booby prize. The latter amid much laughter replied in a manner that elicited great humor and good feeling. A vote of thanks was extended to President Bruce for his generosity in furnishing the steamer, and it met unanimous applause.

The trip was highly satisfactory, and a record of having a good outing was made, even if the angling record was not smashed.—Syracuse Courier, June 21.

ANGLING NOTES.

Deer's Fat for Fly Lines.

RUBBING the fly line with "red deer's fat" is an English practice, and one that is not, perhaps, widely known on this side of the water, but it is a good one nevertheless. The line, rubbed with deer's fat, floats better, and it seems at least to lay out better on the water, and then there is a feel to it that the unrubbed line does not have. The fat is used on enameled lines as well as on other "dressed" lines. I had a high grade tapered, enameled line, on which the dressing was a little too hard, and in casting the dressing broke in various places, making it a jointed line. I rubbed this with deer's fat every time I used it, and it improved it greatly. I got an undressed, braided silk line from England, such as is used for spinning in Nottingham casting, and I have just rubbed it with deer's fat, and I shall give it a trial in a few days. It is convenient to have a piece of deer's fat in the tackle box, and to use it pass the line over it until it is well covered with the tallow, and afterward rub the line well between the fingers. I have enough of deer's tallow so that I can furnish half a dozen anglers, the first to apply at this office, with a small box of it.

Hudson River Salmon.

Mr. Robert C. Lowry made the second attempt last week to tempt a salmon to rise to his fly in the Hudson below Mechanicville, and he writes me from Montreal, where he went from Mechanicville: "I gave the salmon a thorough trial and not a rise. Neither did I see a salmon break water or jumping. I saw one fish, a fine one of about 30 lbs., near the middle of the stone wall opposite one of the pits of the pulp mill. He was not quietly lying there, but was evidently excited and kept moving about. The Troy dam broke Monday morning at 2 o'clock, and I think that salmon had just arrived from Troy and did not understand the wheel pit nor the foul white water that he encountered. In the afternoon I got a pair of horses and wagon and took the boat down the river to the foot of the rapids, two and one-half miles below the town. I never saw finer water for salmon, but fished it faithfully without any results whatever. The water was very warm, 72°, and salmon won't touch the fly unless the water is cold, say not over 60°. I have just been telling my friend, Mr. Ramsey, of Montreal, about it. He is an old fisherman and he says that salmon never take the fly at such a long distance from the sea, thirty or forty miles is the limit."

And yet nearly a dozen salmon have been killed at Mechanicville on spoon and "deer hair bob" since they first arrived there a few years ago.

As to the Mechanicville fishway, about which I have written once or twice lately, Mr. A. C. Johnson writes me: "One day last week the paper company was obliged to draw the water from the canal [it is the wall of this canal, built to supply the mill wheels with water, that Mr. Lowry mentions, and the fishway is built on its outer side, the upper end passing through the wall], and as that shut it off from the fishway I went into it. The fishway was alive with silver eels. In many of the pockets I found small black bass, I should think twenty-five in all, from 3 to 8 in. long. The fishway is so filled with driftwood that only small fish can get through it. I removed all the drift that I could in the short time that the water was out, but there is a half day's work for some one yet before the fishway will be clear so that salmon can go up."

A. N. CHENEY.

"Tommy," said the visitor, "have you read the books in your Sunday school library?" "Some of them," he replied, rather doubtfully. "Can you tell me what happened to the boy who went fishing on Sunday?" "Yes, he caught three catfish and an eel." "How do you know that?" "Cos I was him."—Washington Star

LAKE ST. JOHN OUANANICHE.

NEW YORK, June 24.—After my experience of June 12 at Mechanicville I proceeded to Quebec for the purpose of putting in a bid for the ten years' fishing rights offered by the Quebec Government for lease of the waters now fished by the Governor-General on the Grand Cascapedia River.

The auction room seemed to be quite well filled with prospective bidders, but when the auction opened there appeared to be no one who meant business excepting Mr. Hogan, of St. Lawrence Hotel, Montreal; Mr. H. W. De Forest and myself; and the waters were finally knocked down to Mr. De Forest at an annual rental of \$6,125. I understand that Mr. De Forest represented himself, R. G. Dun, Wm. K. Vanderbilt, E. W. Davis, and a few others.

It was just the right season for ouananiche fishing at Lake St. John, and as I had long desired to try my hand at taking these much-written-about and largely-advertised fish, I took the train on the Quebec & Lake St. John R. R. for Lake St. John, and on the evening of Friday last (the 16th inst.) found myself at the Hotel Roberval, located near the little village of Roberval at the head of the far famed Lake St. John.

This hotel is a fine one, and has all modern improvements, including electric lights, etc.; but the season had scarcely commenced and there were only about a dozen guests, mostly fishermen and tourists.

The next morning I took the little propeller yacht Undine and in about two and a half hours found myself at the foot of the lake (distance, twenty-five miles), comfortably located at the Island House, a very nice hotel, run under the management of the proprietor of the Hotel Roberval. The proprietor has employed Mr. Patterson, formerly a Hudson Bay Company agent, whose entire business is to look after the fishermen and provide them with guides, canoes, etc. I found Mr. Patterson a very intelligent man and an expert in handling canoes and in everything pertaining to fish and game.

He quickly made arrangements for two good canoes and a birch canoe under the control of one of the best guides, John Morrell by name; but as it was too late to go down to the Grande Discharge that afternoon, Mr. Patterson suggested that he would himself take me out in a canoe late in the afternoon and see what could be done by trolling for ouananiche with a spoon; so about 4 o'clock we went across the river where there was a little swift water right at the mouth of the river and commenced operations.

We had gone but a little distance when I had a strike and lost a fine fish. However, we tried it again, and in a few moments we had another strike, and I landed a 4lbs. ouananiche. Of course, I was more than curious to see this renowned fish, and upon examining him, I became satisfied that he was not a landlocked salmon at all. He had the head, the mouth and the shape of a trout, and his body was scaled like a bass (with smaller scales however) and covered with dark spots. In fact, the fish looked more like a New York Bay weakfish than any fish I have ever seen. He by no means gave me the fight that I expected, but after one or two leaps out of the water he came readily to the net with scarcely any struggle whatever. I was so surprised at this that I asked Patterson what it meant, and was informed that he thought that the water was not swift enough, and that when I began to take the fish in the rough waters, they would give more of a fight.

We then resumed trolling and within an hour's time killed two more ouananiche, one of which weighed 4lbs. and the other 3lbs., and we also killed a pickerel of about 3lbs. weight, which gave us almost as much of a fight as the ouananiche.

The next morning bright and early I took my two guides and the canoe, and we went down the river and in due course of time found ourselves in the white water about ½ mile below the foot of the rapids of the Grande Discharge, distance from the hotel about three miles.

Now as I had read a great deal about the fish taking the fly right from the foam, to the foam we went as fast as we could go there. We found it in a large pool at the foot of the rapids on the lower side of the river, and I lost no time in casting away for all that I was worth, but after about one-half hour's fruitless endeavor, the guides said that the fish "were not rising in the foam that day," and suggested that we move over to a large rock or point that jutted out from the shore, around the end of which a heavy current was flowing.

This we did and almost the first cast that I made with a silver-doctor hooked a 3lbs. fish which, after a couple of jumps in the air, came to the net in the most placid manner and was taken in.

I continued casting for about half an hour without success and then handed the rod over to John Morrell and he instantly hooked a large fish and promptly lost him, as he did with two others right there and then. I at once saw that he did not understand how to handle a fish that was taken on a fly-rod, so the next fish he hooked I took the rod from him and landed it without trouble. I then resumed work and soon had another fish that weighed about 5lbs., but he gave me no more sport than the first ones. He did not take out one inch of line nor make any attempt to sulk nor make a long run or anything of that sort.

We remained on or about this rock all day long and took thirty-two fish, about a dozen of which were only 10 or 12in. long and I promptly returned them to the water. The remainder of the fish we took to the hotel and gave some of them away, and selecting about a dozen of the largest, I thought to take them home with me, but when we arrived in Quebec, the weather was so warm that I concluded it was better to present them to the proprietor of the Hotel Florence.

Well, to return to the ouananiche. On further investigation I found that the flesh of this fish is pink, but a very light shade thereof, and is neither as firm nor as toothsome as the flesh of the salmon, or the trout or the black bass. In fact, I must frankly say that I was never so much disappointed in a fish in my life, both as to its fighting qualities and its uses for the table.

It is not a landlocked salmon at all, I am well satisfied of that fact, for I have killed landlocked salmon on the Grand Lake Stream in Maine, and the real landlocked salmon is almost identical in appearance with the regular salmon that comes up from the sea, but the ouananiche is a different fish entirely. It has not the white belly of the salmon, but has a distinctly yellowish tinge on the belly, the same as a bass or perch.

The scenery at the Grande Discharge is magnificent. The roar and rush of the waters is like Niagara, but I can frankly say that I would rather kill a 3-pound bass, and would be sure to get more fight and more sport out of him, than an ouananiche of double that weight.

It makes me smile now when I read the high-flown accounts of the "far-famed ouananiche."

ROBERT C. LOWRY.

HUDSON RIVER SALMON.

NEW YORK, June 23.—*Editor Forest and Stream:* My first visit to Mechanicville was made on May 23. After finding comfortable quarters in the Hotel Leland, I made the acquaintance of Mr. Thomas L. Pratt, of Mechanicville, whom I found to be a most enthusiastic fisherman and quite desirous to see the killing of a fine salmon in the river. Mr. A. N. Cheney, of Glens Falls, also came down to meet me, and as soon as we had dined, I put my rod together and speedily found myself on the river, but unfortunately there was such a high wind blowing up river, that it was impossible to cast a fly to any advantage, and after spending an hour or two in vain endeavors we gave it up. I think that no salmon had arrived there at that date, as we saw none breaking water and no signs of any. As I had determined to give the water a thorough and fair trial, I left my fishing tackle with Mr. Pratt; and on June 12 I paid another visit to Mechanicville.

This time everything seemed favorable. Not only was the water fine, but about 60ft. of the dam at Troy had gone out or broken away early the morning of the day before, and as it was a well known fact that there were plenty of salmon seen below the Troy dam, I of course expected that they would quickly find their way up to Mechanicville.

Mr. Pratt soon had his boat afloat and took me up as near as the limit would allow, below the falls at the dam, and we spent another morning in a vain endeavor to take a fish.

I used every variety of fly in my fly-book: Silver-doctor, Jock-Scott, silver-ranger, silver-gray, black-dose and fairy, but without success. After about two or three hours' casting, without seeing a fish break water or any signs of any, Mr. Pratt and myself went ashore and walked along the high stone wall alongside of the pulp mill, just below the dam. In a few moments we had the pleasure of seeing a large salmon in the water below us. I should judge that it weighed not less than 30lbs. and perhaps more; he seemed to be in a great state of excitement and was moving rapidly in almost every direction. I think that he had just arrived from down the river and was mystified by the surroundings, including the lime-water that at times flows from the pulp mill. This water is exactly the color of milk and leaves a heavy white sediment along the shore of the river, which of course means death to the fish.

As the salmon above referred to was inside the lawful limit, of course I made no attempt to see whether he would notice the fly or not. In the afternoon we took our boat down stream and went to fishing just below the rapids, located some three miles below Mechanicville.

It is as fine water as I ever saw for salmon, and although I fished it with the greatest care, we did not get a rise or see any fish.

From the above experience it is my belief that the salmon will not take the fly at Mechanicville or at any place located so far distant from sea. The water was very warm, and this, too, was against us. I also doubt if very many fish had yet arrived there, for I received a letter yesterday from Mr. Pratt, dated June 19, in which he informs me that he has seen any quantity of salmon in the river since I left.

He saw them frequently breaking water out in the river just above the Mechanicville Bridge, and upon going up to the stone wall he saw five lying in the clear water in front of one of the wheel pits. He also saw a large number jumping on the apron of the dam in the endeavor to go up stream.

The fishway at Mechanicville is in good order, excepting that it is choked up with brush and debris, and the Fish Commissioners ought to clean it out immediately.

Mr. Cheney also informed me that about two weeks ago one of the game protectors at Hudson had taken some 26 salmon alive in his nets and turned them loose. By the way, I might remark that my opinion is that whenever salmon are caught in the nets and turned loose or hooked by a fly and escape, they immediately return to the sea. In fishing in our Cascapedia River we have frequently lost fish, and the netters at the mouth of the river took them the next day with our leaders and flies in their mouths.

At the mouth of the Dartmouth River at Gaspe Basin, Quebec, there is a Government system of traps for catching the fish for propagating purposes, and as soon as they are stripped they are returned to the river alive. This process has almost ruined the Dartmouth as a salmon river, for the fish are so frightened that they do not return. In fact, some few years ago a number of them were tagged and were taken later on in the St. John and York rivers, both of which empty into the Gaspe Basin, with the copper tags still intact.

Long experience has also taught me that the salmon is very much and very quickly affected by the temperature of the water, and the moment the temperature rises above about 60° the fish seem to be stupefied, and will remain in one place for weeks without stirring or taking notice of the fly, but should a cold wave occur or the temperature of the water be lowered by a freshet, they will immediately bestir themselves and eagerly dash at the fly when presented.

ROBERT C. LOWRY.

Hudson River Salmon with the Fly.

MR. T. L. PRATT of Mechanicville, on the Hudson, writes us that on June 23, with Mr. Miller, of the same town, he killed two salmon, taken with the fly, weighing 9½lbs. and 10½lbs. Mr. Pratt's first fish took the fly as the town clock was striking 5 in the morning and was safely in the boat at 5:28. Mr. Wm. H. Vandenberg took an 11½lbs. fish on June 20. Several others have been lost. Many others are trying for Mechanicville salmon, and it is probable that other fly-fishing records will be made.

A CHANGE of publication day, which is necessary to meet the requirements of a growing constituency in the South and West, will be made beginning with the second number of the new volume. From that date the FOREST AND STREAM will be put to press on Tuesday instead of on Wednesday of each week.

AMERICAN ANGLERS IN CANADA.

THERE has been an immense rush to Canada of both salmon and trout anglers from the United States during the last few days. Mr. H. De Forrest, of New York, formerly secretary of the Restigouche Salmon Club, who was here last week, was the fortunate purchaser of the fishing rights of the Grand Cascapedia, for which he paid \$6,125 per annum. The Governor General of Canada and the Countess of Derby are now on the river, which they will fish till the termination of their lease on the third of July.

Rev. Dr. Rainsford, with a party of friends left here on Saturday for the Restigouche, and on the same river are Messrs. George von L. Meyer and Louis Curtis from Boston. Mr. Walter Brackett, of the same city, is on the St. Marguerite, where Mr. D. H. Blanchard is also expected about the end of next week. Mr. E. C. Fitch has gone down to his North Shore stream, the Romaine, and on a portion of the Cascapedia Messrs. C. B. Barnes and F. W. Ayer are now whipping the pools.

But the greater rush of the angling fraternity is to the more readily accessible waters in the Lake St. John district, where fishing privileges are in thousands of square miles of territory, free to the patrons of Mr. Beemer's and Mr. Baker's hotels at Lake St. John and Lake Edward. Upon this latter lake is now snugly encamped on Isle Paradise, Mr. Kit Clarke, of New York city, who has already this season been to Grande Discharge for a tilt with the ouananiche and killed a number of fine specimens of *fontinalis* in the Metabetchouan, on the preserves of the Springfield Club. Judging by the very heavy fish which have been already taken this season in Lake Edward, Mr. Clarke is likely to have a good time before him. The waters of the newly-formed Triton Club, a little to the south of Lake Edward, have turned out especially well, and the American members who are now encamped upon them report very gratifying success. This track possesses the advantage of being the most accessible of any of the preserves in the district leased to American fishing clubs. Members may leave Quebec at 8:30 A. M. and commence fishing shortly after 1 o'clock the same day. The club house of the New Haven Fishing Club on Commissioners' Lake was unfortunately destroyed by fire a week ago. It will be immediately rebuilt. Messrs. Dr. Stetson, A. H. Mayo and A. W. Hooper, all members of the club, are now fishing its waters. The season at the Grande Discharge has opened very auspiciously for anglers, the ouananiche having been plentiful since the 10th inst., when one of eight pounds weight was taken by the well-known guide Johnny Morel. Four and five pound fish have risen freely to the anglers' flies during the last ten days, and with them have been killed some good specimens of the whitefish, averaging some two pounds each.

It will probably be news to some of the readers of FOREST AND STREAM that the splendid new steamer Mistassini is now crossing daily to the Grande Discharge from Roberval. She usually makes the 25 miles across the lake in about an hour and a half. Among others who are shortly expected here to fish the Grande Discharge are Judge Vann and Eugene McCarthy, of Syracuse.

QUEBEC, June 22.

E. T. D. CHAMBERS.

THE MISSOURI DYNAMITE LAW.

JEFFERSON CITY, Mo., June 18.—*Editor Forest and Stream:* In your issue of May 25 your correspondent "O. H. Hampton, traveling agent Atlantic Dynamite Co.," in commenting on the act passed by the last Legislature of Missouri for the protection of fish and to regulate the sale of dynamite, is, I think, premature in his condemnation of the law. He says: "As a matter of fact, it is so heroic that no one observes it and in consequence it is worthless." Whereas, "as a matter of fact," this act of the Legislature has not yet taken effect and is not yet the law; and will not become so "until ninety days after the adjournment of the session at which it was enacted." (Const. Mo., Article IV., p. 71, Sec. 36, Rev. Stat., Mo., 1889.) There was no emergency clause adopted making it take an earlier effect. I believe the Legislature adjourned late in March, and ninety days thereafter the act takes effect and becomes the law.

Again, Mr. Hampton says: "I am familiar with the dynamite trade in Missouri, but have not heard of any one paying any attention to this law, and probably never will hear of such a thing." That's reasonable. But if he remains in the business after the act becomes the law, with a like experience, wouldn't he make a good witness before a grand jury? I would advise Mr. Hampton to go a little slow with his dynamite sales hereafter, at least in this "neck of woods," as our prosecuting attorney is foolish enough to think the law ought to be complied with.

Mr. Hampton says: "A good deal of the dynamiting is not done with dynamite anyway. It is a well known fact that a bottle filled with rifle powder is just as effective as dynamite, and is used in many of the supposed dynamite cases." Fortunately this contemned Missouri law provides for bottles of powder as well as other things. Sec. 5036a is as follows: "No person shall place or use in any of the waters of this State any medicated drug, any *Cocculus indicus* or fish berry, or any other poisonous thing or substance calculated to poison, kill or injure any fish, nor shall by such means kill, catch or take any fish that may be in said waters, and no person shall place any dynamite, giant powder, nitro glycerine, or any explosive substance of which nitro glycerine composes a part, or any other explosive substance or preparation [that catches rifle powder in bottles, doesn't it?] in any of the waters of the State, whereby any fish that may be in said waters, may be killed, injured or destroyed, and no person shall by such means kill, catch or take any fish from said waters."

This law was not made for good citizens, but for scoundrels who prey upon the public; who to get one fish will slay a thousand; who will wantonly and criminally destroy all the fish in a river, and thus deprive whole communities. Why will the United States and the States appropriate and expend tens of thousands of dollars for the propagation of fish and replenishing the "dynamited" rivers? If dynamiters are to go free for a small fine which they never pay, if it is too severe punishment to send them to the penitentiary, then stop the appropriations and let the fish go.

I have yet to hear the man who does not say the penitentiary is the place of any one who would destroy fish by explosives.

The enforcement of the law may be troublesome, but

honest men must submit to some trouble or submit to the rascals. Mr. Hampton will have to comply with the law until it is repealed. The penalty is graduated—from the penitentiary not exceeding two years or county jail not less than thirty days, or by fine not less than \$100, or by both such fine and imprisonment. Each seller of explosives pays 25 cents for his permit—Sec. 5,086g. The buyer can swear for 5 cents, not 50—Acts 1891, Sec. 5,005, p. 151. I consider this a good law. It is at least the best we have, and the law until repealed. As far as I have learned, it is sustained by public sentiment and will be enforced. Mr. Hampton's cartridge "went off" a little prematurely. I think he wrote without mature consideration. The details of its execution are not complicated, but simple.

H. CLAY EWING.

St. Lawrence Bass and Pickerel.

CLAYTON, N. Y., June 21.—*Editor Forest and Stream:* Roying about through the best fishing points of this vicinity, I am led to ask the indulgence of your columns for a little of my experience at places where are found bass, pickerel and muscallonge.

Beginning at Henderson Harbor I found plenty of black bass, and although they are not of the largest size they occur in goodly numbers. The same can be said of Sackett's Harbor and Cape Vincent. After enjoying the fish at these places I came to the quaint old town of Clayton, a very busy place during the summer season. Here, after a look at the incomparable St. Lawrence River, and having taken from its clear waters a surfeit of fish, a peculiar restful feeling generally follows, and happy is the man with plenty of time at his disposal to enjoy it. The hotels here are excellent, and in nearby waters the fishing is the best. All points within the Thousand Island district can be easily reached within a radius of twelve miles. Steamers run frequently and all stop here. In Eel Bay, which is directly in front of the Canoe Association's former encampments, bass, pickerel and an occasional muscallonge are taken. One recently caught weighed 25lbs.

Last year a young lady nineteen years old caught and landed one here that weighed 47lbs. Grand View Park, located on this bay, has a good hotel, with numerous cottages, and although a little outside the regular route for steamers, is connected by ferry from Thousand Island Park, and here you find a transformation from winter to summer that is wonderful. The immense hotel has an enormous patronage, and with the hundreds of cottages which surround it claims a summer population of 6,000. A mile beyond is Fine View, with good hotel and cottages. Six miles further away Alexandria Bay is reached, a well known and noted fishing resort. It is directly on the river and affords all the accommodations that can be found anywhere. While there yesterday I saw two muscallonge brought in as the result of a few hours' fishing; weight 23 and 18lbs. The two were caught by one man and he an amateur.

I have simply attempted to describe the river from a fisherman's standpoint, and will add that it is hardly necessary to go a mile away from any place mentioned for the best results.

The description of a sail down the St. Lawrence has often been written, but with its constantly changing views, dotted as it is with little islands and handsome residences, it affords a beauty and variety of scenery that needs to be seen to appreciate it.

J.

Fly-Casting Imbroglío.

June 23.—Last week I said that Mr. Elmer Wilkinson won both the fly and bait medals in the second competition of Chicago's fly-casting club. This was hearsay, and was incorrect. Mr. Isgrigg, of Montgomery Ward & Co.'s, won the fly-casting medal at that time. Dissensions in the club seem evident from this morning's city press reports of the third club contest, held yesterday, which read as follows:

"The regular weekly meeting of the Chicago Fly-Casting Club was held yesterday afternoon in Union Park. The features of the event was the excellent bait-casting by Wilkinson, the fly-casting by Johnson, and the inability of the judges to similarly interpret the rules adopted by the club. This misunderstanding led to considerable useless discussion, which tended to delay the events and to arouse temporary antagonism between some of the members present. In the bait-casting there were four contestants, and by the average given in the long distance and accuracy bait-casting the final averages are deduced:

Davidson, 182 4-5ft.; E. Wilkinson, 184ft.; Babcock, 148ft.; Isgrigg, 109ft.

Wilkinson was awarded the two standing medals for long distance and accuracy bait-casting and for the long-distance fly-casting event.

In the accuracy fly-casting event Johnson was easily the winner. The following were the records made by each caster:

Johnson, 33ft.; Isgrigg, 33ft. 5in.; Babcock, 42ft. 9in.; Davidson, 70ft.

The most interesting event of the day was the long-distance fly-casting, with five entries. The contest was between Isgrigg, the holder of the medal, and Wilkinson, the winner. The following distances were given out as official by the judges:

Wilkinson, 64ft.; Johnson, 62ft. 6in.; Isgrigg, 61ft.; Babcock, 60ft.; Clark, 56ft.

The next meeting will be held in Union Park, Thursday, June 29. This meeting promises to be a highly interesting one, owing to the rivalry existing between the contestants, Wilkinson and Isgrigg, for the long-distance fly-casting medal."

E. HUGH,

909 SECURITY BUILDING, Chicago.

Trout at Castalia.

Editor Forest and Stream:

Some little time since you noted the capture at Castalia of a brown trout weighing 4lbs. 2oz., by Mr. John Sweeney, of Detroit. About three weeks since, another fine specimen of the same variety was taken in the same stream, weighing 5lbs. 12oz., and this fish was kept in a live box to adorn the World's Fair aquarium, but an enthusiastic fisherman having undertaken to exhibit the captive to a friend, his majesty took German leave, and the showman and his guest were left lamenting. Now the record is again broken by Andrew Englert, the club's keeper, who on the evening of the 16th inst. took with a 7oz. rod on a Jock-Scott fly, a German trout weighing 7lbs. 6oz. The

fish is now in the hands of a Toledo taxidermist, and will be set up in the finest style of the art for permanent preservation at the club house. The coloring of this particular specimen is simply magnificent, and its display of vermilion and dark carmine is richer and more vivid than on our own *Salmo fontinalis*.

The German trout were introduced into the Castalia Stream seven years ago, and the recent captures show that they have found it a more than congenial habitation.

This club, by the way, has already sent about 100 live specimens of the Rangeley, German and brook trout, ranging from 1/2 to 3lbs. in weight, to the Fisheries Exhibit at the Fair.

TOLEDO, O., June 23.

JAY BEEBE.

Denver Notes.

STATE Fish and Game Warden Callicotte has been investigating the number of fish in the State hatcheries. According to the report of ex-Warden Land there should be at least 800,000 fry in the Denver hatchery, but Mr. Callicotte can only find about 100,000.

It is said that large numbers of fish have been put in private ponds instead of in the public streams, and that 25,000 fry that were taken from the Twin Lakes hatchery to go to the Denver hatchery never reached Denver, but were put in a lake near Buffalo. Warden Callicotte will make a thorough investigation and ascertain in regard to the truth of the above.

The following gentlemen have organized the Denver Fishing Club: Ex-City Attorney Fred Williams, E. E. Quentin, Milward Hewitt, J. L. Jerome, L. B. France, C. Kunsemiller, S. F. Rathvon, F. E. Edbrooke, A. F. Vick Roy, B. E. Shear, I. L. Johnson, W. P. Thompson, D. C. Chesebro, J. S. Temple, D. D. Seerie, P. O'Brian, W. A. Marean, Bradbury Clawson, Manahan and J. Bagley. The club owns five acres of land at Vala, where they will erect a club house, etc. It is a fine game country as well as an excellent fishing point. The membership of the club is limited to one hundred.

TESEEDY.

A Yellowstone Trout.

THE largest trout that has been caught in the State, within our knowledge, was taken from the waters of the upper Yellowstone, in Yankee Jim's Cañon last Thursday. It weighed 8lbs. 9oz., and measured 29in. in length and 17in. in circumference. "Specimen" Schmidt is accredited with having made this remarkable catch, although Conductor Ed. Winston, who exhibited the speckled beauty at the depot Thursday evening, blushing replied in the affirmative when asked by a number of ladies in the depot if he had caught "that lovely fish?" However, it matters not who caught the trout or to whom it belongs. It is sufficient to know that the specimen has been stuffed and mounted for County Commissioner Hoppe, who will take it with him when he goes to the World's Fair next month.—*Livingston (Mont.) Post.*

A Tautog Tandem.

JAMES and Thomas Berry of this city went fishing off Nayatt the other day, and returned with about 120lbs. of tautog, as the result of their day's sport. James pulled in two fish at one time, one on each hook, and on examining them, found that these same two fish had once before bitten two hooks attached to the same line. Each had another hook in its mouth attached to a snell, and the two snells were attached to a small portion of line.

Delaware River Salmon.

WE learn from Fish Commissioner Ford that six Atlantic salmon, taken from the Delaware River during the spring, were sold to a single dealer in Philadelphia market. They ranged in weight from 11 to 23lbs. It is known that salmon were caught at Marcus Hook, Red Bank, Lambertville and Delaware Water Gap. Doubtless many more were captured, but the stringent laws prevent their getting into the records.

In Canadian Wilds.

KITTANNING, Pa., June 19.—I found FOREST AND STREAM in the far Canadian wilds the other day. We were up for the early trout fishing, had a delightful time and landed some of those noble big fellows which figure so largely in the sportsman's imagination. Two-and-a-half and three-pounders on 6oz. fly-rods in reality will remain a cherished memory.

J. H. LAR.

A Plaint from the Post Office.

POST OFFICE, New York, N. Y., Office of the Assistant Postmaster, May 18, 1898.—Forest and Stream Publishing Co.: Gentlemen—The copy of FOREST AND STREAM which you so kind as to send me reaches this office bearing two addresses—one that of a gentleman in Wall street, whose surname also begins with a "G," the other mine. As his name appears first (and for other obvious reasons) he has the prior claim, and the paper is sent to him, leaving me FOREST AND STREAM-less—a most unhappy plight for one who takes so much comfort in perusing it, and whose acquaintance with forest and stream is thus limited to the distant view of the Jersey woods and the Hudson River, which he obtains from his office window. Would you mind re-adjusting your cutting machine? Very truly yours,

J. GAYLER, Asst. P. M.

A Tough Turtle.

In October last Mr. Benson Wambolt, while on the shore of Silver Lake (a tributary to the Rossignol), captured a turtle, and cut its head off with an axe. The body was left lying on a log. Twenty-one days afterward Mr. Wambolt and Mr. N. F. Douglas had occasion to visit the place. The body had fallen into the water. Mr. Wambolt, having heard that a turtle would live for some time after the head had been severed, remarked to Mr. D. that they would see how this fellow was progressing. They then took the body from the water and laid it on the same log, and it immediately began to move itself along with its legs. Four days afterward (the 25th day) Mr. W. again visited the place, and found, to his astonishment, there was life still remaining in the turtle. This is a genuine fish story, and can be attested to.—*Novo Scotia Gold Hunter.*

A Stray Shinplaster

Comes to us once in a while for a copy of "Game Laws in Brief;" but shinplasters nowadays are scarcer than Moose in New York; and 25 cents in postage stamps will do just as well.

"FOREST AND STREAM" FISHING POSTALS

Send us a postal card report of your own luck, your partner's luck, your neighbor's luck, your father-in-law's luck. And—her luck.

BARNEGAT BAY, Waretown, N. J., June 20.—Weakfish have just appeared in Barnegat Bay. I saw one boat yesterday which had caught six that would average 2 1/2 to 3lbs. each. They were taken on the rod at the entrance of Oyster Creek channel. Sheephead are reported as biting well.

NEVERSINK (Fallsburgh), N. Y., June 19.—Fishing good, stream just about right. Wm. Dean and J. M. Freer made a nice catch on Saturday, fish running of nice size. Prospects good.

FRANK FREER.

CLAYTON, N. Y., June 20.—After two and one-half hours' fishing I brought in twenty bass and two pickerel. Coming as I have from Texas, this being my first trip to the St. Lawrence, I thought it worth mentioning.

JACK GORDON.

TAYLOR'S-ON-SCHROON LAKE, N. Y., June 22.—Messrs. Knox and Benjamin caught last week five lake trout in front of the Taylor House weighing 9lbs. The fishing at present is excellent, and prospects for bass very good. This is a particularly good point for deer and partridge shooting in the fall.

J. B. BURNHAM.

LOCH SHELDRAKE (Hurleyville), N. Y., June 20.—There were caught 'on above date at Loch Sheldrake by Mr. Hoberg and Mr. Rockenbach, of the Clyde S. S. Co., twenty very fine pickerel, running from 1lb. up, the largest weighing 6lbs. 14oz.

ED. MISNER.

THOUSAND ISLAND PARK, Clayton, N. Y., June 24.—Mr. Spencer Beard and wife, of Syracuse, caught 15 very fine black bass at Thousand Island Park, from the old bridge, with rod and line in three hours on Friday last. Now is a good time to go a-fishing.

O. P. HADCOCK.

THREE LAKES, Wis., June 13.—Last week Mr. Chas. French caught 489 black bass at Butternut Lake; largest, 6 1/2lbs. Butternut excels the early days of Gogebic for bass fishing. Write to F. R. French for information. Mr. L. G. Wells, Miss Wells, Miss Clark, caught in one day's fishing 43 pike, largest 6lbs.; 7 pickerel, 2 largest 10 and 11lbs.; 4 bass, largest 5lbs.; 2 muskallonge, largest 26lbs.; total 149lbs. Fishing is good.

THREE LAKES.

KENNEBAGO LAKE, Me., June 24.—Trout fishing at Kennebago has been good; large catches have been made. Thursday, June 22, E. A. Belding caught 99; Friday, June 23, E. A. Belding caught 110; Thursday, June 22, E. Belding caught 75; Friday, June 23, E. Belding caught 65; the party is from Springfield, Mass. Messrs. Whitney and Whitcomb from Troy, N. H., caught 300 in four days ending June 24. The catches this spring range from 1/2 to 4lbs.

G. A. ROYAL.

GREENWOOD LAKE (Lakeside), N. J., June 22.—W. F. Ryerson, Newark, N. J.; one day's fishing, 12 bass, one 5lbs., one 3lbs. and balance average 2lbs. All caught casting frog. Herr L. Rosenfeld, of "Liliputian Co.," New York city, caught 15 bass, largest 3lbs.—to-day.

R. L. PATTERSON.

ASBURY PARK, N. J., June 24.—The past week has been one of joy to the anglers hereabout, more striped bass being taken than has been the case for a number of years. Dr. G. B. Herbert, Monday evening, took two weighing 8 1/2 and 23 1/2lbs. respectively, and Tuesday evening one of 16 1/2lbs. All these were caught at Manasquan Inlet. William Brumaker, familiarly known as the Veteran, has landed four ranging in weight from 8 to 20lbs. each on our own beach. Besides at least a dozen have been caught, the particulars of which I could not ascertain. Weakfish and kingfish are abundant, but the pounds take them all. Pickerel and white perch are biting freely in Deal Lake.

LEONARD HULT.

CHESTER (Riverside), N. Y., June 22.—On June 19, E. Bibby caught a brook trout weighing 3lbs., and only 100ft. from the hotel. That is only one of many caught in the same brook.

JOHN B. WELLS.

Moose River.

ATTEAN LAKE SPORTING CAMPS, Moose River, Me., June 23.—Up to date the season has been very backward and we have been troubled with high water, but some very fine trout have been taken and all that I report are regular square-tail speckled trout. Very few sportsmen have been up this way this season so far, so it will be all the better for those who come later. The trout are now rising finely to the fly and plenty of them, and the prospect is good for fall sport, as deer are very plenty, and there are also a good many signs of moose and caribou.

The following is a list of a few who have taken trout on Attean Reserve and their weights:

G. K. Putnam, Vermont, 22 trout; largest weighed 2 1/2lbs. 12 trout weighed 20lbs.

C. C. Bancroft, Vermont, 18 trout; largest one 5lbs.

Ed Cook, Massachusetts, 5 trout, 15lbs.

D. C. Perce, several trout; largest, 5lbs.

Dr. N. B. Russell and J. S. Crose, Massachusetts, good success, average 2lbs.

Ruel Holden, Maine, 5 trout, average over 1lb. each.

John Smith, Maine, 11 trout; largest 2lbs. 5oz.

D. Hancock, Maine, 15 trout; largest 3lbs. 6oz.

Dr. Murphy, Maine, several; largest 2lbs. 6oz.

The water has fallen rapidly the past few days and there is sure sport for any one who comes into this region from this time on.

ITHAMAR HOWE.

The archer-fish, of which but two species are known, is said to have the remarkable power of spurring water so as to bring down insects. Another fish, called the chetodon, continues this habit even in captivity, and is much prized as a household pet by the Japanese, who amuse themselves by holding a fly toward it on a slender rod and seeing the finny archer shoot a drop of water at it with such accuracy as to bring it down.

FISHY.

The Best Line to Denver

From either Chicago or St. Louis is the Burlington route. Only one night on the road. Daily vestibuled trains, with Pullman sleepers, reclining chair cars (seats free) and Burlington route dining cars.—*Adv*

The Kennel.

FIXTURES.

DOG SHOWS.

Aug. 30 to Sept. 2.—Blue Grass Kennel Club, at Lexington, Ky. Mr. Roger Williams, Sec'y.
Sept. 19 to 22.—World's Fair, Chicago. W. I. Buchanan, Chief Dept. of Agriculture.
Sept. 11 to 15.—Toronto, Canada. C. A. Stone, Sec'y.

FIELD TRIALS.

Sept. 4.—Northwestern Field Trial Club's second annual trials, Manitoba. Thos. Johnson, Sec'y, Winnipeg.
Sept. 12.—Manitoba Field Trials Club's Trials, Souris, Manitoba. E. D. Adams, Sec'y, Winnipeg.
Nov. 6.—United States Field Trials Club's Fall Trials, Bicknell, Ind. P. T. Madison, Sec'y, Indianapolis.
Nov. 7.—International Field Trial Club's Fourth Trials, Chatham, Ont. W. B. Wells, Sec'y, Chatham.

Feb. 19.—United States Field Trials Club's Spring Trials, Grand Junction, Tenn. P. T. Madison, Sec'y, Indianapolis, Ind.

TWENTY YEARS IN DOGDOM.

The Bench.

TWENTY years of kennel history. Measured by the history of nations and men, two decades seem a short flight of time, still it would be impossible, in the limited space at our command, to do full justice to the wonderful growth of kennel interests in America during that period. The crude efforts of a few sportsmen at Chicago in 1874, started the competitive feeling which has resulted in and rendered possible such a grand exhibition as that which took place in New York last February.

One cannot resist the temptation to ponder and think over the vast amount of time, energy and money which have been expended to make such a gathering possible. There are men living to-day, old sportsmen, who well remember the first dog shows held in 1874, and could they Rip-Van-Winkle-like close their eyes upon the intervening lapse of time and open them in a New York show of 1894, they would doubtless appreciate the feelings of Washington Irving's creation, when he entered that village in the Catskills. Enough of simile—the age is too practical to indulge in much sentiment.

To the field sportsmen of America we are indebted for the impetus that set the dog show ball a-rolling. The desire to improve the native field dogs led to numerous importations of highly bred setters and pointers in 1873-74, and to the accomplishment of this end the FOREST AND STREAM, even in its infancy, lent no little aid. It brought English and American sportsmen together through the medium of its columns; it negotiated the purchase of several animals which became famous in our stud books as the nucleus from which have sprung many of the finest strains of sporting dogs in the field to-day; it nursed and encouraged the growing interest in "pedigree" dogs by donating valuable cups and trophies at the early shows and field trials, and while it has seen the rise and fall of many kennels, it has ever kept the one end in view—the advancement of the dog in public estimation.

In a resumé of this nature the musty record must enter largely, and while columns could be written of the interesting events which have transpired in the kennel world during twenty years, we must at present confine ourselves to a narrative of the leading ones.

To Mr. C. S. Wescott ("Homo"), of Philadelphia, belongs the credit of first suggesting, in a letter to the FOREST AND STREAM of April 9, 1874, that bench shows and field trials should be held to improve the dogs of that day. We are glad to know that this gentleman lived to exhibit at shows larger than even his wildest imagination could have desired at that early date.

The first show of which we find a record in FOREST AND STREAM is that held by the Illinois State Sportsmen's Association, June 4, 1874, at Chicago. There were twenty-one entries, but no regular classes. Native setters, Laveracks, Gordon and Irish setters, both individual and crossed, and pointers competed together. It seems to have been a sort of mixed competition, where field training had almost as much to do with the awards as beauty of formation. Mr. J. H. Whitman was awarded the premium with Frank and Joe, three years old, black and steel mixed setters, bred by Hilliard from imported Gordon setters. The judges were Messrs. L. B. Croker, of Mendota, Ill.; John Davidson, Monroe, Mich., and H. N. Skerman, Beloit, Wis. These gentlemen in closing their report said they considered this "a very important branch of any meeting of this nature, and hope the Association at its future meetings will offer prizes and give every possible encouragement to such an exhibition. The Great West was the first to give it prominence, and in this respect commensurate to its prominence in all other amusements of the field sportsman." Who can say but that this prominence has been ably sustained?

Three weeks later a small show was attempted at Oswego, in connection with the sixteenth annual New York State Sportsmen's Association meeting, but as there were only three entries the prizes were withheld and entry fees returned. In only one instance, the proposed show in Pittsburgh, Pa., in 1887, has a bench show committee found itself in this unpleasant plight. The show held at Mineola, L. I., in October, 1874, is generally conceded to be the first regular bench show where regular classes and prizes were provided. The first prizes were cups, and diplomas were given to the second prize winners. The judges were Messrs. E. S. Carman, A. Gubner and Chas. H. Raymond, who imported through FOREST AND STREAM the noted Laverack setters Pride of the Border and Fairy. The only exhibitors known to the kennel world of the present day whose dogs were awarded prizes are A. C. Waddell, who won second with Kate in Gordon

setter bitches, first with Colburn's Dash for setters (any breed), first in pointer dogs with the afterward well known Phil, and second in bitches with his Belle; Edmund Orgill, who took second in setters (any breed) with Nelly.

Several shows were held during this year in connection with sportsmen's association meetings, but were confined naturally to sporting dogs, and field merit and training entered largely into the competitions. A more pretentious show was then held at Springfield, Mass., April 28-29, 1875, and is noted as the first dog show held in New England. The entries numbered 167, and the classification seems crude indeed to that of the W. K. C. show eighteen years later. The judges for pointers and setters were Horace Smith, at that time kennel editor of FOREST AND STREAM; Lieut. Harry Metcalf, U. S. Army, and F. W. Lawrence, Brookline, Mass. The other classes were judged by Ethan Allin, T. Eaton and O. B. Deane. The classes were for Laverack setters, Gordon setters, English and native setters, red Irish setters, English pointers, Spanish pointers, native pointers, foxhounds and beagles, spaniels and retrievers, terriers, Newfoundlanders, St. Bernards and collies, mastiffs, bulldogs and bull-terriers.

The show was considered at that time a great success and thenceforth small shows cropped up in every direction, and while the prizes advanced in value the entries correspondingly increased. As an example of the great interest displayed by FOREST AND STREAM in the budding fancy, we note that on Feb. 24, the same year, 1875, this journal held a small show in its office and donated a silver cup for the best brace of setter pups under nine months of age. A number of sportsmen turned up with their dogs, though scant notice was given of the contest, and a gentleman whose name is well known to latter day sportsmen and show goers, carried off the "mug." This was Mr. Jacob Pentz, then of Newark, N. J., with his brace of pups by Rodman's Dash out of Flora. Among those who attended were Col. Skinner, Edmund Orgill, the late Nicholas Saltus, owner then of fine kennels in Brooklyn; Baron Gubner of Utrecht, owner of the famous Irish setters Lissa and Mike; Dr. Alex. R. Strachan, whose kennels were based on the importation of setters and pointers made some years before by Sir Frederick Bruce; Theo. Morford, owner of some famous orange and white setters; Frederick Underhill, of Newark, N. J., then noted as the owner of a rare kennel of English beagles; N. Rowe, who had been importing some prominent setters and pointers, and Count Shorb, owner of the famous red setter Jack.

In 1876 the Centennial dog show was held at Philadelphia, but little knowledge of the show can be gained from reports at that date, as everything seems to have been arranged and carried out with that blissful disregard for bench show proprieties that appears to obtain at Chicago even at this advanced period. Meanwhile shows had been held at St. Louis, Baltimore and other cities, and a number of dogs had qualified for the champion classes by winning the prizes in the open. This brings us to the formation of the Westminster Kennel Club, and the holding of its first show in 1877, which served, if nothing else, to show that America had by this time become possessed of a goodly number of canines which could not only sport a pedigree, but were thought by their owners to be deserving of public recognition. FOREST AND STREAM was here again a power behind the throne, for we find one of its editors, the late Wm. H. Tileston, on the bench show committee.

The show was held May 8 to 10, in the old Madison Square Garden, then known as Gilmore's Garden. The late Charles Lincoln was superintendent. The dogs benched numbered 874. The catalogue first called for Division I., Sporting dogs, and in this were included only the champion classes for each breed, English, Irish and Gordon setters, and pointers (any weight). In the open classes, imported and native setters were classed separately, and we find that no less than 64 native setter dogs alone were entered. Native Irish setter dogs also polled a goodly entry of 50, and Gordons were well backed by 23 in the dog class and 19 in the bitch class for imported or natives, while the native had also two other well filled classes. Pointer entries numbered 102, and cocker and field spaniels had 30 entries. Another surprising entry was that of mastiffs, no less than 25 being in the one class. St. Bernards had not yet gained their subsequent eminence and popularity, as only 16 names appear. Pugs were quite numerous, there being 26. There were 22 Skye terriers, and their colors ranged from steel blue, blue gray, sky blue, silver gray, iron gray and blue and tan to yellow. Some very valuable special prizes were offered, and here again we find that FOREST AND STREAM was a liberal helper, donating a silver cup, value \$100, made by Tiffany & Co., for the best red Irish setter stud dog, native or imported, to be shown with not less than two of his get.

It is a pleasure to reflect that the judges at this show are all living to-day and are taking, with one exception, an active part in dog shows. They were Messrs. John Davidson, Dr. L. H. Twaddell, Rev. J. Cumming MacDona (England), a minister then, but a lawyer and M.P. now; T. Frank, P. Kavanagh, and Capt. (now Major) J. M. Taylor.

To Mr. J. H. Whitman, of Chicago, belongs the honor of winning the first prize at an American dog show. Among the earliest present day exhibitors are Dr. William Jarvis, L. H. Smith, of Canada; Fred Gebhard, August Belmont, who showed a black and tan setter, among other sporting dogs, and also some fox-terriers at the New York show of 1877; James Mortimer, who exhibited the bulldog Crib at the same show; S. Fleet Speir, M.D., Max Wenzel, C. Dubois Wagstaff, E. S. Sanford, Jr., E. Dexter, W. J. Farrar, O. W. Donner, E. Orgill, W. A. Coster, who showed an Irish water spaniel and a cocker; A. Belmont Purdy, F. O. DeLuz, now treasurer of the W. K. C.; Dr. L. H. Twaddell, who showed some celebrated dachshunds; R. L. Belknap, late owner of Winlawn Kennels of mastiffs; H. Mead, J. P. Haines, Jenkins Van Schaick, the collie owner; F. Bronson, John Matthews, who even at that early date showed a bulldog, Duke; George Raper, D. P. Foster, A. Kisteman, who showed pugs; W. Sanderson, who showed Donald, a noted Skye terrier; all these names appear in the

1877 catalogue of the W. K. C. show. Later shows before the early '80s brought George Langran, H. W. Huntington, A. C. Wilmerding, James Watson, J. Otis Fellows, F. Senn, Sidney Dillon Ripley, T. M. Aldrich, R. P. Keasbey, Dr. Cattanach, C. E. McMurdo, George D. McDougall, F. R. Hitchcock, L. & W. Rutherford, W. J. Comstock, Richard Gibson, F. B. Fay, R. C. Cornell, A. H. Moore and others whose names do not just at present occur to us, to the front and who are still in the ring. Breeders come and breeders go, but it is likely that those mentioned will own dogs as long as they live. The successes and disappointments of succeeding shows all over the country are familiar to most of our readers, so it is not necessary to enter further into this part of kennel history.

While dog shows have done so much toward improving our friend, the dog, these gatherings could not have become the important events they now are, had not the kennel press lent every aid in their power to help along the good cause. FOREST AND STREAM can review the past years with every feeling of self-satisfaction. It has ever fostered the growing interests and its pages have always been open to those who wished to discuss the merits of their dogs. FOREST AND STREAM has never truckled to any power or association; when criticism was needed it was sharply given, and this will be the policy of the future—independent—not seeking to quarrel for the sake of notoriety or finding fault, but by every means in its power upholding the grand canine fabric that its many readers, the dogmen of to-day, have erected.

H. W. LACY.

The Field.

THE young sportsman of the present day accepts the established order of things as a matter of course. But what has been universally accepted as right for a few years may easily imply existence from time immemorial. It is not many years since improvement began.

The perfection of the practical sportsmanship of to-day had its origin in very crude beginnings about twenty years ago. In this country—and it is of this country of which I write—so great is the difference between ideas, implements and methods of to-day and those of twenty years ago that they mark widely different eras of development.

A history of the evolution of field trials, theories of breeding, improvement and growth of sportsmanship, etc., would fill a large volume. This sketch is intended merely to point out a few landmarks of the history, it is not a history in itself.

Twenty years ago very few men considered the pedigree of a setter or pointer as being of much importance. The practical work of the dog afield was the chief test. The question whether the progeny of such dogs would be like or unlike the sire or dam was given very little thought. Then there were very few sportsmen comparatively, therefore there was very little market for dogs, and low prices prevailed. The highest prices then would be considered as too small for consideration at present.

Such few pedigrees as there were twenty years ago were mostly a record of crosses of all kinds of setters—Irish, Gordon, native and English. There were most excellent dogs, however, twenty years ago. They were strong, enduring and intelligent. Their constitutions were sound. Twenty years ago there were many who valued highly the dropper, as the progeny of a setter and pointer is called. The dropper was supposed to combine in a high degree the excellence of both parents. A man would be ashamed to own a dropper now.

There were a few kennels, however, which exerted care in dog breeding, but as compared to the present they were extremely few and the pedigrees are to-day unsatisfactory.

Twenty years ago, primitive ideas and primitive methods obtained everywhere. The muzzleloader was the favorite field gun. A rude powder horn or glass bottle was considered a good receptacle for gunpowder, and the shot was carried in anything that would hold it. The hunter poured out powder in the hollow of his hand till he thought he had enough for a load. Thus a gun was seldom loaded twice alike. The percussion cap was then considered about the limit of improvement over the flint lock. Old newspapers were prized as good wadding, but a yellow jacket's nest was considered better, particularly by the brother sportsmen who did not live in the city. The shooter who owned a wad cutter and cut his wads out of refuse cardboard was credited as having reached about the limit of loading refinements.

Twenty years ago, many good men and true believed that a dog's tongue needed "worming," that a dog suffering from distemper could to a certainty be cured by rubbing tar on his nose; that shooting a dog with bird shot, when at work afield was good pedagogy; that a rifle bullet went perfectly straight; that a diet of meat would permanently ruin a dog's nose, etc. These are but a few of the things which were our pride and our knowledge twenty years ago. We do not believe them now.

With the advent of the sportsmen's journal of the rod and gun, general improvement began and good lessons were taught. Field trials were inaugurated, which stimulated competition, advertised the sport to the world, and served as great object lessons to the beginner or unskillful sportsman. Endless discussions began on the relative merits of certain breeds or strains of dogs, and on the merits of guns. By continually sifting out the chaff from the wheat, much accurate knowledge was established.

The first field trial was held in 1874 at Memphis, Tenn., beginning Oct. 8. It had twelve entries, nine of which started. There was but one stake, a Free-For-All. First prize, a silver service. That was the beginning, humble indeed as compared with the great field trial events of to-day, many of which last a full week. Indeed, under the heat system which prevailed three or four years ago, some trials lasted two or three weeks nearly.

Mr. H. Clark Prichitt has the honor of winning, with his dog Knight, the first field trial event, which was held by the Tennessee State Sportsmen's Association.

Since that time field trials have grown steadily in impor

ance and number. Many of them are fixed annual events, held by clubs who have game preserves, and every facility and knowledge of how to run trials. These clubs can count in their membership many of the wealthiest and best gentleman sportsmen in the land.

In 1875, at the second trials of the Tennessee State Sportsmen's Association, the blue blood, so-called, appeared in the competition. Thereafter for many years there was one of the greatest controversies on the merits of the imported and native dogs. However, it ended in the native dog being decreased in public value, and at last they appeared no more in public competitions. It cannot be denied that there were many good dogs among them. A few owners, who admired the native dogs in the olden time, still retain them, but the number of such is very few. The blue blood, so-called, is the dog of the present.

The Llewellyn setter, soon after the trials were established, became the fashionable dog and drove the native out of public estimation, particularly in connection with field trials.

The great variety of setter colors were weeded out till black and white, or black, white and tan became the common color. Orange and white or lemon and white seems to be next in popular esteem. This in respect to English setters. The Laveracks had a few admirers, but as they were unable to make much of a showing with the pure Llewellyns at field trials, the interest in them gradually died out.

The Irish setter has many admirers to-day, and had, too, many years ago a powerful support. They are beautiful dogs and have real merit afield which has never yet been properly brought out by good earnest support at field trials by Irish setter breeders.

That the field trials of this country have done great good in improving setters and pointers, no person will deny. They served as excellent educators. In fact, they educated people too fast and in too great numbers. The lessons of moderation and care in preserving the game supply were not learned coincidentally with the knowledge of how to kill. Still, there is the monitor ever vigilant and ever helpful, the press. The pages of *FOREST AND STREAM* contain the teachings needed in the present and the future. Therein are found true lessons in sportsmanship. Its pages show that it has kept pace with the vast growth of sportsmanship pertaining to land and water, forest and stream.

The humble little trials at Memphis were the beginning of a great movement for better sportsmanship and its universal growth. Last year there were field trials held in California, Canada, Indiana, Kentucky, Ohio, Mississippi, Texas, Massachusetts and North Carolina. These do not indicate the number of field trials held, for there were three held in North Carolina, three in Canada. In the past twenty years field trials have been held in, besides the places already enumerated, Nebraska, Minnesota, Missouri, Iowa, Tennessee, Alabama, Pennsylvania, Virginia, Robins Island, Fisher's Island, Louisiana and Illinois.

This growth would never have been possible without a special journal. The special literature on the dog is really an outgrowth of lessons first taught by the journal of the sportsman. Twenty years ago it was impossible to get information at any price on matters which are now common knowledge or easily available to all.

There was great pleasure in those days in following a dog in whose veins flowed the blood of fifty varieties. The muzzle-loader, too, was a medium of pleasure. I have followed as scurry a working dog twenty years ago, and shot with as poor a muzzle-loader as could be imagined, yet I then thought it great sport. It was great to me, for it was the best we had. To-day an educated sportsman would think that sport, under such conditions, was too frivolous and poor to engage in. The good old times are good mostly in our imagination. The good times of the present are better than the good old times of our imagination. The good old times are strictly personal. The new times of to-day will be the good old times of by and by.

In the history of field trials the pointer has held an important part. The relative merits of setters and pointers have engaged many champions in controversy and argument. Each class comes to the competition each year prepared for the struggle, though setters greatly outnumber the pointers.

The first scale of points for field trials is interesting at this day, nearly nineteen years later. It was as follows: Nose, 30; pace and style, 20; backing, 10; breaking, 15; retrieving, 5; style and staunchness in pointing, 15; roading, 5. Total, 100.

In 1876, this having proved unsatisfactory, the system called the five point system was adopted. Each competitor had five opportunities to point. A failure to point was a lost opportunity. Each point was valued at 5. Other qualities had values in the scale. In 1879 the heat system was adopted, and this system was the prevailing one everywhere till it was superseded by the spotting system, which is the prevailing one at present. Thus many different links connect the present time with twenty years ago.

A Dog's Sagacity.

Editor *Forest and Stream*:

An article I read a week or so ago in *FOREST AND STREAM* about a dog's sagacity, reminded me of an incident related by an old surgeon of Burlington, Vermont, and which others can vouch for. It will interest any true lover of dogs. Returning home one afternoon this old surgeon saw by the road a dog suffering from a fractured fore-leg. He lifted him into his buggy, took him home, set the bone, and fed him. He nursed him for some six months, and the recovery was complete. The dog realizing that his "visit" was over, complacently trotted away one morning and nothing more was seen of him for nearly two years. Then one morning the doctor heard a scratching on the side door leading to his office. He opened it, and beheld his old friend wagging his tail with a cur by his side, who presented a fore-leg broken in almost the same way that the dog's had been. This surgeon was none other than the eminent Dr. Hayes, who died some eight years ago. Dogs always appealed to and delighted him.

J. D. B.

BAY RIDGE, JUNE 15.

POINTS AND FLUSHES.

[By a Staff Correspondent.]

The American Kennel Club.

I FEEL constrained to write a few words about the American Kennel Club, now that it has awakened from its coma. At the outset I desire to say that I am not inimical to the A. K. C. Such a club is necessary. I believe there should be a governing body in the dog world. But I feel perfectly free to offer legitimate criticism on shortcomings, errors or abuses. If I am in error, the same monitor which governs the A. K. C. and other public bodies, that is, public opinion and measures, will correct me. I believe it is truer friendliness to point out failings with a view to improvement than to be a sycophant or a friend for revenue. Support given for the crumbs which fall under the table is not the best kind of support. Advice given with these same crumbs in mind is not the best kind of advice.

Many men who are members of the A. K. C. are the best in the land. Some of them, I believe, are my friends. I concede their ability, their integrity and their fitness. But as a club I believe they have been following wrong lines of policy. I do not believe they have appreciated the situation of the interests of the dog world or the sentiment of the fanciers. Furthermore, I do not think it was possible for them to do so under the past policy. How could they know the real situation? The representation by delegates as practiced hitherto cut the officers off from a knowledge of the desires of their constituents outside of their own immediate circle. I have been at A. K. C. meetings enough to know that a very few men did all the talking and were the leaders. Clubs in the far West or South were represented by delegates who sat mute in their chairs throughout the meeting. Graven images would have been quite as representative. Theoretically, these delegates represented their clubs. It went on record that they so did. Practically, their clubs were not represented at all. Representation was simply in such cases a parliamentary fiction. Now, I do not blame the few men for doing all the talking—under the existing conditions some one had to talk and act. However, there is no doubt that a man who accepts the office of delegate is doing a wrong when he does not know what his club wants, or, knowing it, does not act. How can a man who has lived all his life in New York, know what measures, purposes, sentiments, or ideas are best for a club in Mexico? What particular interest can he have in its success? If this man represented one club last meeting, another one next meeting, etc., and if several men similarly represent several other distant clubs, it is easy to see that the clubs themselves can develop and have wants and aspirations far ahead of the official knowledge of the so called delegates or the A. K. C. To be properly represented the club must have a delegate from its own midst, and who is a member of its own body at the A. K. C. meetings, at least once a year. Representation by delegate as practiced in the past has been a mere makeshift, save in a few rare instances. The real legislative force has been practically in the hands of the same individuals for months. It was not their desire, perhaps, the faulty system forced it on them. No makeshift delegate can understand the needs or environment of a club whose personnel he does not know or whose section of country he has never been in. He has not the membership pride in its success or regret at its failures that a member of the club would have. He has nothing to gain or lose. He is indifferent, and his action at the meeting shows it. If instructed as to a certain question he simply casts a vote. He can't discuss measures of his club because he doesn't know. There are a thousand details he does not know as a delegate. He cannot know them. He does not return to his club to inform them of the interesting details which interest the fancier. His club gathers its knowledge from a dry report. It is no wonder that clubs get indifferent and out of touch with each other.

I do not think any man should attempt to represent a club if he has no personal knowledge of its members, needs and policy. It will be said that a club then might not be represented at all. I believe that it is better not to be represented than to make a hollow, fictitious pretense of representation.

Dr. Perry's Policy.

I desire to express my admiration for the soundness of Dr. J. Frank Perry's measures in the recent meeting of the A. K. C. They showed a keen and true perception of the situation. There was no little courage displayed in presenting truths which were apparently not popular. Any one who thought it wasn't going to be much of a storm did not know the situation. I firmly believe that Dr. Perry has averted the most serious disaster which ever threatened the A. K. C. Moreover, Dr. Perry knew the true situation. If the A. K. C. thought that there would be an organization which would waste its energies trying to fight it, it was much mistaken. It would have organized with the intention of ignoring the A. K. C. If the movement had no history, it might have made one. That the movement was the result of one man's efforts is too trifling to consider.

In a private letter to me Dr. Perry suggests that all those discontented have patience till next September, "when they should pick their best men, state their grievances, and help the more liberal delegates from the East to set matters right. They should, for the time being, withdraw their credentials from Eastern men and give them to the members of their club. Let their new delegates be the best men among them. Let them meet us fairly and all will be made right. We have no honors or privileges which we are not ready to share with them under their own flag tree, and they can tell us wherein we are wrong; and they may feel certain that no fault which can be corrected will exist once we appreciate it."

There is a broadness and kindness about those few lines which give them more force than all the "Whereases" and "Be-it-resolveds" which could be uttered. There is no East or West in such talk. It is free from all provincial lines. It is fairness itself. And withal there is a feeling of good fellowship and sincerity in it which puts it beyond question that it will all come true. It is right and just. No man East, West, North or South can object to it.

There is no question but what Dr. Perry's measures have put in abeyance all action toward forming a new organization, and possibly the legislation of the A. K. C. in the future may cause such intentions to be entirely abandoned. I think the A. K. C. and the dog world were both fortunate in having Dr. Perry's counsel at the present juncture.

Mr. Belmont's speech at the A. K. C. meeting impressed me forcibly that he was not in touch with public sentiment. By public sentiment I do not mean a meeting of two or three soreheads or grumblers; there is a difference between chronic grumbling and a fixed public sentiment and determination. A number of events which have come to the surface this year shows it. Behind all these was a strong sentiment of support. I realize fully that Mr. Belmont has done a great work for the A. K. C., that he tided it over dangerous financial places in its weaker days, and that he has done a great deal to strengthen it in every way. But the canine interests have grown, the territory has grown, clubs have grown. What were good lines and legislation in 1890 were as compared to 1898 inefficient, or narrow, or irrelevant.

Mr. Belmont, in his recent A. K. C. speech, said: "In the case of the National Dog Club, we thought then, and maintained then, that it would result in a concentration such as I have described, and would be an unfortunate thing. Now, there is a remedy. For instance, there is the remedy with regard to the constitution. There is the remedy against any ruling of the advisory committee. There is a remedy against the executive government of the club. There is a remedy for everybody, and the fact that they do not avail themselves

of it is not the fault of the American Kennel Club. It is the fault of individuals themselves that they do not watch and do not know how to reach the American Kennel Club," etc. Those things may be there, but how long does it take to get action? On some simple matters coming before it, how many months has it sometimes taken to settle them? It is too slow.

Again: The *American Kennel Gazette*, although not a readable paper, is a record, and when anybody wants to look back for ten or fifteen years, that paper will be more serviceable than all the sporting papers put together. Its dry bones are what make it useful.

I always had a feeling that the *Gazette* was awfully dry. How it can be more useful than all the sportsmen's papers put together is a conundrum. They contain all the records of value and a great deal of useful matter besides, which is not found in the *Gazette*. I have often thought that the *Gazette* could be made of real use in the present and future, and interesting too. One would not have to wait then fifteen years for it to get value. If the delegates of the different clubs throughout the country could have space in it to present and discuss their views on their clubs' needs, their ideas on any general legislative measures, the beneficial or injurious effects of any rule or law, the local situation in canine interests which would make some special legislation necessary, etc., there would be a better understanding among clubs; a better and more accurate knowledge of details and of the situation of delegates; a better educated lot of men to attend meetings as delegates, and a better general understanding and good fellowship. It thereto the secretary or other club officer who had time would each month write an editorial covering fully pertinent current events, presenting legislative topics for discussion, suggesting improvements, expose errors of legislation, advise those who wish to begin, etc., the *Gazette* would have subscribers who would read it for its usefulness. It is possible that the secretary might not have time to do all that; but look at the departments of any great weekly; see the amount of original writing and editing which has to be done by one man, most of which is done on a salary of \$15 to \$30 per week, and see how money is there earned. I know it is said that the A. K. C. office is a hard worked office. I believe there is a deal of work to do there, and probably the secretary can do no more than he does do. I infer so from the statement in the report that if there was an A. K. C. meeting in Chicago, he could not attend there. We newspaper men working for a salary go wherever our business calls us—to New York, New Orleans, San Francisco, and we would go to Australia if necessary. When we are paid to do a thing we do it. If Mr. Belmont were to direct one of his employees to do a certain important work in line with his business and said employee should calmly but firmly tell him that he couldn't do it, what would happen? Vacations would be in order.

There is one matter I wish to object to. That is the statement that the West is sectional. The West asks for nothing which is not conceded to the East. It, so far as I know, asks for no special favors. I do not think that there is any sectional issue. I have not heard of any measure advanced because it was Western or Southern. The dog men of the country cannot split on sectional lines. They have enough other matters to interest them.

I had the pleasure of a pleasant visit at the Grange, the home of Mr. E. Bardoe Elliott, at Maywood, Ill., on the Chicago and Northwestern Railway, about forty minutes' ride from Chicago. I will confine my remarks to the roomy and comfortable kennel grounds and buildings which Mr. Elliott has in charge. A fence, made of strong wire netting securely fastened to posts and rails, incloses about three acres. In one corner, nearest the house, are the kennels. A building is subdivided into compartments, each of which has an adjoining yard, inclosed by the same kind of wire netting aforementioned. In each yard was a low table made with interstices between the slats of which the top was made. The dogs were all contented and looking well. Neatness was a conspicuous feature of the kennel kitchen. There was no offensive smell in any part of the kennel.

The affairs of the Canicna Co. are in the hands of a receiver, owing to the dissatisfaction of a member of the company and not to financial embarrassment. Its business will not be discontinued.

I met a few days since Mr. George Waddington, of Geneva, Iowa, whose name was prominent in field trial matters ten years ago. The years make little impression on his powerful physique. He told me that hereafter he will again pay attention to dog training and will make a specialty of furnishing trained dogs to hunting parties who have none of their own.

In reading different papers, I notice periodical mention of the ferocity of the psuvi at Denver. Therewith is added the embellishment that Mr. Davidson judged them in their stalls, they being too fierce to be judged in the ring. It is remarkable that such a silly canard has such marvelous vitality. The psuvi were not fierce at Denver, and had they been so, Mr. Davidson would have judged them in the ring just the same.

In a private letter, Mr. P. T. Madison, secretary of the United States Field Trials Club, informs me that the prospects of the club's Bicknell Derby are quite favorable, and there will probably be a success of it. There are many important kennels which are yet to be heard from, and which undoubtedly will make large entries.

Those interested in beagle matters should bear in mind that there will be a meeting of beagle fanciers at the Wisconsin State Building, at the World's Fair grounds, 12 M., June 14.

There appeared in a Western contemporary, in its issue of June 17, a vilely malicious and libelous article. It was mostly a string of assertions, detached from anything material, yet broadly asserting rascality. Not a single proof of any statement therein was offered, nor was there any claim that such proof existed. It seemed entirely the reckless outpourings of spite, irresponsibility and resentment. It is said that the matter, since the publication of the libel, took a serious turn, and the editor will treat himself this week to a solitary repast of the epicurean dish called crow. It is vulgarly called "eating crow." I do not believe a single word of the insinuations in said libel. I have known the libeled party many years, and never knew him other than upright and honest. Such libelous publications are disgraceful and harmful.

The columns of *FOREST AND STREAM* are in sharp contrast to the bickerings, quarrels, semi and whole libels, criminalations and endless mud slinging which seem to comprise the said contemporary's estimate of the literature needed by the gentlemen sportsmen of the country, and published in its columns.

The great growth and influence of *FOREST AND STREAM*, constantly growing wider and firmer, prove that a clean journal, fearless and just, is appreciated. It discusses intelligently live questions of the day, it is not the organ of any faction, and it is not astride any fence on any issue.

909 SECURITY BUILDING, Chicago.

B. WATERS.

Mr. E. Gerry Roberts is getting down to business in good order. His noted beagle bitch Prudence whelped June 21, four pups by Ch. Royal Krueger, and the cross should prove of good result.

The Type of Great Danes.

BY A. H. HEPPNER.

YOUR request to bring forward a full description of the characteristics and points of the great Dane at hand.

I do not believe that a simple and plain description, *i. e.*, a copying of the points as laid down in various countries, will answer your purpose. We American fanciers of great Danes should be able to determine a standard of our own, either by blending the other standards after thoroughly reviewing their respective merits, or adopting the best of the foreign standards, which I consider is the German. First, however, permit me to review the situation in America to-day with as little prejudice as one deeply interested in the breed can have. There seem to be two factions, and outside of these two factions a body of men who know nothing about the breed and who will howl in favor of either of the above factions just as their personal interest may dictate. It is a peculiar and deplorable fact that most of our great Danes are in the hands of Germans. I, as a German, wish to declare here, that that is one of the greatest handicaps to the breed. Even the most gentlemanly Teuton, with the best of abilities otherwise, seems to be unable to dismiss all jealousy, personal antagonism and selfishness from a discussion of this kind. I think this explains the fact that judges are run down by the owners of dogs on the sole fact and claim that their dog only received a vhc. instead of a first prize. As evidence of the judge's error, such writers submit but one fact—the ownership of the dog. If you, Mr. Editor, will sift everything that has appeared in sporting papers you will find that all the discussions during the last three years have been nothing more nor less than advertisements for kennels of great Danes, the owners of which have demonstrated their knack to advertise without paying regular advertising rates. It seems, in order to become a great Dane judge and critic in this country, all you have got to do is to buy a dog called a great Dane, show him, fail to get a prize with him and then hire a secretary and write columns about the slaughter the judge has committed on a great dog. Such men will write mostly about things that are least known, for instance, where and when the breed originated, what its proper name should be, and how the judging should be conducted.

This is one side—now comes the other. A specialty judge of this breed, in order to become famous, makes a supreme effort to demonstrate by his judgment that he has borrowed no ideas from anybody else, and judges to his heart's content by a standard peculiarly his own. Such judges are making it a point not to write anything explanatory on their decisions. When interviewed they put themselves on the high horse instead of coming out and giving their reasons or their opinions. Anybody can decide satisfactorily to himself that one dog is better than the other and give him a first and second respectively. But to tell us the reason why, so that we may derive the benefit from the well posted gentleman's labor, and be enabled to gain a knowledge of the respective value or faults, seems to me to be the most essential work of a judge in a class where type, general appearance and purpose are so universally misrepresented and misunderstood as in great Danes.

Any man can keep on buying and selling great Danes until he strikes one that comes nearest to the idea of our leading all-around judges. In this way it would be an easy task, even in our chaotic situation, to become the proud possessor of a champion *par excellence*, but my idea of the main purpose of dog shows is this: We, breeders, should be educated up to breed correctly and systematically; we should get an opportunity to mate our dogs judiciously and learn by virtue of the critical description of the dogs in a show what specimens should be bred for the best result, in the judge's opinion, so that we may breed to suit his ideas.

Before we go into the history of great Danes, let me say that our doggy journals, as a general rule, do not scrutinize carefully enough the letters submitted to them for publication, and thus to-day we can read in a journal over the signature of a great Dane man, that a great Dane should be black, with wall-eyes, and to-morrow that he should be white, with a red nose. If our editors were good all-around judges themselves, the present *statu quo* in great Danes would be impossible. The man who happens to have a big dog of no merit calls for a certain judge, and the possessor of a snipy, weedy specimen, which is really lacking type because it lacks size, wants another certain judge. Now, there is no question at all about the fact that we have more coarse, big, half-breed great Danes in this country to-day than typical specimens of the right kind, and naturally when we allow exhibitors to choose judges by vote, or when our show committees allow a single individual who is known to exhibit a string to name a judge whose ideas on great Danes tolerate such inferior strains, a strict judge, who knows the breed, will not be selected, and if he be, will be downed by the great majority of kickers.

The whole controversy regarding the extremist who is reported to have been selected to judge at the World's Fair is simply the movement set afoot by parties possessing dogs which have been "undervalued," as these parties put it, by him during his debut as a judge in New York or Baltimore. Suppose now that the other faction had been slighted by a judge in sympathy with the opposite side, would we not have the same result only differing in the person of the judge? Yet I hardly think so because no sensible exhibitor is so sure of being justified in condemning a judge because the latter happened to have a different idea as to the make up of a great Dane. The object of these writings is now to compare the respective merits of these extremists, and I beg of you, Mr. Editor, your assistance in my endeavor to be unprejudiced, by publishing only such parts of my views that seem to you logical and well established.

As I take it, a sporting dog is a dog for a practical purpose. Therefore judges and breeders must endeavor to shape their dogs so as to be primarily a handsome dog. The great Dane is a fancy dog. Should you want him for a practical purpose, such as hunting large game, you would have to breed him still more in a shape adapted to speed; but as I say, he is a dog mainly intended to satisfy our conception of beauty, the question remains, what is beauty in a great Dane? No doubt the St. Bernard is to the eye of many a grand looking dog. So is the mastiff. Now, do you mean to tell me that we should breed the great Dane to come near a mastiff when we have a real grand old mastiff at hand, thoroughly established and wanting in nothing but constitution which has been destroyed in a measure by breeding him too highly. I for one am willing to rather have a mastiff than a mastiff great Dane. Or do we want a greyhound, a dog which is bred for speed only, regardless of beauty? He, too, is a sporting dog and bred more in the direction of usefulness than toward a point of exterior beauty. Hence there is no room for a great Dane in the doggy world if he were too near a greyhound type, because we have the grand greyhound. There is no room for him, as said before, too near a mastiff type because we have the grand old mastiff, and as I believe in laboring for a purpose, I would abandon great Danes if convinced that either of these extremes will prevail. There are no better extremes to be named than the mastiff-headed champion Melac and the pseudo greyhound Wenzel. But we will speak of them later.

You will observe that every man who argues on great Dane points will answer your question as to "Which is your ideal great Dane?" by saying: "Hannibal." Is it because they do not have to fear any competition from Hannibal, he being dead—or is it that they acknowledge Hannibal's greatness because everybody else does so? The vital question in my opinion is: "Should we prefer to breed Hannibal's type lighter or heavier?" I cannot acknowledge a great Dane

typical unless he has substance. I cannot acknowledge a mass of bone and muscle under a short coat to be a great Dane, and if I had to choose between a 200lb. dog, good on his legs, but without great Dane character, and another one of 130lbs., with an abundance of type and character and fair on his legs, I would prefer the latter decidedly. This question of size and substance versus beauty of shape and movement has been fully discussed and decided, in years gone by, in Germany.

[TO BE CONTINUED.]

BOUND BROOK, N. J., May 20.

The World's Fair Show.

ONE would think that Mr. Buchanan or Mr. Thacher or whoever has the arrangement of the list of judges for the World's Fair, would have gained some wholesome experience from the protests of the dogmen at large and the vast amount of criticism that their actions have evoked during the past three months. A steam drill cannot, however, bore common sense into some people's heads. The World's Fair management has now brought itself into even a worse snarl than before. The Rhode Island State Fair Association, a member of the A. K. C., claimed the dates Sept. 19 to 22 prior to the June postponement of the World's Fair show. This claim gives them the advantage, and the A. K. C. cannot now consistently withhold its support from the former association.

The World's Fair show wins, by special legislation of the A. K. C., were admitted to recognition. Further than this they have no claim on the A. K. C. The question now arises can the World's Fair awards be recognized if they persist in clashing with the Rhode Island fixture? One naturally asks what are officials put at the head of departments for unless they are already acquainted or willing to acquaint themselves with their duties. If Mr. Buchanan would take the trouble to read the kennel journals he would soon see how matters stand and inform himself of the peculiarities of the dog show world and how it is run. We understand that no judge on the list given out has been approached to learn whether he would serve or not, nor yet has any arrangement been made for their compensation or reimbursement for expenses that would be incurred in going to Chicago to judge. As a well known exhibitor and judge expressed himself yesterday, "The swelled-headed lot think that all they have to do is to make dates regardless of anybody else and the whole kennel world of exhibitors will flock to their call like a brood of chickens when the old hen clucks to them. They publish a list of judges without even writing to find out whether the persons whose names they have published are willing to undertake the job and without a syllable as to what remuneration or anything in the way of defraying of expenses is to be met. All they think they have to do is to press the button and judges will dance, sing or do anything else that may be wanted to do. Now, I am not built that way, nor are many others, either."

The time for action is short, the premium list is not yet out; let us advise a remedy. The A. K. C. does not meet till Sept. 13, so no action can be taken in the matter by the executive committee. The A. K. C. is the only body that the World's Fair people seem inclined to listen to; then let President Belmont call a special meeting of the advisory committee to consider the case and draw up resolutions advising the postponement of the World's Fair show till October. This would be better in every way. Many unpleasant issues would be avoided; the weather would be cooler; dogs' coats would be in better condition; the fall shows in the States and Canada would be over; judges who are on the W. F.'s list would be at liberty, and as far as we can see at present everything would be plain sailing. Something of this sort must be done or the World's Fair show will simply be a gathering of a few Western dogs and not the representative and international affair it was intended to be. Action must be taken quickly or we cannot expect the English exhibitors to come over when there is so much uncertainty. Once postpone the show until October and the kennel journals will lend their aid, and a good show and a representative show will be the result.

Benching in Rotation.

The English Stock-Keeper has this to say in commenting on our remarks regarding the irregular benching of dogs at our shows: "American exhibitors are crying out, and very properly so, against the practice of benching dogs at shows in stalls to which they have no claim, and our contemporary, FOREST AND STREAM, has very properly taken the matter up editorially. It is quite intolerable that an owner, to gratify his own selfishness, should be permitted to bench his dogs, entered in different classes, and possibly of various distinct breeds, alongside each other, to the confusion of the public and disarrangement of the show. Reporters are misled by these practices likewise, and consequently errors which would otherwise have been avoided creep into the notices of a show, the result being that injustice is frequently done, and the readers of the fancy papers are seriously misled. Having only recently had occasion to protest against the methods of some lady exhibitors in this country who are in the habit of removing their pets from their proper places in the show, we need scarcely assure our contemporary of our sympathy with him in the attitude he has adopted with reference to a growing and most objectionable evil."

In almost every report during the past circuit we drew attention to the practice of exhibitors in the toy classes in putting three or four of their entries into one cage. These exhibitors, as if intent on making matters worse, generally take the collars off and so leave the reporters and public, unless the dogs are well known, positively without means of identifying them, and a half hour is often wasted in hunting up owners to get particulars. The pet dog people have grumbled repeatedly that their dogs did not receive sufficient attention from the press, that these classes seemed to be hurried over in the reports. No doubt that the state of affairs spoken of above is in many cases the cause of neglect, if neglect there be. We feel sure that we have only to call the attention of our show managers to these abuses, and they will in future endeavor to remedy the evil. The Pet Dog show was an exception in this respect, only in the cocker classes were dogs jumbled up a bit. Mr. Mortimer is inclined to take exception at our remarking that the W. K. C. started the backsliding this last spring. He says that if dogs were benched irregularly it was contrary to his orders and knowledge. This we will admit, and we can imagine that it is no small matter to keep track of something like 1,300 dogs, when owners get on reciprocal terms and change places for the sake of convenience in the friendly manner dogmen are noted for.

United States Field Trials Club.

INDIANAPOLIS, Ind., June 25.—*Editor Forest and Stream:* I have secured Dr. N. Rowe and W. W. Titus as judges for this club's trials at Grand Junction, Tenn. The third judge has not yet been selected. I will, however, if possible, secure another gentleman of equal experience.

P. T. MADISON, Sec'y-Treas.

Spaniel Pictures.

Editor Forest and Stream:
As one of many greatly interested in the correspondence now passing through the columns of FOREST AND STREAM, relative to the merits of ancient and modern cockers, would like to know where prints or photos of good specimens of both kinds may be procured.

JAPAN.

DOG CHAT.

California Notes.

The Californians, and even the exhibitors up Seattle way, are fast becoming versed in the ways of exhibitors, but have not as yet mastered the temptation to have a little fun with the judge. Eastern exhibitors have in most part become accustomed to take their medicine in the shape of an adverse decision without flinching, but some of our far Western friends still swallow their dose with a vry face. There has been considerable correspondence in the press out there, over Mr. Raper's decision in the English setter awards at San Francisco, and the placing of the St. Bernards at Seattle. It would scarcely be interesting here to go into the particulars of the "kicks," and we only mention the facts in order to show that the lot of a judge out there is not altogether a happy one, when self-asserted knowledge, which must necessarily arise from ignorance, plays a conspicuous part.

At Seattle one exhibitor of a St. Bernard removed his dog from the show because he did not get first prize, and remarks in his letter afterward that he knew he would be "snowed" under. Of course, this is an appropriate way of putting it, where St. Bernards are concerned, but none the less an insult to the judge. It is probable that the owner of this dog knows little about St. Bernards, especially when he twits Mr. Raper with having remarked when he showed him a certain dog, just to try him, that it was a very fair St. Bernard, and then goes on to say that said dog was not a pure St. Bernard at all, as it was by a Newfoundland dog out of a St. Bernard bitch. This is no reflection on Mr. Raper, as we may be pretty sure that that well-known dogman would not give such an opinion unless the animal possessed the St. Bernard characteristics, and even Mr. Raper is not clever enough to know what the sire and dam of a dog are like by merely glancing at the offspring. He, like the rest of us, must judge by the result. We have seen capital English setters that were sired by a pointer. It would seem as if the Seattle Kennel Club would be doing good work if it brought this plain speaking exhibitor to a sense of his position by calling the attention of the A. K. C. to his conduct in thus making reflections on the judge's honesty, and also for removing his dog from the show building without permission. A. K. C. rules should be observed by its members even in far off Seattle, especially as this individual threatens to show his St. Bernard-Newfoundland cross, with the aid of a little dye, as a Newfoundland at the next show, if Mr. Raper dons the ermine. To allow such letters to appear in the press will do more harm to the budding fancy in the far West than half a dozen bench shows can correct.

Canada Waking Up.

Mr. Davey is unhappy. He has thought all along that he had the winners at the coming Northern trials and thinks it strange that any of his friends should presume to imagine any of their dogs had a chance. He has girded up his loins, however, or in modern parlance, given a "hitch to his trouser breech," and sent his trainer, Thomas Hallam, to Manitoba with thirteen dogs, twelve of his own and one of Mr. Eddy's, of Detroit. Several of them are blue ribbon dogs and are expected to put their talents to more practical purpose in the coming trials. He has entered three "Derbies" in the Manitoba trials, and the same number in the U. S. and American field and Ohio trials. He will also run one or two braces in each All-Age Stake as they come along and still has retained enough canine material to keep things warm for the boys at the Chatham, Ont., trials, and after doing all this has still ten brace to sell. He remarks: "Some of the boys may think Canada out of the swim, those are the kind of people we want to bring along their best dogs. I can assure you all that you will see a field trial and the best dog will win; and one thing you can always depend upon, you will one and all get a sportsman's welcome." There is only one thing wanting in Mr. Davey's letter, he forgets to say that FOREST AND STREAM is the cleanest paper in the country. Again *verb sap*.

Northwestern Beagle Club of America.

Those beagle men who have been instrumental in forwarding the interests of beagles in the field will be pleased to hear that on June 14, the Northwestern Beagle Club of America was organized at the Wisconsin Building, World's Fair grounds. The object of the club is to improve the beagle in the field and on the bench. The club will hold its first field trials on Nov. 1-3 in southern Wisconsin, and the exact location of the grounds will be selected before long.

The National Beagle Club's constitution and by-laws, also field trial rules, were adopted with slight modification. The officers of the club are: G. A. Buckstaff, Oshkosh, Wis., Pres.; C. Niss, Jr., Milwaukee, first Vice-Pres.; H. A. Dillingham, Sheboygan, Wis., second Vice-Pres.; Louis Steffen, Sec'y-Treas. Executive Committee, Dr. T. S. Maxwell, Columbus, Wis.; E. Bardoe Elliott, Maywood, Ill.; C. Spellerberg, Milwaukee, Wis. All those interested in beagles that wish to join the club can do so by addressing Louis Steffen, Secretary, 781 Third Street, Milwaukee, Wis.

The N. J. K. L.

The New Jersey Kennel League held another executive committee meeting last Friday night at Newark. The committee on bench show dates reported that an effort was being made to hold the show during Thanksgiving week. It is stated that subscriptions amounting to \$1,400 have already been secured toward the bench show expenses. Somebody has remarked that the N. J. K. L. is a "meeting club," whatever that may mean. It strikes us that continual meetings, which are excuses for the club members to get together and discuss subjects connected with their dogs, is one of the very best methods of advancing the interests of the dog. It is much better than to allow a club to fall into "innocuous desuetude," because a meeting is not called. *Verb sap*.

John Davidson.

It seems peculiarly appropriate that Chicago should be the venue for a World's Fair show, when we remember that the first gathering of dogs that could be construed as a dog show was held in Chicago nineteen years ago. Still more appropriate is the fact that in the list of World's Fair show judges, published last week in FOREST AND STREAM, the name of one, John Davidson, should appear as the judge of English setters, when it is remembered that this veteran judge and sportsman was one of the three judges at the show in 1874. What an experience some men are fortunate enough to crowd into a lifetime!

The Rhode Island Show.

There is little doubt that many prominent exhibitors will support this fixture, even if the World's Fair persists in holding its show the same date. Two prominent "World's Fair elect" judges, Messrs. Davidson and Mortimer, have already promised to judge at this show, and cannot well back out now, nor do they wish to do so. Mr. John Read has also been secured as superintendent. The premium list will be issued this week. The entry fee is \$1.

During the Wissahickon show it was our pleasure to stroll through the well-kept yards of the Swiss Mountain Kennels. Some people spend money without end and never succeed in filling their kennels with young stock of their own breeding,

while others again experience the other extreme with a moderate expenditure. In the latter division must be included Mrs. Smyth. In one of the kennels we saw that noted bitch Sunray taking care of a family that noted bitch Scotch Leader was responsible for, and Nanciebel, another winner, was doing the charitable in nursing a litter of Duchess of Arlington's, so that the latter could have a little outing and attend the Wisabickon show. That sweet little red morsel of a cocker, Lady Gay, a bitch that would soften the heart of the greatest canine misanthrope that ever lived, by her pretty ways, had a litter of five reds, by Cherry Punch—his first family; they will be a lively lot if they take after their parents. Jersey Beauty, a black bitch, was almost worried to death by four youngsters, by Middy, that look especially promising, and they are all dogs, too, and will consequently go to market. Then Flossie, an imported bitch, had three by King Raven; this bitch Mrs. Smyth bought in whelp, from Woodstock way. Brunette, a bitch by champion Black Dufferin, was reared by Farrow's Obo III., Mrs. Smyth's late purchase, who but for his head is a capital type of cocker, especially in body. Our old acquaintance, Miss Chip, in the intervals of being coddled herself by her fair mistress, nursed two by Snowball. It may be imagined that with the proper disposition in life of all these youngsters Mrs. Smyth has her hands full, and we wish her every luck. Since we wrote of these kennels some time since, several additional kennels have been created, and the care and maintenance of such a large kennel require more attention than the majority of women would care to assume. Mrs. Smyth seems, however, to delight in it, and many another woman with a country home could find many worse methods of filling out her time to good purpose.

Hamilton Kennel Club Affairs.

The first show of the H. K. C., in 1891, as is well known, resulted in a loss of \$700, and the club committee has been very active ever since in seeking means to pay off this indebtedness to the guarantors. Now another novel scheme is proposed. At a recent meeting the members showed great enthusiasm over the outlook of the club. The secretaries reported that they had secured from a number of prominent breeders and well wishers of the Hamilton Kennel Club, donations of twelve thoroughbred dogs, all of which are registered and have full pedigrees, combining the best blood of the different breeds to be had in the country. These will be raffled off, and the money so obtained be devoted to paying off the deficit spoken of. It was decided that the drawing shall take place on the evening of the second day of the C. A. A. O. regatta at Hamilton—Friday, Aug. 4—in the Royal Hotel. As a guarantee of good faith H. B. Donovan, of Toronto, secretary of the Canadian Kennel Club; W. P. Frazer, secretary of the Toronto Kennel Club, and Andrew Laidlaw, the well-known cocker breeder of Galt, Ont., will be asked to conduct the proceedings on the night of the drawing, together with the president of the club, Dr. Griffin. Particulars of the drawings and descriptions of the dogs have been issued in pamphlet form by the printing committee, Messrs. A. D. Stewart and W. J. Tulk, the assistant secretary of the club. The dogs will be brought on to Hamilton at once and boarded until the night of the draw.

Northwestern Field Trials.

The following reprint from the *Winnipeg Free Press* of June 23 shows a most encouraging and successful field trial situation: "The Derby of the Northwestern Field Trials Club closed with 41 entries—11 pointers and 30 English setters. The entries are very representative. Manitoba heads the list with 16, Tennessee has 7, Ontario 6, Dakota 2, and one each to England, New Hampshire, Michigan, Indiana, Pennsylvania, Northwest Territories, Virginia, Illinois, Texas and New York. The entries for the All-Age Stake close July 15, and promise as big as the Derby. Forms of entry can be had from Mr. Thomas Johnson, secretary. Messrs. G. F. & J. Galt donate to these trials a cup or tankard, open only to dogs that have won a Derby or aged stake. Entrance will be free, and the cup becomes the property of the winner. This Province will be represented by Wootton's Dick Bondhu, Ellis's Duke of Manitoba, Johnson's Manitoba Shot, and Sharpe's Alberta Joe. The Americans will no doubt bring their cracks and make a big effort to carry off this handsome trophy. The patron of the club, Mr. A. P. Heywood-Lonsdale, of England, will probably be represented by Musa, which won the Pointer Club's All-Age Stake in Devonshire, Eng., last month; so that, besides this contest, partaking of an international character, the reputation of the contestants will make it most interesting."

Lexington Dog Show.

The Blue Grass Kennel Club, Lexington, Ky., have arranged with Mr. John Davidson and Mr. Frank G. Wheeler to judge at their coming show. Mr. Davidson will judge the sporting and Mr. Wheeler will judge the non-sporting classes. As this club had 465 entries at their last show, it is expected with the increased and unexcelled facilities for holding a large show that the 500 mark will be passed. Although the season is early and rather warm for traveling, one could hardly spend a more enjoyable week than among the whole-souled Kentuckians who run this show.

Miss Caution.

Perhaps it would surprise Mr. Bunn to hear that Merlin, the noted mastiff, accidentally formed an alliance with his Miss Caution some time since, and that, much as we would like this enthusiastic mastiff man to indulge in self-congratulations, justice must be done to nature and one of these unforeseen happenings, which are sometimes impossible to prevent, must be given the first credit. Needless to say that when it was found that the union had been consummated preventive measures were taken at once to prevent a possible litter.

Fox-Terrier Importation.

The fox-terrier Dame Primrose has been purchased by a New Yorker from Mr. F. Redmond, who has been clearing out his kennel. She is by Diplomacy out of Hulton-Softly, and according to our contemporary the English *Stock-Keeper*, won first in puppy and novice classes in Dublin show. She was shipped through Spratts Patent on the New York, arriving Saturday week last. She is in whelp to Despoiler and should therefore prove useful to the breed over here.

Toronto Show.

The spaniel men will have another judge at Toronto this time, as Mr. A. C. Wilmerding has accepted the invitation of the Industrial Association. Messrs. John Davidson and C. H. Mason have also been invited and may be put down as certainties.

The Bloodhound's Nose.

A most interesting case of the bloodhound's keenness of scent is recorded in the English kennel papers. A woman murdered her daughter and then committed suicide, in order to conceal her daughter's shame, she having given birth to a child. The child could not be found. The police determined to try bloodhounds, and Mr. Markland lent his hounds for the purpose. Two of these first day, owing to conflicting odors, failed to do anything; but the next day the noted winning bitch Dainty tried her nose, and although she was only just recovering from a serious attack of peritonitis, she

immediately took up a scent and led the attendants to the coal cellar of the cottage. Here she excitedly scratched at a heap of coal, and when this was turned over became more excited as a flagstone appeared in view; this was lifted, and digging out the sand below, according to *Stock-Keeper*, the little body was found at a depth of two feet. This bitch is by champion Burnaby out of Helen II., and has won first at Birmingham, among other places, and is also noted as the dam of Dictator.

The Brooklyn Medals.

Those exhibitors who were lucky enough to win one of the handsome bronze medals given by the National Greyhound Club at the Brooklyn show last November will, ere this, have received them. The club sent out seventy-one of these medals last week. The delay has been unavoidable and not at all the fault of the N. G. C. It may be interesting to note that these medals, made by the celebrated English firm, Elkington & Co., cost less than a third of what they could be made for here, the die being an unusually large one.

Pacific Coast Field Trials.

The committee that we spoke of last week as having gone to Salinas, Monterey county, Cal., to investigate the country thereabouts as to its availability for field trials, has reported favorably, and the Pacific Coast field trials will be held there in January next. There are plenty of birds on the grounds and the residents of the town will aid the club in every way. This venue is a much better one than that at Bakersfield, being considerably nearer San Francisco, for one good reason.

Mr. H. W. Smith has had to taste a little of the bitter along with the sweets of triumph he has been indulging in lately. We learn that his celebrated wire-haired fox-terrier St. Broom died in a fit, June 20. Mr. Smith, in telling

"ROADING."

Mr. Chas. Heath's Champion Graphic and Arthur.

us of his death, said: "His loss will not be any greater for me than for the other wire-haired fox-terrier breeders in America, as he was the best representative of their breed in England outside the Carrick breeding, and it was my wish to use him to cross on my Carrick-bred bitches, and then Cribbage as a cross on the result of the above. I do not feel the loss keenly since now that I have got Cribbage, but with the two I would have had a very good brace of stud dogs." St. Broom was by Bushy Broom out of Daylesford Luck and was known in England as Daylesford Broom. He was whelped Jan. 15, 1890. At the time of his importation we published many items of interest regarding this dog and his record at the spring shows is fresh in the memory of exhibitors. That he was the best wire in the country there was no doubt and we sympathize with Mr. Smith in his loss.

The late Detroit dog show has served to stir up a great deal of interest in well-bred dogs in that city and the members of the C. O. T. S. K. C. are doing all in their power to improve the tone of their kennels by securing good dogs from different parts of the country. A late addition is Mr. Arthur Welton's purchase of the Irish setter Fingal, by imported Finglas out of champion Ruby Glenmore. Mr. Welton has put this dog in the hands of a trainer and will run him at the Chatham and Manitoba field trials. Mr. T. C. Onelle is also purchasing fox-terriers; to My Fellow he has added a bitch by Starden's King out of Lady Reckon, from Mr. Thayer's kennels. We have already noted Mr. Herbertson's purchase of Stella G., the cocker. Tom Blake, a sort of a mentor for them, will have a big string for the fall shows in Canada.

Our Canadian correspondent, Mr. Donovan, tells us that the news published by our Philadelphia contemporary regarding the Toronto show is by no means correct, and that one of the committee was guilty of a breach of etiquette in divulging any of the proceedings of the late meeting. Our correspondent was requested particularly not to do so until final arrangements were made with the judges, and he respected this injunction. The schedule is now in our correspondent's hands for revision on rules, etc., and reliable information will appear shortly in *FOREST AND STREAM*.

The Huguenot Kennels, owned by Mr. W. H. Weld, have purchased from Mr. J. L. Galway, Belfast, Ireland, the Irish terrier bitch Ballyisbredan and a son of hers by Irish Ambassador, which has done a little winning.

Stock-Keeper (Eng.) says that Mr. J. Lowrie has sent, through Spratts Co., the bull bitch Duchess of Dorking, a winner at Aberdeen and other shows, to Mr. Dever, Peoria, Ill. She visited Bullrush II. before sailing. Peoria is becoming quite a fanciers' center.

We have an interesting letter from that veteran sportsman, Capt. McMurdo, on the spaniel question, that must, however, wait till next week. We print this week the first of a series of illustrated articles on great Danes, written some time since for *FOREST AND STREAM* by Mr. Heppner, that will in a great measure contribute to a settlement of the correct type of great Danes at our dog shows.

Adolph Thommen, a resident of Basle, Switzerland, not having heard of the postponement of the World's Fair show, arrived in Chicago recently with six St. Bernards for the

show, three roughs and three smooths, of good breeding. Four of them have won prizes. The owner will now have plenty of time to condition them.

"If you see it in the *FOREST AND STREAM* it's so." Folks who saw that World's Fair judges' list last week in the paper where a fake list had already appeared, didn't know whether it was so or not. Folks who read it in the *FOREST AND STREAM* made no question of its accuracy, authenticity and actuality.

If the young woman who sings

"Papa would't buy me a bow-wow,"

would intermit her vocalism and advertise her canine longings in the *FOREST AND STREAM* Kennel Special columns she would be astonished by the results.

It has long been our candid conviction that if all the dogs in the world were boiled down into one there would be in the result the making of a very noble man. On the other hand, we fancy that if all the men in the world were boiled down into one there would be in the result the making of a precious poor dog.—*Eugene Field*.

We are pleased to hear that Mr. Foster's field spaniel Beverly Negus is getting much better, and his owner expects to be able to show him this fall if everything goes on as expected. Judex and others will be shown at Toronto. Mr. Foster has got a new liver bitch that is said to be a good one, by Baron out of Patty. He has had bad luck this year and much sickness in the kennel, but the silver lining is now appearing.

We sincerely trust that the news which our Canadian correspondent sends us about the sale of Messrs. McEwen &

Gibson's long celebrated collie kennel will not lead to a dissolution of partnership or retirement from the fancy of these well known and old exhibitors.

The death is announced of Capt. O. T. Edwards, of Penbroke, Wales, and known to the fancy as the owner of the Scalyham terriers which are useful for fox and otter hunting in rough countries.

Flaps from the Beaver's Tail.

TORONTO, Canada.—For the Ottawa dog show one challenge class of \$5 is provided for most of the important breeds. In the open classes \$7 and \$3 is offered for all breeds. St. Bernards, rough and smooth, are classed together; so are fox-terriers, wire and smooth, but cockers are better treated, being divided into black and other than black, and also having a selling class (up to \$25) of \$7 and \$3. Fox-terriers (up to \$20) also have one selling class. A card is given in the open classes as a third prize. The list is issued under the old C.K.C. rules which, since the dissolution of the agreement between the C.K.C. and A.K.C. must needs be amended. Entries close Sept. 14, and the fee is \$1.50.

Where is this going to end? From far off British Columbia even, a tale of woe reaches me, which is described by the owner of the victims, Mr. C. Dempster, of Nanaimo: "I have no doubt that you will regret to hear that I have been the victim of some dastardly miscreants in the fact that I have had my whole kennel of collies and St. Bernards poisoned, including my collie dog Claremont Garry and bitch Roslyn Lena. The latter was in whelp with six pups. This outrage was absolutely unprovoked, and as yet remains a mystery, though no effort will be spared, as far as money can go, to trace the fiend who did the foul work. This is the more aggravating as Claremont Garry was beginning to make his mark, and I have no doubt had a bright future before him. I saved two St. Bernards out of the general slaughter. As you can imagine, when this sort of thing goes on here there is very little encouragement to import thoroughbred dogs. I had refused fairly large figures for some of the dogs poisoned. I will let you know at once if the perpetrator of the deed is found out." My sympathies go out to Mr. Dempster, and, as I wrote him, he should be on the lookout for some one who has cause to be jealous of his success.

I was surprised to learn from Mr. McEwen that McEwen & Gibson's kennel of collies was for sale, not even the dogs selected for the World's Fair being reserved. What's in the wind?

A meeting of the executive committee of the Canadian Kennel Club will be held at the Queen's Hotel here on Thursday, July 13, at 3 P. M. The following is the business to come up for discussion and action: Relations of the C. K. C. and A. K. C., revision of the rules, etc., of the club, World's Fair dog show, Canadian circuit of shows and field trials, communications, election of members and general routine business. H. B. DONOVAN.

Business.

ALL I HAD TO SELL.—Milford, N. Y., June 18.—*Editor Forest and Stream*: The ad. that I put in your paper has sold my pointers, six of them, all I had to sell, and I could have sold more if I had had them. H. D. WEEKS.

Spaniel Trials.

Editor Forest and Stream:

I have noticed a number of letters recently in regard to field trials for spaniels, and what class of game could be used to try the hunting instincts of that merry little dog to the best advantage. To my mind there is but one bird in this country that field trials for spaniels could be run on with any success whatever, and I think that bird fills all the requirements necessary to test the field qualities of the spaniel. I refer to the rail family. There is not a section of the country where marshes are located, either east or west, where some variety of the rail family cannot be found, from the large king rail of inland waters, the clapper rail of salt marshes, to the smaller sora and red bill rail that are found on both salt and fresh meadows. The entire rail family gives a strong game scent, of which fact all snipe shooters are aware from the manner in which pointers and setters will point them and bother with them: The habits and scent of all the varieties are very, if not exactly, similar. They will lie close for a dog, can run like a race horse, testing a dog's roading capacities to the utmost, and a dog that will retrieve any of the snipe family will not refuse to fetch a rail. On the Pine Brook, Troy and other meadows through which the Passaic River flows in New Jersey, there are as many as five varieties of rail (that I know) and probably more, and a great nuisance they are in the autumn to the snipe shooter's pointers and setters. Around the moist spots where the second growth of grass is about ankle high, large numbers of these birds can be found on the above meadows during any September. Considering his habits, quantity and general distribution throughout the United States, tell me of a bird better adapted to run spaniels on. Surely an hour's work on rail where they are in fair numbers only, would show more real field work by each dog entered than the pointers and setters get at the field trials in several days' work. H. N.

Yachting.

FIXTURES.

JUNE.

30-July 13. Phila., Club Cruise.

1. St. Lawrence, A. M., A. 30ft. and 25ft. classes, P. M., steam yacht race.
1. Miramichi, Cruise to Bay du Vin
1. Hempstead Bay, An., Hempstead Bay.
1. Winthrop, Cash Race, Hough's Neck.
1. Royal Can., Queen's Cup, 40ft. Class, Hamilton.
1. New Rochelle, An., New Roch.
1. Seawanhaka, An., Oyster Bay.
1. Beverly, Marblehead.
1. Williamsburg, Club Cruise.
1. Minnetonka, club race.
- 1-4. Cor., San Fran., Martinez, Suisun and Vallejo.
1. Indian Harbor, Special, Greenwich, Conn.
4. Larchmont, An., Larchmont.
4. Cor., Marblehead, Club Reg.
4. Beverly, 1st Buzzard's Bay Cham., Mon. Beach.
4. Larchmont, An., Larchmont.
4. Buffalo, Club Regatta, L. Erie.
4. Pavonia, Com. and Vice-Com. Cnps, Communipaw.
4. L. Y. R. A., Rochester, rendezvous and race.
4. Minnetonka, cup race.
- 4-5. Citizens Association, Open, Detroit, Mich.
7. Fall River, Ladies' Day, Fall River.
8. Riverside, An., Riverside, Ct.
8. Beverly, 2d Open Sweeps, Quisset.
8. Knickerbocker, Club, Sloops and Cutters, College Point.
8. Monaquot, Cash Prizes, Weymouth.
8. Savin Hill, First Cup, Dorchester Bay.
8. So. Boston, 1st Cham., So. Boston.
8. Mos. Fleet, Cham., So. Boston.
8. St. Lawrence, A., 30ft. and 2ft. classes, Montreal.
8. L. Y. R. A., Royal Hamilton, Ham.
10. Riverside, Cruise, L. I. Sound.
10. Corinthian, Atlantic City.
10. L. Y. R. A., Royal Canadian, Toronto.
13. Miramichi, Newcastle to Chatham.
15. St. Lawrence, 25ft., 18ft. and 15ft. classes, Montreal.
15. Phila., Pen. and Sweeps Race, Delaware River.
15. Commonwealth, 1st Pen, Boston.
15. Jersey City, Cruise.
15. Cor., Marblehead, 1st Cham.
15. Winthrop, Cash Race, Hough's Neck.
15. Atlantic, Cruise, rendezvous, Cold Spring.
15. Minnetonka, club race.
15. Royal Can., Skiff Class, Tor.
15. Staten Island, Open Regatta.
17. Rhode Island, Cup.
17. Monaquot, Ladies' Day, Weymouth.
22. Mos. Fleet, Cham., So. Boston.
22. Rochester, Skiff, Charlotte.
22. Riverside, Special Cup, Riverside, Conn.
22. Cor., Marblehead, 21-footers.
22. Beverly, 3d Open Sweep, Mon. Beach.
22. Savin Hill Union Race, Dorchester Bay.
22. Royal Can., 2ft. Class, Tor.
- 24-30. Hempstead Bay, Cruise, L. I. Sound.
27. Fall River, Ladies' Day, Mount Hope Bay.
28. Savin Hill, Moonlight Sail.
29. Buffalo, An. Cruise, Lake Erie.
29. Indian Harbor, An., Greenwich, Conn.
- 29-30. Cor., San Fran., Masquerade and Cruise.
29. Hull Cor., Cash Race, Hull.
29. Royal Can., Lansdowne Cup, 40, 35 and 30ft. Classes, Tor.
29. Minnetonka, club race.

AUGUST.

2. Monaquot, 1st Cham., Weymouth.
4. Savin Hill, 2d Cham., Dorchester.
5. Cor., Marblehead, 2d Cham.
5. So. Boston, 2d Cham., So. Boston.

TWENTY YEARS OF YACHTING.

THE first number of the FOREST AND STREAM appeared just at the opening of the New York Y. C. cruise of 1873, early in August. The fleet included some of the noted yachts of the day, many of them large schooners, Alarm, Eva, Tarolinta, Columbia, Resolute, Tidal Wave, Clio, Madeline, Josephine and Foam, with the sloops Vision and Vixen; and the chief incident of the cruise was the abandonment of the original programme in consequence of a storm which wrought havoc to this fleet.

At this time, closely following the first two races for the America's Cup and the accompanying victories over Cambria and Livonia, schooner racing was at its height, and the season of 1873 was made notable by the many and valuable prizes raced for, most of them the gift of Mr. James Gordon Bennett, then commodore of the New York Y. C. Yachting was attracting more attention in this country than ever before, and the daily and weekly journals were devoting an unusual amount of space to it, many of the writers being able and competent men.

Outside of criticism of the work of one modeler in order to praise another, one will look in vain, however, for anything but unstinted praise of a fleet which was generally considered to be above criticism in all respects. Although the performances of the then new cutter Vindex had opened the eyes of yachtsmen to the possibilities of greater depth and low ballast, the yachting reports of the day were pitched in one uniform key of admiration for the national model, with its limited draft, excessive beam, awkward rig and inefficient ballast. Even the terrible lesson of the Mohawk, while the FOREST AND STREAM was still in its infancy, was glossed over and its true causes hidden under excuses of all kinds, and yachtsmen still refused to believe anything to the discredit of their favorite type.

Under such circumstances it required no small degree of courage for an American newspaper to set out to tell the truth about American yachts, to oppose itself to the general chorus of indiscriminate praise, and to establish for itself an independent policy of judgment and criticism on strictly technical grounds. Such a course, however, was adopted by the FOREST AND STREAM as soon as the yachting department of the young paper had developed to an extent which gave weight to the opinions which it might express; and the same course has been consistently followed for nearly twenty years.

So far as the FOREST AND STREAM is concerned, although the fight was a hard one, and undoubtedly has hurt it at times with those on whom it of necessity depended for its support, it has found in the end no reason to complain. It has not only won the support of the great body of American yachtsmen, but the respect of those who, though opposed to its views, have come to look upon it as a fair and honest adversary. We need not remind our readers, both friendly and adverse, that the fight has been a hard one, but as evidence of the result we can point to the total disappearance of the sandbag model in all classes save the one for which it is alone adapted, the open racing boat; for the extinction of the national sloop rig and its replacement by the modern Americanized cutter rig; for the universal adoption of the lead keel, even on such flyers of the old type as Comet, Gracie and Grayling; to the vast improvement in model and construction, in sails and rigging; to uniform and greatly improved rules for measurement and racing.

There is hardly an important feature of American yachting to-day which has not been suggested in the first place by the FOREST AND STREAM, or else advocated by it as soon as the suggestion was made by others; nor is there one which has not been bitterly opposed from the first by other American journals and yachtsmen in general.

Among these features we may mention the lead keel, the double headrig, the fixed keel, a greater proportion of depth and less of beam, the long cutter in place of the saved-off stern, the through bolt in place of the iron spike, the use of less material, but of better quality and better workmanship, the use of plans made by a trained designer, in place of a model whittled by any one, the length and sail area rule, the handling by Corinthians instead of paid helmsmen and crews, and above all, the far fairer conditions of the great international trophy, the America's Cup.

It would be absurd to claim that we foresaw from the first all the vast changes to come in twenty years, that our predictions have been borne out in every immaterial detail, or that in all this time we have made no mistakes; but looking back carefully over the whole record of the past there are very few points on which we have changed our opinions or would wish to change them; and it is a

source of infinite satisfaction to feel that, whether finally proved right or wrong, that they were our own opinions, and honest ones, too; that we have always led and not followed, and that we have dared to say what we thought without regard to the consequences.

A look at the yachts afloat to-day, Gloriana, Pappoose, Gossoon, Iroquois, Yampa, Volunteer, Katrina, Liris, Sea Fox, Merlin, Shamrock, Lasca, Emerald, and the odd hundred more that will gather next August for the New York cruise, and a mental comparison with the fleet of 1873 will show what has been done, and a glance through some of the forty volumes of the FOREST AND STREAM, and the corresponding numbers of other American papers, will show who has helped the work and who has opposed it.

There have been times in the past when it was a question whether it paid, from a newspaper standpoint, to be honest and independent, whether American yachtsmen would tolerate the publication of unpalatable facts, or whether it was necessary to follow the usual course, avoiding all criticism and dealing out unstinted praise on every hand. Fortunately this question was long since settled in the assured success of the FOREST AND STREAM, and it has been proved that yachtsmen are ready to entertain a criticism, however adverse, which is based on technical grounds, or on the recognized principles of fair play among sportsmen.

Appropos of the race of the Southern Y. C., reported in another column, a correspondent makes the following inquiry:

"Is the rule, 'Sec. I. Rule 20' of the racing rules (a yacht touching a mark or causing a mark to shift its position, unless wrongfully compelled to do so by another yacht, shall be disqualified), a good rule or not, and is said rule enforced by the various yacht clubs of the United States and England?"

It is one of the fundamental principles of yacht racing that a yacht in order to win must go fairly over the correct course, from start to finish, without touching another yacht or any mark of the course. The rule quoted by our correspondent is common to all clubs and strictly observed, and we believe that it is not only a good one, but absolutely indispensable. As regards the questions of intention or of actual damage, it would not be possible to consider either, even if it were desirable to do so at times, as it would be impossible to prove what a man's intentions were, and often equally impossible to prove the degree of harm done. So far as the judges of a race are concerned, the only thing they can consider in a case of fouling a mark or another yacht is the fact of contact, either the yacht goes entirely clear or she touches, and the degree of contact can have no effect on their decision. In many cases there is a question as to whether the foul was caused by another yacht, but in such a case as that referred to, where no such doubt as to the blame can arise, the yacht is disqualified by her own act, and has no right to continue the race as an outside boat, to the hindrance of the other contestants.

With the new volume of FOREST AND STREAM an important change will be made, the paper going to press a day earlier, on Tuesday in place of Wednesday. In order to appear in the following issue it will be essential that all reports of races, most of which occur on Saturday, should reach us by Monday morning.

It is the desire of the FOREST AND STREAM to publish promptly and accurately an account, however brief, of every yacht race sailed in this country. Owing to the vast extent of territory covered by American yachting, from New York to San Francisco, along the Great Lakes and from New Brunswick to Florida, it is impossible to do this without substantial assistance from the clubs interested, and in more distant places we are forced to rely entirely on such aid. The FOREST AND STREAM race reports are intended for this purpose, blank forms specially prepared for recording yacht races; and we will gladly send to any club such a number as they may need for their own use in keeping the times and also for forwarding a duplicate copy to the FOREST AND STREAM. Our extensive system of exchanges and of clippings from local papers, though covering the whole country, fails to give us the required information, as such local reports, as a rule, are apt to take it for granted that the reader knows all about the wind, weather and other trivial details, and only wants to know what there was to eat and drink on the steamer or at the club house. Our race blanks provide for all material facts as to wind, tide, weather, courses and competitors, and with the mention of any special accidents or incidents make a complete and permanent record of a race. While we are impelled in part by selfish motives in asking of clubs and regatta committees that they will take a little trouble in this matter, we feel at the same time that it is the clubs themselves who derive the most benefit from full and accurate reports in such a journal as the FOREST AND STREAM of all races and proceedings. If a club has any life and vitality at all it will be doing something in the way of racing or of improving rules that it has reason to be proud of, and nothing raises a club in the estimation of its own members like the knowledge that other clubs are watching it and imitating it.

The latest measurement of Valkyrie, made last week, gives her waterline as 86.82ft. in place of 85, while her sail area by Y. R. A. rule is 10,207sq. ft., making her rating 147.70. Thistle's official measurements in her first season were 86.40ft. l.w.l., 9,956sq. ft. of sail, and 143.37 rating. The measurements of Thistle (Meteor) last season were similarly 85.20, 8,157, and 115.83; a very marked decrease, which of itself is enough to throw out Thistle as a means of comparing Valkyrie and Britannia with Volunteer in her original form. By the terms which Lord Dunraven proposed and which were agreed to by the New York Y. C., both challenger and defender are limited positively to an excess of two per cent. over the specified length, in this case 85ft., which would make the excess 1.70ft., or a total waterline of 86.70. If the figures given are correct Valkyrie exceeded this limit by something less than 2in., but it is stated that her spars, sails and head have been reduced, making her just in the limit. Being a composite vessel, her displacement and length are certain to increase a little by two or three months' immersion, but at the same time there is no reason to suppose that she cannot easily be brought to the limit either by the adze, like all the American forties, or by lessening her inside fittings, as will probably be done in any case for the Cup races. It is evident, however, that she must race at a waterline of over 85ft., each inch of such excess counting as two inches, so that if fully up to the limit her waterline for measurement will be 88.40ft. In the case of Thistle the sail measurement by Seawanhaka rule was just 90 per cent. of the Y. R. A. measurement, and the same proportion applied to Valkyrie gives about 9,300sq. ft. for her measurement in America, or say 96ft. for the square root of the sail area. Her actual sailing-length with the waterline up to the extreme limit would then be 91.35ft., but sh

would be compelled to assume a measurement of 92.30, or nearly a foot more. In this case the actual penalty she would assume above her true allowance would be not quite half a minute in thirty nautical miles. It is too soon yet to say where the defender will be when the measurer puts his tape on her, but from past experience, and with Navahoe's excess in view, it is safe to say that at least two out of the four new yachts will be over 85ft. waterline, and it is quite probable that all may be liable to a penalty similar to Valkyrie's and Navahoe's.

ONE reason for the astonishing popularity of the great trio of Burgess-Paine Cup defenders, Puritan, Mayflower and Volunteer, lay in the admirable selection of names, each of which appealed strongly to the patriotic spirit of Americans. In naming the fourth boat, Gen. Paine has made a departure that can hardly fail to be a disappointment to the many who are looking to him to defend the Cup with like success for the fourth time. The rather commonplace name Jubilee has nothing in common with the other three, and is in no way distinctively American; in fact, the now general use of the word dates back to the great Jubilee year, 1857, in England, the fiftieth of the reign of Queen Victoria. Since then "jubilee" events of all kinds have been in order in England, but the word has hardly found a footing in this country. There will undoubtedly be a "jubilee" for some one after the trial and again after the Cup races, with "general rejoicings and fireworks in the evening;" but at this time it is somewhat uncertain who will play the star part of Nanki Poo and "not be there." It is also a question now whether the proverbially fickle public will not transfer its sympathy and support to the other Boston fin-keel with the more taking name of Pilgrim; which, by the way, has also the seven letters and doubling of a vowel which is considered essential to success. The yacht was launched at Lawley's on June 24, and at once towed away to a derrick to ship her mast.

THE owners of the late Yankee Doodle have set a new precedent in actually building a new boat in three weeks, launching her on June 22. Of course the old engine and boilers will be used, but even with this to start on it should have taken at least six months to build the hull, during which time the papers should have been busy booming the new boat and telling how fast she would be. If men begin in this way instead of after the old established methods, there is no telling what the end may be; it is even possible that there may some day be a *bona fide* race of the 30-knot steam yachts.

DELAY is the word with each of the four 85-footers, not one being up to the estimated time of completion. Colonia is the most advanced and has been out twice this week under canvas, but with negative results, the wind being too light for a test, the mainsail is still sitting badly in spite of alterations, while there is a good deal of work to do before the yacht can be accepted by her owners. Vigilant is not yet rigged and will be a week or so later than Colonia. Jubilee is afloat, her mast is stepped and bowsprit in place, and Mr. John B. Paine is counting on a trial trip on Saturday, but there is still much work to be done before the yacht is out of the builder's hands, even though she may be rushed in order to get the first sail this week. Pilgrim has been delayed beyond the expected time at the Erie Basin, leaving there on Tuesday, so that she will not reach Boston before the latter part of the week, and some time must elapse before she is in commission.

THE regatta committee of the New York Y. C. has announced the date of the first trial race as Sept. 7, three to five races being sailed at intervals of a day apart. At this rate it is quite probable that the fifth race, if sailed, will not be finished before Sept. 20, so that the date for the international races has not been set too far ahead. It is possible that the racing through August may virtually settle the selection of a defender, and also that two or three days of good breezes may be found for the first trials, so that the committee can announce its decision by Sept. 12. In this case, and if the defender requires no special alteration, the main races might come off at once. It is much more likely, however, that some ten days will be wasted over the trial races, and that as much time more will be granted to the chosen yacht to clean, paint and prepare for the final races.

THE anxiety in regard to Queen Mab, not spoken since she left England on May 17, has been in a measure relieved by the news received on Monday that she had reached Bermuda in a disabled condition. The report is very indefinite, but to the effect that she had lost her mast and that one of her crew had been washed overboard.

Pilgrim.

FOR a week past the center of attraction to New York yachtsmen has been the Erie Basin, in South Bay, where the new fin-keel Pilgrim has been perched high in air while the fin and bulb were placed under her. The visitors as a rule were not backward in expressing their opinions, and many curious comments have been made. Some condemn the new-fangled idea as wrong in principle and bad in its effects on yachting, some approve of the clean easy form and the advantageous distribution of the ballast, but shake their heads over the great draft. The various opinions, favorable, adverse and doubtful, have afforded much amusement to those connected with the work. The sight from the head of the larger dry-dock is a curious and interesting one; far down toward the gate of the dock is a high platform consisting of two parallel rows of heavy posts, about 3ft. apart, each row capped by a heavy fore and aft timber, which is braced by other timbers running horizontally from the sides of the dock. This double framework is also well braced diagonally in a fore and aft direction. Resting on top of the framework is a white hull of the oval form of which may be best described as similar to the small cruisers Elsa, Myra and Scarecrow, illustrated during the past winter in the FOREST AND STREAM. Although the actual area of the deck is larger than in Volunteer, the hull looks almost diminutive in contrast with the huge dry-dock beneath, and one quite fails to grasp the real size.

Walking aft, however, the view from the caisson, above and immediately astern of the yacht, gives quite another impression, the deck showing up as very large and in particular as very wide, although the proportion of over all length to extreme beam is but 5 to 1. Seen from below the hull looks comparatively narrow, although the beam is actually 23ft. The length over all is 122ft., the waterline is about 85ft., and the depth of the hull about 8ft. The total draft is 22ft., or a half of hull and 17ft. of keel. The hull has a fair sheer, a slight sweep of moderate height and curvature, while the keel contour is also a continuous curve from stem head to archboard. The midship section is also a fair and continuous curve, with moderate deadrise, a bilge that is powerful without being abrupt, and the topside slightly curved and with very little flare.

While the bow lines, both vertical and horizontal, are of the general character of the Herreshoff fin-keels, the aft line is quite different, the waterlines being finer and the vertical sections more in harmony with those of the fore body, instead of being almost flat at the futlocks and turning very sharply at the waterline. This, of course, gives a much easier quarter, better balanced wedges and less disturbance in fore and aft trim in heeling, so that an extreme length and fullness of the forward overhang is not necessary. It almost goes without saying in this type of boat that all the fore and aft lines, square or inclined, are fair and convex; in fact there is no hollow anywhere visible. So far as wave-making and the other elements of resistance are concerned, the form is an easy one to drive and at the same time possesses sufficient stability of form for its special purpose.

The chief reliance in carrying s is of course the fin and its lead bulb, the latter weighing, as stated, considerably over 30 tons. The stem above water is of the latest Roman nose fashion, while the counter differs but slightly from the conventional stems of the larger Burgess yachts, being about 4ft. fin. across the archboard. The bulwark is of light steel plate, and with its oak rail is about 12in. high amidships. The chainplates are not only on the hull, with out channels, but inside the bulwarks at the deck. The entire hull is of steel, and with the usual straps and braces of a steel yacht, to which are added four braces of angle bars, running from the

partner beams about the mast to the floors, each bar being inclined at an angle which brings the heels considerably further apart than the heels.

Near the center of the hull is a solid steel bulkhead, the center pierced by an oval opening about 4ft. long and 2ft. high. The interior forward of this bulkhead forms the forecabin and galley, while abaft it is a saloon 10ft. long, then a couple of staterooms, one for the captain, and abaft all a large saleroom extending into the counter. The fittings below are very simple, of light white pine, and intended solely for racing service, in fact no other object than speed in the trial, and, indeed, the cup races, has been considered for a moment.

The fin and bulb are unquestionably the interesting features of the yacht, marking her as different from anything of her length ever constructed. The fin itself is some 35ft. long where it joins the hull, and about half as long on the bottom, the rake being greater on the fore edge. Along the bottom of the hull are two heavy angles, parallel and about 2 1/2 in. apart, extending some 6ft. forward and abaft the fin. The latter is composed of two thicknesses of 3/4 in. plates, each plate about 18ft. long, the plates are just an inch apart, having an inside half strap of that thickness at each seam, the seams of course being up and down; though not quite vertical, as each plate is wider on the upper than on the lower edge.

At the fore and after sides of the fin, and also along the bottom, liners of the same thickness as the butt straps are used, the two on the sides being rabbeted as the stem of a steel yacht, and tapered out to the rabbet to the fore edge. Along the bottom of the fin is an angle bar, the flange facing outward and making a ledge, flush with the bottom of the fin, on which the half bulb rests.

The upper end of each vertical plate extends into the hull for a distance of about 12in., and the two sides of the fin are here separated by a steel plate as long as the fin, 2ft. wide and 1in. thick. The upper half of this plate is within the hull and the lower half outside within the fin. The floors and angles inside straddle the three plates forming the fin, the rivets are driven into the two exterior plates and the three plates, and the part of the fin inside is well riveted to the floors and angles.

The lead itself is in two halves, showing a very easy taper fore and aft, each piece resting on the angle at the bottom of the fin, and the two secured with through bolts. The spaces between the two plates are filled with lead at the bottom and from the top of the fin of the central plate at the top with common inch boards.

Unlike the fin-keels, all of which were fitted with the balance, or, as it has been called, the "nasty" rudder, Pilgrim, like the little Folly before described in the FOREST AND STREAM, has a rudder of the usual form and construction, and hung on a forged steel sternpost, as in all steel yachts; this sternpost being supported by a triangular scap of steel plate. The sternpost has a rake of some 30°.

Although the yacht is set down as a pure fin-keel as distinguished from the combination of fin and centerboard in the other Boston boat, she at the same time has a centerboard of some 800lb. weight; but its use is only as an auxiliary, to aid the steering and not to add to the lateral plane. This board is about 7ft. long, and is located between the fore end of the waterline and the fore end of the fin. It is raised and lowered by a powerful worm winch.

The deck is of white pine of less than the usual thickness, with low skylights, companions and sail hatch of mahogany. The gammon iron is a heavy forging bolted to the steel framing of the deck, and on the deck abaft it is a steel tube, also fastened to the deck frame, to take the heel of the bowsprit. The rig will be the smallest of the four, somewhat larger than the area of Volunteer when rigged originally as a cutter, or about 10,000ft. The sails have been made by Wilson & Silsby, and the spars by Lawley, while Billman has made and will set the rigging. Like all the other American boats, Pilgrim will steer with a wheel.

The idea of a Boston syndicate yacht was first suggested early in the year by Messrs. Stewart & Binney, and it has been chiefly through their exertions that the syndicate was organized and the work has been carried out. The leading members of the syndicate are Vice-Com. Gardner, Eastern Y. C., owner of Mayflower; Bayard Thayer, owner of Commodore, New York Y. C.; Nas Jones, owner of Marguerite; David Sears, owner of Wayward; J. E. Addicks, owner of Now Then; Dr. C. G. Weld, H. F. Sears, W. B. Thomas and C. H. Hanks. The design and construction originated with Messrs. Stewart & Binney, and the hull was built by Pusey & Jones, of Wilmington, builders of Volunteer, under their personal supervision. The yacht was launched on June 12, being christened Pilgrim by Mrs. George E. Bullard, mother of Mr. Binney, and was at once towed to New York. Marguerite, in charge of Captain Edward Sherlock, lately in command of Marguerite, and for some years in charge of Gitana for the late Wm. F. Weld. Apart from his previous record, Captain Sherlock's handling of Marguerite last year stamps him as an able and experienced racing man, and in his hands the new boat is likely to have a fair and thorough trial.

Southern Y. C., Walker Cup.

NEW ORLEANS—LAKE PONTCHARTRAIN.

Saturday, June 17.

THE first race ever sailed for the new and elegant trophy presented by Mr. Walker as a challenge trophy for yachts of New Orleans, Mobile and Pensacola, took place on Lake Pontchartrain under the management of the Southern Y. C., the first holders of the cup. No outside yachts were on hand to compete, and the race was limited to eight of the club boats, as follows:

	Length.	Allows
Silence, P. Labouisse.....	33.08	m. s.
Lady Emma, N. E. Baumgarden.....	33.68	
Mephisto, Brewster.....	30.72	3 29
Caprice, W. E. Brunet.....	29.06	9 21
Nyanza, Stone, Ranlett & Co.....	26.06	9 41
Lufki Humma, Glenn Bros.....	25.09	11 01
Touty, Dr. R. Murphy.....	24.03	13 53
Barton B., H. O. Benedict.....	23.01	16 13

Silence and Lady Emma were once as well known in New York as in New Orleans, having been noted racers in their day.

The course was three rounds of the club's five mile triangle, 15 miles in all. The day was bright and clear, but at the start there was only a light and puffy S.E. wind. The preparatory signal was fired at 1:57:00, the starting gun at 2:07:00, and the handicap gun at 2:17:40. The start was timed:

Lady Emma.....	2 10 14	Lufki Humma.....	2 17 15
Nyanza.....	2 15 08	Caprice.....	2 18 00
Touty.....	2 16 05	Silence.....	2 20 28
Barton B.....	2 16 28	Mephisto.....	2 23 18

Silence and Mephisto were far from the line at the start, and were back-capped. Shortly after the start the wind freshened into a good sailing breeze. Silence and Mephisto sailed through the fleet and were second and third before the first round was completed, Nyanza being first.

Nyanza.....	3 30 29	Touty.....	3 38 37
Mephisto.....	3 31 37	Lufki Humma.....	3 41 14
Silence.....	3 34 15	Barton B.....	4 00 40
Lady Emma.....	3 36 27	Caprice.....	4 05 32

As Mephisto rounded the mark, a rowboat with a flag, she jibed over and struck the mark with her boom, nearly capsizing the boat and tearing her mainsail. She kept on in spite of the foul, but was disqualified by the judges, who witnessed the occurrence. For a time the wind was quite strong, being now from S.W., but on the second round it fell light and on the last died away to almost a calm. The rounds were timed. Second:

Nyanza.....	4 21 21	Touty.....	4 42 18
Mephisto.....	4 22 42	Lufki Humma.....	4 43 47
Silence.....	4 25 39	Barton B.....	5 49 30
Lady Emma.....	4 29 27	Caprice.....	Not timed.

Third:

Mephisto.....	5 40 32	Silence.....	6 16 22
Nyanza.....	5 48 37	Others not timed.	

The final times were:

	Elapsed.	Corrected.
Mephisto.....	3 22 53	3 19 03
Nyanza.....	3 32 19	3 23 15
Silence.....	3 58 42	3 58 42

Mephisto was disqualified without protest, making Nyanza the winner of the cup. The judges were R. S. Day, Capt. E. T. Cope and R. M. Robertson. Mr. W. T. Sadler, of Mobile, was appointed a judge, but being absent, Mr. R. M. Robertson took his place.

Puget Sound Yachting.

Editor Forest and Stream:

It would be a source of some surprise to Eastern yachtsmen to realize the degree of yachting interest and enthusiasm that exists in the extreme Northwest. Puget Sound and the Gulf of Georgia form a magnificent inland sea at the boundary line between the United States and British Columbia, and the spirit of rivalry that always forms a part of a yachtsman's nature is here intensified by the national pride on either side the line, resulting in a constant and always interesting strife for supremacy in yacht racing. The approaching international event in New York creates here no such general enthusiasm as our own local international contests. To recognize and encourage this we have an International Yachting Association, composed of all the yacht clubs on Puget Sound and Gulf of Georgia, and a regatta is held by it annually for the international trophies. Up to this time the yachts of the United States have proven, as a rule, too speedy for our British neighbors.

The British Columbia yachts are, as a rule, built from designs pro-

cured in England, and we are compelled to draw upon the talent of our Eastern United States designers for our best racers, though we have some local designers who are producing creditable work. Up to this time no Eastern designer has been able to supply us models to compete successfully with the Bouncer type from designs of Thos. Clapham, of Long Island. It was thought by many that the fin keels built during the past winter would probably be successful against our Clapham skimmers; but, true to our rule, the Bouncers were found first in every class in which they competed. The latest Bouncer production is "Mylth, an improved "Chippaway" about 40ft. over all, with 14ft. beam and only 15in. draught. In the late international races at Victoria B. C. she not only won in her class, but beat all yachts in the classes above her, without time allowance. We find here the same national tendency manifesting itself in our yacht construction as has heretofore been observable in the East. Our British Columbia yachtsmen cling almost exclusively to the deep keel cutter type, while on this side the line the tendency is toward the centre-board, though we have some beautiful and able keel yachts here; but in all our contests the centreboards have shown the greatest speed, as a class. BOB S. AY.

WHATCOM, Washington, June 15.

Eastern Y. C. Annual Regatta.

MARBLEHEAD—MASSACHUSETTS BAY.

Monday, June 26.

THIS annual regatta of the Eastern Y. C., sailed off Marblehead on Monday, was a very tame affair, with few starters and little wind. There was a promise of sport in the meeting of Volunteer in new hands, with Mayflower, the extensive alterations just completed in the latter having presumably improved her; and the race of the 46ft. class was awaited with some interest as likely to give an indication of the speed of the larger fin-keels through the performance of the new Carmita with Wasp and Harpoon. As it happened, the schooner race was very unsatisfactory, the wind being light and the finish a calm, while Carmita did not start at all, though under way during the day. In the 30ft. class there was no race, as Handsel gave up after the first leg, having no competitor. The entries were:

SCHOONERS.

Sailing Length.

Volunteer, Com. J. Malcolm Forbes.....	92.14
Mayflower, Vice-Com. W. Amory Gardner.....	88.71
Marguerite, H. W. Lamb.....	83.74

46FT. CLASS.

Wasp, E. R. Coleman.....	55.37
Harpoon, G. C. and C. F. Adams, 2d.....	54.83
Carmita, C. H. W. Foster.....	54.14

32FT. CLASS.

Chopquoit, C. H. Jones.....	32.23
Handsel, J. R. Hooper.....	32.23

Boston has been patiently enduring a spell of cold rainy weather with northerly winds, and though Monday was clear, the wind was still in the same unpleasant quarter, the air was chilly, and there was a roll to the sea which awakened many a responsive chord among the guests on the club steamer.

The wind was light, E. by N., and the yachts worked out so slowly that the committee postponed the start for twenty minutes. The course signals were set for the 32 mile triangle between Nahant, East in the Point, and the E. Y. C. turning buoy, an isosceles triangle, with a base of about four miles and two equal sides of about five miles each, the starting point Half Way Rock being in the center of the base. This made approximately a run of 7 miles, a beat of 8 1/4 miles, a close reach of 9 1/4 miles and a run of 6 1/4 miles.

The start was given at 11:35, Volunteer, mistaking the first whistle, having already crossed and being on her way back when Marguerite sent over, with spinnaker boom dropped to port. Mayflower following Marguerite, the latter carrying a couple of minutes later, just having a handicap. Both Marguerite and Mayflower set spinnakers at once, Mayflower also carrying her balloon jibtopsail; but Volunteer made the run without her spinnaker, setting balloon jibtopsail and maintopstaysail.

Handsel led the smaller class, with Harpoon, setting spinnaker and balloon jibtopsail, just astern of her, Wasp crossing a couple of minutes later. The start was timed:

Marguerite.....	11 37 00	Handsel.....	11 45 45
Mayflower.....	11 37 07	Harpoon.....	11 46 08
Volunteer.....	11 39 36	Wasp.....	11 47 35

The yachts ran off easily, being little troubled by the sea. Mayflower soon passed Marguerite, but could not get far away from her, and Volunteer ran up on the pair. Harpoon led Wasp, and made quite a gain in the last quarter of a mile, carrying the balloon right up to the mark. The times at the Nahant mark were:

Mayflower.....	12 31 00	Harpoon.....	12 37 38
Marguerite.....	12 31 59	Wasp.....	12 38 22
Volunteer.....	12 32 44	Handsel.....	12 47 16

The next leg was more interesting as sheets came in and the yachts settled down for windward work. Mayflower setting a maintopstaysail, while Marguerite sent up the fisherman's stay which Capt. Sherlock had made for her, a small trawl sail. Mayflower jibed over on the other two, all holding on port tack for the first hour. Volunteer passed Marguerite and gradually drew up on Mayflower's weather quarter. The first tack was made in company, but after a time they broke tacks, coming together near the E. Y. C. seamark half an hour later, Mayflower easily crossing Volunteer's bow, while Marguerite on the ruling tack forced Volunteer to give way. Mayflower's new mainsail was in poor condition for windward work, but she held about her Volunteer. Wasp and Harpoon held together long enough for the former to work out to windward and well clear, then Harpoon cast about for luck and went off shore, but dropped into Wasp's wake as they came for the mark. The times were:

Mayflower.....	2 29 09	Wasp.....	2 30 43
Volunteer.....	2 29 52	Harpoon.....	2 34 57
Marguerite.....	2 30 00		

The next leg was rather dull, the wind falling. Mayflower made quite a gain, and Marguerite passed Volunteer, turning just ahead, but making a wide sweep and allowing Volunteer to slip inside of her. Wasp had come up with the schooners, and Harpoon had also gained, although delayed by dropping her balloon jibtopsail overboard. The times at Eastern Point being:

Mayflower.....	3 34 45	Wasp.....	3 41 04
Marguerite.....	3 40 25	Harpoon.....	3 53 15
Volunteer.....	3 40 46		

When the yachts turned and set spinnakers there was a prospect of a speedy finish, with but 6 miles to go; but soon after the wind dropped entirely, making little more than a drift in. Wasp crept up to the head and Volunteer gradually drew past the two schooners, but the finish was dull and devoid of interest. The official times were:

	Start.	Finish.	Elapsed.	Corrected.
Volunteer.....	11 39 36	5 56 00	6 10 24	6 16 24
Marguerite.....	11 37 00	6 15 10	6 28 10	6 32 32
Mayflower.....	11 37 07	6 14 09	6 36 54	6 44 43

30FT. CLASS.

Wasp.....	11 47 35	6 00 35	6 15 35	6 15 35
Harpoon.....	11 46 08	6 18 11	6 33 01	6 33 30
Handsel.....	11 45 41	withdrew.		

Volunteer wins \$100 and Wasp \$75 in addition to the Puritan Cup, given this year for the best corrected time in any class. The race was managed by Messrs. Eaton, Buck and Jackson of the regatta committee. Com. Morgan, New York Y. C., came into Marblehead in the May on Sunday and followed the race for a time on Monday, finally heading for Cape Cod and Vineyard Haven. But few yachts were out to witness the race, Fortuna, Carmita, Alborak and four or five steamers. Carmita, though launched some weeks since, was not yet in condition, and on the previous day she had sailed a scrub race with Alborak in which she was decidedly worsted, so that she was not willing to face Wasp and Harpoon on Monday.

Quincy Y. C. Club Race.

QUINCY—BOSTON HARBOR.

Thursday, June 25.

The second club race of the Quincy Y. C. was sailed in a variable easterly breeze, from light to fresh, on June 25, the times being:

	Length.	Elapsed.	Corrected.
Beatrice, John Cavanaugh.....	1 30 30
White Fawn, A. E. Jones.....	1 42 08
Moodyne, A. J. Shaw.....	1 47 11
Gipse, H. Drinkwater.....	1 49 23
Adolph, H. Moebis.....	1 50 55
Vanessa, A. Bigelow.....	Withdrawn.

SECOND CLASS.

Opeechee, W. P. Parker.....	19.08 1/2	1 39 06	1 11 57
Maggie, H. G. Otis.....	19.08 1/2	1 42 10	1 15 01
Aurora, H. M. Faxon.....	19.08 1/2	1 42 35	1 15 26
Vision, G. Crane.....	1 42 51

THIRD CLASS.

Imp, G. Maybury.....	16.03	1 40 49	1 09 49
Primrose, H. M. Faxon.....	1 44 05
Dandelion, A. Alams.....	17.06	1 44 02	1 13 30
Sunbeam, H. B. Faxon.....	1 41 28
Don, W. H. Shaw.....	18.04 1/2	Withdrawn.
Flora Lee, C. D. Lanning.....	Withdrawn.

Lake Minnetonka Y. C. Open Regatta.

LAKE MINNETONKA, MINNESOTA.

Saturday, June 17.

OPEN boat racing, such as has largely gone out in the East, still flourishes on the Western lakes, and just now it is having a boom on Lake Minnetonka, in Minnesota, as well as on other neighboring waters. This year the Minnetonka fleet has been increased by three notable boats in particular, the Horseshoe Alpha, last year's winner in the Boston 21ft. class, a new "Alpha," the Kite, specially built by the Horshoffs, and a dark horse, built under lock and key by two young yachtsmen, Arthur Dyer, a local builder, about 23 years old, and Ward C. Burton, 17 years old, son of H. J. Burton, a member of the L. M. Y. C.

The new boat, Onawa, is 27ft. over all, 20ft. 6in. l.w.l., and about 5ft. beam, carrying 400sq. ft. of sail. She has a short counter, her overhang being all forward, and her model is spoon-shaped, full and convex lines. The construction is peculiar, the planking is very light, with wide, thin ribs spaced close together, making almost a double skin, while outside she is covered with canvas laid in varnish on the planking. The sail plan shows a large jib and square-headed mainsail. Under the very peculiar rules of the L. M. Y. C., in which sail area alone is taxed, she receives some twelve minutes allowance from Alpha and Kite, with nearly double the sail area. The race was sailed in a fresh S.E. breeze with twelve starters in the sloop class, Onawa, Alpha and Kite being well in the lead from the start. On the first leg Onawa made nearly four minutes gain on both Alpha and Kite, the Alpha being disabled on the second leg by the peeling of her jib-halard, which accident forced her to withdraw. Onawa increased her lead through the whole race, finally beating Kite by 7m. 40s. elapsed time, not counting her large allowance. The official times were:

FIRST CLASS SLOOPS.			
Onawa.....	1 46 11	Aurelia.....	2 00 07
Kite.....	1 51 51	C. L. C.....	2 03 20
Siren.....	1 56 54	Ida.....	2 02 10
Mystic.....	2 07 17	Aurora.....	2 01 46
Advertiser.....	2 06 05	Shark.....	2 10 08
Waterwitch.....	2 19 28		

FIRST CLASS CATS.			
Atlanta.....	2 03 09	Mabel.....	2 14 21
Columbia.....	2 12 54	Curlew.....	2 09 26

The judges were Maj. Hale and Messrs. Benton and Branch.

Douglaston Y. C. Annual Regatta.

DOUGLSTON—LITTLE NECK BAY.

Saturday, June 24.

The annual regatta of the Douglaston Y. C. on Saturday was sailed very successfully, the wind being from the north at first, but afterward coming in fresh from S.W. The times were:

CLASS 3—SLOOPS, CUTTERS AND YAWLS, 30 to 36ft.			
Sasqua.....	12 48 00	Did not finish.	Corrected.
Vorant.....	12 52 00	Did not finish.	
CLASS 4—SLOOPS, CUTTERS AND YAWLS UNDER 30ft.			
Duster.....	12 52 10	5 26 30	4 31 32½
Chippewa.....	12 50 30	4 52 30	4 02 00
Katrine.....	12 53 15	Did not finish.	
Estella.....	12 53 45	Did not finish.	
Kitty.....	12 51 30	5 12 25	4 20 55
CLASS 5—CABIN MAINSAIL BOATS OVER 22ft.			
Oconee.....	12 53 40	5 15 20	4 22 40
Aura.....	12 52 20	4 23 40	4 23 40
CLASS 6—CABIN MAINSAIL BOATS UNDER 22ft.			
Willada.....	12 53 05	5 57 50	5 01 22½
Melita.....	12 54 10	Did not finish.	
Caper.....	12 55 35	5 27 20	4 31 45
Adelaide.....	12 52 40	Did not finish.	
CLASS 8—OPEN MAINSAIL BOATS 17 to 22ft.			
Baby.....	12 53 15	5 40 00	4 46 45
Concha.....	12 56 30	5 34 00	4 38 30
Ida K.....	12 55 14	5 15 25	4 20 11
Eleanor.....	12 53 40	Did not finish.	
Sadie.....	12 55 10	Did not finish.	
Elftwa.....	12 56 15	5 45 00	4 49 45
Phyllis.....	12 54 05	4 58 35	4 04 30
Violet.....	12 54 45	Did not finish.	
Typhoon.....	12 55 20	Did not finish.	
Elf.....	12 56 30	Did not finish.	
CLASS 9—MIXED RIGS UNDER 17ft.			
Dove.....	12 55 12	2 21 50	1 26 38
Becky.....	12 56 10	Did not finish.	
Tot.....	12 55 15	Did not finish.	

Chippewa was disqualified for sailing the wrong course.

South Boston Y. C., First Championship.

SOUTH BOSTON—BOSTON HARBOR.

Saturday, June 24.

The first of the series of three championship races of the South Boston Y. C. was sailed on June 24. The weather was fine, with good sailing breeze and no flukes. Wind, east northeast, quite steady. Tide, going flood, no advantage:

FIRST CLASS.				
Length.	Start.	Elapsed.	Corrected.	
Violet, H. J. McKee.....	33.08	2 50 00	2 51 35	2 22 23
Quisset, W. T. Taylor.....	25.09	2 50 00	2 52 01	2 14 29
Stanley, W. L. Colson.....	26.00	2 50 00	2 58 05	2 20 53
Grace, C. D. Porter.....	25.05	2 50 00	Withdraw.	
SECOND CLASS.				
Good Luck, J. B. Farrell.....	21.10	2 55 00	1 44 35	1 12 18
Awilda, John J. Bligh.....	24.07	2 55 00	1 46 23	1 17 16
Wapiti, James Bertram.....	23.06	2 55 00	1 51 37	1 21 23
Julia, W. H. McLeod.....	21.11	2 55 00	2 01 30	1 29 19
B. B., W. B. Stone.....	23.07	2 55 00	2 04 59	1 34 40
THIRD CLASS.				
Trife, J. F. Cashin.....	18.07	3 00 00	1 36 59	1 08 33
Cook, Thos. Murphy.....	18.08	3 00 00	1 38 32	1 10 12

Winners: Class 1—Quisset first, Stanley second. Class 2—Good Luck first, Wapiti second. Class 3—Trife first. The storm of the last two days prevented a number from entering; weather very kindly cleared in time to allow the race. Wapiti protests Awilda for fouling at Buoy 7 and also for fouling mark; both allowed, giving Wapiti second prize. Wapiti broke rudder pintle, but not in the fouling. Judges, Arthur Fuller, Hubert Pope, C. McKenna, W. H. Godfrey and Thomas Christian.

In the May 30 race, the Maggie and Egeria counter protests on measurement did not change result; Egeria was 3in longer on waterline. The Marion, fourth class, protested Princess for fouling at mark; protest allowed, giving Marion third prize.

Seawanhaka Corinthian Y. C. Races.

OYSTER BAY—LONG ISLAND SOUND.

Saturday, June 17.

The proposed races for the Hoyt cups for naphtha launches were run off at Oyster Bay on June 17, being followed in the afternoon by the first race for the Rouse and Wetmore series. The weather was thick and hazy, with a strong N.E. wind. The times were as follows:

Courses straight off club house dock, thence to Cold Spring Light, keeping it on starboard hand, thence to Moses Point Buoy, keeping it on starboard hand, thence to finish off club house dock.

CABIN CLASS I.				
Length.	H.P.	Start.	Finish.	Elapsed.
Tide, Colgate Hoyt.....	30	11 25 00	12 04 05	39 05
Alma, John Agar.....	30	8 11 25 00	12 06 10	41 10

OPEN CLASS II.

Eleanore, Wm. Youngs.....	25	4 11 25 00	12 09 41	44 41

As Mr. Hoyt gave these cups he will not accept the one his launch won, so puts it up again for all comers some time in July.

Judges, R. W. Gibson and R. C. Townsend.

ROUSE AND WETMORE CUPS.

Course: Starting from east to west across a line between the Bell Buoy (now Red Spar) and stakeboat, around Center Island Buoy, leaving it on starboard; thence around Lloyd's Neck Buoy, leaving it on starboard; thence around Bell Buoy (now Red Spar), leaving it on starboard; thence around Center Island Buoy, leaving it on starboard; thence around Lloyd's Neck Buoy, leaving it on starboard; thence to finish line, crossing same from east to west.

Start.				
Turn.	Finish.	Elapsed.		
Pxyie, Oswald Sanderson.....	2 55 00	3 06 49	5 16 28	2 21 28
Nameless, C. W. Wetmore.....	2 55 00	3 07 05	Disabled.	
Trinket, T. S. Young, Jr.....	2 55 00	3 07 30	5 31 58	2 36 58
Indolent, S. V. R. Cruger.....	2 55 00	3 06 20	5 26 50	2 31 50
Almira.....	2 55 00	3 07 08		
Anemone.....	2 55 00			

The race was sailed in a strong wind and sea. Nameless is sailing with a larger rig this year and has been twice disabled, breaking her hobstay in this race. Judge, R. W. Gibson.

YACHT NEWS NOTES.

The Horseshoe Harbor Club, of Larchmont, sailed its spring regatta on June 17, the principal event being the race for the yawl class, in which was entered the yawl Kittie and the new yawl Audax, lately built for Mr. H. W. Eaton. The course was nine miles, the wind fresh N.E. The two were evenly matched off the wind, but to windward Audax outpointed Kittie and beat her badly in the four miles, the time being: Audax, 1:31:02; Kittie, 1:35:38; Kittie's corrected time was 1:35:40.

The arrangements for the Seawanhaka Corinthian Y. C. regatta on Saturday are different from previous years, there being no club steamer from New York. The regular club steamer Dunderberg will be at the railroad dock, Oyster Bay, to meet the 9 A. M. train from New York, carrying the guests to the club house and following the race for a time, returning to the house for luncheon and afterward going out to see the finish. The steamer will make regular trips to connect with the evening trains after the race.

Canoeing.

Secretaries of canoe clubs are requested to send to FOREST and STREAM their addresses, with name, membership, signal, etc., of their clubs, and also notices in advance of meetings and races, and report of the same. Canoeists and all interested in canoeing are requested to forward to FOREST and STREAM their addresses, with logs of cruises, maps, and information concerning their local waters, drawings or descriptions of boats and fittings, and all items relating to the sport.

FIXTURES.

JULY.

1-15. At. Div. Meet, Captain's Island. 15-30. W. C. A. Meet, Ballast Island. 29. Red Dragon, Delaware River. 22. Toronto, International Paddling Trophy Race.

AUGUST.

11-26. A. C. A. Meet, St. Lawrence River.

SEPTEMBER.

2. Orange An., Arlington, N. J. 4. Holyoke, Fall, Holyoke, Mass. 4. Ianthe, An., Passaic River. 16. Red Dragon, Delaware River.

The Marine and Field Club regatta of Saturday was the most successful of the year, but hardly up to previous ones, the entries being fewer: We are able to give but a brief summary this week. A number of those present were just from the meet of the Eastern Division at Haddam Island, and all united in pronouncing it a great success.

The Humber Yawl Club.

The Humber Yawl Club, of Hull, England, the only canoe-yawl club in the world, is fortunate in the possession of a goodly number of artist sailors who strive with each other to make the annual club

pamphlet a work of art, as well as a faithful record of the club's progress. We reproduce herewith the frontispiece, showing two of the associate members of the club; together with a design of a new canoe-yawl and some sketches of canoe-yawl life. The club now has a membership of 53 and a fleet of 52 canoe-yawls, canoes and dinghies.

A. C. A. Membership.

Eastern Division: Joseph Bennett, Tyngsboro, Mass.; G. Selden Roorbach, Mystic, Conn.; H. Monmouth Smith, Middletown, Conn.; H. E. Damon, Boston, Mass. Atlantic Division: W. H. P. Veysey, Percy R. Engwell, Yonkers, N. Y. The name published last week should read E. R. von Nardroff.

Marine and Field Club Regatta.

BATH BEACH—NEW YORK HARBOR.

Saturday, June 26.

The annual canoe regatta of the Marine and Field Club was sailed on June 24, the official times being as follows:

Start.	Finish.	Elapsed.
Aztec, W. W. Howard.....	11 35 00	12 30 55
Wasp, Paul Butler.....	11 35 00	12 31 08
Bee, David Goddard.....	11 35 00	12 33 55
Damosel, William Whitlock.....	11 35 00	12 37 51
Torment, F. C. Moore.....	11 35 00	12 39 15
Pioneer, C. B. Vaux.....	11 35 00	12 39 45
Event No. 2, cruiser race, boats 18ft. waterline or under, to carry one man besides helmsman, 6 miles:		
Goblin, William S. Elliott.....	12 58 45	2 45 30
Viking, H. P. Allen.....	12 58 25	2 52 47
La Gloria, M. T. Bennett.....	12 58 57	2 59 45
Event No. 3, club sailing, one man from each club, 6 miles, twice around triangle:		
Wasp, Paul Butler.....	3 31 50	4 29 37
Torment, F. C. Moore.....	3 32 00	4 35 10
Eclipse, F. L. Dunnell.....	3 31 30	4 40 54
Pioneer, C. B. Vaux.....	3 31 20	4 42 03
Damosel, William Whitman.....	3 31 25	4 45 20
Event No. 4, the Marine and Field Club cup, 6 miles, to be won twice in succession it becomes the property of the winner, 6 miles:		
Torment, S. Schieffelin.....	5 21 00	6 17 38
Aztec, W. W. Howard.....	5 21 00	6 18 38
Bee, D. Goddard.....	5 21 00	6 19 04
Eclipse, F. L. Dunnell.....	5 21 00	Did not finish.
Pioneer, C. B. Vaux.....	5 21 00	Did not finish.

The four paddle race was won by the Ianthe crew, beating the Bayonne crew by three lengths.

Rifle Range and Gallery.

New York Schuetzen Corps' Prize Shoot.

The thirty-sixth annual festival and prize shoot was held in the Union Hill Park on Wednesday and Thursday of last week.

The energetic labor and influence of the present captain, Henry Hoffman, during the past half year has resulted in a large increase in the membership present. Another happy feature on the second day were the large delegations of visiting riflemen, representing the principal shooting societies of New York and vicinity. There was a large contingent from the Independent New York Corps, under the leadership of Capt. Wm. V. Weber; New York Central Corps, Capt. A. Richter; New York City Corps, Capt. Christ. Rehm; Hoboken Corps, Capt. Geo. R. Fredericks; Hoboken Independent Corps, Capt. A. Erx-

Among the prominent riflemen present were Wm. Hayes, of Newark; Fred. Ross, Henry Holges and Louis Flach, of the Zettler Club; David Miller, of Hoboken; L. P. Hansen, of Jersey City. There were also to be seen scores of other stars of lesser light in the shooting fraternity all vying with each other in the race for prize honors.

There was present a visiting shooter from Europe on his way to Chicago, Mr. Carl Graf, one of Germany's solid citizens, a wealthy manufacturer and an enthusiastic rifleman. He takes one of the Zettler Bros.' Ballard rifles with him to the Chicago shoot. He says he prefers the American arm and ammunition in America. In this decision the gentleman probably bases his judgment on the experience of some of the visiting American riflemen to Germany in 1890; the latter claimed that the American powder in Germany did not do its work with the uniformity that the Germans would want in a rifle. The target proper was a disk 4in. in diameter, placed (in a pocket) in the center of a 12in. black. To hit this disk was to entitle the shooter to the credit of a red flag on the premium list, and according as the bullet encroached upon the center of the disk so were the shooter's chances enhanced for getting the first prize for the best center shot.

During the two days' shoot the number of flags made by the many shooters in the competition ran up in the hundreds. To separate each individual center and credit it to the shooter making it, and then to separate and measure the best of the lot, looks like an endless job; but after the close of the shoot Barney Zettler, the shooting master of the corps, selected a committee from the riflemen present as assistants, and with the boxes of bulletseyes under one arm he led the way to one of the committee rooms in the castle, where he and his committee were soon at work.

The bulletseyes were first separated into individual lots to the credit of the shooter making them, then from each lot was selected the one containing the shot approaching the nearest to the center. When this had been done the measuring machine was brought into use. This had been the work in the matter of getting at the final results of the two days' shoot was highly interesting. There were many bulletseyes that to the naked eye looked to be a tie, or so close that only the machine could indicate which was the best, but at last when every shooter's best disk had taken its turn through the machine the results were found to be as follows:

Target.	Degrees.	Target.	Degrees.

An Uniform Target System.

ALTON, Ill., June 14.—Editor Forest and Stream: Would it not be possible, through the FOREST and STREAM, for the rifle shooters of the country to adopt a uniform system of targets? As the reports of matches are now given it is utterly impossible to tell whether the shooting is good, bad or indifferent. Every rifle club seems to have adopted some system of its own. We could not but be a good gain to get an expression from some of the leading clubs, East and West, as to the merits of the various targets now in use? Our club, the Piazza Rod and Rifle Club, have adopted the Massachusetts target for 100 and 200yds., and the Zettler target for 75 and 100ft.; the Massachusetts target, 12 center and one less for every inch out; the Zettler 25 center and 14in. rings. I would like to hear from other clubs.

Our friend Mr. Willis, of the Piazza Club, outclasses us a little in shooting, but those powerful eyeglasses take him to within 25ft. of the target, while we stand at 75ft. This is not right. E. H. LARER.

Greenville Rifle Club.

WEEKLY gallery shoot, Friday night, June 23: 10 shots, possible 250, distance 75ft. Plaisted 241, Robidoux 238, Collins 239, J. Boag 237, J. Dodds 236, C. Boag 236, Purkess 235, Chavart 231, Gotthardt 230, Spahn 230, Gassman 231, Lembeck 210.

The members met in Armbruster's Park on Saturday, June 24, for outdoor practice. Many of the members have had but very little experience at 200yds., and as a consequence their shooting is somewhat erratic, but with such men as Messrs. Ross and Dorrier as preceptors there are opportunities for rapid advancement. Most of the afternoon was devoted to pool shooting. The following 10-shot scores were noted by the news scribe: Ross 234, Dorrier 232, Chavart 211, Plaisted 208, Purkess 197, Collins 196, Boag 194, Robidoux 186, Spahn 180, Hill 160, Kaiser 155, Hovington 150.

Columbian International Festival.

OFFICE OF THE SECRETARY, 49 LaSalle street, Chicago, June 20.—Following are the records for the Columbian international rifle shooting held June 18 and 19 at Sharpshooters' Park, near Lewis and Clark, which took part were: Rob. Unzicker, Peru, Ill.; Louis Ritzau, San Francisco; George W. Ziegenfuss, Winona, Minn.; Dr. M. D. Tibbets,

Highland, Ill.; Sylvester Leaf, Grant Fork, Ill.; H. Goettsche, Chicago; Geo. Roth, Highland, Ill.; Fred Pfeiffer, Chicago; James Montgomery, Owensville, Ind.; W. H. Regennitter, Davenport, Iowa; C. H. Gmelin, Bloomington, Ill.; Geo. Sengel, Fort Smith, Ark. To all these gentlemen the Columbian medal was awarded. The following scores were made:

Bulleseye Target—Sylvester Leaf, 4 flags out of 100 shots; Dr. M. D. Tibbets 8, J. Montgomery 19, Rob. Unzicker 14, W. H. Regennitter 12, Louis Ritzau 10, Geo. Roth 10, Geo. M. Ziegenfuss 10.

Columbia Target—Sylvester Leaf 30 out of 75 rings, Dr. M. D. Tibbets 55, Geo. Roth 51, Geo. Ziegenfuss 49, Louis Ritzau 50, W. H. Regennitter 59, J. Montgomery 53.

Stick—Best point to Dr. M. D. Tibbets. Standard—W. H. Regennitter 33, J. Montgomery 36, M. D. Tibbets 36, People's Target—M. D. Tibbets 66, F. Pfeiffer 66, W. H. Regennitter 67, J. Montgomery 66.

Man—W. H. Regennitter 83, J. Montgomery 80, F. O. Young 88, M. D. Tibbets 45, F. Pfeiffer 80, Geo. Roth 76.

King—Louis Ritzau 174, M. D. Tibbets 197, Geo. Roth 173, Sylvester Leaf 120, Geo. Ziegenfuss 176, W. H. Regennitter 190, F. Montgomery 192.

The best scores up to date: Columbia 64, King 205, People's 168, Man 89, Standard 46, and 21 flags out of 100 shots.

A. BOESE, Secretary.

Cincinnati.

CINCINNATI, O., June 18.—The Cincinnati Rifle Association held its regular practice shoot at its range to-day. Conditions 300yds off-hand at the standard target. Weather fine, but a strong, steady 9 o'clock wind bothered the shooters considerably, making good shooting rather uncertain:

Gindele.....	8 8 9 8 7 8 10 9 9 9 85
Payne.....	10 8 10 9 8 8 10 10 7 7 87
Brumback.....	10 9 7 9 9 10 8 9 8 8 88

North End Rifle Club.

EPHRAATA, Pa., June 26.—On Friday afternoon last the members of the North End Rifle Club met on their range in Ephrata to practice at rest shooting, distance 200yds., best score out of a possible 120 points. The weather clear and cool, but terribly blustery, and the sudden gusts coming round the hill made it almost impossible for good shooting to be done. The following were the best three out of five scores of 10 shots each to each man:

D B Lefever.....	10 9 8 8 6 9 8 10 11 11 90
W D Winters.....	6 9 8 7 8 9 12 9 8 9 85
S L Sharp.....	8 9 11 8 7 8 8 8 8 9 84 259
L M Wiest.....	8 12 9 9 11 7 11 7 8 6 88
J W Sheaffer.....	8 8 7 12 8 7 8 11 8 4 257
	8 8 8 8 7 6 9 12 10 8 84
	5 5 10 10 10 9 10 7 9 8 81
	6 10 9 8 9 7 11 9 10 88 253
	8 9 9 9 11 8 8 7 9 9 87
	9 10 8 9 7 7 6 8 8 8 80
	7 7 9 10 8 8 7 8 7 10 81 246
	6 10 10 11 8 9 10 11 8 83
	8 6 8 7 9 7 9 9 8 11 82
	8 11 9 7 6 8 6 7 8 9 78 253

The next regular meeting will be held on Friday, July 14, and will be off-hand.

D. B. LEFEVER, Secretary.

New York City Schuetzen Corps.

The monthly practice shoot in Washington Park on Friday, June 23, was well attended considering that the members were hardly recovered from the fatigues consequent to the New York City Festival of Wednesday and Thursday previous. R. Busse carried off the honors on the ring and man targets. The scores are appended:

Ring target, 10 shots, possible 250: R. Busse 212, John Facklam 195, Otto Uhllein 194, Christ. Rehm 174, H. Radloff 173, Otto Arnstein 159, Amb. Stolzenberger 163, Chas. Rothweiler 148, C. Gohmann 145, Adam Keller 143, Wm. H. Gerdes 137.

Man target, 3 shots, possible 90: R. Busse 58, C. G. Zettler 52, John Facklam 50, Christ. Rehm 49, Adam Keller 48, Otto Uhllein 47.

Red flags: Adam Keller 5, Otto Uhllein 3, John Facklam 3, H. Radloff 2, R. Busse 2, Christ. Rehm 2, C. G. Zettler 1, Joseph Dickescheid 1.

Bulleseye: Otto Uhllein 2, R. Busse 2, Schaer Leutenegger 2, H. Schuch 2, Otto Arnstein 1, Christ. D. Rehm 1, Henry A. Gerdes 1, J. Dickescheid 1, Aug. Range 1, Wm. G. Gerdes 1, Amb. Stolzenberger 1.

Germania Bund Prize Shoot.

COMPANY No. 56 of the Germania Bund of Hudson county, N. J., held its annual festival and prize shoot in Armbruster's Park, Greenville, on Monday, June 26. The first prize on the target of honor or target was won by W. Holzappel. On the people's or public target the following scores were made, 3 shots, possible 75: August Meyns 72, Fred Ross 63, Geo. Schlacht 63, E. Hansen 63, Muller 61, E. Ludvig 51, E. Kuhlman 49. First flag, E. Ludvig; last flag, Geo. Schlacht. Bulleseyes: Ross 6, Schlacht 5, Ludvig 2, Hansen 2, Miller 2.

Jersey City.

PRACTICE shoot at Armbruster's Park, June 24:

L P Hansen.....	24 34 35 22 14 19 17 33 19 19 206
C Ward.....	24 34 35 20 24 33 16 17 23 13 204
J Hughes.....	24 34 35 23 16 17 13 18 25 21 189

Turtle Bay Rifle Club.

HANDICAP shoot, June 22; 10-shot scores, three scores to count, 60ft.: J Ochs, Jr.....247 243 237—726 J Krampert.....231 235 234—702 H Walter.....246 240 240—726 K H Plate.....231 232 228—701 J Oberle.....234 239 235—708

RIFLE NOTES.

SOME of the other fellows who did not get first prize at the New York Schuetzen Corps at Union Hill last week have since then been bothering the FOREST and STREAM man with queries as to how he came to get there. As a final answer to all further questions on this subject the FOREST and STREAM man says: "Catch on to the FOREST and STREAM either with a business ad. or a subscription for a year, six months, or even ten cents invested any week. If you haven't got the ten cents, come around to 318 Broadway and inquire for the FOREST and STREAM free reading rooms. Anything connected with FOREST and STREAM in these days is a success."

The article on "Crooked Work on the Range" in our issue of June 15 is beginning to bear fruit. On every hand the general expression of all lovers of the sport is to show us money to any of those fakers who are caught making scores with the lead pencil punch. There are several suspects under surveillance among our New York and Brooklyn clubs who are liable to hear something drop in the near future unless they mend their ways.

There are a number of New York city riflemen of known shooting ability who desire to attend the Chicago Fair in September and take in the Columbia prize shoot. Having a natural pride in their municipal and State government, they would like to see the Empire State team, by representing the Columbia shoot by a team of twelve men who could down any other teams brought against them. New York State contains a good many first class off-hand shooting riflemen, and if any of them are contemplating a trip to Chicago in the fall, perhaps they would be glad to avail themselves of the opportunity of uniting with others in a New York State team for the honor of the Empire State. Any New York State riflemen who desire to connect himself with a team, by communicating with FOREST and STREAM Rifle Department will be put in communication with the other riflemen interested in the formation of a State team.

Trap-Shooting.

Communications for publication relating to business should be addressed to the Forest and Stream Pub. Co. If addressed to an individual they will be subject to delay in that individual's absence.

All ties divided unless otherwise reported.

FIXTURES.

If you want your shoot to be announced here, send in notice like the following:

July 24.—Multnomah Rod and Gun Club tournament, at Portland, Oregon.

July 34.—Coldwater (Mich.) Gun Club tournament.

July 34.—Portland (Ore.) Gun Club tournament.

July 35.—Shreveport (La.) Gun Club tournament.

July 35.—Vermilion (Gun Club) tournament, at Steator, Ill.

July 4.—Towanda Rod and Gun Club's fifth annual tournament. W. F. Dietrich, Sec'y.

July 4.—Eastern New York Trap Shooters' League tournament at Amsterdam, N. Y., under auspices of Riverview Gun Club. Rob't M. Hartley, President.

July 4.—Maplewood (N. J.) Gun Club shoot, all day.

July 4.—Valley City Gun Club tournament, Grand Rapids, Mich.

July 4.—J. A. Hartner's all-day shoot, Orangeville, Baltimore county, Md.

July 4.—Slater Gun Club tournament, at Slater, Mo.

July 4.—Central Gun Club's first annual tournament, Duluth, Minn. H. L. Heisler, Sec'y.

July 4.—Mt. Kisco (N. Y.) Gun Club tournament.

July 4.—Manufacturers' Club open swamp tournament, at Pelhamville, N. Y.

July 4.—La Crosse (Wis.) Gun Club tournament.

July 45.—Lake Geneva (Wis.) Gun Club tournament.

July 46.—New Mexico Mutual Game and Fish Protective Association's second annual tournament, at Raton, N. M.

July 46.—Lafayette (Ind.) Gun Club tournament.

July 5.—Parkersburg (W. Va.) Gun Club tournament.

July 5.—Wesley (Ohio) Gun Club tournament.

July 6.—Open-to-all shoot, 20 live birds, \$30 entry, at Willard's Park, Paterson, N. J.

July 68.—Manufacturers' Trap-Shooting Association tournament, at St. Louis, Mo.

July 11.—New Jersey State League and open tournament, on South Side grounds, Newark, N. J.

July 13.—Interstate Manufacturers' and Dealers' fourth tournament, at East Liverpool, Ohio.

July 14.—Helena (Mont.) Rod and Gun Club's annual tournament.

July 19.—Dixie Gun Club tournament, at Pensacola, Fla.

July 20.—Penberthy's trap-shooting tournament, at Massillon, O.

Aug. 7.—Pier Gun Club tournament, at Atlantic City, N. J.

Aug. 7.—Arkansas State Sportsmen's Association tournament, at Little Rock, Ark.

Aug. 9.—Missouri State Amateur Shooting Association, at Paris, Mo.

Aug. 23.—Third international live bird and target tournament, at Des-chree-shos-ka Island, Detroit, Mich.

August.—Manufacturers' Trap-Shooting Association tournament, at Wheeling, W. Va.

August.—Keystone Target Company, seventh annual tournament, at London, Conn.

Sept. 4.—Frankfort (N. Y.) Game and Fish Protective Association tournament.

Sept. 14.—Riverside Gun Club's second annual tournament, at Red Bank, N. J. John P. Cooper, Sec'y.

Sept. 26.—Pennsylvania State Sportsmen's Association tournament at Harrisburg, Pa. H. M. F. Worden, Cor. Sec'y.

September.—Manufacturers' Trap Shooting Association tournament, at Columbus, Ohio.

October.—Manufacturers' Trap-Shooting Association tournament, at Allentown and Bethlehem, Pa. (combined).

Oct. 19.—West Newburg Gun and Rifle Association fall tournament, at Newburg.

DRIVERS AND TWISTERS.

We have received the programme for the Interstate Manufacturers' and Dealers' Association tournament to be held at East Liverpool Ohio, on July 12 and 13. The programme of events is precisely the same as that of the Passaic and Altoona shoots, so that another publication of it is unnecessary. The association will guarantee \$200 each day, and the programme contains the following ancient East Liverpool: "East Liverpool is famous as the pottery center of the New World, some thirty-eight manufacturing establishments are engaged in the making of crockery, ranging from common ware to the finest productions, which for art and beauty fully equal the productions of Sevres and other famous potteries. These immense plants, employing thousands of workmen, will be open to visiting marksmen, and the advantage and pleasure to be derived from a visit and inspection of them is well worth the trip to East Liverpool. The Pottery Center of the World, a character that commands admiration. East Liverpool is situated on the Cleveland & Pittsburgh R. R., and is 47 miles north of Wheeling, W. Va., 106 miles south of Cleveland, Ohio, 150 miles east of Columbus, Ohio, and 44 miles west of Pittsburgh, Pa." Shooters' headquarters will be at the Hotel Grand, Thompson House and National Hotel. The shoot will be held at the pottery center of the grounds of the East Liverpool Gun Club, situated on the plateau opposite the city and only ten minutes' ride from the above hotels. Some of the fine scenery on the Ohio River is obtainable from here.

There will be a surfeit of shooting at the trap on July 4, nearly every club in the country having arranged to hold private or public shoots. Among the tournaments announced are those of the Multnomah Rod and Gun Club, Portland, Ore., 3d, 3d and 4th; Portland (Ore.) Gun Club, 3d and 4th; Shreveport (La.) Gun Club, 3d, 4th and 5th; Towanda (Pa.) Gun Club, 4th; East Liverpool (Ore.) Pottery Shooters' League, at Amsterdam, 4th; Maplewood (N. J.) Gun Club, 4th; Valley City Gun Club, at Grand Rapids, Mich., 4th; Hartner's all-day shoot at Orangeville, Md., 4th; Slater (Mo.) Gun Club, 4th; Central Gun Club, Duluth, Minn., 4th; Lake Geneva (Wis.) Gun Club, 4th and 5th, and the Lafayette (Ind.) Gun Club, 4th, 5th and 6th. This is quite an assortment from which to choose. It is safe to say, however, that none of the above will attract what can be called a good attendance on the 4th, as that is a day on which the "Daddies" like to remain at home, looking after the celebration by the little ones and guarding against fire. In fact a tournament on a holiday is almost sure to be a flat and dismal failure, no matter what the holiday may be.

The announcement is made that on August 7 and 8, the Pier Gun Club of Atlantic City will hold its second annual tournament, under the management of John Young and Herbert McCann of Atlantic City and Harry Thurman of Germantown, Pa. This club shoots from the pier set on the end of Young and McShea's pier, 380ft. out into the ocean, where there is always breeze enough to keep shooters and spectators cool as well as to render it difficult to make clean scores. The dates bring the tournament in at the height of the watering season when this great seaside resort is seen at its best, and the famous board walk will be filled with strollers throughout its entire three miles of length. The fishing too is at its best at that season and may be enjoyed from the sides of the pier while shooting is being done from the end.

The Winchester Gun Association, of Winchester, Va., sends us an attractive programme for a target tournament to be held on July 11, with \$100 in added money. The programme will be as follows: 10 targets, \$1 entry, \$5 added; 15 targets, \$1.50 entry, \$7.50 added; 20 targets, \$2 entry, \$10 added; 25 targets, \$2.50 entry, \$12.50 added; club team race, 25 targets, \$10 entry, \$25 added; 25 targets, entrance free, for merchandise prizes; 25 singles, \$2.50 entry, \$12.50 added; 20 singles, \$2 entry, \$8 added; 15 singles, \$1.50 entry, \$7.50 added; 20 singles, \$2 entry, \$8 added. The shooting handicap will be used after the first event. The team race will be at unknown angles, and teams are expected from Washington, Baltimore, Rockville, Staunton and other places. The City Hotel will be shooters' headquarters.

William L. Force, secretary of the Central New Jersey Fish and Game Protective Association, and Fish and Game Warden, had a narrow escape Friday afternoon from a violent death. He and a number of his friends were driving when the horse was startled, jumped, and got one of its feet caught over the wheel. Then it began to kick to free itself. Mr. Force sat on the front seat of the park phaeton. One of the flying hoofs struck him full in the breast. He fell heavily to the ground and one of the wagon wheels fractured the right arm and wrenched the elbow out of joint, tearing the ligaments. Mr. Force was taken to Muhlenberg Hospital, and his injuries properly attended to. He manfully declined to have ether administered and bore the excruciating pain without flinching.

Fairly good eyesight must be that of Miss Bertele Heynal of Berlin, judging from an item in an exchange which exploits Miss Heynal's skill with the rifle and caps the climax by saying that she can "split

Hadlyme Gun Club.

THE second tournament of the Hadlyme Gun Club was held on their grounds on June 21. There was a very good crowd in attendance: Match at 10 targets: Willey 9, Nelson 8, Burbage 6, Cook 7. Match at 10 targets: Burbage 10, Willey 8, Nelson 8, Moshier 7, Cook 7. Match at 15 targets: Burbage 13, Banning 13, Willey 11, Cook 10, Nelson 10, Pitt 9, Moshier 9. Match at 10 targets: Cook 9, Willey 9, Moshier 9, Burbage 8, Treat 8, Edgerton 9. Match at 15 targets: Banning 12, Cook 12, Burbage 12, Moshier 12, Treat 11, Willey 10, Edgerton 10, Nelson 9. Match at 10 targets: Treat 10, Burbage 9, Nelson 9, Moshier 9, Alger 8. Match at 15 targets: Treat 14, Edgerton 14, Willey 13, Burbage 13, Nelson 13, Cook 12, Spencer 12, Alger 12, Pitt 10. Match at 10 targets: Moshier 10, Cook 10, Willey 10, Burbage 9, Nelson 8, Edgerton 8, Banning 8. Match at 10 targets: Burbage 10, Nelson 10, Edgerton 9, Willey 9, Cook 9, Pitt 9, Moshier 8, Treat 8. Match at 15 targets: Burbage 14, Edgerton 14, Cook 13, Moshier 13, Willey 12, Nelson 12, Treat 11.

Emerald Gun Club.

THERE was a fair attendance at the regular monthly shoot of the Emerald Gun Club at Dexter Park on Tuesday, June 20. It was the fourth shoot under the new handicap rules for the six or more annual

prizes in the several classes. J. Maesel, E. Doenck, H. Thau and J. Horn killed ten straight and materially added to their averages, especially in the case of the two last, who made 3½ and 4½ points respectively. The first class men were only able to make a small number over their handicap. Each man shot at ten birds, class handicap, Emerald Gun Club rules. The birds were a good lot of flyers and the scores made were very fair. Scores of shoot:

Atlantic Rod and Gun Club.

ON account of the races at Sheepshead Bay the attendance at the West End grounds, Coney Island, by the members of the Atlantic Rod and Gun Club was very small, only seven competing for the two sil-

ver cups given by Judges K. Sutherland and R. Newton. Each shot at 10 birds, club handicap. C. E. Morris, J. McKay and Fred Quimby killed 10 straight, but the shoot off was postponed until the next shoot on account of the scarcity of birds. Score: C E Morris.....22221211—10 W Boyle.....0211222121—9 J B Monsees.....1011000010—5 C Hubbell.....1112212110—9 J B Voorhees.....2111110129—9 F Quimby.....1112111112—10 J McKay.....1112212111—10 Sweepstake, 5 birds: Voorhees 5, Monsees 5, Quimby 4. MEMBERSHIP SHARES

IN THE

Triton Fish and Game Club,
CANADA.

There has just been incorporated under the above title the finest fishing and gunning association in Canada. This preserve consists of 102,000 acres, having within its borders over fifty lakes and a score of rivers and mountain streams, all of which swarm with trout ranging from 6lbs. (*Salmo fontinalis* only.) The virgin wilderness teems with small game. Of the larger kinds the caribou abounds. Moose and black bear are fairly plentiful, as also beaver, otter and other fur-bearing animals.

The Triton Club is situated 100 miles north of Quebec, on the line of the Quebec & Lake St. John Railway, and is reached in twenty-four hours easy journey (by rail) from New York City. (See prospectus.)

A limited number of shares is offered to gentlemen of unexceptionable references.

As a summer resort for both gentlemen and ladies the Triton Club offers great attractions, in addition to the best fishing and shooting to be had on this continent, at a very low cost.

The shares are \$50 each, and are an absolutely safe investment. Intending purchasers should carefully examine Sec. 4 of constitution, also pages 12 and 24 of by-laws about membership certificates, agents, membership cards, route and mode of payments.

For Prospectus, By-Laws, Maps, etc., and full information address

Messrs. TOWNSEND & HOWARD,
